The Supplier shall ensure that each of the Insurances is effective no later than:
 - 1.1.1 the Framework Start Date in respect of those Insurances set out in the Annex to this Schedule and those required by applicable Law; and
 - 1.1.2 the Call-Off Contract Effective Date in respect of the Additional Insurances.
- 1.2 The Insurances shall be:
 - 1.2.1 maintained in accordance with Good Industry Practice;
 - 1.2.2 (so far as is reasonably practicable) on terms no less favourable than those generally available to a prudent contractor in respect of risks insured in the international insurance market from time to time;

 - 1.2.4 maintained for at least six (6) years after the End Date.
- 1.3 The Supplier shall ensure that the public and products liability policy contain an indemnity to principals clause under which the Relevant Authority shall be indemnified in respect of claims made against the Relevant Authority in respect of death or bodily injury or third party property damage arising out of or in connection with the Deliverables and for which the Supplier is legally liable.

2. How to manage the insurance

- 2.1 Without limiting the other provisions of this Contract, the Supplier shall:
 - 2.1.1 take or procure the taking of all reasonable risk management and risk control measures in relation to Deliverables as it would be reasonable to expect of a prudent contractor acting in accordance with Good Industry Practice, including the investigation and reports of relevant claims to insurers;
 - 2.1.2 promptly notify the insurers in writing of any relevant material fact under any Insurances of which the Supplier is or becomes aware; and
 - 2.1.3 hold all policies in respect of the Insurances and cause any insurance broker effecting the Insurances to hold any insurance slips and other evidence of placing cover representing any of the Insurances to which it is a party.
3. What happens if you aren't insured

4. Evidence of insurance you must provide

4.1 The Supplier shall upon the Start Date and within 15 Working Days after the renewal of each of the Insurances, provide evidence, in a form satisfactory to the Relevant Authority, that the Insurances are in force and effect and meet in full the requirements of this Schedule.

The Supplier shall use all reasonable endeavours to notify the Relevant Authority (subject to third party confidentiality obligations) as soon as practicable when it becomes aware of any relevant fact, circumstance or matter which has caused, or is reasonably likely to provide grounds to, the relevant insurer to give notice to cancel, rescind, suspend or void any insurance, or any cover or claim under any insurance in whole or in part.

7. Insurance claims

7.1 The Supplier shall promptly notify to insurers any matter arising from, or in relation to, the Deliverables, or each Contract for which it may be entitled to claim under any of the Insurances. - 7.3 Where any Insurance requires payment of a premium, the Supplier shall be liable for and shall promptly pay such premium.
- 7.4 Where any Insurance is subject to an excess or deductible below which the indemnity from insurers is excluded, the Supplier shall be liable for such excess or deductible. - 1.2.2 instruct the Supplier to comply with the Rectification Plan Process;
- 1.2.3 if a Service Level Failure has occurred, deduct the applicable Service Level Credits payable (if applied under the Contract) by the Supplier to the Buyer; and/or,
- 1.2.4 if a Critical Service Level Failure has occurred, exercise its right to Compensation for Critical Service Level Failure (including the right to terminate for material Default).

2. Service Credits

- 2.1 The Buyer shall use the Performance Monitoring Reports supplied by the Supplier to verify the calculation and accuracy of the Service Credits, if any, applicable to each Service Period.
- 2.2 Service Credits are a reduction of the amounts payable in respect of the Deliverables and do not include VAT. The Supplier shall set-off the value of any Service Credits against the appropriate invoice in accordance with calculation formula in the Annex A to Part A of this Schedule.

2. Satisfaction Surveys

2.1 The Buyer may undertake satisfaction surveys in respect of the Supplier's provision of the Deliverables. Call-Off Schedule 20 (Call-Off Specification)

This Schedule should be read and interpreted in conjunction with Call-Off Schedule 4 (Call-Off Tender).

1. SPECIFICATION

- 1.1. The Buyer is seeking the provision of the hardware outlined at paragraph 1.2 of this Call-Off Schedule 20.
- 1.2. The required hardware, inclusive of product description/name, product SKU and volumes is detailed in the below table:

VOLUME	SKU	PRODUCT NAME	PRODUCT DESCRIPTION
4500	MMXF3B/A	Apple iPhone SE 3 rd Gener- ation	 Colour – Midnight Display – 4.7" Retina HD Storage – 64GB Asset Condition – Factory New

- 1.3. All Apple iPhone SE handsets must be unlocked and capable of being used with any current and/or future mobile voice and data network provider based within the UK.
- 1.4. All Apple iPhone SE handsets should also be provided inclusive of an 'Apple USB-C to Lightning Cable' to allow for device charging.
- 1.5. All hardware should be supplied suitable for UK use, and meet the <u>Greening</u> government: ICT and digital services strategy 2020-2025.

- 1.6. The Buyer requires standard manufacturer warranty to be supplied with all handsets. The Supplier must also transfer full title and ownership of the hardware to Buyer.
- 1.7. Transfer of title and ownership should take place once the full volume of hardware has been receipted by the Supplier, and confirmation has been provided that all hardware has been securely stored by the Supplier (on behalf of the Buyer).
- 1.8. The provision of warranty for each Apple iPhone handset will be deferred until an End User completes registration / activation of the new device.
- 1.9. The Buyer requires the Supplier to be an Apple Authorised Reseller. Every Apple iPhone SE handset **must** be registered on the Buyer's Apple Business Manager platform. There shall be no further device pre-provisioning required.

SECURE BONDED STORAGE

- 1.10. In addition to the provision of hardware, the Buyer requires the Supplier to provide full management of the end-to-end refresh program. This includes key activities of; deployment of the new handsets, and subsequent collection and secure disposal/refurbishment of the legacy Samsung devices. Additional actions (which have been outlined below) will also be required to support the refresh program:
 - 1.10.1. Secure Bonded Storage;
 - 1.10.2. Dead On Arrival Process;
 - 1.10.3. Asset Management Support;
 - 1.10.4. Security Considerations;
 - 1.10.5. Contract / Service Management; and,
 - 1.10.6. Social Value.
- 1.11. Due to budgetary constraints, the Buyer requires **all hardware to be stored on its behalf by no later than 31st March 2024**. The Buyer requires for the Supplier to invoice for the hardware once it has been securely stored at their premises. The Supplier's contractual commitments shall continue past 31st March 2024, and shall remain active until the refresh program has been successfully delivered (which needs to be completed prior to the Contract End Date).
- 1.12. As part of its financial assurance processes, the Buyer may be required to conduct an audit (on a date agreed by the Parties) at the Suppliers 'storage location' to verify that the hardware has been 'securely stored' on its behalf, prior to 31st March 2024.
- 1.13. If the hardware is not receipted and stored by the Supplier prior to 31st March 2024, this may be classed as a Critical Service Failure by the Buyer. In accordance with Call-Off Schedule 14 (Service Levels), if a Critical Service

Level Failure occurs, the Buyer may exercise its right to Compensation for Critical Service Level Failure, including the right to terminate for material Default. This shall include the right for the Buyer to cancel any order for hardware not stored by this date, without any financial impact.

- 1.14. For example, if the Supplier is only able to receipt/store 75% of the required hardware by 31st March 2024, the Buyer would reserve the right to cancel the order for the remaining 25% of devices. The Buyer shall also have the right to return (with the Supplier providing a credit) any hardware which has already been delivered to the Buyer prior to the required date. In this event, the Buyer would be liable for the payment of return delivery charges.
- 1.15. All hardware should be receipted and 'securely stored' by the Supplier prior to the commencement of deployment activities, and volumes of the hardware shall remain in storage until the refresh program has been delivered (i.e., until handsets have been delivered to End Users and/or the Buyer's nominated address(es)).

NEW HANDSET DEPLOYMENT

- 1.16. The Suppler will be required to manage the deployment of the new Apple iPhone SE handsets and supplemental eco-friendly bumper cases, and Apple 20W USB-C power adapters to End Users. The expected volume for End User deployment is **4,096** handsets, cases, and power adapters.
- 1.17. The remaining hardware (**404** Apple SE handsets, **904** eco-friendly bumper cases, **904** power adapters, and **500** charging cables) will need to be delivered directly to the Buyer's offices.
- 1.18. The Buyer's office locations for the delivery of hardware:
 - 1.18.1. London Sanctuary Buildings, Great Smith Street, London, SW1P 3BT;
 - 1.18.2. Coventry –
 - 1.18.3. Darlington –
 - 1.18.4. Manchester –
 - 1.18.5. Sheffield –

If required, the Buyer can provide a 'for the attention of' contact for each site.

END USER DEPLOYMENT & HANDSET DELIVERY

- 1.19. The Supplier is expected to primarily complete the deployment of new handsets and supplemental hardware by delivering directly to End Users home addresses.
- 1.20. Should it be required by the Supplier, the Buyer can provide contact details (business email addresses and phone numbers) of the End Users who currently have a corporate mobile handset deployed to them.

- 1.21. The Buyer can also issue an internal communication to End Users to advise them that the mobile handset refresh program will be taking place and the actions required from them (as required).
- 1.22. Although it is expected the majority of new handset deployment will be actioned via delivery to End User home addresses, there may also be a small volume of End Users who request that deployment of the new handset and supplemental hardware is completed at a nominated DfE office. This is because End Users will need to have the option of opting out of delivery to their home addresses in order for the Buyer to adhere to Data Protection legislation.
- 1.23. Where volumes for deployment of the new handsets and supplemental hardware is low at any DfE office location, the Buyer may opt to manage the refresh of these handsets internally via its IT Support Team. The threshold for the Buyer opting to manage a refresh will be dependent on the particular DfE office, but as an estimated figure, the Buyer expects any volume under 100 could be self-managed. In the event of self-management, the Supplier will be required to deliver the specified volume of new handsets and supplemental hardware to each nominated DfE office(s).
- 1.24. However, if the volume for new handset deployment at any particular DfE office is high, there may be a requirement for the Supplier to attend such office location(s) and manage the swap-out of mobiles handsets for in scope End Users. Please see paragraph 1.25 below and further details in Call-Off Schedule 5 (Pricing Details) for information on Optional Costs covering potential on-site deployment support requirements.
- 1.25. For the avoidance of doubt, the Supplier should be aware that the management of deployment of new handsets at the Buyer's office locations (including the allocation of resources) **is not** a guaranteed requirement. The Supplier will decide on whether such support is required at any of its offices, depending on the volume of End Users who opt-out of home delivery. In the event that this management support is required, it will be communicated to the Supplier during the life of the Contract, and further discussions will take place between the Parties to agree suitable dates.
- 1.26. The Supplier should refer to the Buyer's **'must have'** and **'should have'** requirements (outlined below) which will need to be considered and incorporated into their deployment delivery plan:
 - 1.26.1. The Supplier **must** provide an online portal (or a suitable equivalent) where End Users can register their preferred delivery address, alongside a requested delivery date which suits their schedule. The Supplier **must** ensure that deliveries to End Users are only made during the Buyer's core working hours of 08:00 17:00 Monday to Friday.
 - 1.26.2. Within the online portal (or suitable equivalent), End Users **must** have the option to opt-out of delivery to their home address, and instead select a nominated DfE office as their preferred delivery address for deployment of the new handset.

- 1.26.3. Within the online portal (or suitable equivalent), End Users **must** also have the option of being able to amend their requested delivery preference.
- 1.26.4. The Supplier **must** provide the names and volumes of End Users who opt-out of receiving delivery of the new Apple iPhone SE handset and supplemental hardware to their home address, to the Buyer's Project Team.
- 1.26.5. For each direct delivery to End Users, the Apple iPhone SE handset and supplemental hardware (eco-friendly bumper case and Apple 20W USB-C power adapters) **must** be placed in a package with appropriate padding to reduce the risk of damage to the hardware in transit.
- 1.26.6. If it is not provided as standard with the required Apple iPhone SE handset, a SIM tray tool **must** be provided allowing End Users to swap the SIM from their current Samsung handset.
- 1.26.7. Each package **should** be insured for the full value of the Apple iPhone SE handset and the supplemental hardware.
- 1.26.8. End Users **should** have the ability to receive a text message or email (ideally based on a preference which they have previously recorded within the online portal or suitable equivalent) prior to and/or on the day of their requested delivery date.
- 1.26.9. This message/notification **should** include the ability for the End User to 'track' their delivery, and also outline an estimated delivery window.
- 1.26.10. All deliveries to End Users **must** be signed for at their specified home address, and **must not** be given to neighbours or left in a safe place.
- 1.26.11. If a delivery cannot be signed for at the End Users specified home address, the Supplier **must** provide a clear process which allows the End User to contact them (or their nominated courier partner) to provide an alternative date for delivery to be re-attempted. Deliveries **should not** automatically be re-attempted on the next Working Day as this may not meet the End Users schedule.
- 1.26.12. The Supplier **must** report any unsuccessful deliveries and/or any other discrepancies (e.g., an invalid home address being specified) to the Buyer's Project Team. Any circumstances of End Users not engaging with the process **must** also be reported.
- 1.26.13. Any 'attempted delivery' which falls outside of the End User's requested delivery date and the Buyer's core working hours **must** not count towards a Failed Delivery. If any 'attempted delivery' is made which meets the above description, the Buyer will not be liable for the cost of any re-delivery attempts (until such time the criteria of a Failed Delivery is met).
- 1.26.14. Upon successful completion of delivery of the new handset and supplemental hardware, the Supplier **must** provide the Buyer's Project Team with confirmation of which 'asset' is assigned to each End User. The Supplier will be required to provide this in the form of a report on a

weekly basis until all specified hardware has been delivered to End Users.

- 1.26.15. In the event an End User receives a damaged Apple iPhone SE handset (or as otherwise deemed "Dead on Arrival"), the Supplier **must** provide a clear process which allows the End User to contact them to provide an alternative date for a new delivery to be scheduled with a replacement handset, and to return the faulty handset.
- 1.26.16. The Supplier **must** also notify the Buyer's Project Team of any 'Dead on Arrival' and/or faulty handsets, and update asset information as necessary.

OLD HANDSET COLLECTION AND DISPOSAL

- 1.27. Once the new Apple iPhone SE handsets and supplemental hardware have been delivered to all End Users and each of DfE's nominated offices, the Supplier will then be required to manage the collection and secure disposal/refurbishment of the legacy Samsung devices. The Buyer has 4,096 Samsung A series devices deployed to End Users. As these Samsung devices are in circulation, the current asset condition is unknown (although DfE expects that most of the devices will be in a 'Good Used' condition).
- 1.28. In addition to these deployed devices, the Buyer also has 1,655 Samsung A series devices 'in-stock' which have not been deployed to End Users. The asset condition for these devices is 'Factory New'. The full breakdown of volumes per device model (deployed devices and non-deployed devices) is detailed below (*note volumes are correct as of 3rd January 2024*):
 - 1.28.1. Deployed Samsung A50 2,826
 - 1.28.2. Deployed Samsung A51 1,025
 - 1.28.3. Deployed Samsung A52 245
 - 1.28.4. Non-Deployed Samsung A50 530
 - 1.28.5. Non-Deployed Samsung A51 373
 - 1.28.6. Non-Deployed Samsung A52 752
 - 1.28.7. Total 5,751
- 1.29. The Supplier is expected to primarily complete the collection of deployed devices from End Users home addresses. However, similarly to new device deployment, there may be a small volume of End Users who request that the collection of their legacy Samsung device is completed at a nominated DfE office. This is because End Users will need to have the option of opting out of collection from their home addresses in order for the Buyer to adhere to Data Protection Legislation.
- 1.30. Where End Users opt out of collection from their home addresses, it is expected that these legacy devices will be returned to the Buyer's Internal IT Support Team. The Supplier will be required to provide the Buyer's Project Team with

the details (name, volume, and specified DfE office) of End Users who have chosen collection of the legacy Samsung device from a nominated DfE office.

- 1.31. The Supplier will then be expected to complete the collection of all the devices (which have not been collected from End Users home addresses) in bulk from the Buyer's offices.
- 1.32. Once all Samsung A series devices have been collected, it is expected that the Supplier will then manage the secure disposal/refurbishment of all legacy handsets. The Buyer has no preference on whether the Supplier chooses to recycle, refurbish for resale, or dispose of the legacy handsets as part of the refresh program, however, the Supplier **must** ensure that any device which has been deployed to an End User has been securely wiped, with a residual value returned to the Buyer (as applicable).
- 1.33. As an exception to paragraph 1.32 of this Call-Off Schedule 20, the Buyer has a **legal requirement** to retain a small volume of legacy Samsung devices and all the data contained on them, to comply with the ongoing enquiry into the Government's handling of the COVID-19 pandemic. The Buyer's Project Team will make the Supplier aware of the End Users in scope, so these devices can be excluded from disposal and be returned to the Buyer (with delivery to DfE's London office).
- 1.34. DPD swap out (or similar services which involves delivery and collection taking place at the same time) **are not** appropriate for this requirement. End Users will require time to enrol and set up their new iPhone SE handset before their legacy Samsung device is collected.
- 1.35. The Supplier should refer to the Buyer's '**must have**' and '**should have**' requirements (outlined below) which will need to be considered and incorporated into their proposed approach for collection and disposal of legacy devices:
 - 1.35.1. The Supplier **should** provide the option to include a printed QR code within the packages for the new iPhone SE handsets which links to guidance for the End Users to follow for the return of their legacy Samsung devices.
 - 1.35.2. Following the successful completion of delivery of all new iPhone SE handsets and supplemental hardware, the Supplier **must** provide an online portal (or a suitable equivalent) where End Users can arrange for the collection of their legacy Samsung device on a specific date. The Supplier **must** ensure that the collection of legacy Samsung devices from End Users is only made during the Buyer's core working hours of 08:00 17:00 Monday to Friday.
 - 1.35.3. The preferred collection method specified by End Users **must** reflect the option previously chosen for the delivery of the new iPhone SE handset and supplemental hardware. For example, if an End User has chosen to receive delivery of the new hardware at their home address, then collection of their legacy Samsung device **must** also be from their home address. This will similarly apply for those End Users who opt-

out of receiving delivery of the new hardware to their home address. If and End User is receiving their new hardware from a nominated DfE office, they **must** also return their legacy Samsung device at the same time (to complete a 'swap-out').

- 1.35.4. Within the online portal (or suitable equivalent), End Users **must** also have the option of being able to amend their requested collection date preference.
- 1.35.5. End Users **should** have the ability to receive a text message or email (ideally based on a preference which they have previously recorded within the online portal or suitable equivalent) prior to and/or on the day of their requested collection date.
- 1.35.6. This message/notification **should** include the ability for the End User to 'track' their collection, and also outline an estimated collection window.
- 1.35.7. The Supplier **must** report any unsuccessful collections and/or any other discrepancies (e.g., an invalid home address being specified) to the Buyer's Project Team. Any circumstances of End Users not engaging with the process **must** also be reported.
- 1.35.8. Any 'attempted collection' which falls outside of the End User's requested collection date and the Buyer's core working hours **must** not count towards a Failed Collection. If any 'attempted collection' is made which meets the above description, the Buyer will not be liable for the cost of any re-collection attempts (until such time that the criteria of a Failed Collection is met).
- 1.35.9. The Supplier **should** ensure that there is an auditable chain of custody for collected devices, so the Buyer's asset records can be updated accurately should any legacy Samsung devices be lost in transit.
- 1.35.10. Once the Supplier has collected all legacy Samsung devices, the handsets **must** be assessed and graded based on their condition and suitability to be repurposed. The Buyer has no preference on whether the Supplier chooses to recycle, refurbish for resale, or dispose of the legacy Samsung devices as part of the refresh program.
- 1.35.11. The Supplier **must** ensure that any device which has been deployed to an End User has been securely wiped using applicable industry standards, which will include confirmation/certification that data erasure has been completed.
- 1.35.12. The Supplier **must** ensure that the legacy Samsung devices which are in scope of the legal requirement to retain as part of the ongoing enquiry into the Government's handling of the COVID-19 pandemic are excluded from data erasure, and are returned to the Buyer's Project Team.
- 1.35.13. Alongside the deployed devices, the Supplier **must** also arrange for collection of the 'in-stock' Samsung devices which have been unused from the Buyer's offices.

- 1.35.14. Once the condition of the Samsung devices has been confirmed, the Supplier **must** return the residual value for each device to the Buyer before the conclusion of the refresh program in the form of a credit note. It is expected that devices which have a greater asset condition, will return a higher value (and all devices must have a residual value applied).
- 1.35.15. Following the successful 'disposal' of all Samsung devices, the Supplier **must** provide the Buyer's Project Team with 'asset' information, which **must** include the serial and IMEI numbers for each returned Samsung device, the End User/DfE office that it was collected from, the confirmed asset condition, and confirmation of the subsequent disposal action taken for each device (e.g., refurbished for resale, recycled for parts, donated, destroyed, etc).

2. DEAD ON ARRIVAL (DoA)

2.1. The requirements to provide DoA support is as outlined within the Order Form.

3. ASSET MANAGEMENT SUPPORT

- 3.1. As part of the end-to-end refresh activity, the Buyer also requires the Supplier to provide 'asset management support'.
- 3.2. Upon receipt of the Apple iPhone SE handsets (and prior to 'secure storage'), the Supplier will be required to accurately record a list of serial numbers and IMEI numbers for all the new handsets. When the handsets are deployed to End Users and/or shipped directly to the Buyer, the asset register must be updated to align the allocated user with the specific handset.

In addition, any Communications Plan deliverable must include a risk assessment relating to the use of web and social media channels for the programme, including controls and mitigations to be applied and how the NCSC social media guidance will be complied with.

The Supplier shall implement the necessary controls and mitigations within the plan and regularly review and update the risk assessment throughout the contract period. The Buyer shall have the right to review the risks within the plan and approve the controls and mitigations to be implemented, including requiring the Supplier to implement any additional reasonable controls to ensure risks are managed within the Buyer's risk appetite.

2.27. Any Supplier ICT system used to handle, store or process the Buyer's Data, including any Supplier ICT systems connected to systems that handle, store or process the Buyer's Data, must have in place protective monitoring at a level that is commensurate with the security risks posed to those systems and the data held. The Supplier shall provide evidence to the Buyer upon request of the protective monitoring arrangements in place needed to assess compliance with this requirement.
