- 22.1.2 The Parties agree that they shall bear their own respective costs and expenses incurred in respect of compliance with their obligations under Schedule 7 (Records and Audit Access) of the framework Agreement unless the audit reveals a Material Breach by the Supplier in which case the Supplier shall reimburse the Customer for the Customer's reasonable costs incurred in relation to the audit.

23. FORCE MAJEURE

- 23.1.1 Neither Party shall be liable to the other Party for any delay in performing, or failure to perform, its obligations under this Contract (other than a payment of money) to the extent that such delay or failure is a result of a Force Majeure Event. Notwithstanding the foregoing, each Party shall use all reasonable endeavours to continue to perform its obligations under this Contract for the duration of such Force Majeure Event. However, if such Force Majeure Event prevents either Party from performing its material obligations under this Contract for a period in excess of fifteen (15) consecutive Calendar Days either Party may terminate this Contract with immediate effect by notice in writing to the other Party.
- 23.1.2 Any failure or delay by the Supplier in performing its obligations under this Contract which results from any failure or delay by an agent, Sub-Contractor or Supplier shall be regarded as due to a Force Majeure Event only if that agent, Sub-Contractor or Supplier is itself impeded, as in the case of an Affected Party, by a Force Majeure Event from complying with an obligation to the Supplier.
- 23.1.3 If either Party becomes aware of a Force Majeure Event or occurrence which gives rise to or is likely to give rise to any such failure or delay on its part as described in Clause 23.1.1 it shall immediately notify the other by the most expeditious method then available and shall inform the other of the period during which it is estimated that such failure or delay shall continue.

- 24.1.3 If the Supplier's proposals referred to in Clause 24.1.2 are considered insufficient or unacceptable by the Customer acting reasonably then the Customer may terminate this Contract for Material Breach.

25. WAIVER

- 25.1.1 The failure of either Party to insist upon strict performance of any provision of this Contract, or the failure of either Party to exercise, or any delay in exercising, any right or remedy shall not constitute a waiver of that right or remedy and shall not cause a diminution of the obligations established by this Contract.
- 25.1.2 No waiver shall be effective unless it is expressly stated to be a waiver and communicated to the other Party in writing in accordance with Clause 34 (Notices). Such waiver shall only be operative with regard to the specific circumstances referred to.
- 25.1.3 A waiver by either Party of any right or remedy arising from a breach of this Contract shall not constitute a waiver of any right or remedy arising from any other or subsequent breach of this Contract.

26. CUMULATIVE REMEDIES

- 26.1 Except as otherwise expressly provided by this Contract, all remedies available to either Party for breach of this Contract are cumulative and may be exercised concurrently or separately, and the exercise of any one remedy shall not be deemed an election of such remedy to the exclusion of other remedies.

- 28.1 No amendment to the provisions of this Contract, other than a change to the Services in accordance with the procedure and provisions set out at Clause 29, shall be effective unless made in accordance with the procedures set out in this Clause 28 ("Change Control Procedure").
- 28.2 Subject to Clause 29.1, either Party may request a contract change by completing and sending a draft Contract Change Note in the form set out at Schedule 1 ("the Contract Change Note") to the other Party giving sufficient information to enable the other Party to assess the extent of the change and any additional cost that may be incurred. The Party requesting the contract change shall bear the costs of preparation of the Contract Change Note.
- 28.3 The Party receiving the request for a contract change shall respond to the request within five (5) Working Days (or such other period as may be agreed by the Parties) and if applicable, the Parties shall enter into discussions to discuss the proposed change and neither Party shall unreasonably withhold or delay consent to the other Party's proposed changes to this Contract.
- 28.4 Where the Customer has proposed a contract change and the Supplier is unable to provide the change, including where the Parties are unable to agree a change to the Contract Charges, the Customer may terminate this Contract with immediate effect.
- 28.5 Following execution of the final Contract Change Note, the Supplier shall implement such change and be bound by the same provisions so far as is applicable, as though such change was stated in this Contract.

- 29.3 The Supplier shall consider any request by the Customer to increase the number of Story Points for a Release, and may, subject to the Change Control Procedure set out at Clause 28, agree to such request.

- 30.1.1 If any provision of this Contract is held invalid, illegal or unenforceable for any reason, such provision shall be severed and the remainder of the provisions hereof shall continue in full force and effect as if this Contract had been executed with the invalid, illegal or unenforceable provision eliminated.
- 30.1.2 In the event of a holding of invalidity so fundamental as to prevent the accomplishment of the purpose of this Contract, the Customer and the Supplier shall immediately commence good faith negotiations to remedy such invalidity.

 - 37.6.2 any regulatory losses, fines, expenses or other Losses arising from a breach by the Supplier of any Law.
- 37.7 No enquiry, inspection, approval, sanction, comment, consent, or decision at any time made or given by or on behalf of the Customer to any document or information provided by the Supplier in its provision of the Services, and no failure of the Customer to discern any defect in or omission from any such document or information shall operate to exclude or limit the obligation of the Supplier to carry out all the obligations of a professional supplier employed in a client/customer relationship.
- 37.8 Save as otherwise expressly provided, the obligations of the Customer under this Contract are obligations of the Customer in its capacity as a contracting counterparty and nothing in this Contract shall operate as an obligation upon, or in any other way fetter or constrain the Customer in any other capacity, nor shall the exercise by the Customer of its duties and powers in any other capacity lead to any liability under this Contract (howsoever arising) on the part of the Customer to the Supplier.
- 37.9 For the avoidance of doubt any liabilities which are unlimited shall not be taken into account for the purposes of establishing whether the limit in Clause 37.3.1 has been reached.
- 37.10 Nothing in this Clause 37 shall act to reduce or affect a Party's general duty to mitigate its loss.

PART H – TERMINATION

38. TERMINATION EVENTS

- 38.1 The Customer shall have the right to terminate this Contract for convenience and without cause at any time by giving notice to the Supplier as set out at Clause 38.2 and the Supplier's obligation to provide the Services shall end on the date set out in the Customer's notice.
- 38.2 Notice Periods
 - 38.2.1 The notice period (expressed in Working Days) to be given by the Customer in respect of Clause 38.1 shall be the number of whole days that is 20% of the total duration of the final SOW to be executed under this Contract, up to a maximum of 30 Working Days. Partial days shall be discounted in the calculation and the duration of the SOW shall be calculated in Working Days. For example, if the duration of the SOW is 10 Working Days: 20% of the SOW is 2 days. The Notice Period = 2 Working Days; or if the duration of the SOW is 62 Working Days, 20% of the SOW is 12.4. The Notice Period = 12 Working Days.
- 38.3 The Parties acknowledge and agree that:
 - 38.3.1 the Customer's right to terminate for convenience and without cause under Clause 38.1 is reasonable in view of the subject matter of this Contract and the Agile nature of the Services being provided;
 - 38.3.2 the Contract Charges paid during the notice period given by the Customer in accordance with Clause 38.1 are a reasonable form of compensation and are deemed to fully cover any costs or Losses incurred by the Supplier which may arise either directly or indirectly as a result of the Customer exercising the right to terminate without cause.
- 38.4 The Customer shall have the right to terminate this Contract at any time with immediate effect by written notice to the other Supplier if:
 - 38.4.1 the Supplier commits a Supplier Default and if the Supplier Default is not, in the opinion of the Customer, capable of remedy; or

- 38.5 the Supplier is unable to provide a change proposed by the Customer;
- 38.6 Either Party may terminate this Contract at any time with immediate effect by written notice to the other Party if:
- 38.6.1 the other Party commits a material breach of any term of this Contract (other than failure to pay any amounts due under this Contract) and, if such breach is remediable, fails to remedy that breach within a period of fifteen (15) Working Days of being notified in writing to do so;
 - 38.6.2 an Insolvency Event of the other Party occurs, or the other Party ceases or threatens to cease to carry on the whole or any material part of its business; or
 - 38.6.3 a Force Majeure Event occurs for a period of more than fifteen (15) consecutive Calendar Days.
- 38.7 Without prejudice to any other right or remedy which a Customer may have under the Call-Off Agreement or at Law (including the right to terminate under this Clause 38) if any Services are not supplied in accordance with the Call-Off Agreement, then the Customer may (whether or not any part of the Services has already been delivered) do any of the following at the Customer's option and in its sole discretion:
- 38.7.1 at the Supplier's expense, give the Supplier the opportunity to remedy any failure in the supply of the Services together with any damage resulting from such defect or failure (and where such defect or failure is capable of remedy) or to supply replacement Services and carry out any other necessary work to ensure that the terms of this Call-Off Agreement are fulfilled, in accordance with the Customer's instructions;
 - 38.7.2 carry out, at the Supplier's expense, any work necessary to make the supply of Services comply with this Call-Off Agreement;
- 39. CONSEQUENCES OF EXPIRY OR TERMINATION FOR ANY REASON**

- 39.2.3 Except where this Contract provides otherwise, all licences, leases and authorisations granted by the Customer to the Supplier in relation to the Services shall be terminated with effect at the end of the Contract Period (howsoever arising) without the need for the Customer to serve Notice.
- 39.2.4 Save as otherwise expressly provided in this Contract:
 - (a) termination or expiry of this Contract shall be without prejudice to any rights, remedies or obligations accrued under this Contract prior to termination or expiration and nothing in this Contract shall prejudice the right of either Party to recover any amount outstanding at the time of such termination or expiry; and

40. EMPLOYMENT, TAX AND NATIONAL INSURANCE LIABILITIES

- 40.1 The Customer and the Supplier acknowledge and agree that the commencement and subsequent expiry or termination of this Contract are not events that are intended to give rise to any Relevant Transfers to which TUPE will apply, either in relation to any employees of the Customer or Former Supplier transferring to the employment of the Supplier at commencement; or Supplier Staff transferring from the Supplier to the Customer or a Replacement Supplier at expiry or termination.
 - 40.2 The Supplier shall at all times indemnify the Customer and keep the Customer indemnified in full from and against all claims, proceedings, actions, damages, costs, expenses, liabilities and demands whatsoever and howsoever arising (including either before or after the making of a demand pursuant to the indemnity hereunder) by reason of any circumstances whereby the Customer is alleged or determined, whether during the Contract Period or arising from termination or expiry of this Contract, to have been assumed or imposed with:

SCHEDULE 1 - PROJECT OUTLINE CASE

The project will deliver the following:

- Digitising the customer application process;
- Integrating the customer application process with a downstream legalisation IT system (the Legalisation database);
- Integrating a payments service with the customer application process;
- Providing management information reporting on the customer application process;

All development work will meet the FCO's requirements for:

- Performance
- Availability
- Security
- Capacity
- Accessibility
- Reliability
- Standards compliance

DIGITISING THE CUSTOMER APPLICATION PROCESS

The customer application process currently involves customers downloading a Microsoft Word based application form from the legalisation pages of GOV.UK, filling it in (either by hand or electronically) and then submitting it by post to the legalisation office. The project will replace this method with a digitised customer application process, in accordance with the digital by default service standards, and provide guidance to customers during each step of the process.

A small number of customers use the legalisation service regularly and for those, we envisage that the application process will provide the capability to store their details so that they can submit applications more quickly. This may need to make use of the [Verify platform](#), subject to that platform meeting our needs for business users.

INTEGRATING THE CUSTOMER APPLICATION SYSTEM WITH DOWNSTREAM LEGALISATION IT

The project will deliver an interface between the customer application system and the primary Legalisation Office IT system, enabling the electronic transfer of data entered by the customer to the Legalisation Office system to support automatic record creation in the downstream system. The supplier will be expected to work with the Legalisation Office IT system's management team to design and implement an appropriate standards based interface. Successful delivery of this component is expected to save significant time for Legalisation Office staff that currently has to enter customer details manually.

We expect that the customer application system will still need to generate a paper output of the application process to be submitted by customers with the documents they need to have legalised (documents submitted by customers are paper based and are posted to the Legalisation Office), but it doesn't necessarily have to include all customer details – it will simply be used by Legalisation Officers to link the document set received by post with a customer record submitted online. The supplier will be expected to provide an innovative solution to meet this desired outcome and again will be expected to work with the Legalisation Office IT systems management team to deliver the solution, as it will need to integrate with the Legalisation IT system.

The integrated solution will also allow a customer to access the details of their application online and make payment amendments. Subject to further confirmation of the user needs, customers may also require status tracking which would require querying the downstream systems to discover the status of the application.

A de-coupling approach will be adopted to prevent any delays in internal IT blocking the Supplier's work. This includes the option of temporarily outputting the online application into a printable format and email, until the link with the backend is established.

INTEGRATING THE PAYMENTS SERVICE

We will shortly be moving our customer payments service to Barclaycard SmartPay and it is this service that must be integrated into the customer application system to provide a smooth customer journey. Working with the standard integration interface specification supplied by Barclaycard, the supplier will be expected to deliver a payments process that is similar to typical online payments, therefore making it intuitive to customers. A reference linking each payment to an application must be passed to the downstream Legalisation IT system. Additional payment options may be considered in later phases of the project.

MANAGEMENT INFORMATION CAPABILITY

The supplier will integrate Piwik web-analytics service as part of the solution. They will also need to integrate with the GOV.UK performance platform. This is to support end to end transaction analysis and performance monitoring.

The Legalisation Office also maintains a number of off-line management information reports, primarily captured in spreadsheets. A desired outcome from the project is to minimise off-line management information reporting by delivering the capability through the Legalisation Office IT systems, including the customer application system. So the customer solution must be able to push Management Information data to the backend IT system, and potentially also directly to Mazepoint, our third party reporting suite.

MEETING THE FCO's NON-FUNCTIONAL REQUIREMENTS

We want the customer application process to be available on all devices (desktops, laptops, tablets smart phones) without any need to configure the end user device. The presentation to the customer must adhere to the digital by default service standards and must adhere to best practice accessibility standards and guidelines.

The solution must be resilient, with a well defined approach to business continuity / disaster recovery. The system must be available 24-7-365.

The solution must be scaled to allow for a throughput of at least 150,000 transactions per year, and must deliver performance reporting to provide evidence of consistent transaction processing times, even at busy times.

The solution must meet HMG and commercial best practice for security and must be successfully accredited by the FCO accreditor.

SCHEDULE 2 - HIGH LEVEL RELEASE PLAN

Resource Plan

SCHEDULE 3 - REQUIREMENTS AND VALUE DRIVERS

REQUIREMENTS:

LOCATION:

[REDACTED]

CURRENT SITUATION/ BACKGROUND:

STRATEGIC CONTEXT

1. The Legalisation Office (LO) is the FCO's largest single customer-facing operation. Legalisation is the official confirmation that a signature, seal or stamp on an official document is genuine. Confirmation is given by attaching a certificate (called an apostille) to the original document.
2. The LO is a process-driven operation that resides with the FCO because of a historical decision - the 1961 Hague Convention on International Law designated the FCO as the Competent Authority to carry out Legalisation work. The LO issues around 450,000 apostilles a year. The LO operates out of two locations – one in Milton Keynes and one in London. The Milton Keynes office processes postal applications and operates a counter service for business customers (applications are processed within 24 hours). The London office exclusively provides a 'same day' counter service for premium business customers.
3. The LO presents a continual challenge to operate. Volumes are rising at an average of 6% per year, with 10% growth in FY 13-14. Resourcing this growing business from within the FCO is problematic because it means moving more staff away from front line work. Resourcing the business through recruitment is problematic due to headcount caps. We have little reliable data about future trends in volumes, but annual increases have been sustained for the last 15 years, driven by increasing prosperity, increasing migration and increasing requirements from other states for documents to be legalised. A draft EU Directive to remove the requirement for legalisation of EU civil status documents may reduce volumes by up to 15% on implementation, but would have no impact on the volume of other documents, or legalisations of civil status documents for use in other countries.
4. At present, Legalisation work is undertaken by a team of 38 through a labour intensive process. The team deliver an excellent service, processing over 98% of applications within 48 hours with error rates in fractions of one percent. However, many of the business' processes have a heavy reliance on manual paper based methods and off-line management information reporting tools.
5. The LO sees opportunities to invest in new technologies to make its processes vastly more efficient and to align the LO operation with the Cabinet Office digital by default agenda.
6. A 2014 business and IT review of the LO resulted in a set of recommendations aimed at improving the efficiency of the LO and the customer experience, including:
 - a. Digitising the customer application process to improve the customer experience;
 - b. Improving integration of LO IT services to reduce data duplication, minimise paper based processes and eliminate the need for resource intensive data rekeying;
 - c. Reducing or removing the need for off-line management information reporting by improving the functionality of LO IT systems;

PROJECT DELIVERY APPROACH

7. The LO and FCO's Consular Directorate have commissioned a project to support the LO in delivering on the recommendations of the review, with the expected benefits to include:
 - Improving the customer experience through Digitising the customer application process;
 - Improving LO efficiency through integration of the customer application process with the Legalisation database;
 - Improving the customer experience by integrating the payments service into the customer application system;

- Improving management information capability on LO IT systems to minimise inefficient paper based and offline management information reporting processes.

DIGITISING AND INTEGRATING THE CUSTOMER APPLICATION PROCESS

8. The customer application form is currently downloaded from the Legalisation pages of gov.uk and filled in by the customer, either electronically or by hand, and then posted to the LO with the document(s) to be legalised.
9. Details entered onto the form by the customer have to be rekeyed into the LO database by LO staff, who often have to decipher hard to read hand-written information. A legalisation officer takes an estimated average of 30 seconds to check if the customer's details already exist on the Legalisation database, and if not there, key in the customer's details. This equates to over 150 days a year.
10. Digitising the customer application form, using a web based user interface, allows for the integration of customer application and application processing systems (known as the Legalisation database), eliminating the need for LO staff to rekey data and delivering the additional benefit of a digital user interface that conforms to the Cabinet Office digital by default agenda.

INTEGRATING THE PAYMENTS SERVICE

11. The LO use Barclaycard's EPDQ payments service, a web based application that has no connectivity to the rest of the LO IT estate. Customers access the payment service from the Legalisation pages of gov.uk. After presenting their payment details they receive a payment reference number which must be submitted with the customer application form and documents to be legalised. The EPDQ application does not take the payment from the customer at this point, but performs a card authorisation process; only when the apostille is produced and 'shipped' is the payment actually taken.
12. The customer 'journey' is not smooth, and customers have to navigate through several distinct URLs to complete the payment process and download the application form (further steps are required if the customer needs to review related guidance). Integrating the payments process with the application process, and providing access to online guidance at each step in the process, will provide a more intuitive and streamlined customer experience.
13. Note that EPDQ will be replaced by the Barclaycard SmartPay tool in 2015; integration of the payments service with the customer application process will begin once the SmartPay tool has been introduced.

IMPROVING MANAGEMENT INFORMATION CAPABILITY

14. Integrating the LO IT services will reduce the amount of off-line data capture as it will be much easier to link application and payment information together, and to view and report on them. The development of a new online application process must include the ability to push reporting data to third party services such as the LO backend tool, the public GOV.UK Performance Platform and potentially an additional third party reporting suite, Mazepoint. It must also have comprehensive instrumentation of customer interactions on the web pages using Piwik Analytics.

Prototyping & User experience development

For the purpose of user research ensure the alpha prototype is hosted online, with password protection if required so we can control access.

Refinement of prototype following feedback from User Research provided by FCO, as timescales and size of feedback allow

Picking up of additional stories from the backlog, as time permits

System Architecture, Security & Documentation

Support preparation for the Digital by Default alpha assessment

Engage early with the FCO security consultant, and provide any architecture and security documentation requested.

Design in configurability from the outset - while focusing on standard one-time postal applications during alpha, keep in mind future needs to layer on additional functionality and different field combinations and/or application journeys for different groups of customers e.g. business users, repeat postal users

Analyse existing Smartpay payment code and investigate the API, in support of product feature discussions and in preparation for progress to beta

Establish plan and initial holding page, as appropriate, for the event of the service being temporarily offline

Establish plan for analytics tracking and performance platform reporting, and begin implementation where appropriate (avoiding throwaway work), as agreed with the FCO
