Schedule 1: Services

Approach

From 1st April 2023, the Supplier will continue to host the CRC system in its existing archived state, on a Fixed Price basis as described within this proposal. The environment will effectively remain in a dormant state, retained within the AWS to keep hosting costs to a minimum.

When a request for information is received, the Supplier will make the environment available, allowing the Buyer to retrieve the required information via the Back-Office application.

Key elements of the Service are described in more detail below:

Hosting, Maintenance and Support of the CRC Environment within AWS

A number of AWS resources are currently reserved, the table below shows the date these reservations end and what action will be taken once it has ended.

AWS Reserved Resource	Dated Reservation Ends	Action to be Taken Once Reservation Ends
AWS Oracle RDS – Single AZ (operational database)	2 nd April 2023	Resource will revert to on-demand charges, which will provide a significant saving as the environment will be shut down for the vast majority of the time
AWS Oracle RDS (datamart)	2 nd April 2023	Resource is used for Business Objects, so is no longer be required. It is proposed that this resource will therefore be terminated and all snapshot backups images removed. We will consult with The Agency at the time to decide what approach to take
AWS Oracle RDS (Test)	2 nd April 2023	Resource will no longer be required. It is proposed that this resource will therefore be terminated and all snapshot backups images removed.
AWS Dedicated Host	21 st May 2023	Resources will revert to on-demand charges for individual server instances. This will provide a significant saving as the environment will be shut down for the vast majority of the time.

Maintenance of the CRC environment, ensuring that solution components are patched and maintained at supported levels, will be included as part of the fixed price service. It is proposed that patching will continue to be done on a quarterly basis, due to the offline nature of the solution.

Responding to Information Requests

It is proposed that the current arrangement be continued, where the Supplier will provide responses as part of the fixed price service, up to a limit of 12 days effort per annum. After those days are consumed, additional days will be charged monthly in arrears on a Time & Materials basis (see Section **Additional T&M Charges**).

We estimate a 2-3 day's effort per request, but this will obviously vary depending on the nature of each request.

This arrangement ensures the Supplier can maintain system knowledge within the team, whilst providing a cost-effective service to the Buyer.

Support will be provided for any issues experienced in responding to information requests, with any related effort charged for as part of the information request.

Data Destruction at End of Life

At the end of the CRC Archive solution's life, anticipated to be 31st March 2025, the Buyer may request an export of all data to be provided, following which all data will be destroyed, the environment deleted, and the AWS account terminated. Effort to carry out this activity is included up to a maximum of 15 days effort.

Deliverables

A CRC Archive Reporting Service, as described in this Schedule 1, from 1st April 2023 through to 31st March 2025.

Acceptance Criteria

Testing will be limited to verification that changed components of the CRC Register function as expected. The Buyer retains responsibility for assuring themselves of the quality and completeness of the work performed.

Assumptions & Dependencies

The Suppliers obligations are conditional upon the assumptions set-out below and the Supplier shall not be held liable and shall be entitled to seek a price adjustment or compensation in the event of any failure or delay in the fulfilment of the outlined assumptions.

Assumptions

The following assumptions have been made:

1. All work will be carried out from the Suppliers offices, although it is currently expected that Supplier staff will work remotely from home.
2. All engagement between the Buyer and the Supplier will be conducted remotely via videoconference, using Microsoft Teams.
3. For each information request, the Supplier will reinstate the Back Office environment only, to allow the Buyer to retrieve required information. The Public facing environment will not be required.
4. All AWS costs have been estimated based on delivery of the standard service including the provision of 12 days uptime in response to information requests. Any additional hosting costs incurred beyond this allowance will incur further additional charges based on actual costs plus [REDACTED]
5. No break-fix support services will be required, and no additional changes are expected to be made to the application. Any fixes or changes requested in relation to the application code will be undertaken on a T&M basis as per the standard rate card as set-out in Schedule 2 and may incur further costs to establish a suitable development environment if required.
6. The Postcode look-up services will be withdrawn on 1st April 2023 (the earliest date that these can now be withdrawn).
