

NO SPACE, NO FREE ROOM? ...NO PROBLEM!

Prices from **£7,500** ex vat

The Sensory Pod is an affordable, calming and relaxing space for both Children & Adults. Typically used in special needs and mainstream schools, Universities, Hospitals, Libraries and airports, as well as family homes.

PREVENTS AND MANAGES DISRUPTION

Helps prevent and manage the disruption caused by sensory overload events, through pre-emptive usage when stress/anxiety is bubbling.

It provides a cocooned, safe, haven for users, when needed. Proven to continually reduce the frequency and severity of disruptions.

MORE RELAXED ENVIRONMENT

Principals, teachers, and students all positively report on the benefits of having a calming focal point for those in need of withdrawing.

School becomes a more positive, happier, and less stressful environment through the reduction in full blown meltdowns.

BENEFITS THE WHOLE COMMUNITY

Non autistic students with stress, anxiety and the potential for panic attacks also greatly benefit from the Sensory Pod.

We also have feedback from many Schools that teachers are also using it to get the same outcomes.

IMPROVES ATTENDANCE AND PARTICIPATION

Parents/schools report improved attendance and students are less likely to self-absent as coping skills increase with the Pod.

The Sensory Pod provides coping confidence in the knowledge of having the tools for a calmer learning environment.

EDUCATIONAL RESOURCE

It's possible for teachers to use the 32" monitor to mirror educational software from their phone or computer.

Better intensity is gained by removing distracting stimuli, especially for Sen or resource teachers.

ENCOURAGES INDEPENDENCE

It encourages personal sensory regulation and independence. Students absent themselves from class when they feel the need.

This works well for the child and the classroom as the negative stigma of disruption for other students is reduced.
