

GENERAL NOTE

ALL MATERIALS AND COMPONENTS MUST BE SUITABLE FOR THEIR INTENDED PURPOSE AND LOCATION, AND MUST BE MANUFACTURED AND INSTALLED IN ACCORDANCE WITH ALL RELEVANT, CURRENT BRITISH STANDARDS AND CODES OF PRACTICE, AND MANUFACTURERS SPECIFICATIONS.

The following notes are to be read in conjunction with all relevant drawings and schedules and is applicable whether specifically referred to or not. All work is to comply with the current requirements of the Building Regulations and Allied regulations. All materials are to be fit for their purpose and used and installed in accordance with the relevant manufacturers recommendations. All new services are to be provided in accordance with the Statutory Undertakers requirements. The quality of any material shall not be lower than that defined in the relevant British Standard or that the material has been satisfactorily assessed by an appropriate independent authority ie. BSA BRE etc. Where there is no legislated standard the quality and use of the product shall be in accordance with established trade practice. All work shall be carried out in a neat workmanlike manner. Reasonable precautions shall be taken to protect fixed and unfixed materials against any damage likely to affect the finished quality of the dwelling. All contractors and sub-contractors must ensure to their own satisfaction that they are in possession of current drawings and details before commencing the relevant stage of work.

Any reference to an approved document in this specification relates to the relevant Approved Document of the current Building Regulations.

INTERNAL TIMBER PARTITION WALLS

All to be constructed of nominal 89 x 38 mm softwood studs at max 400mm c/c with 89 x 38mm sole headplates and noggings lined both sides with 1no. layer 15mm British Gypsum soundabsorbing plasterboard or equal approved to a minimum density of 10kg/m², m. screwed to timber stud finished with skim coat plaster set. Rockwool 25mm acoustic Slab or equal approved within cavity to a minimum density of 10kg/m³, m (50mm Rockwool Flex, 25mm Iso wool APR 1200).

Door openings to be formed to allow for door lining thickness of 32mm fin. size and to be positioned to allow for fixing full architraves to perimeter. Include for additional noggings and bearers for radiators switches and other services as appropriate. Where partitions are to be finished with wall tiling plasterboard to be moisture resistant and thickness to be increased to 15mm in accordance with recommendations of plasterboard manufacturer.
