

Clarification Log for RFI009 Maritime Threat To Simulation UAV

Clarification Question #	Received Date	Questions	Reply Date	Answers
1	03/03/2021	Where is the being driven from within the HQ – what MPEG and problem?	03/03/2021	This was intended to inform an early stage of our commercial process to gauge what systems are available on the market, or at sufficiently high TRL to be competitive soon, that could offer a Red Air simulation for live exercises. At the moment in the UK we use a Hawk and Falcon with emulator pods in both the maritime and air domains. The RN is interested to understand whether industry could provide a UAS that could offer both a hard target or EM emulation that could also be deployable within a Maritime Task Group.
