The Supplier shall ensure that each of the Insurances is effective no later than:
 - i.the Framework Start Date in respect of those Insurances set out in the Annex to this Schedule and those required by applicable Law; and
 - ii.the Call-Off Contract Effective Date in respect of the Additional Insurances.
- ii. The Insurances shall be:

 - iv.maintained for at least six (6) years after the End Date.
- iii. The Supplier shall ensure that the public and products liability policy contain an indemnity to principals clause under which the Relevant Authority shall be indemnified in respect of claims made against the Relevant Authority in respect of death or bodily injury or third party property damage arising out of or in connection with the Deliverables and for which the Supplier is legally liable.

10. How to manage the insurance

- i. Without limiting the other provisions of this Contract, the Supplier shall:
 - i.take or procure the taking of all reasonable risk management and risk control measures in relation to Deliverables as it would be reasonable to expect of a prudent contractor acting in accordance with Good Industry Practice, including the investigation and reports of relevant claims to insurers:

 - iii. Hold all policies in respect of the Insurances and cause any insurance broker affecting the Insurances to hold any insurance slips and other evidence of placing cover representing any of the

Insurances to which it is a party.

11. What happens if you aren't insured

- i. The Supplier shall not take any action or fail to take any action or (insofar as is reasonably within its power) permit anything to occur in relation to it which would entitle any insurer to refuse to pay any claim under any of the Insurances.
- ii. Where the Supplier has failed to purchase or maintain any of the Insurances in full force and effect, the Relevant Authority may elect (but shall not be obliged) following written notice to the Supplier to purchase the relevant Insurances and recover the reasonable premium and other reasonable costs incurred in connection therewith as a debt due from the Supplier.

12. Evidence of insurance you must provide

14. Cancelled Insurance

- The Supplier shall notify the Relevant Authority in writing at least five
 (5) Working Days prior to the cancellation, suspension, termination or non-renewal of any of the Insurances.

The Supplier shall use all reasonable endeavours to notify the Relevant Authority (subject to third party confidentiality obligations) as soon as practicable when it becomes aware of any relevant fact, circumstance or matter which has caused, or is reasonably likely to provide grounds to, the relevant insurer to give notice to cancel, rescind, suspend or void any insurance, or any cover or claim under any insurance in whole or in part.

15. Insurance claims

i. The Supplier shall promptly notify to insurers any matter arising from, or in relation to, the Deliverables, or each Contract for which it may be entitled to claim under any of the Insurances. - iii. Where any Insurance requires payment of a premium, the Supplier shall be liable for and shall promptly pay such premium.
- iv. Where any Insurance is subject to an excess or deductible below which the indemnity from insurers is excluded, the Supplier shall be liable for such excess or deductible. The Supplier shall not be entitled to recover from the Relevant Authority any sum paid by way of excess or deductible under the Insurances whether under the terms of this Contract or otherwise.

25/26 UKETS Advisory Consultancy Business Case

UK ETS Technical Advisory Support to OPRED – proposal to engage an independent contractor to identify and develop process improvements for review of Activity Level Change Reports (ALC) and determination of free allowances under the UK Emissions

Trading Scheme for the Offshore sector

Background

The UK Emissions Trading Scheme (UKETS) continues to grow in scope and complexity, creating resourcing challenges across all UKETS Regulators. Rules for the management of free allowances have become more complex, requiring annual data intensive reviews of operator emissions and activity levels (Activity Level Changes (ALC)). There are also additional 'energy efficiency' considerations that affect most offshore installations. For context, around 60% of the annual changes to offshore installations are affected by energy efficiency, a larger percentage than all the onshore UK regulators combined.

There is also a growing list of data corrections and compliance issues related to free allocations, which the OPRED Atmospherics team struggle to manage alongside ongoing delivery and policy changes within the UKETS. In 2023/24, we engaged consultancy support to assist in the review of ALC reports received from operators and to provide advice based on their experience to inform potential improvements to our determination process.

Outline Proposal

In April 2024, OPRED were provided with a report including several recommendations that would deliver efficiency and data handling improvements. We would like to follow up a number of those recommendations, including implementation of potential automation options but do not have the necessary capability internally to develop the solutions. We would, therefore, seek to source an external advisory consultancy contract to gain further advice to inform and implement priority improvements. The initial report material will be shared with the successful supplier

The available budget for this work is £100,000 (including VAT) secured through a successful 25/26 spending review bid. There is no commitment to spend the full value.

Specification

We would be seeking an independent specialist contractor with a wide sectoral exposure to EU ETS and UK ETS, and with specific experience of undertaking reviews of baseline data, ALC and free allocation related submission types. The contractor is required to provide technical services to identify and implement process improvements for management of ALC applications and complete ALC reviews to inform and test those improvements.

Work-package 1 (WP1) will include review of data handling and efficiency recommendations reported in April 2024, work up of development options for agreement with OPRED leads and completion of agreed improvements within budget.

The work package can be staged to include review of recommendations; presentation of options and agreement with OPRED leads; and delivery of agreed products. WP1 output will be the developed products agreed, with supporting process guidance.

Work-package 2 (WP2) – to support WP1, the contractor will be required to technically review up to a maximum of 50 ALC reports and supporting information to determine free allocation levels, using the products and process developed under WP1. WP2 output will be a review file for each of the above reports. Further details of the work packages are provided in Appendix 1.

The end of the work to result in a 90-minute close out meeting with OPRED staff of the products developed under WP1 and work undertaken in WP2.

The full work scopes for WP1, WP2, must be completed no later than 13th March 2026, with a final 90-minute close out meeting the following week commencing 16th March 2026 to ensure completion and close out of the contract before 31st March 2026.

Management of the contract will be undertaken by the OPRED Atmospherics Team. The use of MS Teams will be the primary means of holding meetings with OPRED. There is no intention to hold face-to-face meetings for the duration of this short contract. However, OPRED envisages the need for close interaction between OPRED and the contractor undertaking the work throughout the process, to ensure that emerging issues are dealt with promptly as well as managing any queries. All contact with operators will be by OPRED staff, there is no requirement for the contractor to interact with operators directly. Safe and secure remote IT access to project folders on SharePoint will be provided to key personnel after contract award.

Appendix 1 – Work Package Requirements

Work scope

A key requirement within the scope of this contract is for the contracted service to provide skilled and experienced technical resource to support the core area of work and implementation of process improvements for the UKETS Activity Level Change review cycle.

The overall objective of this work scope is to support OPRED in the technical reviews of free allocation submissions, through implementation and testing of recommended process improvements (Work Package 1). The contract will also include carrying out up to a maximum of 50 technical reviews of Activity Level Changes (ALC) to test and assure implemented improvements for a specified list of UK ETS installations, using the supporting information for these installations contained in their ETS permits (Work Package 2).

The contractor is therefore required to have a good understanding of the UK ETS Order and Free Allocation Regulations. Specifically, an excellent understanding and experienced track record of working with ETS activity data, energy data within fuel and heat sub installations and CO2 emissions in relation to reviewing free allocation-based submissions. This requires a detailed understanding of UK ETS on activity data and ideally previous experience gained in the review of ALC across other sectors within the ETS, in the current 2021 – 2025 allocation period.

The contractor will also need to be proficient with Microsoft Excel, macros and developing tools for analysis and automating data to deliver efficiency enhancements.

Relevant files and supporting information to be reviewed shall be provided by OPRED. The information will be shared via secure SharePoint links and therefore the contractor must be comfortable with use of SharePoint where all the work will be undertaken.

Work Package 1

1(a) Scope

Previous work has been undertaken to identify potential improvements to OPRED's process for managing ALCs and free-allocation data. The contractor will be asked to review, recommend and implement solutions based on the key recommendations, which focus on combining available Regulator excel tools ('ALAN' and 'O Summary' which will be provided) with the current review approach adopted by OPRED. Combining these two methods to deliver improvements to review efficiency and rigour.

The expected improvements will involve:

- developing functionality within excel spreadsheets via the use of visual basic coding, to automate some elements of data entry and validation and aggregate data files stored on SharePoint
- developing a summary tool to collate data from individual installation reports (excel files)

- aggregating historic data and checking completeness
- improving format and record keeping, developing a summary sheet and comments log
- providing a training pack and guidance to support use of the improved tools
- · testing of the tools to ensure functionality

The successful contractor will be provided with further details of the previously recommended improvements once appointed.

1(b) Inputs to work scope

The **primary inputs** for work package 1 shall comprise of:

- Details of Recommended ALC Process Improvements
- Existing Regulator tools (ALAN and O-Summary)
- Link to the respective legislation (web-link)
- Link to the respective guidance available (web-link)

The **secondary inputs** shall include the ALC, AEM reported data for each ETS installation, as referenced in Work Package 2.

1(c) Expected Outputs

- ALC Data summary tool and user guidance
- Updated master data summary
- Structured review notes template
- Key comments log
- Automated AEM data tool (if feasible)

Work Package 2

2(a) Scope

The contractor will be asked to complete up to a maximum of 50 Activity Level Change Report determinations to inform and test the development and implementation of process improvements.

The contractor will be responsible for carrying out all technical review tasks for these installations.

The installations are a mix of fuel and heat sub-installations and both of a CL and non-CL status. The contractor will also be responsible for liaising with OPRED administrative and specialist technical staff to meet staged milestones with respect to the inputs and outputs of the work packages of review files (see below 'Working Arrangements' for more details).

2(b) Inputs to work scope

The **primary inputs** for each ETS installation ALC report technical review shall comprise of (one file / folder per operator / installation):

- The latest ALC report for the installation which also comprises of all the relevant subinstallations within the same report (excel).
- The associated VR file for the installation (excel).
- Copy of the approved UK ETS permit (PDF) which includes the MMP.
- Supporting procedures as referenced from the MMP / Permit (excel / PDF / word).

Should an update be required to the data after the initial review, OPRED will determine if the update warrants further input from the contractor for that respective installation.

The **secondary inputs** for each ETS installation shall include the following files which are applicable for each installation, as reference material in the technical review:

- Calculated energy data (TJ) from each installations submitted AEM (excel).
- Information on any historic re-determinations undertaken on AEM report data (excel / PDF).
- Understanding of the process steps set out in Appendix 2.
- Any other supporting files which OPRED deems relevant to the review of the reports.

2(c) Expected Outputs

The key data output from the ALC technical review is the O_Summary data tab with any comments embedded within that tab for each of the respective installations that have been reviewed. For the BDR files these will be notes within the BDR file itself.

Once per week when one or more ALC / BDR reviews has been completed, the contractor is to advise OPRED of such and which installations; where OPRED will peer-review and potentially submit the respective ALC decisions to the UK ETS Authority for approval. NB. Where a ALC review by the contractor has identified 'energy efficiency' decisions in worksheet 'G_Fallback' these are to be assessed by OPRED staff during peer-review as part of the final ALC decision stage.

Monthly report table to be submitted outlining the work completed since the previous month and next steps for the forthcoming month as well as running monthly costs incurred by time, grade and WP reference for staff undertaking the work.

Working Arrangements

The work is expected to commence as soon as possible following contract award (within the appropriate procurement arrangements).

It is proposed that the work be structured as follows:

Kick-off meeting early in week 1 after the agreed contract start date to agree and finalise the technical review approach.

A further meeting into the second or third week to discuss any initial review findings, issues and OPRED feedback on the work initially done by the contractor.

Monthly progress meetings to review work completed, next steps and any feedback from the contractor and OPRED, during delivery of WP1 and WP2.

The full work scopes for WP1, WP2 are to be completed no later than Friday 13th March 2026, to include delivery and testing of process improvements. A final 90-minute project close out meeting with OPRED to be held week commencing 16th March 2026.

There will be no requirement or need for the contractor to engage with any oil and gas operator directly. The only point of contact will be the named OPRED staff.

We envisage the need for close interaction between OPRED and the contractor undertaking the work throughout the process, to ensure that emerging issues are dealt with promptly as well as managing any additional information being sought or there is a technical query. There may be a requirement to have a meeting with OPRED and or the contractor may request one with OPRED to discuss technical matters if needed where the timings differ to the monthly project meeting.

The use of MS Teams will be the primary means of holding meetings with OPRED. There is no intention to hold a face-to-face meeting for the duration of this short contract.

Appendix 2 - Technical Review Steps

Current Process Approach - Technical Review steps:

The current technical review steps required for determination of each ALC report are set out below.

The contractor will need to understand these steps to inform the development of process improvements (Work Package 1) and complete technical reviews of the installation determinations under Work Package 2.

For the **ALC** report:

Reviewing the worksheet "A_Installation Data" to ensure it correctly aligns with the permit.

- Reviewing the worksheet "B+C_SubInstallations" to ensure it correctly aligns with the Historic Activity Level (HAL) information for the installation and with the VR for each sub-installation.
- Review of worksheet "D_Emissions" to rigorously check that:
 - o Emissions and activity data is correct and aligns with supporting information.
 - Where there is waste heat recovery that the details shown in the Cogeneration tool are correct and potentially additional sources of heat are aligned with supporting information.
- Review the worksheet "E_Energy Flows" to check that:
 - Distributions of fuel energy data by sub-installation aligns with the supporting information.
 - Details of net measurable heat are consistent with any waste heat recovery and / or direct sources of heat, and are consistent where relevant with worksheet D.
 - Electricity balance at the installation plausible for energy used.
- Worksheet "F ProductBM" is not relevant to review. i.e., Not applicable to UKCS installations.
- Review the worksheet "G_Fallback" to ensure that this has been populated (energy, and production data) for the applicable sub-installations linked to the MMP.
- Note the energy efficiency aspects of this section are **not** in scope of the review but the
 ensuring the data is populated for the respective sub-installation(s). These will be checked
 and reviewed by OPRED following consultancy review output.
- Review the worksheet "J_Comments" where an operator may have added some additional
 information or referenced a separate document to help explain some of the data. The
 comments may help explain a discrepancy in the data submitted against what has been
 previously reported for example.
- To aid the data review and process for each installation, a new tab referred as "O_Summary" in each report will need to be added by the contractor, this will auto populate a large proportion of the emissions and energy data into one tab to allow the technical review. This will also need to refer out to the additional information listed above as provided by OPRED.
- Within the O_Summary tab, any comments / issues / concerns against the data can be made in a free text box which will act as the audit trail for each installation.
- Review the verification report for verifier findings, issues with the data, over all opinion, misstatements, material misstatements, compliance, non-conformities.
- Confirmation that the data has been checked must also be made clear in the free text box as well, should there be no issues found with the data.
- The process allows all the relevant information to be retained in one place for that installation and acts as an audit trail of the technical review process and OPRED will peer review that as well to make a final determination.
