Schedule 1 Invitation to Tender and Specification

Healthwatch England's business plan for 2017-18 prioritises the need to bring the public's views to the heart of national decisions about the NHS and social care. In order for this priority to be effectively realised we need to efficiently progress our work streams which relate to how we collect, share and search large volumes of intelligence using minimal resources.

We have worked with CQC to understand what tools they are using that may assist us with this task and have identified that we can use Endeca to meet some of our requirements. CQC have agreed to provide us with a small number of licences and training support and it is anticipated that in the future we will work with the CQC to learn to develop the system internally. While this approach is being developed by CQC we have a number of clear development projects that we need to undertake this year.

We would therefore like to procure a developer to undertake the following:

1. To undertake daily reviews of all Healthwatch sites and collect all of the newly published materials and store it in a secure and accessible site. Ideally this would create a daily upload that we can then prepare for processing.

This is a critical element for Healthwatch England because not only does it enable us to automate some of the legal requirements that exist between ourselves and our network in relation to information sharing but it is key to the fulfilment of our statutory obligations.

At the moment, on an annual basis, we pay an external company to supply us with a daily upload of all Healthwatch publications. We will replace this cost with a one off payment to develop Endeca to do this for us removing unnecessary dependencies.

2. To pull our Enter and View report catalogue into Endeca and section the reports applying the Healthwatch taxonomy. This will also serve to benefit the CQC who will be able to access this intelligence.
3. Develop thematic taxonomies to search our data
4. To undertake discovery and development around a function that will provide a daily push of CRM based activity/insight data for intelligence processing.

PROPOSAL FOR THE DEVELOPMENT OF AN OEID SOLUTION FOR HEALTHWATCH UK

Scope

This proposal covers the activities and effort to develop an Endeca Information Discovery solution for Healthwatch UK providing a single intelligence platform combining structured and semi-structured data from multiple sources including APEX, CRM, pdf reports and Healthwatch websites.

The proposed solution will include the delivery of dashboards and visualisations, data model, data integration and data capture from the sources, and will leverage the existing CQC Endeca Information Discovery platform.

The services will include the design and build of the application as well as training and handover.

Solution

Based on the requirements and data source examples shared, the proposed solution will:

1. Leverage the CQC's existing Oracle Endeca Information Discovery platform
 1. Connect to existing LDAP authentication
 1. If use of existing LDAP not possible then provision separate Endeca Studio instance if required for Healthwatch
 2. Use a separate Data Domain for Healthwatch data
2. Model, integrate and join data sources using the existing Healthwatch taxonomy joining data from:
 1. APEX Access database
 2. Direct from CRM if required
 3. pdf reports
 4. Healthwatch Websites
3. Use Endeca Integrator Acquisition System (IAS) Document Conversion Module to ingest pdfs and then use regex to parse the text into columns
4. Use the Web Acquisition Toolkit or web crawler in IAS to acquire content from websites
5. Set up automation to minimise manual involvement and support from Healthwatch teams
6. Provide training and handover as appropriate

Approach

The approach to delivering the solution is proposed to involve:

1. Reporting requirements gathering workshop to:
 1. Understanding reporting requirements
 2. Build initial mock-up dashboards
 3. Understand potential data model
2. Data modelling exercise conducted to determine how the sources will be joined and to define available attributes and metrics from each source

3. Build configuration files in Endeca to support results from data modelling exercise
4. Create Integrator graphs to:
 1. Pull data from each source
 2. Transform and model based on designed data model
 3. Load data into Endeca Server
5. Create front end dashboards and reports in Endeca Studio
6. Review with key stakeholders to drive iterative feedback / update loop
7. Set up automated schedules in Integrator Server
8. Produce training materials and documentation

Effort and Engagement

The proposed team is for the work to be delivered by an Endeca Developer, supported by an Endeca Lead for key design and development decisions.

In order to keep overall costs to a minimum for Healthwatch it is proposed the developer undertakes the majority of the work supported by the Lead as required, and that the work be undertake primarily remotely from CDO Partners's offices to minimise expense costs.

[illegible]

Assumptions

1. Healthwatch can use the existing CQC Endeca platform
2. Endeca and components are licensed and available
3. Existing platform requires no remedial work to be available
4. pdf and website data sources are consistent in format and data extraction requirements

- 20.12 The Agreement constitutes the entire contract between the Parties in respect of the matters dealt with therein. The Agreement supersedes all prior negotiations between the Parties and all representations and undertakings made by one Party to the other, whether written or oral, except that this clause shall not exclude liability in respect of any Fraud or fraudulent misrepresentation.
