

Q&A3 for RSSB1976 – Developing of a Sustainable Stations Framework (T1074-01)

Dear supplier,

Please find below a list of questions and answers which have been received to date:

Ref.	Questions	Answers
1.	The deliverable is a framework. Can you advise the expected maturity of the framework. For example it could be a document/PC tool explaining the criteria for measuring performance and how they can be considered together. Is it safe to assume a fully robust, tested piece of software is not required?	No, we are not looking for a piece of software.

Kind regards,

Hazel Fernandes
Procurement and Contracts Manager
