Statement of Requirements

A. Background

1. INM Scientific Staff are currently undertaking scientific support work to inform musculoskeletal injury (MSKI) mitigation strategies on behalf of Commandant General Royal Marines (CGRM).
2. Individuals employed in physically active training within the armed Services are at risk of MSKI. Specifically, there is a relatively high incidence of lower limb injury, such as stress fracture, in recruits undertaking arduous physical military training. This incidence has resulted in a substantial loss in training and associated fiscal costs – as well as reputational damage to the MOD.
3. The employer has a duty of care to reduce the risk of MSKI occurrence, and this requires an increased understanding of factors contributing to this type of injury.
4. If individuals susceptible to MSKI can be identified before participating in periods of physical activity, appropriate interventions may be applied to reduce the likelihood of MSKI development.

B. Requirement.

5. A 2 m pressure plate with sampling at 500 Hz is required to continue a programme of work where the aim is to identify measurable biomechanical variables associated with the development of lower limb MSKI.
6. An annual service and repair call out contract is required of 3 and with an option for a further 2 more years (if available) to mitigate future risk. In the event of a breakdown call out, labour and parts would preferably be included.
7. INM would require the pressure plate to be delivered directly to CTC RM, Exmouth Road, Lympstone, Exmouth EX8 5AR.

C. Deliverables

8. The contract would be considered complete once the pressure plate had been delivered and confirmed as fully operational.
9. The contract should include 12 months warranty, including labour and parts. The service and repair element would start after the warranty had expired.

D. Contract start date

10. Ideally the pressure plate is required as soon as possible.

E. Security considerations

11. There are no particular security considerations for supply of this equipment. It is accepted that a standard cyber risk assessment will be required but there will be no transferrable data with MOD systems.
