- 7.9 If the Supplier successfully completes the requisite Tests, the Buyer shall issue a Satisfaction Certificate as soon as reasonably practical following such successful completion. Notwithstanding the issuing of any Satisfaction Certificate, the Supplier shall remain solely responsible for ensuring that the Deliverables are implemented in accordance with this Contract.

Summary of the work

MHCLG recently completed a discovery into creating a shared digital evidence base to support the Spatial Framework for the Oxford-Cambridge Arc. This alpha phase will seek to test and develop: an open evidence base production; a prototype for a shared digital evidence base and a collaboration space across the Arc.

Expected contract length

10 to 12 weeks

Location

London

Organisation the work is for

Ministry of Housing, Communities and Local Government

Budget range

The contract is expected to have a budget in the region of £100,000 to £125,000 (excluding VAT).

About the work

Why the work is being done

MHCLG is leading on the development of a long-term Spatial Framework - <https://www.gov.uk/government/publications/planning-for-sustainable-growth-in-the-oxford-cambridge-arc-spatial-framework/planning-for-sustainable-growth-in-the-oxford-cambridge-arc-an-introduction-to-the-spatial-framework> - for the Oxford-Cambridge Arc. We want to support best use of data and digital tools in the development of the Framework, and create a long-term resource for local and national plan-making (including transport planning), policy-making and investment decisions.

In the discovery, MHCLG explored best practice, existing tools and standards that are used across the Arc for evidence base production relating to Local Planning Authorities, transport planning authorities, government agencies and government departments in the Arc.

The discovery showed the need for developing an open, transparent and authoritative approach to designing, commissioning and publishing evidence base studies. It showed the need for developing a joint digital evidence base repository with 'best' data standards alongside the Spatial Framework, and a collaboration space for Local Planning Authorities to establish a 'community of practice'.

This work will contribute to ensuring that the joint digital evidence base can aid the Spatial Framework. Through establishing standardised digital formats, the information will move from documents to data, and will become interoperable. This will enable us to have a strategic overview across the Arc and greater collaboration between Local Planning Authorities.

Problem to be solved

We want to:

- Test and develop a shared digital evidence base repository.
- Test and develop an open, transparent and authoritative approach to designing, commissioning and publishing evidence base studies and their foundational data.
- Develop a data standard for the evidence base required for developing the Spatial Framework and local planning.
- Test and develop a collaboration space for local planning authorities to establish a 'community of practice'.

We would also like to:

- Test and refine approaches for presenting elements and data of the spatial framework with users, including members of the local community.
- Investigate approaches for analysing and collecting the datasets used as evidence to inform each of the policies contained in the Spatial Framework.

Who the users are and what they need to do

As a local planning officer and local council partner (i.e. transport providers), I want an open approach to commissioning evidence base studies and their foundational data. I want all information stored as linked data in one place and relate to my local or neighbouring planning authority. Access to standardised data will make it easier to inform cross-boundary strategic planning and analyse potential opportunities/constraints with neighbouring authorities.

As a decision-making stakeholder (i.e. infrastructure provider or housing developer) I want any data required to make a decision to have the most recent, reliable information to provide evidence for any investment decisions.

As a local politician, planning decisions should be informed by a robust evidence base. If a decision was challenged, I would draw upon resources that were easy to find and to support decision-making.

As a government planning officer, I would need local evidence base documents to understand the cumulative impact of development, and be able to advise Ministers on strategic investments and decision-making.

As a resident in the planning process, I want information that is accessible, easy to understand and up-to-date, so communities can engage with local plan-making consultations.

Early market engagement

To support the Spatial Framework, MHCLG recently completed a discovery - <https://www.digitalmarketplace.service.gov.uk/digital-outcomes-and-specialists/opportunities/12737> - to seek out the opportunities in creating a shared digital evidence base.

This alpha phase will seek to test different approaches on open evidence base production, creating the prototype for a shared digital evidence base across the Oxford-Cambridge Arc with 'best' data standards, as well as providing a collaboration space for Local Planning Authorities.

Any work that's already been done

MHCLG has completed a discovery - <https://www.digitalmarketplace.service.gov.uk/digital-outcomes-and-specialists/opportunities/12737> - into users and needs of the people who will use or benefit from creating a shared digital evidence base, as well as existing tools and opportunities for scaling up across the Oxford-Cambridge Arc.

The Digital Land team within MHCLG, have run various projects into Local Plans, Brownfield sites and Developer Contributions which have set data standards, created prototypes and made data easier to find, understand, use and trust. The work completed to date on these projects and their lessons learnt can be taken forward into this alpha phase - <https://digital-land.github.io/project/>

Existing team

Suppliers will collaborate with the OxCam team and Digital Land Team - <https://digital-land.github.io/about/> - in MHCLG, who will support and advise on technical aspects. Suppliers will need to collaborate with other suppliers working on projects that align with this work.

Our current teams have user research, content, service and interaction design capability. We also have policy specialists, data scientists, business analysts and developers.

The supplier team should include a Service Designer, an Interaction Designer, a Content Designer, a Data Scientist / Data Standards Specialist and a User Researcher. Some delivery management is desirable. Not all roles need to be full-time.

Current phase

Work setup

Address where the work will take place

We expect the successful supplier to work regularly with MHCLG in 2 Marsham Street, London, SW1P 4DF/virtually given the ongoing COVID-19 pandemic. A weekly update meeting will be held at 2 Marsham Street or virtually.

MHCLG will not fund travel within London but will fund necessary travel outside of London.

Working arrangements

Given the current COVID-19 climate, we would expect the supplier to work remotely but keep in close contact with the existing team. Any changes on these circumstances will be agreed with the supplier.

We expect the supplier to work in line with the Digital Land team mission, values and ways of working - <https://digital-land.github.io/about/> We are a digital team who work openly and use agile methodology. We will induct the supplier on team specific practises and on the overarching hypotheses and vision we work to as a team.

Security clearance

CTC or above isn't required but is desirable so staff don't need escorting on site. There is no requirement for supplier personnel to be security cleared.

BPSS clearance will be required to access MHCLG's ICT systems.

Skills and experience

Buyers will use the essential and nice-to-have skills and experience to help them evaluate suppliers' technical competence.

Essential skills and experience

- Have experience of delivering alphas in line within the Government Service Manual.
- Have experience of recruiting users for research.
- Have experience of delivering user-centred solutions to problems.
- Have experience of digital planning.
- Demonstrate evidence of meeting skill requirements based on the anticipated composition of the team.

Nice-to-have skills and experience

- Demonstrate experience of solving problems involving data for Local Planning Authorities.
- Have experience of producing a minimal viable product/proof of concept for successful delivery into a 'live' environment on behalf of a government department.
