

ITT Clarifications

Tender Reference: 3205-SRB-020524

Issued: 08/04/2024

Q1	In section 3 – scope, you refer to “Anchors and moorings” throughout. Should we read this as “inter-array cables” or is the scope different for this area?
A1	This should be read as “inter-array cables”. An updated ITT has been uploaded to Contracts Finder on 13/05/24
Q2	Could CSP clarify what is meant by "the current footprint in Cornwall" in section 5.2.6? Is this in reference to the proposed solution?
A3	This refers to the current social, environmental and economic impact that the lead bidder and their collaborators have on Cornwall. The baseline should be based on the situation now, before any impacts arising from the development of the proposed solution land. Such developments may (but might not be limited to) movement of capital into the region, development of infrastructure, increase in jobs, increase in revenues etc.
