Section 4 – Specification

1. Introduction

The Healthy Ageing Challenge is seeking a bespoke package of support for a group of Social Enterprises for a 14-month period.

The Social Enterprises are awardees of a recent [Healthy Ageing Social Ventures competition](https://www.ukri.org/news/social-ventures-invited-to-apply-for-healthy-ageing-product-funding) – (www.ukri.org/news/social-ventures-invited-to-apply-for-healthy-ageing-product-funding) run through the Small Business Research Initiative (SBRI) scheme. A total of 2.7m was awarded, and the Social Enterprises are due to start their projects in Jan-Feb 2023.

The purpose of the support UKRI are seeking through this tender exercise is to provide the greatest possible opportunity for those Social Enterprises to achieve their growth potential and therefore impact at scale.

The competition process revealed that the successful awardees have the potential to achieve significant social impact, and that to best achieve that would value further knowledge to support business growth.

This is the second competition UKRI has run specifically for Social Enterprises, and this support activity is designed to explore whether a key success factor for awardees, alongside the funding, could be providing timely and bespoke expertise which supports them in their business growth. This approach is similar to that currently used with the Healthy ageing Catalyst Award projects where there is strong evidence to endorse the provision of business growth support.

2. Aims & Objectives

The objectives are as follows:

- To provide the greatest possible opportunity for the Small Business Research Initiative (SBRI) Social Enterprise awardees to achieve sustainable growth and impact at scale.
- To ensure the Social Enterprises are focused on those priorities which are most likely to lead to success.
- To provide learnings that would inform future UKRI Social Enterprise programmes on the key success factors.

The support will be measured in terms of:

- the difference it makes to the leadership skills of the social entrepreneur
- the difference it makes to the governance, growth and sustainability of the social enterprise
- how it enables the social enterprise to measure and demonstrate the impact of their product or service
- how it addresses the barriers to growth the social enterprise faces
- how it creates a more enabling ecosystem for social enterprises.

UKRI anticipate that the support will contribute to the growth of the business, visible in the following ways:

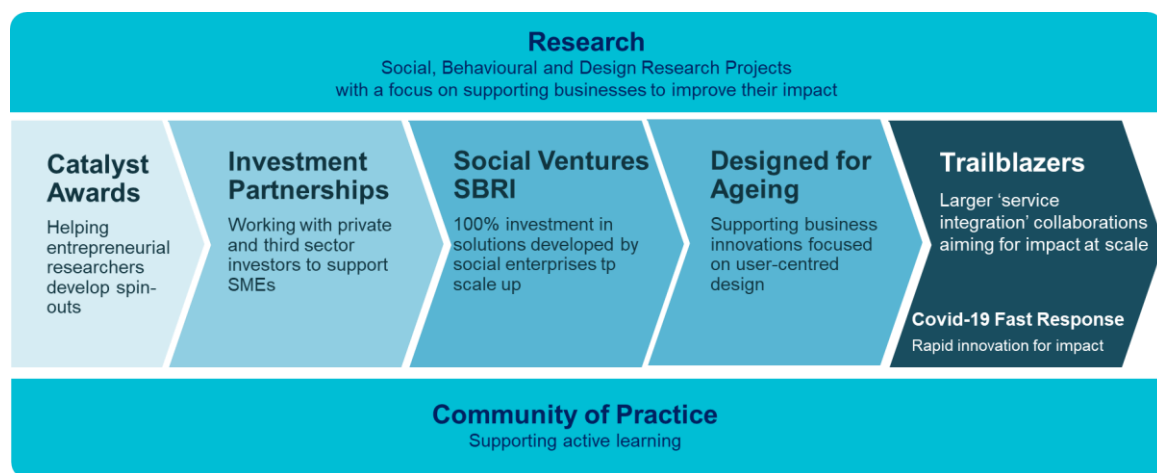

- job creation
- expand number of lead customers
- revenue and profitability growth
- investment raised
- supply chain enhancement
- social value creation.

3. Background to the Requirement

The Healthy Ageing (HA) Challenge is one of over 20 programmes under the Industrial Strategy Challenge Fund. The HA Challenge is comprised of a £98 million investment that aims to enable businesses, including social enterprises, to develop and deliver products, services and business models that will be adopted at scale which support people as they age. This will allow people to remain active, productive, independent and socially connected across generations for as long as possible.

The Challenge started in December 2017, the delivery plan was approved in June 2019, with funded programme activities starting from 6 January 2020 and due to finish by 29 March 2024.

A snapshot of our project streams, which shows approximate level of market maturity of the investments in each stream, from left to right, is shown below.

The requirement outlined in this tender is in relation to the successful applicants of the Healthy Ageing SBRI Scaling Social Ventures competition which closes on the 19th October 2022 with awardees starting their projects from around January 2023

The aim of the competition has been to fund organisations to deliver social impact and address one or more of the 7 themes of the Healthy Ageing Challenge Framework. The intention is to support social ventures to scale up, and all applicants are required to have an existing lead customer and have the capacity to scale by 25% over the duration of the project

Awards for the Healthy Ageing SBRI Social Ventures competition will be made to approximately Social Ventures who have projects with costs from £200,000 to £500,000. The aim of this competition is to enable businesses with a social purpose to scale up existing innovative products, processes and services where the innovation element is at a [Technology Readiness Level \(TRL\)](#) between 3 and 7.

The successful awardees are likely to be based in locations across the UK and will be working across one or more of the 7 themes of healthy ageing.

- Living Well with Cognitive Impairment
- Managing the Common Complaints of ageing
- Sustaining Physical Activity
- Creating Healthy Active Places
- Design for Age Friendly Homes
- Maintaining Health at Work
- Supporting Social Connections

The Innovation Lead for the SBRI Healthy Ageing Social Ventures Competition is the main point of contact for this contract, and would agree strategy, milestones and outputs.

There would also be a scoping meeting, and quarterly governance meetings with the Innovation Lead and the Senior Management Team at the Healthy Ageing Challenge.

Progress would be reported via a quarterly report which would include a detailed review of the previous quarter and the upcoming plan, related budgets, risks for the upcoming quarter.

4. Scope

The scope of support required is as follows:

- A bespoke package of support made available to the projects successful through the Healthy Ageing SBRI Social Ventures competition.

The support might include, but is not limited to:

- 1:1 business support
- Coaching and mentoring
- Access to specialist expertise and knowledge resources (legal advice, fund raising, branding support, ecommerce skills)
- Advisory support to strengthen social entrepreneurs' skills, business models, confidence, product-market solutions, governance, trading and financial sustainability, teams and networks
- Practical support around the barriers to growth that social enterprises face: access to follow on growth capital, access to markets, specialist support, evidencing impact.
- Access to learning community.

The support should help the Social Enterprises to focus on key areas, such as:

- Improving healthy ageing and scaling that impact
- Inclusivity, particularly around drivers of inequalities
- Ensuring beneficiaries/service users are woven into the design and delivery of their solutions
- How they can accelerate growth and impact.
- How they measure their impact
- Enabling them for continued expansion after the end of the programme (e.g. embedding them in markets/networks, connecting them to investors/opportunities, providing them with long term plans, enabling team growth/expansion, preparing for exits).

- A proven methodology for delivering business growth support

- Capability to provide or broker a range of capacity building/technical assistance

Core requirements:

- bespoke package of support made available to the projects successful through the Healthy Ageing SBRI Scaling Social Ventures competition. The specific package of

support, and the approach taken, should be recommended by bidders, taking into considering the objectives, the audience, timescale and budget.

Optional requirements:

- Bidders may choose to offer a tiered service providing a more intense package of support to a selection of the Social Enterprises.
- Whatever approach is taken must be still be delivered within the total available budget.

UKRI would require bidders to outline the support that would be provided to participants including:

- The approach to the support package and any methodology to be applied
- Whether they would opt to apply a *tiered* approach to the delivery of support to projects, and if so to describe the number of projects that could be provided with additional support, the proposed approach that would be used and the selection criteria and process for identifying which ones would receive the different tiers of support.
- Timescales, and any assumptions and/or limits on duration.
- A breakdown of costs in line with the proposed approach to delivery.

Where a question is 'for information only' it will not be scored.

The evaluation team may comprise staff from UK SBS and the Contracting Authority and any specific external stakeholders the Contracting Authority deems required.

To maintain a high degree of rigour in the evaluation of your bid, a process of commercial moderation will be undertaken to ensure consistency by all evaluators.

After evaluation and if required moderation scores will be finalised by performing a calculation to identify (at question level) the mean average of all evaluators (Example – a question is scored by three evaluators and judged as scoring 5, 5 and 6. These scores will be added together and divided by the number of evaluators to produce the final score of 5.33 ($5+5+6=16 \div 3 = 5.33$))

Scoring criteria

Evaluation Justification Statement

In consideration of this particular requirement the Contracting Authority has decided to evaluate Potential Providers by adopting the weightings / scoring mechanism detailed within this ITQ. The Contracting Authority considers these weightings to be in line with existing best practice for a requirement of this type.

Evaluation Envelope	Q No.	Question subject	Maximum Marks	
			Overall	Breakdown
Commercial	AW5.1	Price	20%	20%
Technical	PROJ1.1	Understanding of the Healthy Ageing Challenge environment and needs of social ventures	80%	30%
Technical	PROJ1.2	Delivery approach and team		40%
Technical	PROJ1.3	Social Value		10%

Evaluation of criteria

Non-Commercial Elements

Each question will be judged on a score from 0 to 100, which shall be subjected to a multiplier to reflect the percentage of the evaluation criteria allocated to that question.

Where an evaluation criterion is worth 20% then the 0-100 score achieved will be multiplied by 20%.

Example if a Bidder scores 60 from the available 100 points this will equate to 12% by using the following calculation:

$$\text{Score} = \{\text{weighting percentage}\} \times \{\text{bidder's score}\} = 20\% \times 60 = 12$$

The same logic will be applied to groups of questions which equate to a single evaluation criterion.

The 0-100 score shall be based on (unless otherwise stated within the question):

0	The Question is not answered, or the response is completely unacceptable.
10	Extremely poor response – they have completely missed the point of the question.
20	Very poor response and not wholly acceptable. Requires major revision to the response to make it acceptable. Only partially answers the requirement, with major deficiencies and little relevant detail proposed.
40	Poor response only partially satisfying the question requirements with deficiencies apparent. Some useful evidence provided but response falls well short of expectations. Low probability of being a capable supplier.
60	Response is acceptable but remains basic and could have been expanded upon. Response is sufficient but does not inspire.

80	Good response which describes their capabilities in detail which provides high levels of assurance consistent with a quality provider. The response includes a full description of techniques and measurements currently employed.
100	Response is exceptional and clearly demonstrates they are capable of meeting the requirement. No significant weaknesses noted. The response is compelling in its description of techniques and measurements currently employed, providing full assurance consistent with a quality provider.

All questions will be scored based on the above mechanism. Please be aware that there may be multiple evaluators. If so, their individual scores will be averaged (mean) to determine your final score as follows:

Example

Evaluator 1 scored your bid as 60

Evaluator 2 scored your bid as 60

Evaluator 3 scored your bid as 40

Evaluator 4 scored your bid as 40

Your final score will $(60+60+40+40) \div 4 = 50$

Once the above evaluation process has been undertaken and the scores are apportioned by evaluator(s) this will then be subject to an independent commercial review and moderation meeting, if required by the commercial lead, any and all changes will be formally recorded relative to the regulatory obligations associated with this procurement, so as to ensure that the procurement has been undertaken in a robust and transparent way.

Commercial Elements will be evaluated on the following criteria.

The lowest price for a response which meets the pass criteria shall score 100. All other bids shall be scored on a pro rata basis in relation to the lowest price. The score is then subject to a multiplier to reflect the percentage value of the Commercial criterion.

For example - Bid 1 £100,000 scores 100.

Bid 2 £120,000 differential of £20,000 or 20% remove 20% from price scores 80

Bid 3 £150,000 differential £50,000 remove 50% from price scores 50.

Bid 4 £175,000 differential £75,000 remove 75% from price scores 25.

Bid 5 £200,000 differential £100,000 remove 100% from price scores 0.

Bid 6 £300,000 differential £200,000 remove 100% from price scores 0.

Where the scoring criterion is worth 50% then the 0-100 score achieved will be multiplied by 50.

In the example if a supplier scores 80 from the available 100 points this will equate to 40% by using the following calculation: $\text{Score/Total Points multiplied by 50}$ ($80/100 \times 50 = 40$)

The lowest score possible is 0 even if the price submitted is more than 100% greater than the lowest price.

This evaluation criteria will therefore not be subject to any averaging, as this is a mathematical scoring criterion, but will still be subject to a commercial review.

Evaluation process

The evaluation process will feature some, if not all, the following phases.

Stage	Summary of activity
Receipt and Opening	<ul style="list-style-type: none"> ITQ logged upon opening in alignment with UK SBS's procurement procedures. DO:

- 7.1 Do comply with Procurement document instructions. Failure to do so may lead to disqualification.
- 7.2 Do provide the Bid on time, and in the required format. Remember that the date / time given for a response is the last date that it can be accepted; we are legally bound to disqualify late submissions. Responses received after the date indicated in the Section 3 of the ITQ shall not be considered by the Contracting Authority, unless the Bidder can justify that the reason for the delay is solely attributable to the Contracting Authority

You should note that we will release the answer to the question to all Bidders and where we suspect the question contains confidential information, we may modify the content of the question to protect the anonymity of the Bidder or their proposed solution
