Summary of the Work

FSA require a Connected Contact Centre for MS Teams Certificated Partner to implement and integrate a CCaaS solution with MS Teams for the FSA Corporate Support Unit.

Anywhere365 has been identified as a suitable product that meet the requirements, and the FSA will require 45 Enterprise Licenses.

Description of the Work

Why the work is being done:

The Corporate Support Unit (CSU) run a Helpline and Customer Contact Centre for internal and external customers. The Helpline consists of a team of eight agents handling calls Monday to Friday, across two shifts, on a four-hour rotation. When enquiries cannot be answered by the core helpline team, it is passed to the appropriate support team to provide a response.

FSA recently transitioned their telephony provider to Microsoft Teams. To effectively manage and monitor this service, we need to expand the basic functionality offered within Microsoft Teams.

Problem to be Solved:

User research revealed a distinct requirement for a call management solution, to build upon the newly adopted use of Microsoft Teams telephony. The team currently use a standard version not designed for call centre use. Consequently, there is not enough data to manage staffing profiles and understand performance.

In addition, the Interactive Voice Response (IVR) system is not part of the current Microsoft Teams set up, making its usage cumbersome.

The following capabilities are lacking:

- Inbound and Outbound Cloud Contact Centre
- Omnichannel Routing
- Automatic Call Distribution (ACD)
- Interactive Voice Response (IVR)
- Workforce Management
- Quality Management
- Reporting and Analytics
- Performance Management
- Integrations (with Customer record and Case Management solution, Microsoft Teams Integration, and Voice as a Service)

FSA require that the solution be certified under Microsoft's Connected Contact Centre for Microsoft Teams Certification Program.

The solution must be compatible with a Teams Telephony service using Direct Routing.

The solution must be scalable to support other contact teams within the FSA that aren't part of CSU.

Call management

We need the service to resolve the following user needs:

- Provide a view of all individual team members currently taking calls
- Provide call volumes and current waiting times
- Average waiting times for incoming calls over a period
- Number of calls that dropped off before going through to anyone
- Number of calls taken that day/week
- Number of calls taken by each team member
- Average call time per team member
- Report on how often call volumes fluctuate
- Report team performance and create performance targets
- Download data/API/Interface
- Remote access to change IVR
- Automated system which easily stands up/stands down staff to meet demand

The Supplier will need to implement the product and provide the following support:

- Implementation Anywhere365 for Microsoft Teams
- Develop dashboards and reports within the system covering on the areas listed in 'Call management' above.
- Deliver ongoing support and training for Anywhere365, Teams and Telephony services.
- Assess and mitigate security and privacy issues and ensuring GDPR compliance.
- Integrate CCaaS with case management/CRM tools and other external APIs such as GOV.UK Notify , GOV.UK Pay, Companies House etc. (We envisage that inbound call data (and associated metadata) could be made available to the case management product to allow for information to be available as a call is taken, data about the call recorded (eg. date, duration, source telephone number, number of rings before answer). Likewise that outbound calls can be initiated from within the case management tool and also that the routing information of inbound calls is informed from case management data.)

Security

Supplier Personnel must have BPSS Clearance.

Supplier must have Cyber Essential Plus or ISO27001 accreditation.

The supplier must be able to demonstrate compliance against the National Cyber Security Centre Software as a service cloud security principles:
