

Hardware

The BMS network has the following hardware connected to the sites IT infrastructure.

45	IQ2xx Controllers
64	IQEco
51	IQL
111	IQ3xx
78	IQ4xx
65	IQView (Various devices)
16	SIP Modules (Both type d & e)
3	IQExtend
5	IQ4NC

Additionally the site has a point count of approximately 42,500 inputs and outputs. It should be noted that this figure will include both real and internal inputs.

Software

The site currently runs five No Trend 963, one of which is a full client server system.

The site also has two IQVision software V2.3 running. One system is located on a server in R89 data centre, the other is located on an engineer's laptop for development purposes.

IQVision will require periodic updates and maintenance.
