SECTION C

That party shall only disclose such Confidential Information to those of its employees, agents or subcontractors who need to know the same for the purpose of discharging that party's obligations under the Contract, and shall ensure that such employees,

Schedule 1 Special Conditions

NOT USED

Schedule 2 Pro forma purchase order form

Schedule 3 Scope of Services

Background

This contract is for the delivery of estimates of regional jobs in the power sector and will involve researching employers to understand the locational distribution of jobs for each low carbon technology, split by nature of the job (e.g. manufacturing, construction, transportation, operation, etc), and the timing and duration of the jobs (i.e. short-term construction jobs, long-term maintenance jobs).

When complete, this work will give senior management and ministers figures on the jobs delivered by specific projects or policy aims and their expected regional distribution.

This work will allow BEIS to more closely align the Net Zero Strategy and Energy Security Strategy ambitions with the Levelling Up agenda. Due to the latter, there has been an increasing desire for BEIS to provide estimates of jobs supported at a regional level.

Aims and Objectives of the Project

The aim of this work is to generate regionalised estimates of the jobs associated with the building and running of power sector projects (e.g. new offshore wind farms, nuclear plants, etc) to 2050. This will run parallel with current ONS work that takes a snapshot of total power sector jobs

[Link to ONS Low carbon and renewable energy economy estimates](#)

The snapshot of jobs produced is split by technology (eg. offshore wind, onshore wind, solar, etc.) and job type (Manufacturing, Construction, Professional, scientific and technical activities, etc.).

BEIS has internal projections on power sector capacity to 2050 in meeting the Net Zero targets, with estimated number of jobs at a national level based on GVA and require estimates of the number of jobs by region.

The objective of this project is to be able to estimate the number of regional jobs by year (including planning and construction) for any given project (eg. technology and capacity) by job type. These estimates should be consistent with ONS published snapshot figures.

Suggested Methodology

BEIS are open to any approach which provides robust estimates of regional jobs by year. However, the proposed approach and how uncertainty would be captured using this approach should be laid out in the bid documents.

One possible approach is to survey employers involved in jobs associated with the building and running of power sector projects. As the ONS already have a Low carbon and renewable energy economy survey which provides a snapshot view of jobs at a national level, it would be worth discussing with ONS the sampling framework, methodology issues and questions for this survey. Any survey will need to be adapted to produce estimates for region and longevity of jobs.

Using the estimates from the above phase, a simple spreadsheet calculator should be built where the user inputs a project by technology, start date, size and location and the calculator provides estimates of jobs by year, job type and region.

Deliverables

Project Management

The successful bidder must provide a project plan laying out key milestones and deliverables in line with the timescales reported in their bid. A failure to adequately monitor and adhere to this timeline may result in BEIS refusing payment for the work.

Expected Outputs

Bidders should note that BEIS will own the intellectual property rights of any and all intermediate products, including final deliverables, and in particular including presentation slide packs, reports and data.

The following outputs are required within the project, irrespective of whether the proposed methodologies are used or whether alternatives are proposed. Alternative reporting approaches or timing may be proposed so long as they meet the needs outlined below and the bidder's reasoning is clearly set out.

Outputs are expected to include:

Final Report - This should detail the methodology used in deriving the regional estimates of jobs, so that a third party could replicate the methodology in the future if required. There should be details on the robustness of assumptions, confidence

levels in outputs and citations of equivalent work.

Calculator - There should be a documented simple spreadsheet or formulas that allows the user to input a project with variables of technology, capacity, start date and location that will generate a profile of regional jobs by the year (including planning and construction), region and job type (e.g. manufacturing, construction, transportation, operation, etc).

Presentation - The team should provide a presentation of the research findings for analytical colleagues at BEIS.

BEIS would welcome suggestions as to any further outputs and would expect to agree a final set of deliverables at the inception stage.

Quality Assurance

Bidders must set out their approach to quality assurance (QA) in their response to this Mini Competition with a QA plan.

Sign-off for quality assurance must be done by someone of sufficient seniority within the contractor organisation to be able to take responsibility for the work done. Acceptance of the work by BEIS will take this into consideration.

Provisionally, BEIS will only request three rounds of improvements to any documentation produced, however, BEIS reserves the right to refuse to sign off outputs which do not meet the required standard specified in this invitation to tender and/or the contractor's QA plan. QA should cover all aspects of the project undertaken by the contractors, including data collection, data analysis and reporting.

Working Arrangements

The successful bidder will be expected to identify one named point of contact through whom all enquiries can be filtered. A BEIS project manager will be assigned to the project and will be the central point of contact.

BEIS envisage the need for close interaction between the BEIS Project Manager and contractor throughout the process, to ensure that emerging issues are dealt with promptly and that BEIS fully understand the assumptions and approach taken. Bidders should assume that engagement with BEIS will include fortnightly project management phone calls, weekly progress update reports, steering group meetings (frequency to be confirmed), and any ad hoc meetings as required to design and deliver the project. Throughout the project, BEIS will review and sign off all final data collection instruments, analytical approaches (including key assumptions) and outputs.

Skills and expertise

BEIS require you to demonstrate that you have the necessary expertise and capabilities to undertake the project. Your tender response should include a summary of the project team's skills and capabilities, both in terms of evaluation skills and renewables policy expertise.

Challenges

There may be a number of challenges in conducting this research; some are detailed in the following section. Bidders must consider how these and any other challenges will be addressed through the project's design and delivery.

Timing of outputs

Bidders should consider how they can deliver outputs to the tight timetable. Bidders are welcome to propose innovative methods and outline a delivery plan which splits the required activities in stages to meet the requirement.

Price and payments

The maximum budget for this project is £50,000 excluding VAT.

Bidders should provide a full and detailed breakdown of costs. This should include staff (and day rate) allocated to specific tasks.

Bids should, at a minimum, include costs for activities, including design and analysis

Publication

The successful bidder will be permitted to publish the final report and any associated documentation on their company website. The intention is that this work will be fully visible to the public and that anyone might use the results in their work.

SECTION D

Clause	Note
A3-2-1	You may wish to shorten this period in some cases.
B1-3-2	if the Supplier will not accept the higher standard set out in the first option, insist on the second option
B1-3-9	If you wish to include any specific obligations relating to the particular Services, these should be included as Special Conditions.
B3-1-2	If the Supplier wishes to impose any specific obligations on the Contracting Authority relating to the particular Services, and you have agreed to these, these should be included as Special Conditions.
B4-5	There may be circumstances where you wish to require a shorter payment period than 30 days. If this is the case and you shorten the period, you must also shorten the payment period in clause B4-9 to the same period.
B4-9	You must shorten this payment period to correspond with the payment period in clause B4-5.
B9-5	Ideally this clause B9-5 will not be included. However, if the Supplier insists upon a limitation of its liability, this clause should be amended, as appropriate, and included. Ideally the limitation of liability will be set as high as possible. You should consider the nature of the supply, and the corresponding risk, to decide on a cap. When negotiating with the Supplier on this point, take into account the level of insurance cover that the Supplier has. Consider in particular whether the cap should be set lower than the Supplier's professional indemnity cover.
C5-2	This clause provides clarity in regard to UKSBS's needs to audit at any time the contract to be able to provide assurance to BEIS and CO that Cyber essentials are monitored and audited during the contract term
C7-6-1-a	In each case, please complete relevant contact details.
C7-6-4	Include reference to clause C7-6-5 only where the Supplier is not based in England or Wales.
C7-6-5	Only use and complete this clause C7-6-5 where the Supplier is not located in England or Wales. In any such case, require Supplier to nominate details.
C7-12-2	Clause C7-12-2 is included to cover the possible scenario where the Supplier uses UK SBS's or Contracting Authority IPR outside the UK and we wish to take action in relation to such unauthorised use (as IP rights are territorial, and action to enforce them will in all likelihood need to be taken in the country in which infringement occurs). This eventuality may be unlikely to occur under this arrangement, where the Supplier is only supplying low value / low risk Services. However, where the Supplier is supplying bespoke Services and or Supplies the risk will be higher (as the Contracting Authority is more likely to share its IPR with the Supplier). If the Supplier objects to this clause and you consider that the risk of needing to enforce IPR overseas is low, you may be happy to delete it. If you delete C7-12-2, you will also need to delete the introductory wording "subject to clause C7-12-2" at the start of C7-12-1.

##GUIDANCE

PPN 09/14

All contracts which involve handling personal information and providing certain ICT products and Services shall apply the requirements of Cyber essentials as a mandatory government requirement this came into force on the 1/10/14. Cyber essentials have two levels of certification Cyber Essentials and Cyber Essentials plus which is a more rigorous as it requires vulnerability tests to be performed as part of the certification.

Cyber Essentials is for all organisations, of all sizes, and in all sectors. This is not limited to companies in the private sector, but is also applicable to universities, charities, and public sector organisations. Further details are available at:
<https://www.cyberstreetwise.com/cyberessentials/>

PPN 14/15

All Contracts that are for above £10M and exceeding 12 months shall have regard to Ministerial guidance covering Skills and Apprenticeships as part of the procurement exercise. Under no circumstances should this requirement be set as a mandatory Pass / Fail question.

PPN 14/15

The PPN does clearly state that any application must be consistent with the Governments priority to demonstrate value for money, so this would suggest that utilisation of any apprenticeship, sponsored student and or graduate should not have an associated financial burden as a result.

Any consideration of adoption of this guidance should pass a consideration of relevance to the procurement. If it is not relevant, then a written record of the decision not to incorporate this shall be retained by UK SBS.

PPN 06/15

All major construction and infrastructure Contracts that are above £50M shall have regard to Ministerial guidance covering Skills and Apprenticeships as part of the procurement exercise. Under no circumstances should this requirement be set as a mandatory Pass / Fail question.

This PPN reflects that commitment in the context of the UK's procurement rules. This also builds upon the statutory obligations of Reg 113 for all above threshold contracts.
