Amazon Web Services (AWS) Cloud Services

Service Overview

QA Consulting provides a competitive AWS service with your long-term skills development and self-sufficiency at the core of our delivery model with flexibility that allows scaling up and down in line with project requirements. In addition to providing multi-discipline subject matter experts, we also support up-skilling and re-skilling of your existing staff through creative ways that have minimal impact to delivery. Our collaborative approach to design, development and support covers on-premise and cloud services including delivery of cloud migration services at both application and infrastructure levels.

WHY QA CONSULTING

QA Consulting has an extensive Consulting heritage providing enterprise solutions and managed services for leading commercial and public sector clients; and partnerships with leading software vendors.

We have well-referenced success enabling organisations deliver cloud ready services and scale internal capability and sustainable skills pipelines. On top of day-to-day delivery there are also options for you to:

- Build in-house capability through up-skilling, re-skilling and Knowledge sharing

- Ensure continuity of service and reduce disruption by retaining some of our junior members in the delivery teams as permanent members of staff

- Scale you delivery teams through our multi-disciplined, 100% co-located self managing lean delivery teams; with experience of multi-vendor environments

- Realise Cost Savings and Optimisation through utilising our award-winning graduate scheme (QAC Academy) to hire, train and deploy consultants alongside experienced developers

APPROACH/ PROPOSITION

ENGAGEMENT MODEL

Your long-term skills development and self-sufficiency is at the core of our delivery and engagement model. We work with you to achieve this by:

- Providing 100% co-located Subject Matter Experts who can drive interaction, peer development of skills and experience through collaboration with your staff

- Injecting new skills into your organisation through the option for you to retain some of our junior members in the delivery teams as permanent members of staff

- Conducting a skills maturity assessment

- Leveraging the assessment to identify up-skilling and re-skilling opportunities for your existing staff

- Developing a re-skilling and up-skilling roadmap with minimal disruption to delivery through creative and flexible knowledge sharing initiatives

Our staff will work collaboratively in teams within your existing programme management structure.

PEOPLE AND PROCESSES

WELFARE AND PEOPLE SUPPORT

Consulting Director and Technical Managers

QA Consulting provide supplemental support for our staff through the Consulting Team. The Consulting Director supported by a team of Technical Managers and Consultant Liaisons own this facilitating on-boarding & off-boarding, day-to-day management and continuing career development. This also provides a point of escalation for our staff in customer projects, for any issues that can hinder their performance and level of engagement.

Security Checks

QA Consulting carries out Basic Personnel Security Standard (BPSS) Clearance as standard for all our employees and associates.

For roles requiring a higher level of clearance, QA Consulting has a number of SC and DV cleared resources and we also ensure that all new hires match the pre-requisites for SC or DV clearance.
