Graphic Schedule

American Air
Museum
Redevelopment
Project

Date of issue: **July 2015**

To be read in conjunction with the tender issue drawings and schedules, the general specification and pricing schedule document.

1.0 GRAPHICS PRODUCTION - SUPPLY AND INSTALLATION

- 1.1 Supply and install all graphics shown on the drawings **and** on the graphics schedule. Print-ready artwork will be provided.

All dimensions on the schedule are approximate the contractor must allow for the graphics to be measured on site, printed and mounted and delivered to site by Graphics Production Contractor within the Fit-out Contract.

It is the responsibility of the Fit-out Contractor to supply the artworker with the final dimensions for the artwork to be produced.

Fit-out contractor is to include for safe storage, handling and fixing of all the graphics as noted in the graphic schedule after delivery to site by the Graphics Production Contractor.

- 1.2 All graphics to be delivered to the site in a maximum of three lots by the graphic production company within the fit-out contract. On delivery they are to be checked by the Fit-out Contractor with a representative of the graphics company and handed over in perfect condition. The Fit-out Contractor is then to take full responsibility for their protection. The Fit-out Contractor is to hang all graphics before the end of the contract, when the site is clean and clear and there is no risk of damage. Where specified, all bonded panels to be fixed with water based contact adhesive. A minimum number of pins may be used invisibly to assist adhesion.
- 1.3 Aluminium split battens to be used for hanging all panels mounted onto MDF substrate. Fixings are to be supplied by Graphics Sub-contractor.
- 1.4 The Fit-out Contractor must ensure that the Graphics Sub-contractor is able to obtain reliable dimensions on site for all the graphics in time to allow sufficient production time for each of the galleries in accordance with the programme. Where indicated, the Fit-out Contractor is to provide templates for the artwork.
- 1.5 All artwork will be generated on InDesign CS4 on Apple Macintosh hardware and supplied on Mac formatted CD/DVD.
- 1.6 All graphics to be high quality display graphics for permanent museum installation. **Photo digital graphics are to be best quality as approved by client.** All finishes to be matt, unless otherwise specified.
- 1.7 Include for all substrates listed in the graphics schedule and drawings. Please make clear in the priced schedule who will supply the substrates – i.e. Fit-out Contractor or Graphics Subcontractor. We would recommend that substrates are provided by the Graphics Subcontractor. Where the substrates are to be cut/shaped specifically to fit a structure and/or lightbox, they should be provided by the Fit-out Contractor.
- 1.8 For all reverse mounted graphics, 2mm low-reflective polycarbonate should be used (except where noted otherwise). This should be supplied by one source.
- 1.9 The Graphics Subcontractor is to allow costs for 3 A3 high resolution scans from print and/or transparency to be supplied to the artworker.

- 1.10 The Graphics Sub-contractor is to allow for the following 20 sample graphics:
10 delivered to IWM Duxford (client) and 10 delivered to Redman Design for approval prior to production:

6 x A3 digital prints matt finish
4 x A4 digital prints reversed to 2mm low-reflect polycarb
2 x A3 screen-print tests onto flood coated MDF
4 x 1m x 1m digital print wallpaper
4 x sample vinyl lettering

- 1.11 Graphics Sub-contractor to ensure that all elements of the graphics are costed for. An individual price to be shown on the schedule for each graphic identified in the Graphics Schedule to include: print, mounting, substrates, fixings, delivery and installation.
- 1.12 Allow for all the screen-printing in the schedules to be done on site.
- 1.13 Contractor must not butt joint prints onto single substrate as the joint is vulnerable to damage, or butt joint two sheets of substrate under one print as the joint will remain visible through the print. All prints must to be wrapped on a single substrate.
- 1.14 The Fit-out Contractor to clearly indicate profit on this element of the works.
- 1.15 Any additional graphic elements or variations to be charged at the same rate pro-rata as the items costed in this tender.
- 1.16 Programme – Fit-out Contractor to provide indicative program of key dates for discussion/final resolution with the client (who will be providing final text and images) and with the artworker who will be producing the production ready artwork. Sufficient time **must** be built in to the program to allow time for these elements to be produced
- 1.17 Exclusions –No exclusions
- Only contractors from the approved list below or similar to be approved, may be used to supply and install.

Client:	Imperial War Museum DUXFORD
Project:	American Air Museum
Ref:	14.382
Last Issue Date:	22-Jul-15

Contractor to price for supply and delivery of all items scheduled below. **Price must include:** Materials to the scheduled dimensions and quantites, print processes to materials and delivery to site.
Price must include: Edgings, Absolute label holders and fixings as scheduled unless identified as provided by others.

NOTE: 'Digital print' to be best quality available - PLEASE PROVIDE SMALL SAMPLE (unmounted) WITH TENDER

NOTE: Some graphics require cut-outs for screens and speaker (PIR TBC)

NOTE: All dimensions and production details are for tender pricing purposes only and must be confirmed before manufacture commences.

FOR TENDER: PLEASE REFER TO THE INVITATION TO TENDER AND GRAPHIC SPECIFICATION DOCUMENT
