Annex 2 – Specification

Background to requirement

This tender is for the delivery of hydrometric training for the Environment Agency (EA) regarding three existing training packages. The courses provide a structured approach to the theoretical background and the practical application of field hydrometric measurement and data capture techniques, data processing and analysis methods. These training packages provide knowledge and performance skills to enable reliable and cost-effective provision of high-quality hydrometric data relevant to the Environment Agency business needs. The training also enables our workforce to develop and deliver a consistent national hydrometric network service.

Hydrometric data underpins much of the work that the EA does. The Hydrometry & Telemetry (H&T) service provides the data and evidence that enables the EA to make informed decisions on protecting people, places, wildlife, and the environment. The pressures on our water resources are increasing with population growth, forecasts indicate that we will use more water, and climate change will only add to the pressures. Data we provide are used for water management, regulation of water companies and abstraction licence compliance. Flood risk is expected to increase, our data feeds into the EA flood warning service and provides the evidence to build, maintain and operate high quality FCERM (Flood and Coastal Erosion Risk Management) assets.

Objectives and deliverables

The courses will provide a structured approach to the theoretical background and the practical application of field hydrometric measurement and data capture techniques, data processing and analysis methods. The objectives of each course are detailed below. Please see below for specific content topic areas.

The training requirements will be on-going and will be required as new staff arrive in the department from around the country. For economy of scale, a certain number of attendees will be required before face-to-face courses can run. Most delegates attending the courses will be H&T Officers with occasional attendees from other related disciplines or partner organisations.

Stage Discharge training will build on knowledge gained from Hydrometry Level 2. This intervention will focus on the assessment and derivation of stage discharge ratings in line with current Environment Agency procedures and systems. It will be held at a suitable location to allow delegates to have access to computers to allow live examples to be completed with the support of trainers. Business simulation exercises using Kisters Sked program have been established within to embed via experiential learning.

Please note the cost model requirements included within the document ask for design and delivery day rates. Over the course of the contract let there may be further related design and delivery needs due to policy, technology and legal changes hence their inclusion.

The course objectives of Stage Discharge training:

At the end of the course delegates will understand:

- How to assess the quality of existing stage discharge ratings.
- Statistical terminology and their importance.
- How to derive new stage discharge ratings for structures and rated sections.
- Stage discharge rating extension and methods of extrapolation.
- How to undertake GSDQ (Gauging Station Data Quality) classification process.
- How to undertake annual and full rating review procedures.
- How to use Uncertainty Tool to produce uncertainties for flow measurement structures.
- Understand how to utilise the Environment Agency's versions of Kisters WISKI and SKED programs to manage and derive stage discharge ratings.
- Hydrometry & Telemetry DIAP (Data and Information Acquisition Plan) update requirements.

The Training Provider and their representatives should:

- Be suitably qualified and experienced personnel.
- Be collaborative in their approach.
- Have a good understanding of our role and vision as an organisation and reflect our values and culture.
- Be able to assess delegate performance to an agreed standard.
- Have a good understanding of accessibility standards and EA EDI strategy.

Course cancellation terms

We will always work with a provider to reschedule a course for as soon as is possible. Should we need to cancel a course the following policy will apply:

Notice of cancellation	Percentage of course fee paid

The successful provider must provide four weeks' notice for any cancellations and agree a revised schedule as soon as possible. The successful provider will be expected to work in partnership with the EA and be flexible with regards to the postponement or cancellation of courses.

Utilisation of contract

The Environment Agency reserves the right to be flexible on the utilisation of this contract once established. Course demand may increase/decrease each year for reasons such as changes to funding and recruitment levels, higher priority objectives, etc. It should therefore be noted that this may impact on the overall value of the contract, resulting in it being less than the estimated maximum value of £240,000.

Sustainability and the Environment

Our [eMission 2030](#) strategy outlines how we will improve the sustainability performance of our own operations and that of our suppliers including achieving Net Zero Carbon emissions by 2030. This extends into our supply chain through the purchases we make and the goods and services that others provide on our behalf.

Our Suppliers will be required, through this contract to work towards Net Zero Carbon for all of its operations, and embed sustainability both into the training content, and the delivery of the service.

In addition to this, our Suppliers must ensure that they are fully compliant with all our relevant environmental legislation at all times including any amendments to existing legislation or any new legislation that may come into force during the life of this contract.

Suppliers should consider and reduce the environmental impacts of the service they provide over the lifecycle of the contract to include but not limited to:

- Booking and location of training to reduce the carbon impact from travel.
- Choice of venues, and locations which can demonstrate sustainability credentials including social value, payment of real living wage to staff and suppliers.

- Resources required to deliver the training ensuring for example no single use plastics at venue arrangements.

- The Supplier is responsible for ensuring that all parties working under this contract are aware of, compliant with the sustainability requirements listed in this document. The Supplier must monitor and ensure ongoing competence and compliance with this throughout the life of the Framework.
- Share and communicate best practice, lessons learned and new innovations with the EA in all areas that are relevant to this Framework, as a part of the quarterly review meetings. Any

significant points should be brought forward to the Framework / Contract Manager before the review meetings.

We expect the very highest standards of behaviour and positive attitudes to equality, diversity and inclusion. We are committed to equal opportunities, and expect a respectful work environment free from bullying, harassment and discrimination and expect the same standards from our Suppliers. Suppliers must make reasonable adjustments to ensure learning is accessible to everyone.

The first part of the paper discusses the importance of the research and the objectives of the study. It then moves on to a literature review, which provides a background on the topic and identifies the gaps in the existing research. The methodology section describes the research design, data collection, and analysis. The results section presents the findings of the study, and the conclusion summarizes the main points and offers suggestions for future research.

The research was conducted in a systematic and rigorous manner, following the principles of good research practice. The data was collected from a representative sample of the population, and the analysis was carried out using appropriate statistical methods. The results of the study are presented in a clear and concise manner, and the conclusions are based on the evidence gathered.

The study has several strengths, including a well-defined research design, a large and diverse sample, and the use of advanced statistical techniques. However, there are also some limitations, such as the cross-sectional nature of the data and the potential for self-report bias. Despite these limitations, the study provides valuable insights into the topic and contributes to the existing knowledge in the field.

The findings of the study have important implications for practice and policy. They suggest that there is a need for further research in this area, and that the results can be used to inform decision-making and the development of interventions. The study also highlights the importance of considering individual differences and the role of context in understanding the phenomenon being studied.

In conclusion, the study provides a comprehensive and detailed examination of the topic, and its findings are of significant value to the research community. The study is well-structured and easy to read, and it provides a clear and logical argument for the conclusions drawn. It is a valuable contribution to the field and a model of good research practice.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (1990–1999), and the number of people in the public sector has increased by 2.5 million (1990–1999) (Department of Health 2000).

There is a growing emphasis on the need to improve the quality of care in the public sector, and to ensure that the public sector is able to meet the needs of the population. This has led to a number of initiatives, including the introduction of the NHS Act 2003, which sets out the framework for the NHS, and the introduction of the NHS Commissioning Board, which is responsible for commissioning and paying for NHS services.

The NHS Commissioning Board is responsible for commissioning and paying for NHS services, and for ensuring that the NHS is able to meet the needs of the population. 3. How the Contract works

3.1 The Order Form is an offer by the Authority to purchase the Deliverables subject to and in accordance with the terms and conditions of the Contract.

3.2 The Supplier is deemed to accept the offer in the Order Form when the Authority receives a copy of the Order Form signed by the Supplier.

3.3 The Supplier warrants and represents that its Tender Submission and all statements made and documents submitted as part of the procurement of Deliverables are and remain true and accurate.

4. What needs to be delivered

4.1 All Deliverables

(a) The Supplier must provide Deliverables: (i) in accordance with the Specification and Tender Submission; (ii) to a professional standard; (iii) using all reasonable skill and care; (iv) using Good Industry Practice; (v) using its own policies, processes and internal quality control measures as long as they don't conflict with the Contract; (vi) in accordance with such policies and procedures of the Authority (as amended from time to time) that may be specified in the Contract (vii) on the dates agreed; and (viii) in compliance with all applicable Law.

(b) Without prejudice to the Specification the Supplier must provide Deliverables with a warranty of at least 90 days (or longer where the Supplier offers a longer warranty period to the Authority) from Delivery against all obvious damage or defects.

4.2 Goods clauses

- (a) All Goods Delivered must be capable of meeting the requirements set out in the Specification and be either (i) new and of recent origin, (ii) reused or (iii) recycled.
- (b) All manufacturer warranties covering the Goods will be assigned to the Authority on request and for free.
- (c) The Supplier transfers ownership of the Goods on completion of Delivery (including off-loading and stacking) or payment for those Goods, whichever is earlier.
- (d) Risk in the Goods transfers to the Authority on Delivery but remains with the Supplier if the Authority notices any damage or defect following Delivery and lets the Supplier know within three Working Days of Delivery.
- (e) The Supplier must have full and unrestricted ownership of the Goods at the time of transfer of ownership.
- (f) The Supplier must Deliver the Goods on the date and to the specified location during the Authority's working hours.
- (g) The Supplier, its subcontractor(s) and supply chain must minimise packaging used whilst providing sufficient packaging for the Goods to reach the point of Delivery safely and undamaged. The Supplier must take back any primary packaging where it is possible to do so. Packaging must be 100% re-usable, recyclable or compostable, use recycled content where reasonably practicable and support the Government's commitment to eliminate single use plastic.
- (h) All Deliveries must have a delivery note attached that specifies the order number, type, quantity of Goods, contact and details of traceability through the supply chain.
- (i) The Supplier must provide all tools, information and instructions the Authority needs to make use of the Goods. This will include, where appropriate, any operation manuals which, unless specified otherwise, will be written in English and provided in electronic form.
- (j) The Supplier will notify the Authority of any request that Goods are returned to it or the manufacturer after the discovery of safety issues or defects that might endanger health or hinder performance and shall indemnify the Authority against the costs arising as a result of any such request. Goods must be disposed of in line with the waste management hierarchy as set out in Law. The Supplier will provide evidence and transparency of the items and routes used for disposal to the Authority on request.

(k) The Authority can cancel any order or part order of Goods which have not been Delivered. If the Authority gives less than 14 calendar days' notice then it will pay the Supplier's reasonable and proven costs already incurred on the cancelled order as long as the Supplier takes all reasonable steps to minimise these costs.

(l) The Supplier must at its own cost repair, replace, refund or substitute (at the Authority's option and request) any Goods that the Authority rejects because they don't conform with clause 4.2. If the Supplier doesn't do this it will pay the Authority's costs including repair or re-supply by a third party.

(m) The Authority will not be liable for any actions, claims, costs and expenses incurred by the Supplier or any third party during Delivery of the Goods unless and to the extent that it is caused by negligence or other wrongful act of the Authority or its servant or agent. If the Authority suffers or incurs any damage or injury (whether fatal or otherwise) occurring in the course of Delivery or installation then the Supplier shall indemnify from all losses, damages, costs or expenses (including professional fees and fines) which arise as a result of or in connection with such damage or injury where it is attributable to any act or omission of the Supplier or, where related to the Contract, any of its subcontractors or suppliers.

wear and tear and any pre-existing cleanliness, safety or tidiness issue at the Authority's premises that existed before the commencement of the Term.

(h) The Supplier must ensure all Services, and anything used to deliver the Services, are of the required quality and free from damage or defects.

then the Authority may:

- (i) require that the Supplier provide to the Authority (for its approval) a plan setting out how the Supplier will ensure continued performance of the Contract (in the case of (a)) or improve its sustainability conduct or performance (in the case of (b)) and the Supplier will make changes to such plan as reasonably required by the Authority and once it is agreed then the Supplier shall act in accordance with such plan and report to the Authority on demand
