SCHEDULE ONE**1 BACKGROUND**

Social mobility has been highlighted as a current priority for DfE, with education and skills being key contributors. There is currently an evidence gap on the socio-economic characteristics of Further Education (FE) learners and apprentices, and how experiences and outcomes of FE learning and apprenticeships vary by these characteristics.

Many learners and apprentices do not achieve their training (approximately 28% of apprentices and 13% of other learners¹) and little is known about why they do not complete their learning or the barriers they faced. Also, little is known about the intentions after learning or apprenticeship for various groups within these programmes.

The Individualised Learner Record (ILR) collects monitoring information and some demographic data on FE Learners and Apprentices. It does not provide the required level of detail to accurately assess the socio-economic background of learners (or to examine inter-generational changes to this). This project is intended to build upon the monitoring information to enrich our data and allow for more detailed examination of learners' experiences in this context.

The respondents in this project will be asked for permission to link their information to the Longitudinal Educational Outcomes (LEO) matched dataset, containing education, employment, salary and benefits data. This will enable us to study outcomes (financial, further study) for different groups over time.

The findings from this research will help in designing interventions to get disadvantaged people into learning (i.e. which is targeted towards the specific barriers they face), and help them to complete their learning and achieve successful outcomes. This is vital in upskilling the population – improving social mobility and productivity – and improving the country's levels of basic and intermediate skills.

2 AIM

The Contractor shall use all reasonable endeavours to achieve the following aims:

- Design and deliver a survey to improve understanding of who undertakes FE learning and Apprenticeships, the pathways taken to the learning/apprenticeship, who does not complete their learning and why (and how this varies for different groups, including those from disadvantaged backgrounds).
- Obtain consent from respondents to link their information to the LEO matched dataset, maximising the value of the data for future use.

3 OBJECTIVES

The Contractor shall use all reasonable endeavours to achieve the following objectives:

- To capture information (or in some cases, proxy information) on:
 - Economic status of learners'/apprentices' parents
 - Educational attainment of parents

¹https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/586015/SFR07_2017.pdf

- Single-parent households
- Caring responsibilities
- Household income
- Current or pre-course earnings
- Tenure
- Answer the following research questions:
 - What are respondents' pathways onto their learning/apprenticeship? How do these vary for different types of learning?
 - i. How do these vary for different socio-economic backgrounds?
 - What do respondents intend to do following their learning/apprenticeship, and how does this vary for different groups?
 - What are respondents' perceptions of the impact that their learning/apprenticeship will have on their outcomes, and how do these vary for different groups?
 - What barriers did they face in undertaking their learning/apprenticeship, and how do these vary for different groups?
 - What help and support did they receive to overcome these barriers and who provided it?
 - Who does not complete their learning/apprenticeship and why?
 - i. What reasons do they give for not completing their learning/apprenticeship?
 - ii. How do these vary for different socio-economic backgrounds?
- Ask respondents for consent to link to the LEO matched administrative dataset (containing data from DfE, HMRC, and DWP) to enable future exploration of outcomes of FE learning and apprenticeships (such as progression to further learning, employment, and future income and benefits receipt). This linking and data analysis is not in scope of this project, it will be conducted separately at a later date.

5 METHODOLOGY

Overview

The contractor will undertake a survey of 15'000 FE Learners and Apprentices, covering recent completers, ongoing learners/apprentices and non-completers. The sample will be split evenly between Learners and Apprentices. There will be an expected questionnaire length of 15 minutes, to be confirmed between the contractor and the Department following piloting. The majority of the responses are expected to be achieved by CATI method, with additional interviews conducted using an online approach. The sample will be drawn from ILR records, selecting a recent extract near the start of fieldwork to ensure that learners and apprentices have either recently finished their course or are nearing completion. For the pilot, the sample will be drawn from the record of all learners and apprentices with a planned course end date between December 2016 and August 2018.

The contractor will run a pilot survey for both methods, utilising two rounds of cognitive testing to both ensure that the survey design is suitable and to test and improve the questionnaire for explicability to respondents. The pilot survey will consist of 2000 initial mail outs to test response rate and ensure that the coverage is suitable to explore all necessary elements of the survey design. The pilot will also test the rates of consent to link with the LEO database. Following delivery of the pilot report, the Department will make a decision on whether to proceed with the study, based on the levels of consent and response rates obtained (as in the clause on page 1 of this contract).

There will be an additional 36 depth interviews, from 45-60 minutes, to provide a deeper qualitative understanding of issues identified during the survey fieldwork and to cover areas that the questionnaire is unable to incorporate.

Project management

The project will need a detailed inception meeting to discuss all aspects of the survey methodology. If available all members of the research team will attend. Following the meeting the contractor will produce an inception report detailing all key aspects discussed, particularly any refinements to the survey method. This will also include a detailed timetable. The timetable will be kept as a live document throughout the study, and updated and reissued if and when any changes are agreed.

Most contact will be by telephone or email, with scope for one additional meeting if required (for example to talk through pilot findings and the implications for the questionnaire).

will be the main day to day contact for the project. The contractor will provide DfE with a single email address that can be used to contact all members of the research team.

The contractor will provide regular email progress updates to an agreed format and frequency. During fieldwork this will be weekly, with telekits on a fortnightly basis. The contractor will supply emerging findings during fieldwork in the form of (unweighted) topline data with brief commentary.

Questionnaires will only be employed once signed off by DfE. The questionnaire development process will be that questionnaire issues will be discussed at inception. Following this the contractor will draft the questionnaires. These will be discussed at a development workshop and agreed before piloting. Following the pilot recommendations for any changes will be presented in a pilot report. The revised questionnaire will need be discussed and agreed, and once signed off the final CATI amends will be made and checked.

Pilot

The pilot study will consist of three phases. There will be an initial round of cognitive interviewing, to test the questionnaire- achieving 20 telephone interviews. Following this, the draft questionnaire will be tested further in the second phase, consisting of an initial mail out of 2000, intending to achieve 500 interviews. There will be a 3rd round of testing, involving 15 cognitive interviews of the online mode and 15 of the telephone mode. Upon completion of the pilot, the contractor will deliver a pilot report, detailing response rates, suggested changes to the questionnaire and the rates of consent to link to LEO that were achieved. The Department will then decide whether to proceed with the mainstage of the study and confirm this to the contractor.

Main Stage Survey

There will be 15'000 interviews completed with Learners and Apprentices. The fieldwork will consist of both online and telephone interviews to ensure a broad coverage of ILR records, for those with contact telephone details and those without. The first stage of the survey will involve invite letters being sent to all sampled learners with link to online survey. These will be supplemented with a letter after one week and email reminders to maximize response. For the second stage of fieldwork, all those who did not answer the online survey in phase one will be contacted for telephone interviewing. This will run for 13 weeks, with additional calls and text reminders to maximise response rates. There will be priority batching later in the sample to reach harder to access respondents. There will be another attempt to interview those without telephone numbers, with 2 additional letters and emails where possible to increase response rates.

To ensure coverage of course non-completers, there will be a separate drive online to increase participation. This will consist of invitations to around 6500 non-completers, with an expectation that 10% will take part. Up to 650 will be sampled and offered a £10 incentive to continue with the study. Further information on response rates is given in the table below.

Weighting

Weights will be calculated in two stages. In the first stage the contractor will calculate a design weight. This weight will compensate for any unequal selection probabilities. This weight is simply the inverse of the probability of selection. At the second stage the contractor will review the 'design weighted' respondent sample against the population targets derived from the anonymised ILR frame. If differences are observed, additional population 'rim' weights may be applied. When applied, the final weight will ensure the weighted sample is reflective of the population with respect to the weighting variables.

Depth Interviews

The contractor will conduct 36 interviews of between 45 and 60 minutes, to provide a better qualitative understanding of the issues covered by the survey- in addition to related areas that the survey is unable to cover. Important themes to explore in these depth interviews will be issues of how learners imagine the future outcomes of participation in FE, and how their experiences of FE met, or failed to meet these expectations. Linking anticipation to outcome in the narratives of young people will add validity to the research and ensure that the data represents the full range of experiences for those failing to complete FE courses. The contractor will employ a combination of techniques to assist recall and go beyond surface level or post rational responses including: journey mapping, cognitive interviewing and behavioural impact mapping.

Linking

A major objective of the survey is to secure high levels of consent to link respondents' survey data to the LEO administrative dataset. Future linkage will be essential to understand if and how social mobility may be affected by Apprentices and Learners' experiences of Further Education. Linking to the LEO is the priority for this study. It will provide accurate, detailed administrative information from DfE, HMRC and DWP including: additional educational courses studied, qualifications entered for and achieved, income, benefits and employment data.

Expected response rates are shown here:

Phase	Size of sample for phase (for each phase)	Expected completions for each phase	Conversion rate (for phase)	Adjusted response rate
1. Initial 'drive online' letter	40,875	4,088	10%	-
2a. Main telephone survey	32,370	10,680	33%	-
2b. Additional 'drive online' reminders	4,410	247	5%	-
<i>Response for sample with telephone</i>	<i>35,970</i>	<i>14,280</i>	<i>40%</i>	<i>60%</i>
<i>Response for sample with no telephone</i>	<i>4,905</i>	<i>735</i>	<i>15%</i>	<i>18%</i>
Final response	40,875	c.15,000	37%	57%

6. STAFFING

The contractor's project team will comprise:

7 STEERING COMMITTEE

The Project Manager shall set up a Steering Committee for the Project, consisting of representatives from the Department, the Contractor, and any other key organisations whom the project will impact on, to be agreed between the parties. The function of the Steering Committee shall be to review the scope and direction of the Project against its aims and objectives, monitor progress and efficiency, and assess, manage and review expected impact and use of the findings from the Project against an agreed Project Communication Plan, through the standard Department Communication Plan Template. The Committee shall meet at times and dates agreed by the parties, or in the absence of agreement, specified by the Department. The Contractor's representatives on the Steering Committee shall report their views on the progress of the Project to the Steering Committee in writing if requested by the Department. The Contractor's representatives on the Steering Committee shall attend all meetings of the Steering Committee unless otherwise agreed by the Department.

8. RISK MANAGEMENT

Key challenge	Likelihood of risk	Potential impact	Preventative action	Recovery plan
Lack of clarity/understanding of project objectives	Low	High	Revisit and agree with the Department for Education key project aims and objectives, and how research design will meet these, at project start up meeting. Regular communication and documentation of decisions throughout the project to ensure that work reflects aims and objectives throughout.	
Limited contact details on the ILR	Medium	Medium	<p>We propose a design where respondents are contacted through a combination of post, telephone and email. This maximises our ability to deal with incomplete contact data and maximise contact with sampled learners.</p> <p>Sourcing additional telephone numbers using directory lookups for sampled learners.</p>	
Low response rate or high levels of differential response	Medium	Medium	<p>Carefully designed and managed fieldwork design with three-staged fieldwork process to encourage and remind sampled learners to take part. Clear and persuasive invite letters.</p> <p>Large and experienced team of telephone interviewers with expertise at persuading learners to take part in telephone surveys. Varied call patterns and multiple attempts to interview each sampled learner over a lengthy fieldwork period.</p> <p>We propose piloting the survey methodology to accurately assess response rates at each stage of the process. Findings from the pilot will be used to refine our sampling approach, contact procedures and fieldwork processes.</p>	Additional reminders can be targeted at sub-groups who are less likely to respond. Should response rates prove low we would welcome a discussion on whether we might offer conditional incentives to specific sub-groups

Key challenge	Likelihood of risk	Potential impact	Preventative action	Recovery plan
Low levels of consent to data linkage	Low	High	<p>Achieving a high consent/agreement rate will be important for successful longitudinal measurements related to social mobility. Our design assumes a very achievable (if anything conservative) agreement rate, allowing a degree of contingency.</p> <p>We will test and refine consent questions during the pilot.</p> <p>Our telephone interviewing team has experience of obtaining high agreement/consent rates on surveys of this kind. We will also include a session within the interviewer briefings on how to deal with this.</p>	If levels of agreement to data linkage prove low at the pilot stage we would review and adapt the questionnaire prior to the main stage. We can also re-brief interviewers if necessary.
Questionnaire does not meet research requirements	Low	High	We have put forward an experienced team with expertise in questionnaire design. Throughout the development process there will be opportunities for the Department for Education to review and contribute to draft questions. The pilot survey will allow us to test and refine all research tools including the questionnaire.	Review and adapt questionnaire after pilot.
Questionnaire comparability across modes	Low	High	<p>We propose the survey is designed for online at the outset and use the same software platform for the telephone to minimise differences between the modes. Most of the data to be collected will be factual, which will also reduce the effect of respondents completing through different modes.</p> <p>We have specific expertise in designing and adapting questions for use in mixed mode surveys, which we have developed and built on over time through our work the numerous studies we have implemented. We can draw on extensive experience of designing questions in such a way that they are suitable for face-to-face, telephone or web administration (e.g. LSYPE, NCDS, British Crime Survey).</p>	Revise approach after development stage.

Key challenge	Likelihood of risk	Potential impact	Preventative action	Recovery plan
Respondents struggling to recall their experience	High	Low	<p>The time lag between learners completing or dropping out of a course and taking part in our research could negatively affect the extent to which they are able to recall their experience. This is likely to be a particular issue for non-completers. We will consider options to minimise recall issues. First and foremost we will draw sample from the most recently available cut of the ILR and start fieldwork promptly.</p> <p>Ensuring that the questionnaire is easy to comprehend will minimise the cognitive burden on respondents and ensure they are focused on accurate recall rather than interpretation of question items.</p> <p>We also propose a phase of qualitative research. This can be particularly helpful where respondents may need more time and help to remember.</p>	<p>The questionnaire can be reviewed and adapted after the pilot stage.</p> <p>Qualitative research can be focused on areas where recall is particularly low.</p>
Data security issues and/or ethical breach of conduct	Low	High	<p>A commitment to high standards of quality, ethics and information security, underpinned by accreditations to ISO 9001, ISO 20252 and ISO 27001. Kantar Public was one of the first UK research organisations to be formally audited and accredited to the full ISO 27001 information security management standard.</p> <p>We follow clear ethical procedures relating to confidentiality and anonymity. Full consent gained from respondents. All interviewers are CRB checked.</p>	<p>Full complaints process. Agree actions to remedy any data security issues or respondent complaints. Raise issues with the Department for Education and agree actions.</p>

Key challenge	Likelihood of risk	Potential impact	Preventative action	Recovery plan
Respondent complaints	Low	Medium	<p>We are skilled at handling variations of the question: 'How did you get my details?' on other complex government surveys. We will send a clear and informative cover letter to give respondents sufficient information about the research.</p> <p>We will also set up a free phone number that respondents can ring if they have any questions. This will help avoid a formal complaint from respondents, as we will be able to answer any of their questions.</p>	In the event of any complaint, our procedure covering the management of complaints from, or on behalf of, respondents, or from other members of the public clearly sets out what we should do. This procedure forms part of Kantar Public's ISO 20252-accredited quality systems, and conforms to the requirements of the MRS Code of Conduct.
Timings	High	Medium	<p>We will review project progress with the Department for Education and be flexible to accommodate any changes in fieldwork requirements.</p> <p>We have rigorous project management systems and sufficient organisational capacity to meet all requirements.</p>	Revise timetables; draw on additional staff from wider Kantar Public team.
Insufficient staff resource or loss of key staff	Low	High	<p>Project team meet weekly to ensure all team members are aware of the current status of the project.</p> <p>Kantar Public has a team 70 researchers – we are able to move resources within this team to ensure that quality standards are maintained even if members of the core team are not available.</p>	In the event of a staff member leaving or being on long-term sick leave, we have sufficient capacity across the wider team to ensure that project staff are replaced with similarly experienced staff with a similar grade.

Key challenge	Likelihood of risk	Potential impact	Preventative action	Recovery plan
Disasters such as flooding or power cuts	Low	High	<p>Kantar Public has a business continuity plan that defines the minimum planning requirements for management and staff to respond to, continue critical services during, and recover from, an incident. Our plan outlines the critical resources (people, facilities, technology, suppliers and essential information) required to restore the critical services provided by them.</p> <p>Additionally, ISO 27001 assets are risk assessed in accordance with the Information Security Management System requirements. We have password-protected systems with full back-up in place to ensure there is no problems with data loss</p>	All staff are equipped to work securely from home and, as described above, we have a large pool of researchers on which to draw if any staff are affected by an incident.

9 DATA COLLECTION

The Department seeks to minimise the burdens on Schools, Children's Services and Local Authorities (LAs) taking part in surveys.

When assessing the relative merits of data collection methods the following issues should be considered;

- only data essential to the project shall be collected;
- data should be collected electronically where appropriate/preferred;
- questionnaires should be pre-populated wherever possible and appropriate;
- schools must be given at least four working weeks to respond to the exercise from the date they receive the request; and
- LAs should receive at least two weeks, unless they need to approach schools in which case they too should receive 4 weeks to respond;

The Contractor shall clear any data collection tools with the Department before engaging in field work.

The Contractor shall check with the Department whether any of the information that they are requesting can be provided centrally from information already held.

10. CONSENT ARRANGEMENTS

The Department and the contractor shall agree in advance of any survey activity taking place the consent arrangements that shall apply for each of the participant groups. All participants should be informed of the purpose of the research, that the Contractor is acting on behalf of the Department and that they have the option to refuse to participate (opt out). Contact details should be provided including a contact person at the Department. Children who are 16 or over will usually be able to give their own consent but even where this is so, the Contractor, in consultation with the Department, should consider whether it is also appropriate for parents, guardians or other appropriate gatekeepers (e.g. schools, Local Authorities) to be informed when a child has been invited to participate in research.

11. PROJECT COMMUNICATION PLAN

The Contractor shall work with the Project Manager and Steering Group to agree the content of the Project Communication Plan on the standard Department Communication Plan Template at the start of the Project, and to review and update at agreed key points in the Project and at the close of the Project. The Communication Plan shall set out the key audiences for the Project, all outputs intended for publication from the Project, the likely impact of each output, and dissemination plans to facilitate effective use by the key audiences.

End of Schedule One
