Customer Responsibilities

- Overall product ownership for the EESSI project including setting priority and engaging DWP resources to participate as agreed necessary to facilitate agreed timeframes.
- Provide appropriate and timely access to an Azure tenant for use within the project.
- Providing appropriate and timely access to any other relevant systems, tools, processes and methods necessary for Sol-Tec to build the EESSI Azure Infrastructure platform.
- Participate in Daily stand up, sprint planning and retrospective meetings as determined necessary during delivery.
- Participate in any testing deemed necessary to determine the success of the Azure Infrastructure deployment to Dev & Test environments.
- Complete any necessary EU documentation required for the EESSI project, including the nomination of DWP contacts used for communication with the EESSI team within the EU.
- Assist in the completion of any governance for the platform that may need to take place within DWP to validate Azure and the EESSI solution.
- Responsible for penetration testing, security or vulnerability scanning if necessary.
- Timely review and approval of all Sol-Tec deliverables.

General Assumptions

- DWP will provide appropriate Azure tenant and ability to create Azure subscriptions (ideally MSDN) to facilitate the deployment to test/dev
- DWP will assign two points of contact (Technical Delivery Leads) for Sol-Tec staff to liaise with for any DWP specific issues or approvals, and to be a liaison to any other DWP business units outside of the project team.
- DWP will create the necessary networking connectivity between SCEBS (DWP network) and Azure. If the ExpressRoute cannot be provisioned in time for the project, the scope will be updated to include IKE site-to-site VPNs if valid.
- Sol-Tec expects that DWP will provide regular access to business and technology owners and project personnel. The schedule and success depends upon the support and timely participation of DWP personnel to provide sign-off of project deliverables and to manage issues, and (if required) Change Request (within (5) business days). Delays in completing these activities could delay the engagement and impact delivery costs.
- Services will be performed at both Customer and Supplier facilities. We have assumed wherever possible work will be performed remotely, this will reduce travel costs and expenses, which have not been included.
- Whilst the goal is to deploy into production in an automated approach based on infrastructure as code however it is assumed that the deployment to Dev & test will involve some manual configuration effort and rework.
- Sol-Tec will ensure reasonable efforts to retain and maintain a consistent set of resource throughout the lifecycle of this engagement. However, Sol-Tec reserves the right to allocate additional resources necessary to complete our deliveries including allocating resources may adopt multiple project roles.
