Introduction and summary of requirements

Acceleration Support services will continue to build on the previous intentions of the tendered incubation support contract. We are now looking to scale up this support and offer it to Small to Medium-sized Enterprises (SMEs) that are funded through the priority programmes in the new Net Zero Innovation Portfolio (NZIP) and not just to the Energy Entrepreneurs Fund. To ensure that we get the best value for money from these projects, the provision of Acceleration Support will be offered alongside their project deliverables, thereby increasing the capability of companies to exploit, and commercialise their specific technology. By identifying company skills gaps and delivering bespoke support tasks the service will help to promote best practice business development and pave the way toward commercialisation.

Success comprises the following:

- Formation of new commercial and/or technical relationships through networking and exposure at key events
- Commercial progress e.g., advancement through the Commercial Readiness Levels (CRLs)
- Acquisition of enhanced commercial skills and business capability
- Private investment raised through the support and guidance of the services

BEIS is seeking to procure a Delivery Partner for this service, to help deliver its aims and objectives. The Delivery Partner is required to:

- Provide Acceleration Support Services to SMEs in the NZIP priority programmes (200 companies).
- Co-ordinate the provision of Acceleration Support across the NZIP programmes, including the delivery of bespoke acceleration plans and tasks.
- Provide one point of contact to BEIS.

Schedule 2 (Specification)

- Organise and facilitate Acceleration Support workshops for the SMEs to foster peer-2-peer learning and minimise the same support task being delivered multiple times.
- Complete discovery work investigating priority business support for SMEs working in the energy innovation section in the context of our Net Zero 2050 targets. You should be adaptable to the findings of this work and tailor your approach accordingly.

Background

Acceleration Support services (previously termed Incubation Support services) have been provided alongside the EEF since 2012, and to a small selection of Energy Innovation Portfolio (EIP) projects since 2019. Over 90 companies, primarily SMEs, have received Acceleration Support services alongside their BEIS funded project in the last EIP since 2016. Bespoke Acceleration Support has been an integral part of ensuring both value from the EIP programmes and helping them to reach their objectives; it provides business development for the SME, identifying early/new markets for sales and helping the company become investment ready. We are now looking to scale up this support and offer it to SMEs that are funded through the priority programmes* in the new NZIP.

The Acceleration programme will provide support to SMEs participating in innovation R&D programmes targeted to develop and bring new decarbonisation ideas to market by 2050. The support has run alongside the EEF for the past 7 years and early findings from an external evaluation of this programme has found the following:

- a. Most participants stated that without the inclusion of incubation (acceleration) support they would not have sourced it from the market. This suggests that there is a barrier to seeking out business support and that the programme is offering additional value to participants, rather than replacing activity which would have taken place anyway.

There are some direct, tangible outcomes that can be linked to incubation (acceleration) support provided – new contacts made, and commercial offers made, improvements in commercial offering, improved business planning / consumer offering

The provision of Acceleration Support is not mandatory for companies to accept alongside their funding, except for companies supported through the EEF. Although BEIS will strongly encourage companies to take up the offer as it is a valuable service that can be integral to the development of their technology and business processes. Large companies and academic institutions will not be chosen to receive acceleration support in the NZIP, the priority here is SMEs.

*At the time of writing this tender, NZIP priority programmes are described as those that have been approved or have a high likelihood approval for launch in 2021/22. These priority programmes are also expected to support either solely SME lead companies or a high proportion of SME lead companies.

Aims and Objectives

The Acceleration Support service is looking to achieve the following 5 objectives:

- Support SME's and early to mid-stage innovators to develop innovative technologies and processes.
- SMEs supported to leverage private sector funding into pre-commercial technologies and processes.
- Support technologies that are market ready with businesses capable of achieving sales in first year after grant.
- Support projects and establish technologies that are ready for a large-scale demonstration or pilot.
- Supporting SMEs with technologies or products that are suitable for follow on private investment.

Acceleration Support focusses on identifying and filling skills gaps within companies that may prevent them from bringing innovations to market effectively and providing specialist advisors to support companies in the development of appropriate knowledge and skills.

As such, the needs and requirements of the contractor have been split into 4 key delivery areas:

- a. Identification and planning of Acceleration Support requirements, to include discovery work on 'How best to support SMEs in clean tech innovation towards commercialisation'.
- b. Coordination, including quality control, feedback and evaluation.

Schedule 2 (Specification)

Crown Copyright 2019

- c. Management of acceleration tasks.
- d. Delivery of acceleration tasks.

For the successful delivery of Acceleration Support across a range of NZIP programmes, there needs to be a high level of coordination across the four main areas detailed above. The contractor requirements have been broken down in these areas to show scope, interdependencies and skills required for delivery (see (4) Methodology).

Instead, the supplier should detail in their tender response their approach to successfully and efficiently delivering these outputs within their own delivery capability. The requirements are structured and detailed to ensure that the contractor procures a supplier/s that has expertise (or is able to access expertise) across a range of state of art business support processes and most significantly has an excellent understanding of developing and progressing technical innovations within a Net Zero context. This approach supports the wider strategic objectives of promoting best practice business development and paving the way toward commercialisation for innovative technologies.

An overview of the types of Acceleration Support that should be available to projects through the service, and a description of the underlying mechanism through which the support is intended to assist the commercialisation process, is provided in the following table. It should be noted that if some types of support not listed are needed but can be sourced, these will be made available to the applicant.

Type of Support	Mechanism
Market Analysis	Assesses and segments markets, provides information about the route to market, potential partners and competitors and producing publicity materials. All of which helps firms develop their market proposition.
Business Development	Identifies how customers could benefit from the innovation and developing a deeper understanding of the customer base and sales process. This helps to modify the firms market proposition, build sales pipelines, identify customer trial sites, and potentially first strategic sales or customers.
Strategy	Develops business models and business plans for the supported company, to further develop the firms market proposition (often in preparation for investment).
Technology Support	Provides technological roadmap for the product, independent validation of testing results, provides further expert input into the technology, and provision of support for IP strategy and

	application. This helps the supported company to improve the design of their innovation and protect it from competitive threats.
Product Development Support	Support in developing prototypes, product competitive analysis, product trials, product plans. This helps the supported company move from an innovative technology towards having a commercial product.
Supply Chain	Provides clarification of supply chain needs, supports the establishment of supply chains and procurement strategies, initial manufacturing plans. This helps to develop the firm's production and scale up planning.
Team	Identifies skills gaps and supports recruitment, supports board appointments, develops project management and communication within the firm. This helps to ensure the firm has the required skills and knowledge to expand and produce / sell the product.
Fund Raising	Supports the enhancement in financial readiness skills in seeking and securing external investments, provides advice and assistance on licencing. This helps prepare the firms for the activities involved in raising further capital.
Workshops	An opportunity to provide business support to a group of companies who share a common goal and face the same barriers in the market. Workshops may be used to promote and share learnings on one specific topic and/or a range of topics that will be significant at different stages of a project lifecycle. Workshops should avoid the repetition of the same specific tasks to different companies across the portfolio.

*The Supplier will develop a customer feedback form and send to BEIS for feedback and approval before the Supplier sends out to the companies receiving support.

Interdependencies:

The acceleration support coordinator will need to liaise closely with the acceleration planners, managers, and providers to ensure the smooth and efficient delivery of the support.

Identification and planning of Acceleration Support requirements

Summary – To deliver Acceleration Plans for each of the projects identified by BEIS as requiring acceleration support. The acceleration planner should conduct an assessment of the project applicant's commercial progress (using specific business assessment tools) to identify relative strengths and gaps.

Whilst a business assessment tool provides a consistent structure, the acceleration planner needs depth of experience in technology commercialisation and assessment skills with technology and business teams, to gather specific insights and pin-point critical gaps using the tool. This expertise will be vital for building trust with the funding recipient and gaining their buy-in to the resulting acceleration plan.

Tasks:

Tasks required here should include, but not be limited to:

- Read relevant background material e.g., funding application, business plan, web search etc, to compile a list of key questions and issues to examine in greater detail and make an initial assessment of the applicant's stage of development (Technology Readiness Level)
- Arrange a face-to-face Planning Session with the key management and technical team of the company at their premises to include a demonstration (where appropriate) of technical progress to date. Ensure that, where appropriate members of the BEIS Innovation Team join the session.
- Lead the planning session, which should be in the form of a structured dialogue around the six capability areas of the assessment framework, gaining insight and identifying real gaps, and opportunities to de-risk the next stage, and necessary actions for the project and venture to make efficient progress.
- Agree the acceleration plan with the support recipient to ensure alignment on an action plan.
- Follow up with the recipient on any clarification questions or other outstanding points.
- Write up the Acceleration Plan which contains: Assessment feedback in six areas of the business; Summary of relative gaps in each area; Medium-long term business milestones/objectives.
- Prioritised actions and tasks to address gaps and prepare for next stage (Commercial and Project), including a task description or objective where appropriate, an indicative time budget, and tangible deliverables or outcomes.
- Provide feedback to the recipient, the Acceleration Coordinator, review the plan using their input, and adjust if necessary.
- Work with the Acceleration Coordinator to finalise the plan.

Deliverables:

Key deliverables should include, but are not limited to;

1. Detail proposed acceleration framework and plan for implementation.
2. Delivery of quality-assured acceleration plan for each recipient identified by BEIS.

Interdependencies:

The acceleration plans ideally need to be in place at the start of the project that BEIS is supporting. The supplier will need to be available to undertake the planning session at an appropriate time and will need to liaise with BEIS contract manager to arrange the session. Once the plans are completed the supplier will need to quality assure and finalise the plans.

- 2.2 The Supplier acknowledges that any Service Level Failure shall entitle the Buyer to the rights set out in Part A of this Schedule including the right to any Service Credits and that any Service Credit is a price adjustment and not an estimate of the Loss that may be suffered by the Buyer as a result of the Supplier's failure to meet any Service Level Performance Measure.
- 2.3 The Supplier shall send Performance Monitoring Reports to the Buyer detailing the level of service which was achieved in accordance with the provisions of Part B (Performance Monitoring) of this Schedule.

- 2.4.1 the Supplier has over the previous (twelve) 12 Month period exceeded the Service Credit Cap; and/or

Schedule 10 (Service Levels)

Crown Copyright 2019

2.4.2 the Service Level Failure:

- (a) exceeds the relevant Service Level Threshold;
- (b) has arisen due to a Prohibited Act or wilful Default by the Supplier;
- (c) results in the corruption or loss of any Government Data; and/or

2.5 Not more than once in each Contract Year, the Buyer may, on giving the Supplier at least three (3) Months' notice, change the weighting of Service Level Performance Measure in respect of one or more Service Levels and the Supplier shall not be entitled to object to, or increase the Charges as a result of such changes, provided that:

2.5.1 the total number of Service Levels for which the weighting is to be changed does not exceed the number applicable as at the Start Date;

2.5.2 the principal purpose of the change is to reflect changes in the Buyer's business requirements and/or priorities or to reflect changing industry standards; and

2.5.3 there is no change to the Service Credit Cap.

3. Critical Service Level Failure

On the occurrence of a Critical Service Level Failure:

3.1 any Service Credits that would otherwise have accrued during the relevant Service Period shall not accrue; and

3.2 the Buyer shall (subject to the Service Credit Cap) be entitled to withhold and retain as compensation a sum equal to any Charges which would otherwise have been due to the Supplier in respect of that Service Period ("**Compensation for Critical Service Level Failure**"),

provided that the operation of this paragraph shall be without prejudice to the right of the Buyer to terminate this Contract and/or to claim damages from the Supplier for material Default.

Part A: Service Levels and Service Credits

1. Service Levels

If the level of performance of the Supplier:

1.1 is likely to or fails to meet any Service Level Performance Measure; or

1.2 is likely to cause or causes a Critical Service Failure to occur,

the Supplier shall immediately notify the Buyer in writing and the Buyer, in its absolute discretion and without limiting any other of its rights, may:

1.2.1 require the Supplier to immediately take all remedial action that is reasonable to mitigate the impact on the Buyer and to rectify or prevent a Service Level Failure or Critical Service Level Failure from taking place or recurring;

1.2.2 instruct the Supplier to comply with the Rectification Plan Process;

1.2.3 if a Service Level Failure has occurred, deduct the applicable Service Level Credits payable by the Supplier to the Buyer; and/or

1.2.4 if a Critical Service Level Failure has occurred, exercise its right to Compensation for Critical Service Level Failure (including the right to terminate for material Default).

2. Service Credits

2.1 The Buyer shall use the Performance Monitoring Reports supplied by the Supplier to verify the calculation and accuracy of the Service Credits, if any, applicable to each Service Period.

2.2 Service Credits are a reduction of the amounts payable in respect of the Deliverables and do not include VAT. The Supplier shall set-off the value of any Service Credits against the appropriate invoice in accordance with calculation formula in the Annex to Part A of this Schedule.

Annex A to Part A: Services Levels and Service Credits

Service Credits for Acceleration Support Services

It is expected that all KPIs will be achieved 95% of the time and ongoing discussion with suppliers will reflect this. However, service credits will only be applicable if the KPI performance falls below 85% for KPI 1 and 2 and 70% for KPI 3. If the supplier does not achieve these success rates as outlined in Annex C, there will be a penalty clause of 0.5% Service Credit gained for each percentage under the specified performance measure.

Worked Example:

Over the course of the quarter, and across each monthly review of KPI RAG status, the supplier achieved KPI 1 (*Percentage of acceleration support plans created within 10 working days of kick off meeting with support recipient*) 79% of the time.

As the service credits scheme is applicable for 85% or under, there will be service credits applied on (85% - 79%) 6%.

The service credit will be 0.5% for every percentage. Therefore, $0.5\% \times 6 = 3\%$ service credits will be applied to the quarterly invoice.

In the instance that the volume of work is deemed too low for the justification of service credits, BEIS have the authority to not apply the credits. The outlined process of KPI RAG status monitoring and performance tracking will continue to be measured in this instance.

Part B: Performance Monitoring

1. Performance Monitoring and Performance Review

- 1.1 Within twenty (20) Working Days of the Start Date the Supplier shall provide the Buyer with details of how the process in respect of the monitoring and reporting of Service Levels will operate between the Parties and the Parties will endeavour to agree such process as soon as reasonably possible.
- 1.2 The Supplier shall provide the Buyer with performance monitoring reports ("**Performance Monitoring Reports**") in accordance with the process and timescales agreed pursuant to paragraph 1.1 of Part B of

Schedule 10 (Service Levels)

Crown Copyright 2019

this Schedule which shall contain, as a minimum, the following information in respect of the relevant Service Period just ended:

- 1.2.1 for each Service Level, the actual performance achieved over the Service Level for the relevant Service Period;
 - 1.2.2 a summary of all failures to achieve Service Levels that occurred during that Service Period;
 - 1.2.3 details of any Critical Service Level Failures;
 - 1.2.4 for any repeat failures, actions taken to resolve the underlying cause and prevent recurrence;
 - 1.2.5 the Service Credits to be applied in respect of the relevant period indicating the failures and Service Levels to which the Service Credits relate; and
 - 1.2.6 such other details as the Buyer may reasonably require from time to time.
- 1.3 The Parties shall attend meetings to discuss Performance Monitoring Reports ("**Performance Review Meetings**") on a Monthly basis. The Performance Review Meetings will be the forum for the review by the Supplier and the Buyer of the Performance Monitoring Reports. The Performance Review Meetings shall:
- 1.3.1 take place within one (1) week of the Performance Monitoring Reports being issued by the Supplier at such location and time (within normal business hours) as the Buyer shall reasonably require;
 - 1.3.2 be attended by the Supplier's Representative and the Buyer's Representative; and
 - 1.3.3 be fully minuted by the Supplier and the minutes will be circulated by the Supplier to all attendees at the relevant meeting and also to the Buyer's Representative and any other recipients agreed at the relevant meeting.
- 1.4 The minutes of the preceding Month's Performance Review Meeting will be agreed and signed by both the Supplier's Representative and the Buyer's Representative at each meeting.
- 1.5 The Supplier shall provide to the Buyer such documentation as the Buyer may reasonably require in order to verify the level of the performance by the Supplier and the calculations of the amount of Service Credits for any specified Service Period.

2. Satisfaction Surveys

- 2.1 The Buyer may undertake satisfaction surveys in respect of the Supplier's provision of the Deliverables. The Buyer shall be entitled to notify the Supplier of any aspects of their performance of the provision of the Deliverables which the responses to the Satisfaction Surveys reasonably suggest are not in accordance with this Contract.

Annex B: Key Performance Indicators

Information on the specific KPIs and scoring methodology can be found in the table below.

	Key Performance Criterion description	Key Indicator	Performance Measure
1	<i>Percentage of draft acceleration support plans created and sent to support recipients within 10 working days of acceleration needs assessment meeting with support recipient</i>	Time/Quality	100% = Green 85-99% = Amber Below 85% = Red
2	<i>Percentage of initial acceleration support tasks/activity (e.g. 1-to-1 company support, one-to-many support) assigned to an appropriate expert within 10 working days of the final approved acceleration plan being uploaded to the Teams site for sharing documents between the Supplier and the Buyer</i>	Time/Quality	100% - Green 85-99% = Amber Below 85% = Red
3	<i>Customer satisfaction score maintained (%)*</i>	Feedback	80% and over = Green 70-79% = Amber Below 70% = Red

*THE SUPPLIER will develop a customer feedback form and send to the Buyer for feedback and approval before the Supplier sends out to the companies receiving support.

Performance of each KPI will be recorded against a red, amber, green “score”, as described below. KPIs must maintain a green rating in order to demonstrate that the service is being delivered to an adequate quality. In the instance when KPIs are scoring ‘red’, service credits will apply.

RAG	Methodology
Green	If a green score has been awarded to a KPI then no further action is required from the Supplier, with the exception of continuing activities to maintain this score for the next reporting period.
Amber	If an amber score is awarded, the Contractor should examine and implement measures to prevent this KPI being scored an amber or below in subsequent reporting periods. The Authority will not expect formal improvement measures at that stage. If a single KPI is awarded amber in two consecutive invoice periods, or twice in four consecutive invoicing periods then the Contractor should create a Remediation Plan at their own cost. This should detail how they will change their practices to

Schedule 10 (Service Levels)

	prevent another amber score being awarded for this KPI. The timeline for producing this Remediation Plan should be agreed between the Authority and the Contractor and should only be implemented following approval by the Authority. The Authority reserves the right to terminate the Contract if a satisfactory Remediation Plan cannot be agreed.
Red	If a red score is awarded on each quarterly review, service credits will apply. If the Contractor scores a red in the same KPI in any subsequent period throughout the duration of the Contract, the Authority reserves the right to terminate the Contract. The Authority also reserves the right to terminate this Contract based on a red score without requesting a Remediation Plan (as in Amber), if it is of the Authority's view that a material default has occurred. The Authority reserves the right to suspend, or partially terminate this Contract, while a Remediation Plan is being developed and agreed, where there is justification to do so.

The Supplier shall ensure that each of the Insurances is effective no later than
the Start Date in respect of those Insurances set out in the Annex to this Schedule and those required by applicable Law; and
- 1.2 The Insurances shall be:
 - 1.2.1 maintained in accordance with Good Industry Practice;

2. How to manage the insurance

- 2.1 Without limiting the other provisions of this Contract, the Supplier shall:
