Station 4 has O.S. National Grid co-ordinates based on the National GPS network using static GPS observations. All other stations are based on a plane grid with an origin at Station 4 and preserving the O.S. National Grid rotation but with O.S. scale factor removed.

- NOTES
1. Station 4 has O.S. National Grid co-ordinates based on the National GPS network using static GPS observations. All other stations are based on a plane grid with an origin at Station 4 and preserving the O.S. National Grid rotation but with O.S. scale factor removed.
 2. Levels are related to the O.S. National GPS network.
 3. Contours show depth of sediment at 2m intervals.
 4. Water level at time of survey: 61.7m AOD.
