10.1.1 receive and use the Deliverables; and

10.1.2 use the New IPR.

The termination or expiry of the Contract does not terminate any licence granted under this clause 10.

10.2 Any New IPR created under the Contract is owned by the Buyer. The Buyer gives the Supplier a royalty-free, non-exclusive, non-transferable licence to use, copy, and adapt any Existing IPRs and the New IPR which the Supplier reasonably requires for the purpose of fulfilling its obligations during the Term and commercially exploiting the New IPR developed under the Contract. This licence is sub-licensable to a Subcontractor for the purpose of enabling the Supplier to fulfil its obligations under the Contract, and in that case the Subcontractor must enter into a confidentiality undertaking with the Supplier on the same terms as set out in clause 15 (What you must keep confidential).

10.3 Unless otherwise agreed in writing, the Supplier and the Buyer will record any New IPR and keep this record updated throughout the Term.

10.4 Where a Party acquires ownership of intellectual property rights incorrectly under this Contract, it must do everything reasonably necessary to complete a transfer assigning them in writing to the other Party on request and at its own cost.

10.7 If an IPR Claim is made or anticipated, the Supplier must at its own option and expense, either:

10.7.1 obtain for the Buyer the rights in clause 10.1 without infringing any third party intellectual property rights; and

- 10.7.2 replace or modify the relevant item with substitutes that don't infringe intellectual property rights without adversely affecting the functionality or performance of the Deliverables.

 - (b) the Buyer agrees to those usage rights; and
 - (c) the owner or authorised licensor of the Third Party IPR grants full global usage rights to the Buyer on those terms; or

III. Annex 1 – Processing Personal Data

Not Used.

IV. Annex 2 – Specification

1. INTRODUCTION

- 1.1. The Department of Health and Social Care (DHSC) (the Buyer) supports ministers in leading the nation's health and social care to help people live more independent, healthier lives for longer.
- 1.2. As part of DHSC, the Health Improvement Directorate brings together expert advice, analysis and evidence with policy development and implementation to shape and drive health improvement and ill-health prevention for government.
- 1.3. The Buyer is seeking the support of a Supplier to research the tobacco packaging market and design new packaging to incorporate quit themed pack inserts for cigarettes and hand rolling tobacco (HRT).

2. DEFINITIONS

Expression or Acronym	Description
The Buyer	The Department of Health and Social Care
Defra	Department for Environment, Food & Rural Affairs
DHSC	The Department of Health and Social Care
HRT	Hand rolling tobacco
OHID	The Office for Health Improvement and Disparities

3. PURPOSE

- 3.1 In the UK government's health mission, we pledged to legislate to require tobacco companies to include information in tobacco products that dispels the myth that smoking reduces stress and anxiety.
- 3.2 Pack inserts are positive quit-themed messages and advice inside tobacco packets to help smokers to quit which could help complement the existing regulations on tobacco packaging.
- 3.3 A UK-wide consultation on introducing pack inserts, led by the Office for Health Improvement and Disparities (OHID) in DHSC and agreed and undertaken in partnership with the devolved governments, ran for 8 weeks from 14 August to 10 October 2023. Our response to this consultation was published on Tuesday 5 November 2024.
- 3.4 Our response commits to working with the devolved governments to mandate pack inserts for cigarettes and HRT. These products are already subject to standardised packaging meaning that the packaging of the products has to be in a shiny drab dark brown, cigarette packets must be cuboid and there are a minimum of 20 cigarettes in a packet and a minimum of 30g of HRT in a packet alongside other requirements. The response notes that we intend on incorporating pack inserts into the internal packaging of these products, through a 'slide and shell' design for cigarettes packets and on the flap of HRT as we are mindful of the environmental concerns related to loose inserts.

- 3.5 In order to introduce pack inserts to these products, we need to have a better understanding of how the current legislative packaging requirements are implemented for these products and options for amending the packaging in order to incorporate pack inserts. Designs and messaging for the pack inserts have been drafted and tested by the University of Stirling, but we need to alter the current designs for the drafted pack inserts. This is to ensure that the designs best portray the evidence-based health messaging, including the appropriate branding and are visually consistent. Undertaking this work will allow us to have the necessary details required to draft secondary legislation, produce updated designs and accompanying guidance for industry.
- 3.6 Additionally, we will also explore the packaging landscape for all tobacco products, tobacco related devices, cigarette papers and herbal smoking products in order to assess whether standardisation of this packaging is practicable and whether it would be suitable to introduce pack inserts to these products. This piece of work will be a second phase of work that will be procured separately with a separate specification service description.

4. BACKGROUND

Pack inserts

- 4.1 Pack inserts were first introduced in Canada and have also been introduced in Israel. Australia recently announced its intention to introduce them.
- 4.2 Canada introduced pack inserts over 20 years ago. Examples of the images used in Canada alongside the relevant legislation can be found here: [Health-related messages for all tobacco product packaging: Health information messages - Canada.ca](#).
- 4.3 Canada introduced legislation that standardised the packaging of cigarette packets to slide and shell in 2019 and retailers had to comply with these requirements by 2022. The slide and shell design means that people have to push up an interior sliding compartment with the health messaging on in order to open the package and remove cigarettes. The information is presented to the smoker each time they take a cigarette from the pack. Additional further details on slide and shell can be found here: [Canada Gazette, Part 2, Volume 157, Number 12: Regulations Amending the Tobacco Products Regulations \(Plain and Standardized Appearance\)](#).
- 4.4 An evaluation of the Canadian pack inserts policy, suggests that tobacco pack inserts can increase the likelihood of smokers making a quit attempt, by providing motivational cessation messages and information on the benefits of quitting. These complement the graphic health warnings already present on tobacco packaging.
- 4.5 As noted in the government's draft impact assessment, it is estimated that there would be around 150,000 additional quit attempts and 30,000 successful quits over 2 years if pack inserts were introduced for cigarettes and HRT in the UK.

Standardised packaging

- 4.6 The UK is a global leader in tobacco control and our legislation is one of the most comprehensive in the world, as confirmed by the [Tobacco Control Scale](#). Tobacco packaging regulations are already in place:
1. [The Standardised Packaging of Tobacco Products Regulations 2015](#) (SPOT)
 2. [The Tobacco and Related Products Regulations 2016](#) (TRPR)
- 4.7 The current packaging requirements for tobacco products varies depending on the product.

4.8 Both cigarettes and HRT are already subject to the most stringent regulations under SPOT including standardised packaging. This includes (but is not limited to):

- Mandatory colours – The external packaging for cigarettes and HRT must be a non-shiny drab dark brown (Pantone 448C).
- Minimum pack sizes – Minimum of 20 cigarettes in a packet and HRT in packages of at least 30 grams
- Set shapes - Cigarette packets must be cuboid but can have bevelled or rounded edges. Cigarette packets must have either a flip top lid or a shoulder box hinged lid. HRT packets must be either a pouch, cylindrical or cuboid shape, but can have rounded edges.
- Specific material – Cigarette packets can be made of carton or soft material.
- Branding - Brand names are permitted, but must be in a set position, font and maximum size. All other trademarks and logos are prohibited.

4.9 The provisions above currently apply and we have the legislative powers to amend these provisions. The upcoming Tobacco and Vapes Bill intends to provide powers to further adapt the above.

4.10 A number of products must have a combined picture and health text warning (cigarettes, HRT, certain cigars and cigarillos, pipe tobacco and waterpipe products) and under TRPR all tobacco products must include a text health warning. Packaging requirements do not apply to cigarette papers and tobacco related devices (such as devices to heat tobacco).

5. SCOPE OF REQUIREMENT

Market research and feasibility:

5.1 Conduct an audit of the current tobacco market, including the types of products and packaging currently available for cigarettes and HRT in the UK. This includes:

- the types and prevalence of difference packaging shapes currently available including the share of the market that they make up.
- the types of materials used in current packaging manufacturing including the prevalence of different materials and the share of the market that they make up.
- examples and case studies of the packaging types currently available.
- examples and case studies of packaging used internationally that allow for pack inserts to be attached internally. This could be based on international case studies including the packaging forms used in Canada.
- the costs associated with current packaging manufacturing (within the limitations of commercial sensitivities).
- the costs associated with potential changes to packaging requirements for the different types of packaging currently available (within the limitations of commercial sensitivities). Include a breakdown of where the expected costs would be e.g. change in manufacturing equipment, changes in materials used.
- provide a view of the steps required by HRT and cigarette manufacturers to implement the different proposed packaging options. e.g. identify whether new equipment would need to be purchased and estimate the likely costs of this change.
- Where necessary, engage with members of the tobacco industry in order to source the above information in the format deemed most suitable such as surveys or interviews. The tobacco industry will be aware of this work, as it has been announced in the call for evidence on standardised packaging and the government's response to the pack inserts consultation.

- Provide a report outlining the results of the market research listed above. This information will be used for any future impact assessments (IA).

5.2 Maintain an understanding of DHSC's requirements to comply with article 5.3 of the World Health Organisation (WHO) Framework Convention on Tobacco Control (FCTC). Guidance available here: [Guidance for government engagement with the tobacco industry - GOV.UK \(www.gov.uk\)](https://www.gov.uk/guidance/guidance-for-government-engagement-with-the-tobacco-industry)

Design Services and Reporting:

Review the existing pack insert designs provided by the Buyer, noting that these have been tested and are deemed to be effective. The themes are as follows:

- mental health
- physical health
- conception and pregnancy
- financial benefits
- stop-smoking aids
- quitting in older age
- perseverance
- cravings

1.2 We have agreed with the Department for Environment, Food & Rural Affairs (Defra) to explore a message on littering. This could be the inclusion of a small (existing) logo reminding users to throw away their litter. We are exploring options here, and it will need to be agreed with Defra.

5.3 Changes include:

- Considering any updates to the wording. The current proposed wording may need to be amended, for example for copy writing purposes.
- Consider any changes required to the fonts, colouring, images and overall designs, to ensure these are consistent and effective.
- Consider any changes required to the images or illustrations to ensure these are consistent and effective, including sourcing the appropriate licences.
- Considering how to incorporate appropriate Government branding.

5.4 Where appropriate, base fonts, colouring, images and overall designs on the best available health evidence (such as evidence on incentivising quits or nudge theory).

- Provide 2-3 options for final pack insert designs, including examples for 2-3 themes.
- To work with a third party research organisation to undertake qualitative research on these updated designs. This will include providing mock ups made from card or paper as appropriate for both loose and attached pack inserts for both cigarettes and hand rolling tobacco.
- Present options and findings to the Buyer and rollout designs to all the pack insert designs once agreed. Provide final master design templates for the pack inserts that will be available for industry to access.
- Provide designs for loose inserts and updated packaging that incorporates the inserts to the internal packaging. Designs should include:

- consideration for options such as 'slide and shell' for cigarettes and printing on the flap for HRT, or alternative options based on international case studies.
 - include dimensions and materials for the proposed packaging changes.
 - compliance with the relevant requirements such as the combined health warnings and security measures such as [Tobacco Track & Trace requirements \(Tobacco product traceability - GOV.UK \(www.gov.uk\)\)](https://www.gov.uk/government/publications/tobacco-track-and-trace-requirements). We do not want the new designs to result in major changes to these elements of the packaging.
- Provide up to two rounds of amendments to the designs, if required, following the initial design stage and one round of amendments following the third party research of the agreed designs if required.
 - Provide clarification where required during the drafting of statutory instrument consultation and, if necessary, provide two rounds of minor amendments after the consultation and up to two rounds of amendments with minor changes during the progression of this work through Parliament if required.

Guidance

5.5 Draft a guidance document to be published for industry once the statutory instrument has been consulted on and laid. This guidance should include all the details required by industry to implement the changes, including the exact dimensions and materials permitted and the pack insert designs that are to be used.

DHSC will:

5.6 Provide the list of companies that sell cigarette and HRT in the UK. The details of the Supplier will also be provided to manufacturers to allow for this engagement.

5.7 Provide the current designs for the pack inserts and provide the correct government/NHS branding.

5.8 Provide guidance on the interpretation of existing legislation where required.

5.9 Nominate a set individual to be a key point of contact for the service provider. This individual will attend the regular meetings and manage the relationship.
