

NOTES

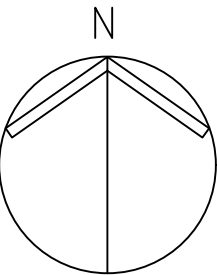

The proposals for new exercise equipment at Lilliput Park include stations set at intervals along one of the paths through the centre of the park.

The equipment is planned in pairs to allow friends to exercise together and then move on to the next station.

The layout is indicative and suppliers are invited to submit their suggestions for suitable equipment.

The preference is for simple items, including items that can be used by wheelchair users or people with other mobility problems.

Each station should include a post with instructions for using the equipment, that also offers a place for dog walkers to tie their dogs to whilst they use the equipment.
