 - A3-6-2 Where it considers that the Supplier has at the time of the award of the Contract been in one of the situations referred to in Regulation 57(1) of the PCR 2015, including as a result of the application of regulation 57(2), and should therefore have been excluded from the procurement procedure;
 - A3-6-3 Where the Contract should not have been awarded to the Supplier in view of a serious infringement of the obligations under the EU Treaties and Directive 2014/24/EU of the European Parliament and of the Council that has been declared by the Court of Justice of the European Union in a procedure under Article 258 of the TFEU;

A3-6-4 Where the European Commission sends a reasoned opinion to the United Kingdom or brings the matter before the Court of Justice of the European Union under Article 258 of the TFEU alleging that the Contract should not have been awarded to the Supplier in view of a serious infringement of the obligations under the Treaties and Directive 2014/24/EU of the European Parliament and of the Council; or

A3-6-6 Such termination shall be effective immediately or at such later date as is specified in the notice. The Contracting Authority shall not incur any liability to the Supplier by reason of such termination and shall not be required to pay any costs, losses or damage to the Supplier. Termination under this clause shall be without prejudice to any other rights of the Contracting Authority.

A3-7 The Contracting Authority or UK SBS acting as an agent on behalf of the Contracting Authority shall at any time have the right for convenience to terminate the Contract or reduce the quantity of Services to be provided by the Supplier in each case by giving to the Supplier reasonable written notice. During the period of notice the Contracting Authority may direct the Supplier to perform all or any of the work under the Contract. Where the Contracting Authority has invoked either of these rights, the Supplier may claim reasonable costs necessarily and properly incurred by him as a result of the termination or reduction, excluding loss of profit, provided that the claim shall not exceed the total cost of the Contract. ANNEX A - SPECIFICATION

1. Introduction and summary of requirements

The Government Office for Science, part of the Department for Business, Energy and Industrial Strategy (the Authority) is developing a classification system for emerging technology in order to:

- a. facilitate better understanding of the relationships and linkages between technologies
- b. reduce confusing conversations around semantics when discussing technologies – aiding joined up work on tech across Government
- c. provide an indexing structure for our library of reports and other Emerging Technology (EmTech) products.

Mission Statement:

The mission is to develop a light-touch and flexible system of categorising technologies, and the relationships between them, to facilitate the sharing of insights across Government. This taxonomy needs to:

- include definitions and search terms for 150 – 200 priority technologies that are currently of interest to x-HMG stakeholders. The Authority will provide a provisional list of technologies and definitions, and would welcome suggestions of additional candidate technologies for inclusion by the provider.
- be ‘application agnostic’. The Authority considers technologies through multiple policy lenses. Exclusion of information on specific applications of when defining technologies will mean outputs are relevant to a wide range of policy teams, and will mitigate bias towards any specific technology applications or departmental interests.
- comprise a schema that flexibly accommodates a broad array of cross-government technology interests.

The project will also describe the relationships (e.g., enabling links) between technologies, their applications, and links back to fundamental science. Construction of these rich semantic relationships will allow stakeholders to rapidly understand the landscape surrounding specific technology areas, facilitating better policy development in this space. The Authority would like to explore the adoption an existing classification schema for the Science/R & D layer (RTIC Data City classifications, Fields of Research¹). The taxonomy will be integrated with the Authority’s EmTech web application, accessed by civil servants only, in a Linked Data format.

Overall Requirement: the Authority requires two types of support that will be advertised as **two separate lots**. Suppliers who can deliver one or both lots are encouraged to submit a bid.

LOT 1: Elicitation of Subject Matter Experts (SMEs) to help define, classify and relate a longlist of emerging technologies.

LOT 2: Provision of semantic web and taxonomic expertise. This specification and contract applies to Lot 2 only.

2. Background

Science and Technology is currently a high priority policy area across Whitehall. For example, the recent Integrated Review placed Science & Technology at the heart of the Governments vision for the UK’s role in the world for the next decade, and leading to the formulation of the National Science and Technology Council chaired by the Prime Minister. Whilst the number of teams working on technology policy is rapidly increasing,

¹ <https://dimensions.freshdesk.com/support/solutions/articles/23000018826-what-is-the-background-behind-the-fields-of-research-for-classification-system->

this has created new challenges in ensuring consistency and join-up across teams and departments. The Authority's Emerging Technology team's objectives are to:

- a) Provide a centralised technology scanning service
- b) Support better decision making with data and analysis
- c) Strengthen cross government collaboration on EmTech

One specific barrier to achieving these goals is language. Currently, the lack of a standardised classification system for technologies across Whitehall is resulting in confusion around semantics when discussing technology policy issues, particularly within non-specialist policy teams. This issue also compounds a lack of interoperability between x-HMG technology work (horizon scanning, reports, data, analytical work) as well as potential effort duplication.

With departments focussing on specific technologies and applications to meet their policy objectives, the Authority's cross-cutting perspective of the Whitehall technology ecosystem enables these pervasive issues to be addressed. The Authority has strong relationships across Whitehall, and has had **significant buy in from a diverse pool of stakeholders to develop a standardised classification system for emerging technology**. The upcoming release of a new EmTech web application and insights dashboard (a tool for x-hmg customers to obtain data and insight on specific technologies) provides an ideal platform to publish this new classification system – providing a semantic reference point for HMG departments to map technology work to. The taxonomy will be used to index all of the resources hosted on the platform, enabling users to search and retrieve all relevant material related to a specific concept.

The Authority investigates emerging technologies through multiple policy lenses (e.g. national security & defence, environment, finance, health etc.) to ensure products and analyses are accessible to a broad range of policy 'customers' across Whitehall. The Authority is therefore looking to develop an 'application agnostic' taxonomy to mitigate bias towards specific policy areas.

3. Aims and Objectives

Project Aim:

To develop a light-touch and flexible system of categorising technologies, and defining the relationships between them, to facilitate the sharing of insights across Government.

Objectives:

1. Facilitate the understanding of links between technologies, between technologies and their applications, and fundamental science – primarily using a knowledge graph approach
2. Enable products and information from different departments to be linked together in a standardised way – reducing duplication and improving consistency
3. Inform search strategies for gathering data about technologies from external sources (e.g. publication data, patent analysis, public literature, data on funding rounds for technology companies)
4. Inform horizon scanning methods for new technologies through the identification of converging technology areas
5. Reduce distracting conversations around semantics when engaging with stakeholders
6. Provide a schema to index a EmTech library of reports, and tag documents with specific concepts

Separately the service provider should specify and set aside an agreed budget and day rates for additional unforeseen call off work of up to 10 days during the contract.	To be agreed and authorised during the project

5. Ownership and Publication

All products and intellectual property developed during the project will be owned by Her Majesty's Government. The Authority may publish some non-sensitive aspects of the taxonomy (such as the glossary) on Gov.uk in due course.

6. Quality Assurance

To ensure deliverables for both lots are achieved and outputs are of a high quality, service providers should demonstrate internal mechanisms in place to ensure this (e.g., ISO 9000 certification). For organisations who do not hold ISO 9000 certification, a clear description of specific and robust quality management systems equivalent to the certificate should be clearly stated. In addition, service providers should ensure that project personnel involved hold appropriate levels of professional experience and competence for the tasks assigned, with clear processes for technical and quality checks on outputs.

7. Challenges

Key challenges of the project identified by the Authority:

1. Outputs of research become redundant due to the rapid rate of change in this sector
2. Outputs not deemed fit for purpose by internal stakeholders
3. Project management across multiple organisations
4. Elicitation of sufficiently broad expertise at pace
5. Delivery of outputs at pace

6. Balance of detail (service providers understanding the 'broad and shallow' focus of the Authority, and proposing an agile solution to reflect this)

8. Ethics

All applicants will need to identify and propose arrangements for initial scrutiny and on-going monitoring of ethical issues. The appropriate handling of ethical issues is part of the tender assessment exercise and proposals will be evaluated on this as part of the 'addressing challenges and risks' criterion.

We expect contractors to adhere to the following GSR Principals:

1. Sound application and conduct of social research methods and appropriate dissemination and utilisation of findings
2. Participation based on valid consent
3. Enabling participation
4. Avoidance of personal harm
5. Non-disclosure of identity and personal information

9. Working Arrangements

The successful contractor for each lot, or for a combined lot contract will be expected to identify a named point of contract through whom all enquiries can be filtered. The Authority will assign a project manager to the project who will be the central point of contact. **This project is being developed in collaboration with Innovate UK. The contractor(s) will be working closely with key stakeholders across government, as well as with each other. Meetings and presentations will take place remotely (via MS Teams or similar) unless stated otherwise.**

10. Skills and expertise

The Authority would like you to demonstrate that you have the skills and capabilities to undertake the project. Your tender response should include a summary of each proposed team members expertise and capabilities.

Contractors should propose job titles of the project team, and include the tasks and responsibilities for each role. This should be clearly linked to the work programme, indicating the grade/ seniority of role and number of days allocated to specific tasks. Contractors should not identify the individual(s) who will be responsible for managing the project.

11. Consortium Bids

In the case of a consortium tender, only one submission covering all the partners is required but consortia are advised to make clear the proposed role that each partner will play in performing the contract as per the requirements of the technical specification. We expect the bidder to indicate who in the consortium will be the lead contact for this project, and the organisation and governance associated with the consortia.

Contractors must provide details as to how they will manage any sub-contractors and what percentage of the tendered activity (in terms of monetary value) will be sub-contracted.

If a consortium is not proposing to form a corporate entity, full details of alternative proposed arrangements should be provided in the Annex of the bid. However, please note BEIS reserves the right to require a successful consortium to form a single legal entity in accordance with Regulation 28 of the Public Contracts Regulations 2006.

BEIS recognises that arrangements in relation to consortia may (within limits) be subject to future change. Potential Providers should therefore respond in the light of the arrangements as currently envisaged. Potential

Providers are reminded that any future proposed change in relation to consortia must be notified to BEIS so that it can make a further assessment by applying the selection criteria to the new information provided.

12. Budget

The budget for this project is £40,000 - £60,000 for Lot 1 and £40,000 - £50,000 for Lot 2. Alternatively, contractors may bid for both Lots and include cost efficiencies, estimated costs £75,000-£110,000.

Contractors should provide a full and detailed breakdown of costs (including options where appropriate). This should include staff (and day rate) allocated to specific tasks.

Cost will be a criterion against which bids which will be assessed.

Payments will be linked to delivery of key milestones. The indicative milestones and phasing of payments will be linked receipt and acceptance of outputs for each respective lot as set out in table 2 and 4. This can be adjusted and agreed with the contractor based on the tender response.

In submitting full tenders, contractors confirm in writing that the price offered will be held for a minimum of 60 calendar days from the date of submission. Any payment conditions applicable to the prime contractor must also be replicated with sub-contractors.

The Authority aims to pay all correctly submitted invoices as soon as possible with a target of 10 days from the date of receipt and within 30 days at the latest in line with standard terms and conditions of contract.

13. Evaluation of Tenders

Contractors are invited to submit full tenders of no more than 16 pages for individual lots, or 33 pages for a combined offer, excluding declarations. Tenders will be evaluated by at least three BEIS staff. Requirements for the tender process vary based on whether bidders wish to bid for individual lots or both lots as set out below:

Lot 1	Lot 2	Combined	Tender response required	Price Schedule
X			For Lot 1 only	For Lot 1 only
	X		For Lot 2 only	For Lot 2 only
X	X		Two separate responses for 1 and 2	Two price schedules covering Lot 1 and 2 separately
