Service attributes	Service type	Service type	
	What's your service called? Include your service name		
Service name	only. Don't use extra keywords.	What's your service called?	Include your service name only. Don't use extra keywords.
		Provide a summary describing what your	
About your service	Provide a summary describing what your service is for.	service is for.	
,	, , ,	Which categories does your service fit	
About your service	Which categories does your service fit under?	under?	
			Include the technical features of your service, for example '"real-time
			reporting' or '~remote access'. 10 words for each feature, 10 features
Service features and benefits	Service features and benefits	List the service features.	maximum.
			Include the benefits that show how your service helps users improve their
			working processes. Use active phrases, for example "publish content from
			multiple devices' or '~quickly manage content on the move'.
Service features and benefits	Service features and benefits	List the service benefits.	10 words for each benefit, 10 benefits maximum.
	Does your service have any constraints that buyers should	List the service benefits.	
	know about? Constraints might include planned		
		Deservour convice have any constraints that	Constraints might include planned maintenance evenes are support.
Comilar come	maintenance arrangements or support being limited to		Constraints might include planned maintenance arrangements or support
Service scope	specific hardware configurations.	buyers should know about?	being limited to specific hardware configurations.
	What system requirements does your service have?		
	Examples of system requirements might be whether		
	buyers have specific software licences or anti-virus		
	technology for virtual machines.		Examples of system requirements might be whether buyers have specific
	10 words for each requirement, 10 requirements	What system requirements does your	software licences or anti-virus technology for virtual machines.
Service scope	maximum.	service have?	10 words for each requirement, 10 requirements maximum.
		Are you reselling another organisation's	
Reselling	Supplier type	services?	
		Which organisation's services do you	
Reselling	Supplier type	resell?	
		Do you provide email or online ticketing	
User support	Email or ticketing support	support?	
User support	Email or ticketing support	How quickly do you respond to questions?	Say if response times are different at weekends.
		Can users manage the status and priority of	
User support	Email or ticketing support	their support tickets?	
		What accessibility standards does your	
		online ticketing support management	
User support	Email or ticketing support	meet?	
User support	Phone support	Do you provide phone support?	
User support	Phone support	When can users get phone support?	Choose the closest match to your phone support hours.
User support	Web chat support	Do you provide web chat support?	

User support	Web chat support	When can users get web chat support?	Choose the closest match to your web chat support hours.
		What accessibility standards does your web	
User support	Web chat support	chat meet?	
			Include details of what users can and can't do.
User support	Web chat support	Describe how your web chat is accessible.	
		Describe any web chat testing that you've	
User support	Web chat support	done with assistive technology users.	
User support	Do you provide onsite support?	Do you provide onsite support?	
	Describe your support levels Describe:		Describe:
	- the support levels you provide		- the support levels you provide
	- how much the different support levels you provide cost		- how much the different support levels you provide cost
	- whether you provide a technical account manager or		- whether you provide a technical account manager or cloud support
	cloud support engineer		engineer
User support		Describe your support levels	
		Can third parties engaged by the buyer	
	Can third parties engaged by the buyer access the support	access the support features of your	
User support	features of your service?	service?	
How users work with your service	Web interface	Is there a web interface for your service?	
			Include:
			- how users can set up the service through the web interface
			- how users can make changes through the web interface
			- any limitations to how users can set up or make changes through the web
		Describe what users can and can't do using	,
How users work with your service	Web interface	your web interface.	
		What accessibility standards does your web	
How users work with your service	Web interface	interface meet?	
			Include details of what users can and can't do. EN 301 549 9: Web (link opens
		Describe how your web interface is	in a new tab) includes the features and constraints you should describe.
How users work with your service	Web interface	accessible.	in a new taby includes the reactives and constraints you should describe.
now users work with your service			
		Describe any web interface testing you've	
How users work with your service	Web interface	done with assistive technology users.	
How users work with your service	API	Is there an API for your service?	

			Include:
			- how users can set up the service through the API
		Describe what users can and can't do using	 how users can make changes through the API any limitations to how users can set up or make changes through the API
How users work with your service	API	your API.	- any minitations to now users can set up of make changes through the API
How users work with your service		Which standard automation tools work	
How users work with your service	API	with your service's API?	
		List any other automation tools your	
How users work with your service	API	service's API uses.	
		Do you provide API documentation for your	
How users work with your service	API	service?	
How users work with your service	API	How is your API documented?	
		Is there a command line interface for your	
How users work with your service	Command line interface	service?	
		Which operating systems does your	
How users work with your service	Command line interface	command line interface work with?	
			Include:
			- how users can set up the service through the command line interface
			- how users can make changes through the command line
			- any limitations to how users can set up or make changes through the
		Describe what users can and can't do using	
How users work with your service	Command line interface	the command line interface.	
,	How do you help users start using your service? Include,		
	for example, whether you provide onsite training, online	How do you help users start using your	Include, for example, whether you provide onsite training, online training, or
Onboarding and offboarding	training, or user documentation.	service?	user documentation.
		Do you provide documentation for your	
Onboarding and offboarding	Documentation	service?	
			Read about the open standard requirements for government documents
		What formats do you provide	(link opens in a new tab).
Onboarding and offboarding	Documentation	documentation in?	
		What other formats do you provide	
Onboarding and offboarding	Documentation	documentation in?	
		What accessibility standards does your	
Onboarding and offboarding	Documentation	documentation meet?	
		Describe how your onboarding and	
Onboarding and offboarding	Documentation	offboarding documentation is accessible.	
· · ·		How do users extract their data when the	
		now do users extract their data when the	

	Describe what happens at the end of the contract.		
	Describe what's included in the price of the contract and	Describe what happens at the end of the	Describe what's included in the price of the contract and what's an additional
Onboarding and offboarding	what's an additional cost.	contract.	cost.
		Does your service provide backup and	
Backups and recovery	Backup and recovery	recovery?	
			Examples include files, virtual machines, or databases. 10 words for each
Backups and recovery	Backup and recovery	What can the service back up?	backup item, 10 backup items maximum.
		How do users control what backups are	Include, for example, whether users can back up different things on a
Backups and recovery	Backup and recovery	performed?	different schedule.
Backups and recovery	Backup and recovery	What's your datacentre setup?	
Backups and recovery	Backup and recovery	How do users schedule backups?	
Backups and recovery	Backup and recovery	How do users recover backups?	
`		Do you provide infrastructure or	
Analytics	Metrics	application metrics?	
		What infrastructure or application metrics	
Analytics	Metrics	do you provide?	
		What other infrastructure or application	
Analytics	Metrics	metrics do you provide?	
		How do you provide infrastructure or	
Analytics	Metrics	application metrics?	
		Does your service scale without the user	
Scaling	Scaling	having to contact your support team?	
Scaling	Scaling	How does your service scale?	
		How do you guarantee users aren't	
	How do you guarantee users aren't affected by the	affected by the demand other users are	
Scaling	demand other users are placing on your service?	placing on your service?	
		Do you notify users if usage nears service	
Scaling	Usage notifications	limits?	
		How are users notified if usage nears	
Scaling	Usage notifications	service limits?	
		Describe the other ways users are notified	
Scaling	Usage notifications	if usage nears service limits	
			Read about the government's 1st cloud security principle: 'Data-in-transit
		How do you protect data between the	protection' (link opens in a new tab).
