Neither Party shall have any liability under or be deemed to be in breach of the Contract for any delays or failures in performance of the Contract which result from circumstances beyond the reasonable control of the Party affected. Each Party shall promptly notify the other Party in writing when such circumstances cause a delay or failure in performance and when they cease to do so. If such circumstances continue for a continuous period of more than 30 days, either Party may terminate the Contract by written notice to the other Party.

18 **TERMINATION**

18.1 UKRI may terminate the Contract in whole or in part at any time before the Goods or Services are provided with immediate effect by giving the Supplier written notice, whereupon the Supplier shall discontinue the provision of the Goods or Services (in whole or in part as applicable). - 19.4 If notified by UKRI, the Supplier shall comply with, and shall ensure that its Staff shall comply with, the provisions of:
- (a) the Official Secrets Acts 1911 to 1989; and
  - (b) section 182 of the Finance Act 1989.

## 20 **PREVENTION OF FRAUD AND CORRUPTION**

- 20.1 The Supplier shall not offer, give, or agree to give anything, to any person an inducement or reward for doing, refraining from doing, or for having done or refrained from doing, any act in relation to the obtaining or execution of the Contract or for showing or refraining from showing favour or disfavour to any person in relation to the Contract.
- 20.2 The Supplier shall take all reasonable steps, in accordance with Good Industry Practice, to prevent fraud by the Staff and the Supplier (including its shareholders, members and directors) in connection with the Contract and shall notify UKRI immediately if it has reason to suspect that any fraud has occurred or is occurring or is likely to occur.

  - (b) recover in full from the Supplier any other loss sustained by UKRI in consequence of any breach of this clause.

## 21 **DISPUTE RESOLUTION**

- 21.1 The Parties shall attempt in good faith to negotiate a settlement to any dispute between them arising out of or in connection with the Contract and such efforts shall involve the escalation of the dispute to an appropriately senior representative of each Party.

All negotiations connected with the dispute shall be conducted in confidence and without prejudice to the rights of the Parties in any further proceedings.
- 21.3 If the Parties fail to appoint a Mediator within one month, or fail to enter into a written agreement resolving the dispute within one month of the Mediator being appointed, either Party may exercise any remedy it has under applicable law.

## 22 **GENERAL**

- 22.1 Each of the Parties represents and warrants to the other that it has full capacity and authority, and all necessary consents, licences and permissions to enter into and perform

its obligations under the Contract, and that the Contract is executed by its duly authorised representative.

- 22.2 The Supplier warrants and represents that during the Term it shall not accept work from other sources that will in any way impair or affect its ability to provide the Goods or Services and comply with the terms of this Contract.
- 22.3 The Supplier must make sure that neither it nor any of its Staff or sub-contractors are placed in a position where there is or may be an actual conflict, or a potential conflict, between their interests or the interests of its Staff or sub-contractors and the Supplier's obligations under this Contract. You must disclose to us the particulars of any conflict of interest that arises.
- 22.4 A person who is not a party to the Contract shall have no right to enforce any of its provisions which, expressly or by implication, confer a benefit on him or her, without the prior written agreement of the Parties.
- 22.5 The Contract cannot be varied except in writing signed by a duly authorised representative of both the Parties.
- 22.6 The Contract contains the whole agreement between the Parties and supersedes and replaces any prior written or oral agreements, representations or understandings between them. The Parties confirm that they have not entered into the Contract on the basis of any representation that is not expressly incorporated into the Contract. Nothing in this clause 22.6 shall exclude liability for fraud or fraudulent misrepresentation.
- 22.7 Any waiver or relaxation either partly, or wholly of any of the terms and conditions of the Contract shall be valid only if it is communicated to the other Party in writing and expressly stated to be a waiver. A waiver of any right or remedy arising from a breach of contract shall not constitute a waiver of any right or remedy arising from any other breach of the Contract.
- 22.8 The Contract shall not constitute or imply any partnership, joint venture, agency, fiduciary relationship or other relationship between the Parties other than the contractual relationship expressly provided for in the Contract. Neither Party shall have, nor represent that it has, any authority to make any commitments on the other Party's behalf.
- 22.9 Except as otherwise expressly provided by the Contract, all remedies available to either Party for breach of the Contract (whether under the Contract, statute or common law) are cumulative and may be exercised concurrently or separately, and the exercise of one remedy shall not be deemed an election of such remedy to the exclusion of other remedies.
- 22.10 If any provision of the Contract is prohibited by law or judged by a court to be unlawful, void or unenforceable, the provision shall, to the extent required, be severed from the Contract and rendered ineffective as far as possible without modifying the remaining provisions of the Contract, and shall not in any way affect any other circumstances of or the validity or enforcement of the Contract.

## 23 **NOTICES**

- 23.1 Any notice to be given under the Contract shall be in writing and may be served by personal delivery, first class recorded or, subject to clause 23.3, e-mail to the address of the relevant Party set out in the Award Letter, or such other address as that Party may from time to time notify to the other Party in accordance with this clause.
- 23.2 Notices served as above shall be deemed served on the Working Day of delivery provided delivery is before 5.00pm on a Working Day. Otherwise delivery shall be deemed to occur

on the next Working Day. An email shall be deemed delivered when sent unless an error message is received.

23.3 Notices under clauses 17 and 18 may be served by email only if the original notice is then sent to the recipient by personal delivery or recorded delivery in the manner set out in clause 23.1.

## 24 **GOVERNING LAW AND JURISDICTION**

24.1 The validity, construction and performance of the Contract, and all contractual and non-contractual matters arising out of it, shall be governed by English law and shall be subject to the exclusive jurisdiction of the English courts to which the Parties submit.

Specification

1. Background						
<p><b>Introduction</b>            UKRI is working in partnership with Ofgem to develop the future delivery model of the fund for the Ofgem Strategic Innovation Fund ('the SIF'). This is a new, multi-year innovation programme to transform energy networks innovation and position the UK as the Silicon Valley of energy systems innovation.            To support this programme we are interested in designing a data science function which adds additional value to the users and customers of the programme. These include internal teams, the public, innovators (funded through the programme and otherwise), investors, policy makers, and the energy networks themselves.            Innovate UK is progressing on its journey to becoming a data-driven organisation. With the Ofgem programme just starting, we have an opportunity to look at how we better capture, analyse and use data to offer additional value. With this we want to consider how approaches could be applied and scaled across the whole organisation. The project will therefore require close working with the Innovate UK data team, as well as the Ofgem Strategic Innovation Fund team.</p> <p><b>Context and background</b>            The SIF programme was launched publicly in August 2021. It is a £450M+ funding programme primarily focussed on delivering better outcomes to energy consumers through innovation. We will capture data to support all 3 of these pillars. This includes data on;

- **The businesses and researchers working across the innovation ecosystem and funded through SIF**
- **Funding applications, and findings, learning and knowledge generated through funded projects**
- **Impact and benefits evaluation metrics**
- **Investor readiness measurements, and data regarding international opportunities**
- **Policy and regulation considerations and evidence**

Through this project we would like the chosen contractor to consider if we are capturing the correct data, structuring it in the most appropriate way, and how we can better present or make it accessible in order to meet the needs of our users. More description is provided on this below.

## 2. Aims and Objectives of the Project

What is needed for this project from the contractor?

This project will require close working with the Innovate UK data team, helping to develop capability within the Innovate UK team, as well as delivering the core deliverables of the tender. We also have a SIF programme, whom work with Ofgem to collaboratively deliver the SIF in a way which integrates and aligns with other innovation programmes. We are working together in an agile manner across these teams to develop proposals for the SIF, but which could also provide value more widely across Innovate UK and UKRI.

The Data Discovery, Analysis, and Design project is proposed to be structured in 3 phases, each covering distinct activities and outputs. However, we invite variations and advice around the delivery model of this project from respondents to help achieve the best outcomes within the project lifecycle.

	Proposed activities	Proposed outputs
Discovery	<p>Identify what information the following user groups would benefit from through innovation projects:</p> <ul style="list-style-type: none"> <li>- Ofgem and Government</li> <li>- Non-funded innovators</li> <li>- Consumers and the general public</li> <li>- Investors and stakeholders involved in procurements</li> </ul> <p>Identify how the data is currently captured within Innovate UK.</p> <p>Review the current process used for capturing and processing evaluation and benefits data.</p> <p>Review existing tools that Innovate UK are, and are not, currently using.</p>	<p>Discovery Paper outlining:</p> <ul style="list-style-type: none"> <li>• Information required by Innovation project stakeholders.</li> <li>• Methods of capture.</li> <li>• Current systems available through innovate that support capturing.</li> </ul>
Analysis	<p>Perform a SWOT and GAP analysis of these current data processes to make recommendations for future solution, including:</p> <ul style="list-style-type: none"> <li>• Which metrics are captured during the application, monitoring and reporting of projects. The format of how these are captured and whether any should be converted into alternative data formats (i.e., natural language, defined parameters etc.)</li> </ul>	<ul style="list-style-type: none"> <li>• SWOT &amp; Gap Analysis</li> <li>• Analysis and Recommendations paper</li> </ul>

	<ul style="list-style-type: none"> <li>• The KPIs and evaluation metrics captured. This includes formats, methods, and the systems used.</li> <li>• The type of capabilities we need within the team, including recruitment and contracting. Outline the best way to deliver these services (i.e. within the Ofgem team, IUK data team etc.). Please note, a wider exercise is currently ongoing across Innovate UK to understand the requirements and capabilities needed within the core data team. This project should complement and support that work.</li> </ul>	
Design	<p>Propose what data services would provide value to innovators, regulators, Government and investors. Outlining solutions that consider:</p> <ul style="list-style-type: none"> <li>• How IUK can maximise the use of existing systems (rather than build further silos of data)</li> <li>• Make recommendations for how we could create datasets through the application, reporting and monitoring processes.</li> <li>• Consider, where existing systems may not be fit for purpose where new data systems may be beneficial. For instance, to reduce data siloes.</li> </ul> <p>Outline an MVP delivery and least regrets options. These might include, but should not be limited to;</p> <ul style="list-style-type: none"> <li>• A digital investor platform.</li> <li>• A brokerage digital platform for people to find and start building proposals with.</li> <li>• An interactive insight tool showing things like location, technical focus, maturity, stakeholders etc involved in all projects.</li> <li>• A mechanism for best sharing knowledge, learning, and datasets from funded projects.</li> </ul>	<p>Solution Outline to include:</p> <ul style="list-style-type: none"> <li>• Proposed MVP Solution Architecture</li> <li>• Roadmap</li> <li>• Staffing requirements and plan</li> <li>• The potential benefits to implementation</li> </ul>

This work will be carried out remotely via video conferencing and other online tools. We expect the contractor to attend a weekly progress meeting with Innovate UK. The principal point of contact within the Innovate UK team will be within the data team, with supportive involvement from the SIF team. We expect the contractor to integrate with the existing team on a day-to-day basis, working openly and collaboratively whilst making themselves available to join workshops and meetings as necessary.

We request a 1.5 hour kick off meeting to develop a shared view of the aims of the project, to prioritise work, and agree initial deliverables. This should be led by the chosen contractor. We will also carry out a midpoint project review meeting, and a close out meeting to review and reflect on deliverables and learnings from the project.

#### Desirable skills and expertise

The external support should have capability and expertise in the following areas:

- The ability to work in an agile, flexible, and adaptable manner.
- A willingness to challenge ideas and demonstrate expertise of achieving influence across the energy industry.
- Ability to use best practice in qualitative and quantitative data analysis techniques.
- Excellent written and verbal communication skills for engaging with others and delivering findings.
- Communicating analysis and insight. Know how to use the most appropriate medium to visualise data to tell compelling and actionable stories relevant for business goals. Present, communicate and disseminate analysis and recommendations effectively, appropriately and with high impact.
- Performance measurement. Know how to enable the team to develop a performance framework including KPIs for a service or product. Provide the intelligence to support the formulation of both short-term and long-term strategic plans. Identify and analyse options, and assess their feasibility and operational impact. Ensure that business solutions are aligned with strategy, business goals and end user needs.
- Technical understanding. Up to date understanding of industry developments regarding data management, use, and analysis. In order to make cost-effective use of new and emerging tools and technologies. Keep up to date with advances in digital analytics tools and data manipulation products.
- Understanding analysis across the product life cycle. Understand the different phases of product delivery and plan and run the analysis for these. Contribute to decision-making throughout the product life cycle. Work in collaboration with user researchers, developers, and other roles throughout the product life cycle. Understand the value of analysis, how to contribute with impact, and what data sources, analytical techniques and tools can be used at each point throughout the product life cycle.
- Understanding constraints. Understand and can work within given constraints (including but not limited to technology, policy, regulatory, financial, legal, ethical, social, user constraints). Feel comfortable challenging constraints that can be changed. Know how to ensure compliance against constraints by adapting products and services where needed with a particular focus on data security and privacy concepts including data protection.

- Undertaking analysis and providing insight. Turn data into valuable insights that inform decisions. Understand analytical tools; are numerate. Know how to collect, collate, cleanse, and interpret data to derive meaningful and actionable insights. Identify and apply the most appropriate analytical techniques to bring different sources together to tell a story. Involve teams in analytics to increase consensus and challenge assumptions.
- User-centred analysis. Understand and can identify who users are and what their needs are, based on evidence. Put users first and manage competing priorities. Understand the importance of analysis to user-centred design and know how to collaborate with professions that are focused on user-centred design (for example, user research, user experience, content, design, business analysis). Act as a voice of the internal user and end user and can bring together data from varying sources to ensure that all members of agile delivery teams have access to actionable insights.
- Verification and validation of data and analysis. Know about quality assurance techniques including those used by other analytical professions. Identify the right data sources and then validate and understand how to interpret the results. Know how to ensure that data is fit for purpose.

### 3. Suggested Methodology

For the delivery of this work, we expect the successful supplier to:

- Partner with an extensive range of stakeholders. You should have a robust framework and plan for managing this engagement, and not presume reliance on UKRI, or Ofgem. UKRI will facilitate introductions with energy sector stakeholders who will be engaged with the SIF, but it is also expected that the delivery contractor would benefit from having some knowledge and networks with the energy sector (including through a partnership bid, if necessary).
- Take an agile and iterative approach to delivery. Using best practices and modern tools for effective delivery.
- Consider how the impacts of Covid-19 disruption, and hybrid ways of working could introduce risk to the delivery of this project, and how you will manage those risks. Particularly how you will effectively engage stakeholders.
- Work effectively and collaboratively with the full range of teams internal to UKRI, balancing requirements and achieving consensus.
- Embrace the delivery team's ways of working, such as:
  - Agile delivery practices
  - using tools and systems that best enable UKRI and Ofgem to make best use deliverables
  - maximising corporate knowledge retention throughout delivery i.e. strong documentation of work through the development stages of the programme
  - ensuring effective handover to the delivery team on conclusion of the work
- Ensure that the outputs are presented in a professional manner, that can be shared with Ofgem and any other delivery partners.
- Outputs delivered will be the property of Innovate UK and shared with OFGEM and BEIS.
