Annex B: Notification of Intellectual Property Rights (IPR) Restrictions

Completion of this Annex B is required as a condition of participating in this RCloud task. Nil returns must be provided.

The completed Annex B will form part of any resulting Contract so that a clear picture of any IPR restrictions is recorded.

As part of any resulting contract, the Contractor shall ensure that this Annex is kept up-to-date throughout the contract. The Authority of any proposed changes to the contract. Any proposed change will be managed in accordance with the agreement.

PART A – Notification of IPR Restrictions

1. <u>ID #</u>	2. <u>Unique Technical Data Reference Number / Label</u>	3. <u>Unique Article(s) Identification Number / Label</u>	4. <u>Statement Describing IPR Restrictions</u>

Please continue on additional sheets where necessary.

PART B – System / Product Breakdown Structure (PBS) NIL RETURN

The Contractor should insert their PBS here.

If neither hardware nor software is proposed to be designed, developed or delivered as part of the Contract, Part B is not applicable.

For Software, please provide a Modular Breakdown Structure.

Completion Notes - Part A

If any information / technical data that is deliverable or delivered under the relevant Contract conditions is, or may be, subject to any restriction (including but not limited to export restrictions) affecting the Authority's ability to use or disclose the information / technical data, then the Contractor must identify this restricted information / technical data. The Contractor shall treat such information in accordance with the same rights under the Contract it would enjoy should no restriction apply.

For example, any of the following must be disclosed:

- a) any restriction on the provision of information / technical data to the Authority; any restriction on disclosure or the use of the information / technical data by the Authority; any obligations to make payments in respect of IPR, and any patent or registered design (or applicable unregistered design right) owned or controlled by you or a third party;
- b) any allegation made against the Contractor, whether by claim or otherwise, of an infringement of IPR (whether patent, design right, copyright or otherwise) or of a breach of confidence, which relates to the performance of the Contractor's obligations under any Contract deliverables;
- c) the nature of any allegation referred to under sub-paragraph (b) above, including any request or obligation to maintain confidentiality information and / or;
- d) any action the Contractor needs to take, or the Authority is requested to take, to deal with the consequences of any allegation referred to under sub-paragraph (b) above.

Block 1	No action – This sequential numbering is to assist isolation and discussion of any line item
Block 2	Identify a unique reference number for the information / technical data (i.e. a Contractor's document or figure number) and version numbers. Documents may only be grouped and listed as a single entry where they relate to the same information / technical data and restrictions and IPR owner are the same.
Block 3	Identify the Article(s) associated with the information / technical data by entering a unique identification number. The identification number shall range from platform level down to sub-system level. This is to enable the Authority to quickly identify the specific user rights limitation (e.g. The RADAR or Defensive Aid Sub-System etc). This identification shall be entered as the Article(s) or part of it to which the restrictions apply (i.e. if the restrictions apply to a sub-system the part of the system to which the restriction boundary). <u>Any entry without a unique identifier shall be treated as a nil entry.</u> NOTE: The Authority does not accept any IPR restrictions in respect of the physical Articles themselves. Do not include a picture to any technical data stated under Block 2 as having IPR restrictions.
Block 4	This is a freeform narrative field to allow a short explanation justifying why this information / technical data is restricted.
Block 5	Identify who is the owner of the IPR in the information / technical data (i.e. copyright, design right etc). If the Contractor is the owner, identify this also.

Completion Notes - Part B

If neither hardware nor software is proposed to be designed, developed or delivered as part of the Contract, Part B. Otherwise, the Contractor must include a System / Product Breakdown Structure (PBS) in a format which is consistent with the configuration requirements of DEFSTAN 05-057, unless an alternative format better represents your design configuration structure must be provided. For reasons of clarity, it is acceptable to provide several levels of breakdown if this assists in understanding the Articles.

Details provided under Part B shall not imply any restriction of use over the Contract Articles, nor any restriction of use under the Contract. Any restrictions of such technical data must be identified within Part A.

Against each unique item within the PBS / module breakdown, one of the following categories shall be recorded:

- a) (PVF) - Private Venture Funded - where the article existed prior to the proposed Contract and its design was funded from His Majesty's Government (HMG).
- b) (PAF) - Previous Authority Funded (inc. HMG Funded) - where the article existed prior to the proposed Contract and was funded by Previous Authority Funding.
- c) (CAF) - Contract Authority Funded (inc. HMG Funded) - where the article did not exist prior to the Contract but is funded by Contract Authority Funding under this Contract.
- d) (DNM) Design Not Mature - where the article / design configuration is not yet fixed.

In combination with one of categories (a) to (d) above, the Contractor shall further identify where an item has, or will have, export control through use of the further following category:

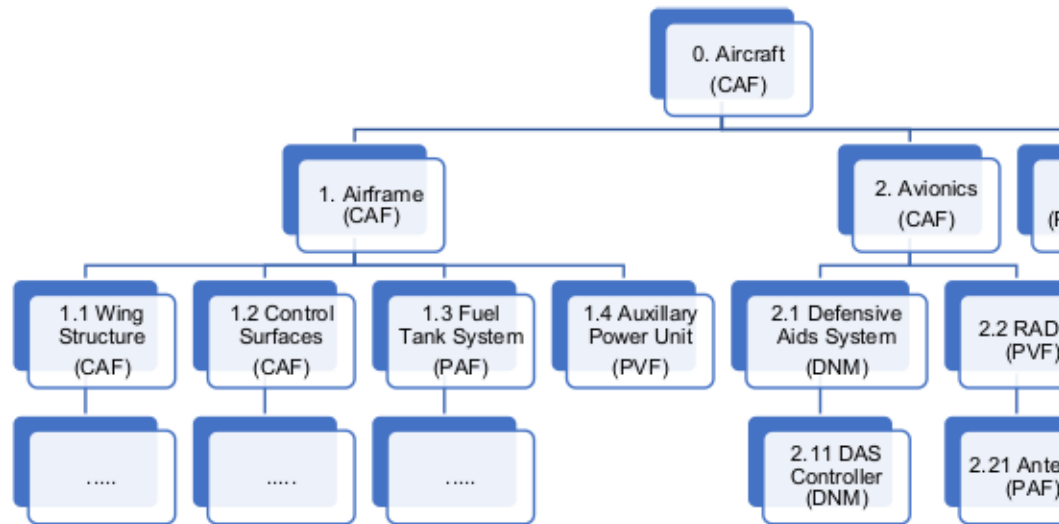

- e) (FEX) Foreign Export Controlled

Notes:

1. During the term of the Contract the Contractor may transition any items identified as category (d) above into category (a) or (b) above. Category (d) into category (a) may only be made with the express written agreement of the Authority's Senior Management in the amendment process set out in the Contract.
2. It is acceptable to specify the highest level of structure to which the category (a), (b) or (c) applies (i.e. there may be sub-componentry if the entirety of the parent system was for example, Private Venture Funded). See guidance elsewhere in the Contract.
3. For the avoidance of doubt, where a parent system did not exist prior to the Contract yet makes use of Private Venture Funded sub-components / sub-systems can be identified as PVF. The Private Venture Funded sub-components / sub-systems can be identified as PVF. The Private Venture Funded sub-components / sub-systems can be identified as PVF.
4. Where items are identified as category (b), the Contractor should provide the number(s) of the previous Contract under which the item was created and the Previous Authority Funding was applied.

Example PBS

A theoretical pictorial example is given below but it is to be noted that the configuration may equally be dealt with in

The diagram above indicates a highly simplified and hypothetical Contract scenario dealing with the procurement of

- i. The proposed new aircraft would be considered Contract Authority Funded (CAF) at its top level.
- ii. Items denoted as Private Venture Funded (PVF) would generally indicate that it and all of its sub-components are HMG. In this instance there is no need to proceed down the product breakdown structure any further (see 1.4). A PVF regarded item has incorporated a Previous Authority Funded (PAF) item (see 2.21).
- iii. The proposed design is making use of a PAF engine.
- iv. This engine has Foreign Export Control (FEX) applying to items within it.
- v. The Defensive Aids System at 2.1 is covered as part of the Contract but the exact configuration and design are (DNM).
- vi. It is not feasible for a parent PVF system to make use of a CAF item; the parent system configuration would
