2.3	Summary of requirements / description of work	<p>Project ZODIAC is a cornerstone of the Army's Land ISTAR Programme and a critical enabler of the UK's ambition to achieve digital advantage in an increasingly contested and complex operating environment. The Integrated Review and Defence Command Paper highlight the growing challenge posed by near-peer adversaries and the need for the UK Armed Forces to prioritise the development and integration of digital technologies that enable faster, more informed decision-making and effective multi-domain operations alongside allies and partners.</p> <p>ZODIAC is being delivered through a phased and incremental approach, informed by early prototyping and user engagement, and is planned to scale beyond the Minimum Viable Product to support a Warfighting Division and its associated Brigade Combat Teams. As the programme transitions from prototyping to full operational delivery and through-life evolution it is seeking to onboard a Managing Agent (MA) to deliver its mission. Through this procurement, the ZODIAC MA will be responsible for establishing, designing and delivering a shared venture across an ecosystem of suppliers to deliver Research and Development, Service Integration and Commissioning and scaling of the ZODIAC solution, as the Contracted party they will act as a managing agent for the delivery of each service, by driving continuous improvement in the ZODIAC delivery model and its individual services by establishing effective, governance alongside the Authority that allows for prioritisation of service backlogs. Establishing a Knowledge, information and data management regime that supports controlled but frictionless flow of info across the model and upholding our commercial model with incentivisation that enables both value for the user and</p>

		wider defence. Alongside the authority the contracted party will be responsible for upholding the ZODIAC Intellectual Property (IP) Strategy, Governance model, architectural principles and the delivery model throughout industry. The Contracted MA will be expected to establish a team of best athletes for each of the two core services and will be required to develop and maintain a set of Industry Partners who will support the delivery of the Non-Core services and experimentation activity which will range from SMEs to OEMs.
