Part 1 - Introduction

1a) The National Trust

In 1895 three Victorian philanthropists, concerned about the impact of uncontrolled development and industrialisation, set up the National Trust (the 'Trust') to act as a guardian for the nation in the acquisition and protection of threatened coastline, countryside and buildings. With our staff, members, volunteers and supporters, we are now the biggest conservation charity in Europe. Everyone can get involved, everyone can make a difference.

We protect and care for places so people and nature can thrive. Many millions share the belief that nature, beauty and history are for everyone. So we look after the nation's coastline, historic sites, countryside and green spaces, ensuring everyone benefits.

From wild and precious places to the world outside your window, the National Trust offers access, enjoyment and a chance for everyone to help out. Nature and the historic environment are under threat. They're essential to everyone, they enrich people's lives and are part of the fabric of society and they urgently need more care.

The National Trust is a registered charity, completely independent of the Government and therefore relies totally on the generosity of our members, visitors and other ad hoc supporters in order to continue this important work.

For more information on the National Trust, please visit www.nationaltrust.org.uk

**Nature, beauty, history.
For everyone, for ever.**

1b) The Opportunity

This Request for Proposal Single Stage (RFP1) sets out the Trust's situation and objectives in respect of restoring the hydrological connectivity of fen habitat at Snag Valley, near Corfe Castle in Dorset. The aim is to secure peat forming habitats, improve peat condition, slow flows, and maximise carbon capture. This will be achieved by using a range of sensitive restoration techniques as prescribed. We are seeking information from a range of suppliers as to capacity, capability, relevant experience, proposed solution and cost. Further details on the Opportunity can be found in **Part 2 – Situation and target outcomes**.

Participating Suppliers will bear their own costs, and seek appropriate advice, for the preparation of their response.

1c) Purpose of the RFP1

The purpose of this RFP1 is to invite a list of possible suppliers to provide the Trust with information that their company has the relevant experience, expertise and can also provide a well costed quote. This will allow the Trust to understand which supplier will be capable of meeting the requirements and to identify a preferred supplier based on the information returned. Methodologies and specifications have been prescribed to carry out restoration works to restore the hydrological function across open fen habitat which is part of the Hartland Moor Nature Reserve.

1d) Statement of Confidentiality

The contents of this document together with all other information, materials, specifications or other related documents provided by the National Trust shall be treated at all times by the Supplier as confidential information.

The Supplier shall not disclose any such information, materials, specifications or other related documents to any third parties or any other part of its group or use any such documents and materials for any purpose other than for the preparation and submission of a response to this document. The Supplier must seek the approval of the National Trust representative named in this RFP1 before providing this document or any other information, materials, specifications or related documents to any third parties. The Supplier shall ensure that all third parties to whom disclosure is made shall keep any such information, materials, specifications or other documents confidential and shall not disclose them or any part of them to any other person or party.

The Supplier shall not publicise the existence of this Opportunity without the prior written consent of the National Trust.

The National Trust in turn confirms that it will treat all information provided to it by the Supplier as confidential and further confirms that such information shall not be disclosed by it to any third parties other than its advisers and consultants. All intellectual property rights in this document and all materials provided by the National Trust or its professional advisers unless specifically stated otherwise are and shall remain the property of the National Trust and are protected by copyright.

Part 2 – Situation and Target Outcomes

Background

The [Dorset Peat Partnership](#) is a subgroup of the Dorset Catchment Partnership which was formed to investigate the feasibility of restoring degraded peatland habitat sites across the Dorset Heaths and to put forward plans to secure restoration grant funding from the Nature for Climate Peatland Grant Scheme (NCPGS).

With Discovery Grant funding from the NCPGS the partnership carried out investigative surveys between 2022-2023 gathering baseline information on peat depths, hydrology, vegetation, protected species, and the historic environment engaging with landowners and stakeholders throughout. This evidence was then drawn together for sixteen potential sites with fully written site plans and restoration proposals submitted as part of a restoration grant bid to the NCPGS in May this year. In August the Dorset Peat Partnership secured funding to deliver the capital works for peatland restoration across sixteen sites.

This tender is for work at **one** of the sixteen sites; **Lower Snag Valley**. The site is under the ownership of the National Trust in Purbeck and is part of the Hartland Moor SSSI complex, which is a protected habitat with protected species.

The remaining fourteen restoration sites of which the full project bid is composed have either already been completed, or are subject to simultaneous tendering opportunities for delivery in Year 2, April 2024 - March 2025.

Project objectives and outcomes

Due to the historic drainage that has occurred across the Snag Valley site, the main project objectives are to re-establish the hydrological connectivity across each site using a combination of restoration techniques. This includes tree and scrub clearance across the site to reduce water loss and reduce the effect of obstacles on diffuse flow; “stage zero” reconnection of the floodplain, through the installation of leaky dams at key locations and channel infilling with trees and root balls. These measures will divert flow across the floodplain to rewet the landscape to provide opportunities for peat forming plant communities to colonise and thrive.

The main outcomes of the implementation of the above works will be that the site will be capable of holding back water for longer, keeping the habitat rewetted to benefit the plant communities and support the wider biodiversity of the Dorset Heaths. In the long term this work will be protecting our habitats from the impacts of climate change, helping to support the capture of carbon by locking it into the peat forming soils, and helping to reduce the emissions of harmful greenhouse gases.

Scope

This RFP1 is seeking interest from competent contractors with the right expertise and resources to deliver the capital works for Snag Valley peatland restoration, which falls into the Year 2 delivery phase (March 2024 – March 2025). Contractors must provide evidence of previous experience of delivering similar peatland/wetland restoration projects in designated sites with the capability to deliver projects on time and within budget.

The scope of the project is detailed in the attached documentation “Specification: Snag Valley Lower – Fen & peatland restoration”. The site is located off the Norden-Arne road, Dorset, near BH20 5BN.

Work proposal dates: August 2024 – November 2024. The timing for these works needs to be carried out in Year 2 of our current delivery programme which runs from **1st April 2024 to 31st March 2025**. Site conditions and protected species must be considered in the timing for these restoration works. We are therefore looking for start dates from August to begin the delivery of works on site, a breakdown of the timeline to contract start date is shown in section 3c.

Site visits

A site visit with representatives from the Dorset Peat Partnership will be essential for potential contractors to view the work required. The provisional date for site visits will be: **09:00-12:00, Tuesday 7th May**

Please notify the RFP1 contact Gen.Crisford@nationaltrust.org.uk to confirm your attendance by **Friday 3rd May** at the latest.

The meeting point will be at the layby located near the Sharford bridge, off the Norden-Arne road - <https://w3w.co/releasing.sensibly.tourist>. Wellies are a requirement for visiting this site.
