Section 1 – About UK Shared Business Services

Putting the business into shared services

UK Shared Business Services Ltd (UK SBS) brings a commercial attitude to the public sector; helping our Contracting Authorities improve efficiency, generate savings and modernise.

It is our vision to become the leading service provider for the Contracting Authorities of shared business services in the UK public sector, continuously reducing cost and improving quality of business services for Government and the public sector.

Our broad range of expert services is shared by our Contracting Authorities. This allows Contracting Authorities the freedom to focus resources on core activities; innovating and transforming their own organisations.

Core services include Procurement, Finance, Grants Admissions, Human Resources, Payroll, ISS, and Property Asset Management all underpinned by our Service Delivery and Contact Centre teams.

UK SBS is a people rather than task focused business. It's what makes us different to the traditional transactional shared services centre. What is more, being a not-for-profit organisation owned by the Department for Business, Energy & Industrial Strategy (BEIS), UK SBS' goals are aligned with the public sector and delivering best value for the UK taxpayer.

UK Shared Business Services Ltd changed its name from RCUK Shared Services Centre Ltd in March 2013.

Our Customers

Growing from a foundation of supporting the Research Councils, 2012/13 saw Business, Energy and Industrial Strategy (BEIS) transition their procurement to UK SBS and Crown Commercial Services (CCS – previously Government Procurement Service) agree a Memorandum of Understanding with UK SBS to deliver two major procurement categories (construction and research) across Government.

UK SBS currently manages £700m expenditure for its Contracting Authorities. Our Contracting Authorities who have access to our services and Contracts are detailed [here](#).

Section 4 – Specification

1.Requirement

The Innovate UK loans (IUKL) team requires a portfolio management system to enable the team to manage a portfolio of loans customers. IUKL is currently a pilot loans programme within the wider Innovate UK business who provide loans between £100k and £1m to scale-up businesses, conducting highly innovative projects that are unable to access debt finance in the market due to their risky nature. IUKL's current loan portfolio is made up of 72 borrowers. This is expected to increase to c100 by March 2020 and 130 to Dec 2020. The required system will be used by Credit Specialists and the Lending operations team to monitor clients. Both teams will need different access levels to enable approvals or reviews with audit trails.

Currently IUKL use excel spreadsheets to monitor the portfolio and some pivot tables to create dashboards for summarising information.

Example headings include, customer name, company number, turnover, EBITDA, Debt Service Cover, loan amount, loan period, interest rate, monitoring score etc. This information will need to be imported into the proposed solution.

IUKL is looking to scale the current business and to enable new systems to be onboarded to reduce manual processes and allow better visualisation, tracking and understanding of data. The requisite portfolio monitoring system will enable the team to track the performance of existing loans clients by collecting financial information quarterly (via excel or website) and transforming this data into reports and dashboards. The system should also be able to flag where a businesses' financials may have deteriorated, or they have breached covenants for example. IUKL would need to segment borrowers by competition type (currently 7 live competitions (portfolios)). The ability to segment customers by credit specialist would also be useful. IUKL would need the system to be able to import excel data and integration via API with Airtable, Salesforce and DueDil would be highly beneficial but not essential. The system would need to export reports to PDF and Excel and provide dashboards on screen. The system/solution should be a loans/equity focused system which is able to track covenants and issue email reminders to clients. All changes made in the system should have an audit trail of who changed what and a time/date stamp.

Features of the system should include: -

- Live dashboard / documents section for each customer including, drawdown schedule, searches, credit papers, annual reviews, changes to loan, loan covenants & status, interest cost, documentation & communications sent with dates/audit trails.
- Overall portfolio - live dashboard, money in/out, accounts on stop, upcoming annual reviews, drawdown schedules & repayments.
- Ability to integrate monitoring officer reports (word documents) and scores into system. Further ability to monitor lifetime scores and reports.

2.Timescales

Expected implementation to start 1st February 2020 and to allow for a period of 3 months for implementation to take place. Access to the system will be required from the contract start date. Implementation fee is to be paid following successful completion. Annual software payment in advance acceptable.

3.Training:-

We will require the bidder to carry out the training to 10 people via the method of 3 face to face training sessions located at Polaris House, Swindon at the agreed time with Innovate and remote training to be carried out also.

4.Breakdown of Costs

Bidders are required to complete the AW5.2 Price Schedule as per the guidance below:-

Year 1 costs associated with this requirement include implementation fee, annual subscription fee based on 20 licenses, training costs based on 10 people to be trained via the method of 3 visits to the Swindon site with accompanying training to be carried out remotely. Year 1 costs also include any maintenance and support costs.

Year 2 costs associated with this requirement include annual subscription based on 20 licenses and maintenance and support costs. There will also be an element of modification to be included within the £75k budget for the second year which could include for example API Integration. Any discussions around modifications will take place should the second year of the contract be utilised and any cost for these modifications should **not** be stipulated in the AW5.2 price schedule. This cost will be agreed before the initial end of the first year of the contract

5.Duration of the Contract

The Period of the agreement is expected to be an initial 12-month contract with a review at the end of the 12 months with a view to extend should it prove to be successful.

Section 5 – Evaluation model

The evaluation model below shall be used for this ITQ, which will be determined to two decimal places.

Where a question is 'for information only' it will not be scored.

The evaluation team may comprise staff from UK SBS and the Contracting Authority and any specific external stakeholders the Contracting Authority deems required.

The evaluation and if required team may comprise staff from UK SBS and the Contracting Authority and any specific external stakeholders the Contracting Authority deems required. After evaluation and if required moderation scores will be finalised by performing a calculation to identify (at question level) the mean average of all evaluators (Example – a question is scored by three evaluators and judged as scoring 5, 5 and 6. These scores will be added together and divided by the number of evaluators to produce the final score of 5.33 ($5+5+6=16\div3=5.33$))

Scoring criteria

Evaluation Justification Statement

In consideration of this particular requirement the Contracting Authority has decided to evaluate Potential Providers by adopting the weightings/scoring mechanism detailed within this ITQ. The Contracting Authority considers these weightings to be in line with existing best practice for a requirement of this type.

Questionnaire	Q No.	Question subject	Maximum Marks
Price	AW5.2	Price	25.00%
Quality	PROJ1.3	System Requirements	25.00%
Quality	PROJ1.4	Flexibility and Customisation	20.00%
Quality	PROJ1.5	Training and Support	15.00%
Quality	PROJ1.6	Resource	15.00%

Evaluation of criteria

Price elements will be judged on the following criteria.

The lowest price for a response which meets the pass criteria shall score 100. All other bids shall be scored on a pro rata basis in relation to the lowest price. The score is then subject to a multiplier to reflect the percentage value of the price criterion.

For example - Bid 1 £100,000 scores 100.

Bid 2 £120,000 differential of £20,000 or 20% remove 20% from price scores 80

Bid 3 £150,000 differential £50,000 remove 50% from price scores 50.

Bid 4 £175,000 differential £75,000 remove 75% from price scores 25.

Bid 5 £200,000 differential £100,000 remove 100% from price scores 0.

Bid 6 £300,000 differential £200,000 remove 100% from price scores 0.

Where the scoring criterion is worth 50% then the 0-100 score achieved will be multiplied by 50.

In the example if a supplier scores 80 from the available 100 points this will equate to 40% by using the following calculation: $\text{Score/Total Points multiplied by 50}$ ($80/100 \times 50 = 40$)

The lowest score possible is 0 even if the price submitted is more than 100% greater than the lowest price.

Section 6 – Evaluation questionnaire

Bidders should note that the evaluation questionnaire is located within the **e-sourcing questionnaire**.

Guidance on completion of the questionnaire is available at <http://www.uksbs.co.uk/services/procure/Pages/supplier.aspx>

PLEASE NOTE THE QUESTIONS ARE NOT NUMBERED SEQUENTIALLY

- 7.42 All Central Government Departments and their Executive Agencies and Non-Departmental Public Bodies are subject to control and reporting within Government. In particular, they report to the Cabinet Office and HM Treasury for all expenditure. Further, the Cabinet Office has a cross-Government role delivering overall Government policy on public procurement - including ensuring value for money and related aspects of good procurement practice.

For these purposes, the Contracting Authority may disclose within Government any of the Bidders documentation/information (including any that the Bidder considers to be confidential and/or commercially sensitive such as specific bid information) submitted by the Bidder to the Contracting Authority during this Procurement. - 7.43 The Government introduced its new Government Security Classifications (GSC) classification scheme on the 2nd April 2014 to replace the current Government Protective Marking System (GPMS). A key aspect of this is the reduction in the number of security classifications used. All Bidders are encouraged to make themselves aware of the changes and identify any potential impacts in their Bid, as the protective marking and applicable protection of any material passed to, or generated by, you during the procurement process or pursuant to any Contract awarded to you as a result of this tender process will be subject to the new GSC. The link below to the Gov.uk website provides information on the new GSC:

<https://www.gov.uk/government/publications/government-security-classifications>

The Contracting Authority reserves the right to amend any security related term or condition of the draft contract accompanying this ITQ to reflect any changes introduced by the GSC. In particular where this ITQ is accompanied by any instructions on safeguarding classified information (e.g. a Security Aspects Letter) as a result of any changes stemming from the new GSC, whether in respect of the applicable protective marking scheme, specific protective markings given, the aspects to which any protective marking applies or otherwise. This may relate to the instructions on safeguarding classified information (e.g. a Security Aspects Letter) as they apply to the procurement as they apply to the procurement process and/or any contracts awarded to you as a result of the procurement process.
