

**Re-surfacing:**

Supply and lay car park to newly excavated area following the recommended build up as below:  
225mm subbase, 70mm binder course and 30mm armc surface coat.  
Supply and install 43 linear metres of new Marshalls (O.EA) 255 x 125mm kerb edging to proposed car park layout.

	New armc coat construction: 225mm subbase, 70mm binder course, 30mm surface. New Marshalls ballnose pin kerbing.
	New Marshalls dropped pin kerbing.
	New CLD block fencing
	New single ply membrane roof finish

Supply and install 6 linear metres of new Marshalls dropped kerb edging to proposed vehicular access point.  
Mark out car park space layout as per plan with torch on thermoplastic white line finish. Typical space sizing of 3000 x 6000mm (mini bus)

**New Fencing:**

Supply and install 134 linear metres of new 'CLD' Dulux double wire security perimeter fencing to positions shown on drawing. Contractor to include for all accessories, posts and footings required for installation. Fence height 2.43m  
Finish PCC Green.

**New Gates:**

Supply and install two new 1000mm wide CLD Lockmaster single swing gate to car park area as shown. Contractor to include for all new posts and accessories required for fitting. Gate to include for lockable slide bar and drop bolts. Finish PCC Green.

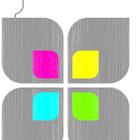

Supply and install new manually operated sliding gate to proposed minibus parking facility. (Contractors design).

**Re-roofing:**

Strip off existing roofing felt from indicated block and overlay entire area with single ply membrane system. (Contractors choice)  
Contractor to allow for dressing of existing rooflights to ensure watertight detail to perimeter upstands.

Allow for access tower and perimeter handrail for duration of works.
