CDM Key

Indicates a residual risk requiring a compulsory action

Conveys information about a residual risk

Indicates a residual risk requiring a specific action to be

cannot be designed out

All dimensions in millimetres. All levels in meters.

This drawing to be read in conjunction with other scheme drawings if applicable.

This is a CAD produced drawing and should not be amended by

Do not scale from this drawing, work to stated dimension only. If in

Structure designed in accordance with BS EN 1993-2 Bridge

Geometry: (Basis of design as per BS EN 1990)

Bridge length = 35.72m

Clear width = 2.500m minimum (Between parapets)

Overall bridge weight = 24t (Steel = 21t) Loading: (Loading as per BS EN 1991, resistance as per BS EN

Live load (UDL): 5.0kN/m² (For smaller loaded lengths)

Live load (UDL): 4.7kN/m² (For full span loaded lengths)

further supplemented by information in this drawing. The execution class is to be EXC2 design in accordance with EN 1090. All steelwork to be UKCA marked. All welds to be free from sharp edges.

All steelwork to be executed in accordance with SHW 1800 as

All proprietary products to be applied strictly in accordance with

manufacturer's instructions. All structural steelwork to be fabricated from minimum grade S355 JO. All ancillary steelwork to be fabricated from minimum grade

All steel to BS EN 10025 & BS EN 10210.

Steelwork to be hot dip galvanised to in accorandacne with BS EN ISO 1461 (85 µm). All welds to be min. 6mm leg fw unless otherwise stated to BS EN

All bolts to be minimum grade 8.8 to EN ISO 898-1 U.N.O. and

galvanized / sheradized U.N.O. Tension control bolts (TCB) to be use where noted grade 10.9 and

Greenkote corrosion protection applied in accordance with EN 14399-1:2005

All timber to be min C24 softwood in accordance with BS EN 1995-1-1 and the TRADA National Structural Timber specification.

Tolerance to be added when ordering timber.

Timber end grains after cutting to be sealed with suitable wax.

All sharp edges to be removed from parapet rails and planed all

around (E4E par)

manufacturer's instructions

FRP pultruded members to be to BS EN 13706:2002 Grade E23.

FRP to not lose its colour due to sun rot.

POLYplank Decking Planks to be black in castellated finish. FRP box profile colours to be dark grey / black.

CDM notes are provided to assist the principal contractor to fulfill their obligations under the Construction Design & Management Regulations 2015. It does not include residual risk that a competent contractor will be aware of nor does it absolve the principal contractor of his legal responsibilities
