8. How many Fellowships posts are you applying for? *

1

9. Please describe the Fellowship posts that your organisation would like to offer (post title, specialty area, location). Please include details regarding clinical roles, opportunities for development, and educational components of the post.

*

Clinical- to develop an interest in dermatology, by doing the Postgrad diploma in dermatology (the Cardiff qualification has been mooted), time also that he can spend in the dermatology department at our local hospital, 4 clinical sessions seeing patients, to include practice learning time and mandatory training and 2 development sessions which the CCT Fellowship would be done in. We have recently resumed dermatology outreach clinics from Leighton hospital

10. Please describe how you will provide mentorship and support - e.g monthly meeting with named mentor in the practice. *

fortnightly meeting with named mentor- a partner at the practice

11. How do your proposed Fellowship posts respond to local population and workforce needs? Is the area a priority area for recruitment? *

Our local population is expanding and the demand is increasing for minor surgery and dermatology consultations. Having someone with an interest in dermatology would enable our in house dermatology clinic and surgery team to be boosted by another person to help with this increased demand

11. Please select the closest category(s) to your application *

System leadership - supporting emerging GP leadership within the local healthcare system – CCGs, STP/ICS, training hubs, HEE. This may include formal qualification in leadership e.g. PG Cert.

Health equity - using the fellowship programme to reduce health inequalities – prioritising fellowships to offer clinical placements in practices in under-doctored or socio-economically deprived areas.

☒ Clinical - helping GPs to develop a clinical special interest e.g. dermatology, frailty, palliative care. These fellowships may often be driven by individuals

Academic - supporting early academic careers, bridging the gap from pre-CCT Academic Career Fellows (ACF) to higher academic study

Educational - stimulating early career GP educators through involvement with undergraduate and postgraduate education and the attainment of postgraduate health professionals' education qualifications.

12. How do your proposed Fellowship posts address the career aspirations of newly qualified GPs? *

Our GP trainee who is due to qualify in August has an interest in dermatology and minor surgery. He has sat in on out in-house minor surgery and dermatology clinics, and has attended a dermatology study day (virtual) at Leighton hospital.

13. How will your proposed Fellowship posts support acquisition of the leadership skills required for both individual career and local health service needs future development? *

Our trainee is in the process of completing a diploma in Medical leadership. At the surgery he will have a chance to sit in on PCN meetings (one of our partners is the Chair of the local PCN) and chair clinical meetings

14. What do you envisage as being possible opportunities for the post holders once they have completed their year as a Fellow? *

To progress further and become a GPwSI in dermatology. One of our retired partners had this and did clinical sessions at the dermatology department as a fellow.
