SCHEDULE 1 - SPECIFICATION OF SERVICES

The Authority is the UK Government Department responsible for the environment, food and farming and rural affairs. The Authority's priorities are to secure a healthy natural environment; a sustainable, low-carbon economy; a thriving farming sector and a sustainable, healthy and secure food supply. Further information on the Authority can be found at: [Natural England](#)

1. Background to Natural England

- 1.1 Natural England is the government's advisor on the natural environment. We provide practical advice, grounded in science, on how best to safeguard England's natural wealth for the benefit of everyone.
- 1.2 Our remit is to ensure sustainable stewardship of the land and sea so that people and nature can thrive. It is our responsibility to see that England's rich natural environment can adapt and survive intact for future generations to enjoy. We work with farmers and land managers; business and industry; planners and developers; national and local government; interest groups and local communities to help them improve their local environment.

2. Background to the specific Natural England work area relevant to this purchase

- 2.1 Natural England is taking a proactive leadership role in landscape conservation, enhancement and creation across England ensuring landscape is an integral part of Nature recovery for people and planet. The government's 25-year Environment Plan and subsequent Landscapes Review identified the case for new designated landscapes and for new forms of landscape recognition and improvement. As the body responsible for designating national landscapes, Natural England welcomes the development of new forms of landscape recognition that add value to and complement existing National Parks and AONBs. To help plan for future landscape conservation, enhancement and creation we are committed to developing a robust, evidence-based approach for identifying places that would gain most benefit from a positive landscape intervention.
- 2.2 Natural England is aiming to co-design and produce, in collaboration with key stakeholders, a bold, ambitious, and forward looking All-England Strategic Landscape Mapping Assessment. It is intended that this work will mirror the scale and significance of the landmark 1947 Hobhouse Review, which provided the masterplan and evidence base for many of our National Parks and AONBs.
- 2.3 The output of this contract will be a digital map/ interactive platform that achieves the following **outcomes**:
 - Providing NE with an evidence-based map to identify potential areas for National Park/AONB designation in England which will facilitate better stakeholder relations through shared understanding of rationale, evidence and need for new designations

- Providing NE, stakeholders and partners with a landscape tool (e.g. GIS) to inform high level decisions (e.g., landscape scale delivery initiatives, strategic landscape forward planning)
- Providing NE and partners with an evidenced based map to inform where any nationally led initiatives supporting landscape management prescriptions may be prioritised
- Providing stakeholders with a tool (e.g. GIS) to inform/support decisions regarding developing alternative landscape approaches.

2.4 It is essential that the output of this contract builds on and adds value to existing relevant data and map-based initiatives and platforms including (but not exclusively) National Character Area database and profiles, an Outcomes Framework for Designated Landscapes, the emerging Nature Recovery Network, Green Infrastructure, Natural Capital and Climate Change adaptation mapping. **It is intended this output will be created primarily from existing map-based information and data sets.**

2.5 Through the collaborative co-design of this product it is envisaged that detailed requirements and criteria will be established. This may include, for example:

- a) considering whether any existing guidance and approaches e.g. Designated Landscape guidance, Landscape Institute Assessing Valued Landscapes may form helpful frameworks for the assessment
- b) agreeing the scale for the map and analysis
- c) deciding the criteria for identifying areas to 'conserve' or 'plan'
- d) considering how local data might be incorporated
- e) deciding whether it's possible or needed to grade areas for conservation or planning i.e. highlighting the very best and very worst
- f) considering timescales for updating the map
- g) deciding whether any high-level management prescriptions might be included.

2.6 In *summary*, to meet the outcomes, it is expected that this project will:

- In collaboration with stakeholders, refine/define the criteria for this ambitious product
- Collaboratively identify and agree datasets/mapping layers to inform the product
- develop the method/model that enables the product to be delivered
- produce the agreed product
- provide a report and guidance on how to use the assessment and mapping to identify need and where different mechanisms might be appropriate to achieve desired outcomes.
- provide recommendations for any next steps required to operationalise the product including communications and stakeholder engagement.

3. **Project task and outputs**

3.2 Suppliers are expected to provide a **quote for the full duration of the project broken down to cover Year 1 and Year 2** (all figures to be ex VAT and inclusive of VAT).

3.3 At this stage Natural England cannot fully commit to Year 2 until its Financial Settlement is agreed and, therefore, there is no guarantee that funding will be available for Year 2. However, Natural England view this project as a high priority and every effort will be made to secure the appropriate funding. Natural England will ensure to keep the supplier up to date although a short 'break point' may be required as the project transitions from Year 1 to Year 2.

- ✓ **Task 2** – develop and produce the end product as agreed in Year 1 and that meets the outcomes highlighted in 2.3.
- ✓ **Task 3** - building on previous stakeholder engagement present and communicate the results of the end product.

Year 2 output(s):

- a finished, populated and ready to use product
