The Contractor shall notify the Authority before engaging any further Key Subcontractors.

Impediments

The Contractor shall notify the Authority as soon as they become aware of any circumstance which will impact on their ability to deliver any of the requirements or meet any of the stated timescales.

Tender Proposal

Requirements to be delivered in accordance with this contract and, where it does not conflict with this contract, in line with proposal included in tender.

Performance Management

A date for delivery of goods or completion of each service will be stated in the contract or agreed between the Authority and the Contractor. Where this is not met by the Contractor, goods are not delivered or services are not completed, until after any stated or agreed date (unless the Authority accepts that circumstances were outside of the control of the Contractor), the Authority reserves the right to deduct 10% of the payment due for those services for each week or portion of a week that passes before the services are completed.

If, at any time, any of the goods or services provided under the Contract do not meet the required standard or quality then the Authority will not be obligated to buy any more services unless it is satisfied that the required standard or quality will be met.

Where the Contractor is unable to provide the required goods/services within the timescales required, the Authority shall be entitled to procure those goods/services from other providers.

If the Authority is able to procure goods/services, which are similar to those listed in this contract, at significantly lower prices than those listed in this contract then the Authority shall be entitled to ask the Contractor to provide a reduced price and/or shall be entitled to procure those goods/services from other providers.

If, in order to deliver the goods/services, the Contractor sources anything through their supply chain subcontractors they shall not charge any additional mark up or profit, on those costs they have paid, when calculating prices to be charged to the Authority.

A date for the Contractor to meet the requirements of the Cyber Implementation Plan has been agreed. Where these requirements are not met by that date (unless the Authority accepts that circumstances were outside of the control of the Contractor), the Authority reserves the right to deduct 5% of the next payment that becomes due for each week or portion of a week that passes before the requirements of the Cyber Implementation Plan are completed.

Schedule 4 - Statement of Requirements

SOR –Preventative Maintenance, Breakdown Cover and Parts Contract for a Skalar SP 2000 Robotic Analyser

Background. The (EIH) Environmental and Industrial Hazards Laboratory (EIH Labs) is the water testing facility for the Royal Navy and is also used by the RAF and Army. The laboratory tests up to 2500 potable waters annually for physical parameters (pH, conductivity, turbidity, and colour) and holds ISO17025 accreditation from the United Kingdom Accreditation Service (UKAS) for this process. EIH Labs own a Skalar SP 2000 Robotic Analyser (serial number 17021178) manufactured by Skalar. It is used to analyse physical parameters in potable water samples for all Royal Navy, Royal Marines and Royal Fleet Auxiliary vessels in accordance with BRd 820 – Potable Water Management. It is also used for the same analysis for Naval land establishments in accordance with the Water Supply Water Quality Regulations 2016 and for Army and Royal Air Force customers in accordance with STANAG 2136, JWP 4.01 and GAI 3006. This testing is a legal Health and Safety requirement for the MoD.

The instrument was purchased with four years' preventative maintenance and breakdown cover beyond the initial one-year warranty period. This is due to expire on 01/05/2023 and we request a new contract to enable continuity of technical and maintenance/breakdown cover for a further five years from 02/05/2023 to allow continued provision of service to the Royal Navy and wider MoD in accordance with the standards listed above. We also seek the ability to use funding assigned to this contract for the purchase of consumables, parts, and to pay for travel and labour costs associated with repair visits.

Requirement. We seek provision for a five-year service contract, with an additional provision to allow the payment of travel and labour costs for breakdown call outs and the purchase of routine consumables and parts for the systems via the contract throughout the five-year period.

- **Description of Work.** The item to be covered by the contract is a Skalar SP 2000 Robotic Analyser (serial number 17021178); this is operated using the Skalar Robotics software version 1.94 release, V1.19. The specific elements required to be covered under the contract are listed below:
 - Priority telephone access to technical specialists and engineers via telephone and e-mail
 - A priority on-site response time from notification of a breakdown of 72 hours (3 working days) and on-site repairs
 - One preventative maintenance (PM) visit per annum, to be arranged for a mutually agreed date but not to exceed 14 months between visits
 - Software support, updates, and patches for the Skalar Robotics software as required or requested
 - The ability to call off from the contract for the purchase of routine consumables, parts, travel and labour costs for the Skalar SP 2000 robotic analyser over the course of the contract

- **Deliverables.** An annual preventative maintenance visit will be delivered with any required actions carried out during the visit, pre-scheduled to suit the laboratory's requirement but not exceeding 14 months between visits. Additional breakdown and technical support will be delivered within the timescales agreed in the contract. Consumable and consumable part orders to be received within 1 month of placing the order. Any issues with the above delivery timescale to be communicated to the laboratory as soon as known and an updated delivery date to be provided.

Security Considerations. There are no security considerations related to this provision. Data stored on the instrument is identified by a laboratory-defined "sample number" and cannot be connected to the source of the sample. Data held relates only to pH, conductivity, colour, and turbidity.

Other Considerations. Service engineers should be suitably trained and evidence of such should be available from the supplier on request.

Offer and Acceptance	
<p>A) The Purchase Order constitutes an offer by the Contractor to supply the Deliverables. This is open for acceptance by the Authority for 90 days from the date of signature. By signing the Purchase Order the Contractor agrees to be bound by the attached Terms and Conditions for Less Complex Requirements (up to the applicable procurement threshold).</p> <p>Redacted under FOIA Section 40, Personal Information</p>	<p>B) Acceptance</p> <p>Redacted under FOIA Section 40, Personal Information</p>
