Annex 1 – Authorised Processing Template

Annex 2 – Specification

The Authority is Natural England. The Authority's priorities are to secure a healthy natural environment; a sustainable, low-carbon economy; a thriving farming sector and a sustainable, healthy and secure food supply. Further information about the Authority can be found at: [Natural England](#)

Introduction

Natural England (NE) is the government's statutory adviser for the natural environment. We play a vital role in delivering the Government's 25 Year Environment Plan, supporting the Government's ambitions for agriculture, fisheries and the natural environment as we leave the European Union and responding to the Government's commitment to net zero by 2050. The twin challenges of biodiversity loss and climate change mean Natural England's work is more important now than ever.

Our vision is of thriving nature for people and planet. Our ambition is not just to improve nature, but to see it thriving everywhere, because a healthy natural environment is fundamental to everyone's health, wealth and happiness. In July 2021 Natural England launched its most recent [Action Plan](#) which contains more information on our priorities for the year ahead.

Project outline: Eddy covariance flux tower installation and monitoring

Net Zero is a major driver of government policy in the natural environment but many evidence gaps remain in our understanding of carbon storage and sequestration by habitats; this will fill gaps identified in our recent review of the topic (Gregg et al., 2021, *Carbon Storage and Sequestration by habitat*, 2021. Natural England). This contract will contribute towards building the organisations research and evidence capacity, as well as facilitating important research links. Access to already existing networks of flux data will also help us to identify key evidence gaps and potential areas for future work and future collaboration. This contract will also provide a facility and evidence to support the new Shared Outcomes Fund project, Nature-based Solutions for Climate Change at the landscape scale.

The research that this contract will contribute to will help to support the development of robust carbon markets, which will require reliable measurements of carbon fluxes and may lead to the development of this sort of approach as mainstream service rather than a unique research service.

Overall Aims of the Agreement

It is Natural England's aim that this contract will;

1. Facilitate the purchase and installation of a flux tower on behalf of Natural England, on a site to be specified by Natural England's climate change team.
2. Provide monthly flux data packages
3. Provide on-going maintenance throughout the contractual period
4. Integrate with other flux networks already up and running across the UK and contribute towards evidence gaps in carbon storage and sequestration of different habitats.

List of tasks/Outputs

The scope of the agreement is set out below as a series of task headings; these may not be exclusive and can be amended or added to if the contractor deems this necessary.

Task 1: Flux tower procurement and delivery

Eddy covariance flux tower and all associated components (**see list below) to be purchased by the contractor through their existing supplier agreements. The contractor is required to raise their order with Campbell Scientific within 2 business days from receipt of the purchase order by the Authority. The contractor will then be required to forward to the Authority by email within 2 business days an order acknowledgement with confirmation of delivery date. Thereby, the Authority should have sight of a confirmed delivery date from the contractor within 4 business of the purchase order by the Authority.

Components should align with that already used with the UK flux network. A closed path analyser would offer the most cost-effective approach as it reduces time needed for maintenance and calibration.

For the avoidance of doubt, ownership of the flux tower and associated components will remain that of Natural England.

Note: Currently supply chain issues due to a global shortage of essential electrical components

Task 2: Site scoping

Virtual meetings to be put in place to discuss options for potential suitable sites to install the flux tower. This should be based around on-going projects within the Natural England climate change team, other organisational priorities and ease of access. The sites must also be accessible to those installing and running the flux tower.

In person site scoping activity to assess the most suitable site for flux tower installation. Contractor and relevant NE staff to meet on site where necessary. See Table 1 below for a list of meeting dates for virtual and in-person meetings, deliverables and requirements.

Table 1: List of meetings, attendees, associated deliverables and responsibilities

Meeting type	Meeting date	Attendees	Deliverables
Project inception meeting (virtual: Teams)	22/07/22	Required: [REDACTED] [REDACTED] Optional: [REDACTED]	- General introductions
Task 2: Site scoping (virtual: Teams)	11/08/22	Required: [REDACTED] [REDACTED] Optional: [REDACTED], NNR site manager	- Discuss options for potential sites for flux tower installation - All agree on top 1 or two sites - All to confirm dates for in field site visit. - All: Risk assessments to be circulated and agreed via email prior to site visit. - NE to confirm with NNR site manager access to the site prior to the following in-person visit.
Task 2: In-field visit: confirm site. *Subject to NNR site manager availability and weather conditions etc*	27/09/22	Required: [REDACTED] [REDACTED], NNR site manager. Optional: [REDACTED] [REDACTED], other climate change team members	- In person visit of potential field locations if necessary - Meet NNR manager and agree longer term access - Exchange contact details between contractor and NNR manager for on-going visits.
Task 3 In field visit: Demonstration of installed kit. *Subject to NNR site manager availability and weather conditions etc*	31/3/22	Required: [REDACTED] [REDACTED], NNR Site Manager Optional: [REDACTED] [REDACTED], other climate change team members, or UKCEH field team members	- In person visit of site once flux tower has been installed - Demonstration of the kit that is in use, any basis maintenance, troubleshooting for NNR manager and other NE staff. - Any follow up

			visits to be agreed.
Task 4 Delivery of data packages (Virtual: Teams)	5/5/23	Required: [REDACTED] Optional: [REDACTED]	Agree start date for monthly data packages to be sent to NE

Agree suitable site based on the requirements of NE and the contractor. It is the responsibility of NE and any other organisations involved to grant access permission for the duration of the agreement.

It is expected this equipment will be going onto one of NE's NNR and therefore a risk assessment would be required prior to access. Both parties would share this responsibility.

Task 3: Flux tower installation and integration with existing network

Flux tower to be installed at agreed location once the contractor has received the equipment from the supplier, and integrated with other flux networks already up and running across the UK. Inform NE once this has happened and report on any issues.

Task 4: Data processing and data packages*

Data processing and management is the responsibility of the contractor. Data is to be processed using software already available to the contractor. Monthly data packages to be sent to NE from a start date to be agreed by the contractor and NE (approximately 1 month to 6 weeks after installation).

Task 5: On-going maintenance*

Carry out regular maintenance (cleaning, calibration, troubleshooting) as and when needed for the duration of the agreement. Local site managers will also be trained to identify when troubleshooting is needed, and to carry out basic maintenance and cleaning.

*Tasks 4 and 5 have the potential to be extended by the customer beyond the maximum 4-year term subject to funding availability from other funding streams. The contractor confirms this can be provided for as per the whole life costing provided below.

Costs:

The revised quotation from UKCEH has been quoted at £8 [REDACTED] ex-VAT for the initial 2-year term as inserted below.

UKCEH receive a [REDACTED] discount from main supplier of flux tower which has been applied to the quotation.

A breakdown of what is included in these costs are as follows:

Equipment cost:

Instrumentation development, purchase, shipment and delivery.

Labour cost:

Field deployment/maintenance, Data management, Provision of data and updates to NE

Consumables costs:

Inlet filters, desiccant chemicals, span gas, regulator, calibration.

The majority of this cost forms approximately £[REDACTED]K per year for calibration, based on combined calibration intervals of all sensors, assuming a 5-year lifespan.

Travel and subsistence (maintenance):

Maintenance provision for year 1 and 2 includes fuel costs (@£[REDACTED]/mile) assuming that the field site is roughly 70 miles from Wallingford (140 miles return), for 7 site visits a year (3 in year 1, 7 in subsequent years).

Overnight hotel and sustenance costs includes overnight stays for two staff (@£[REDACTED]/night) and daily sustenance (@£[REDACTED]/night) for 2 staff for each field visit (3 staff for each site visit in year 1).

Further years maintenance can be provided for years 3 to 10 on the same terms as years 1 and 2 but would then include additional costs for sensor recalibrations as necessary (by manufacturers in some cases).

This is the maintenance provided by UKCEH. The suppliers of the kit don't provide maintenance.

Parts:

Parts are provided by UKCEH from various suppliers under their own warranty for a minimum of 1 year. UKCEH will manage suppliers in the event of warranty issues during the respective warranty periods provided by the suppliers.

There are no other costs to consider for the maximum expected lifespan of the equipment, other than major sensor malfunction requiring a factory repair where a quote will be requested, costs for this will be fault dependant.

Shipment and Import Duties:

Goods are insured by UKCEH during any storage at UKCEH and during transport to NE site until such time installation is accepted by NE.

Shipment lead time is currently 36 weeks for order placement to receiving the kit at UKCEH, this is entirely due to global supply chain issues. Expected timeframe for installation would be within 2 weeks from delivery of equipment to UKCEH, accounting for public holidays and staff leave periods. This totals a lead time of 38 weeks for delivery to NE site.

Company is US based, but with UK subsidiary – UKCEH deal with UK subsidiary who on board all shipping and import duties.

Whole Life Cost Analysis:

An initial lifespan of 5 years has been provided by UKCEH, with a maximum lifespan of 10 years assuming the equipment is well maintained.

The whole life costing below has been based on a maximum 10-year lifespan.

Year 1 and 2 are as per the above quotation from UKCEH.

Year 3 to 10 are the anticipated projected costs provided by UKCEH, which should be tracked with inflation rates (currently ~9%) Therefore, these whole life cost calculations have been based on a maximum projection of 10% inflation.

1. How Charges are calculated

1.1 The Charges:

- 1.1.1 shall be calculated in accordance with the terms of this Annex 3; and
- 1.1.2 if not applicable: cannot be increased except as specifically permitted by this Annex.

1.2 Any variation to the Charges payable under the Contract must be agreed between the Supplier and the Authority and implemented using the procedure set out in this Annex.

2. Are costs and expenses included in the Charges]

2.1 Except as expressly set out in Paragraph 3 below, the Charges shall include all costs and expenses relating to the provision of Deliverables. No further amounts shall be payable in respect of matters such as:

- 2.1.1 incidental expenses such as travel, subsistence and lodging, document or report reproduction, shipping, desktop or office equipment costs, network or data interchange costs or other telecommunications charges; or
- 2.1.2 costs incurred prior to the commencement of the Contract.

3. When the Supplier can ask to change the Charges

- 3.1 The Charges will be fixed for the first **(2) years** following the Start Date (the date of expiry of such period is a "**Review Date**"). After this Charges can only be adjusted on each following yearly anniversary (the date of each such anniversary is also a "Review Date").
- 3.2 The Supplier shall give the Authority at least three (3) Months' notice in writing prior to a Review Date where it wants to request an increase. If the Supplier does not give notice in time then it will only be able to request an increase prior to the next Review Date.

All other costs, expenses, fees and charges shall not be adjusted to take account of any inflation, change to exchange rate, change to interest rate or any other factor or element which might otherwise increase the cost to the Supplier
- 4.2 Charges shall not be indexed during the first **(2) years** following the Start Date.
- 4.3 Where paragraph 5 states that a Charge is subject to indexation then it will be indexed on the date which is **(2) years** after the Start Date and on each anniversary of such date (in each case the "Review Date") to reflect the percentage change in the CPI in the 12 months. The Charge will be indexed using the most recently published CPI figure on the Review Date. [If the percentage change in the CPI is negative on any Review Date, there will be no change to the Charge.]

Where the CPI Index:

- 4.3.1 used to carry out an indexation calculation is updated then the indexation calculation shall also be updated unless the Authority and the Supplier agree otherwise;
- 4.3.2 is no longer published or no longer consider appropriate by the Authority acting reasonably, the Authority and the Supplier shall agree a fair and reasonable replacement.

3.2 The Supplier is deemed to accept the offer in the Order Form when the Authority receives a copy of the Order Form signed by the Supplier.

3.3 The Supplier warrants and represents that its Tender Submission and all statements made and documents submitted as part of the procurement of Deliverables are and remain true and accurate.

4. What needs to be delivered

4.1 All Deliverables

(a) The Supplier must provide Deliverables: (i) in accordance with the Specification and Tender Submission; (ii) to a professional standard; (iii) using all reasonable skill and care; (iv) using Good Industry Practice; (v) using its own policies, processes and internal quality control measures as long as they don't conflict with the Contract; (vi) in accordance with such policies and procedures of the Authority (as amended from time to time) that may be specified in the Contract (vii) on the dates agreed; and (viii) in compliance with all applicable Law.

(b) Without prejudice to the Specification the Supplier must provide Deliverables with a warranty of at least **(1) year** or longer where the Supplier offers a longer warranty period to the Authority) from Delivery against all obvious damage or defects.

4.2 Goods clauses

- (a) All Goods Delivered must be capable of meeting the requirements set out in the Specification.

- (c) The Supplier transfers ownership of the Goods on completion of Delivery (including off-loading and stacking) or payment for those Goods, whichever is earlier.
- (d) Risk in the Goods transfers to the Authority on Delivery but remains with the Supplier if the Authority notices any damage or defect following Delivery and lets the Supplier know within three Working Days of Delivery.

- (f) The Supplier must Deliver the Goods on the date and to the specified location during the Authority's working hours.
- (g) The Supplier, its subcontractor(s) and supply chain must minimise packaging used whilst providing sufficient packaging for the Goods to reach the point of Delivery safely and undamaged. The Supplier must take back any primary packaging where it is possible to do so. Packaging must be 100% re-usable, recyclable or compostable, use recycled content where reasonably practicable and support the Government's commitment to eliminate single use plastic.
- (h) All Deliveries must have a delivery note attached that specifies the order number, type, quantity of Goods, contact and details of traceability through the supply chain.
- (i) The Supplier must provide all tools, information and instructions the Authority needs to make use of the Goods. This will include, where appropriate, any operation manuals which, unless specified otherwise, will be written in English and provided in electronic form.

Goods must be disposed of in line with the waste management hierarchy as set out in Law. The Supplier will provide evidence and transparency of the items and routes used for disposal to the Authority on request.
- (k) The Authority can cancel any order or part order of Goods which have not been Delivered. If the Authority gives less than 14 calendar days' notice then it will pay the Supplier's reasonable and proven costs already incurred on the

cancelled order as long as the Supplier takes all reasonable steps to minimise these costs.

(l) The Supplier must at its own cost repair, replace, refund or substitute (at the Authority's option and request) any Goods that the Authority rejects because they don't conform with clause 4.2. If the Supplier doesn't do this it will pay the Authority's costs including repair or re-supply by a third party.

(m) The Authority will not be liable for any actions, claims, costs and expenses incurred by the Supplier or any third party during Delivery of the Goods unless and to the extent that it is caused by negligence or other wrongful act of the Authority or its servant or agent. If the Authority suffers or incurs any damage or injury (whether fatal or otherwise) occurring in the course of Delivery or installation then the Supplier shall indemnify from all losses, damages, costs or expenses (including professional fees and fines) which arise as a result of or in connection with such damage or injury where it is attributable to any act or omission of the Supplier or, where related to the Contract, any of its subcontractors or suppliers.

4.3 Services clauses

(h) The Supplier must ensure all Services, and anything used to deliver the Services, are of the required quality and free from damage or defects.

(i) The Authority is entitled to withhold payment for partially or undelivered Services or for Services which are not delivered in accordance with the Contract but doing so does not stop it from using its other rights under the Contract.

5. Pricing and payments

5.1 In exchange for the Deliverables delivered, the Supplier shall be entitled to invoice the Authority for the charges in Annex 3. The Supplier shall raise invoices promptly and in any event within 90 days from when the charges are due.

Any disputed amounts shall be resolved through the dispute resolution procedure detailed in clause 35.

5.6 If any sum of money is recoverable from or payable by the Supplier under the Contract (including any sum which the Supplier is liable to pay to the Authority in respect of any breach of the Contract), that sum may be deducted unilaterally by the Authority from any sum then due, or which may become due, to the Supplier under the Contract or under any other agreement or contract with the Authority. The Supplier shall not be entitled to assert any credit, set-off or counterclaim against the Authority in order to justify withholding payment of any such amount in whole or in part.

5.7 The Supplier must ensure that its subcontractors and supply chain are paid, in full, within 30 days of receipt of a valid, undisputed invoice. If this doesn't happen, the Authority can publish the details of the late payment or non-payment.

6. The Authority's obligations to the Supplier

6.1 If the Supplier fails to comply with the Contract as a result of an Authority Cause:

then the Authority may:

- (i) require that the Supplier provide to the Authority (for its approval) a plan setting out how the Supplier will ensure continued performance of the Contract (in the case of (a)) or improve its sustainability conduct or performance (in the case of (b)) and the Supplier will make changes to such plan as reasonably required by the Authority and once it is agreed then the Supplier shall act in accordance with such plan and report to the Authority on demand

If either Party does not wish to use, or continue to use mediation, or mediation does not resolve the dispute, the dispute must be resolved using clauses 35.3 to 35.5.

35.3 Unless the Authority refers the dispute to arbitration using clause 35.4, the Parties irrevocably agree that the courts of England and Wales have the exclusive jurisdiction to:

- (a) determine the dispute;
- (b) grant interim remedies;
- (c) grant any other provisional or protective relief.

35.4 The Supplier agrees that the Authority has the exclusive right to refer any dispute to be finally resolved by arbitration under the London Court of International Arbitration Rules current at the time of the dispute. There will be only one arbitrator. The seat or legal place of the arbitration will be London and the proceedings will be in English.

35.5 The Authority has the right to refer a dispute to arbitration even if the Supplier has started or has attempted to start court proceedings under clause 35.3, unless the Authority has agreed to the court proceedings or participated in them. Even if court proceedings have started, the Parties must do everything necessary to ensure that the court proceedings are stayed in favour of any arbitration proceedings if they are started under clause 35.4.

35.6 The Supplier cannot suspend the performance of the Contract during any dispute.

35.7 The provisions of this clause 35 are without prejudice to the Authority's right to terminate or suspend the Contract under clause 11.
