Schedule 1: Services

Cyber security remediation delivery partner – January 2021-March 2022

1.1 Introduction

A recent review of cyber security in HMRC (“the Buyer”) had identified a need for a significant programme of work to be undertaken by the Buyer at pace to improve its IT security to peer level industry standards.

The Cyber Tactical Remediation Programme (“CTRP”) is a short term (21-month) programme sponsored by the Executive Committee/CISO to help drive down the likelihood of occurrence of future cyber-attacks. The scope of the programme is to address the remediations required across the entire Buyer’s estate with the focus specifically on remediating tactical cyber vulnerabilities in order to reduce the existing cyber risk.

1.2 Requirement

The CTRP is seeking to on-board a delivery partner that will support the delivery, management and assurance of work packages/change requests and projects that arise from the risk assessment conducted across a number of prioritised systems. Given the size of the organisation this is a complex delivery environment with multiple 3rd party suppliers and internal delivery teams. This engagement requires strong governance and technical capabilities to support HMRC to manage the delivery of the changes required within the delivery timescales. There is also a need to work in collaboration with Supplier resources to upskill and transfer skills in order to future proof for new technical change initiatives. All Supplier staff will require SC clearance.

1.3 Service capacity

The Supplier will support the CTRP as its delivery partner, as described in this Schedule 1.

1.3.1 The work undertaken by the Supplier will be on a fixed price for a fixed capacity of resource as described in this paragraph. The Buyer and Supplier have agreed a fixed level of resource capacity to be provided by the Supplier (number of roles, level of seniority and days per role) during the term of this Call-Off Contract. Such capacity is set out in the spreadsheet “HMRC cyber security delivery partner fixed capacity_220121.xls” attached in Schedule 2. Call-Off Contract charges and shall be invoiced on a fixed price basis for each milestone cycle as specified in Schedule 2 Call-Off Contract charges.

1.3.2 Work undertaken by the Supplier will be managed through prioritisation and agreement with the Buyer through governance reviews and within the current fixed level of team capacity described in 1.3.1. Activities can be re-prioritised at the end of each milestone period as agreed between the Buyer and Supplier. This may also include limited changes to the mix of resource within the Supplier’s fixed capacity, subject to provision of two weeks’ notice. Any change requiring additional effort / resources beyond the Supplier’s fixed capacity (including, for the avoidance of doubt any additional days (or parts thereof) to be provided by assigned resources above what is included in the fixed capacity, will be treated as per the Variation process as defined in clause 32 under this Call-Off Contract.

1.4 Schedule, milestones and deliverables

1.4.1 The Supplier will provide the following services to the Buyer:

- Delivery partner
- Security policy writing
- Ongoing project management support to the CSCC workstream

1.4.2. These services will be delivered on the basis of a number of milestone cycles, providing a regular joint governance model that will allow for the frequent review of activities and prioritisation of work.

1.4.3 Each cycle and corresponding end of cycle milestone will comprise production of the following deliverables:

- a) An End of Cycle Report (Contract Checkpoint Document) comprising the work undertaken by the Supplier during the cycle
- b) A backlog of Supplier activities completed and prioritised for the next cycle
- c) A consolidated summary of Supplier work products completed

1.4.4 There will be a joint governance review session held at the end of each cycle. This will confirm agreement of the End of Cycle Report and backlog priorities for the next cycle. The acceptance criteria for the deliverables provided pursuant to 1.4.3 is as follows:

- a) The Supplier will have issued and stored within the Buyer repository (as agreed as part of delivery governance) the deliverables as set out in 1.4.3.
- b) The deliverables will provide clear details of the work undertaken by the Supplier in respect to the services that are in scope (as set forth in 1.5 of this Schedule), with summary information and links to the location of work products produced during the course of the cycle.
- c) The backlog will be maintained and demonstrate that the Delivery Partner teams are working to agreed priority areas, where these are separate to the standard governance products.

1.4.5 There will be a series of delivery and payment milestones which occur at the end of each six-week cycle. As a result of the duration of the work, all governance at conclusion of each milestone is required to be minimal in order to allow the team sufficient focus on work activities being undertaken. As such, the deliverables provided at each milestone will include summary level information and may reference, but will not duplicate, information otherwise provided through regular weekly and work area delivery.

1.4.6 The dates for the aforementioned cycles and payment milestones are shown in Schedule 2 Charges below.

1.4.7 In the course of weekly governance and Plan and Control activities, the Buyer will receive work products in each of the specified areas and the Supplier will provide reporting. If the Buyer has reason to identify concerns with any activities being undertaken within the scope of this service these should be raised to the Buyer Principal Contact at the earliest opportunity such that these can be addressed. The Supplier is to escalate through the reporting governance cycle any issues that would preclude delivery of the above Services to the anticipated level of quality or completeness.

1.4.8 Milestones will be approved based on the following process: For each milestone, the Supplier will submit a document ("**Contract Checkpoint Document**") outlining the details of the milestone completion and evidence with request for approval, for the Buyer to respond within 5-days of submission. Where the milestone is agreed to be complete and/or meets the acceptance criteria set forth in 1.4.4, the Buyer will confirm acceptance of the milestone by means of approving the

Contract Checkpoint Document. If a milestone is not agreed and does not meet the acceptance criteria set forth in 1.4.4, the Buyer will provide a reason for rejection and both parties will work to determine a resolution approach within 7 days. Should this not be concluded to the satisfaction of both parties, this will be escalated to the Principal Contacts for the Buyer and Supplier. Where the Buyer resubmits the rejected deliverables and these meet the acceptance criteria the Buyer shall accept the relevant milestone.

Where an acceptable resolution cannot be reached, following escalation to the Principal Contacts, and without prejudice to the remedy of either party, the Buyer may end the contract by providing thirty (30) days written notice as per the G Cloud framework terms, detailed in clause 18.1 of this Call-Off Contract.

Dan McBride will be the IBM Delivery Partner responsible for overseeing this project and will provide a point of escalation if required.

Diamond Gaddu will be the Buyer's Principal Contact.

1.5. Scope of services

Delivery partner (18th January – 31st December 2021)

The Buyer is currently carrying out risk analysis of its systems and services to generate a list of candidate CRs. The initial CRs are in the process of being impacted.

The Supplier will support the Buyer as its delivery partner to carry out the following activities:

- Work with the existing team to design and stand up delivery governance, processes and MI reporting to manage the delivery (drawing on the Plan & Control/delivery assurance service that the Supplier provides for SoTF)
- Create and maintain the release schedule delivery plan – refreshing and re-prioritising the plan as additional CRs are impacted
- Manage relevant third party suppliers to deliver to time and budget – in line with the delivery plan and Buyer/Supplier contractual commitments and the Buyer's change framework
- Generate weekly reporting to track delivery progress, spend vs forecast etc - including managing reporting requirements into CTR PMO and planning functions
- Escalate risks and issues with the Buyer, other relevant third party suppliers and internal delivery teams
- Manage technical review of the proposed architectural solutions e.g. through TDA – and manage the work of existing (non-Supplier) security / solution architects
- Carry out delivery assurance of third party / Buyer delivery teams

- Manage the engagement with stakeholders including Buyer system/service owners, Buyer internal delivery teams, 3rd party test partners and existing incumbent suppliers in line with IT change governance within CDIO

As the Buyer's delivery partner, the Supplier will help the Buyer ensure that remediation changes are implemented both by system/service and to address themes impacting multiple systems. Once these changes are made, this will help reduce the Buyer's overall Cyber Risk rating.

Security policy writing (1st April – 31st December 2021)

The Supplier will continue to provide policy writing support to the Buyer. This subset of the team will work closely with the Security Transformation work stream in the delivery of a series of prioritised minimum security standards. The priority of the minimum standards to be developed will be jointly agreed between the Supplier and the Buyer.

Activities related to policy writing in support of overall risk analysis will include:

- Finalising agreed priority order for Tier 3 candidate policies
- Aligning with GRC and emerging security strategy
