SCHEDULE 1 - SPECIFICATION

The Requirement

This requirement is for the storage, maintenance, build and breakdown, of the CQC exhibition stand at multiple exhibitions on a cyclical basis for the next 2 years.

The CQC exhibition stand is capable of being erected in multiple ways for the purpose of this requirement described as;

- Full Build Space Only
- Half Build Shell Scheme

Full details of the stand and build types can be found in Annex 1

The contractor will be required to build and break down the stand at exhibitions which are pre booked by CQC. The contractor's role is crucial to CQC delivering a successful exhibition programme which supports the organisation to meet its strategic obligations.

Please note the contractor does not need CQC to be present during the build of an exhibition stand; however the contractor must wait for a CQC colleague to arrive at an agreed handover time (in line with organiser's timeline) to check the stand is correctly built as per agreed plans for each show.

In the event of travel delay, the contractor must wait for a CQC staff member to arrive in order to handover the stand and check everything is correct before leaving the site. Any cost associated with this will be negotiated.

The contractor will be required to maintain (reporting any repairs required and cost to CQC) and store CQC's existing exhibition stand throughout the duration of the contract. **Please see Annex 1 for storage requirements.**

The contract will involve the contractor liaising directly with all the different exhibition organisers to submit information regarding the build and break down by deadlines specified within online manuals (which the exhibition organisers provide). Please note CQC will provide the contractor with the online manual and exhibition organiser details as soon as they become available for each exhibition.

CQC are likely to exhibit at the exhibitions below every year (please note that locations and dates vary every year), however this list is not exhaustive and CQC reserve the right to substitute exhibitions, and in negotiation vary the types of build or request additional events over the life of the requirement.

Spring Season

- Community Care Live – half build shell scheme
- Royal College of Nursing Congress – full build space only (3 x 2m)
- British Dental Association Exhibition – half build shell scheme
- The Alzheimer's Show – half build shell scheme

- Health Plus Care Exhibition – full build space only (3 x 3m)

Autumn Season

- The Health and Care Innovation Expo – half build shell scheme
- The National Children and Adult Services Conference (NCAS) – half build shell scheme
- Best Practice Exhibition – half build shell scheme
- The Care and Dementia Show – half build shell scheme
- Patient First Exhibition – half build shell scheme

There may also be a requirement for simultaneous exhibitions as CQC own enough equipment, to build two stands (whether full build space only or half build scheme) at the same time, in different locations.

The contractor, will be required to provide a quote (**for each individual exhibition**) outlining the expected total cost, broken down as below (the cost per show will vary depending on location, build type, crew required, electric charges etc.)

- **Crew cost** - Includes pre show preparation, installation and de-rig onsite and post site return to warehouse.
- **Logistics (Travel / Subsistence / Hotels) cost** - Accommodation and subsistence expenses for crew during onsite build-up and breakdown period
- **Transport cost** - Delivery to and collection from the venue including fuel and insurance. The contractor must own or lease reliable vehicles, allowing transport of equipment for up to two shows simultaneously.
- **Design and project management cost**- Including order processing, liaison with organisers, and design studio time for x2 3D design concept visualisations, detailed plans, and graphic elevations.
- **Additional charges** - electrics and internet

Whether the build is a full build space only or a half build shell scheme, electrical charges may not be included (depending on the show) and may need to be incorporated into the individual exhibition quotes supplied to CQC by the contractor.

The contractor must send the quote to CQC within 5 working days of being notified of the requirement.

The Senior Events Officer for CQC will then sign off this quote and the first 50% invoice can be raised within 30 days of this confirmation. The next 25% invoice should be sent to CQC 30 days before the exhibition begins and the final 25%, plus any last minute additions (such as an additional literature racks), should be invoiced within 30 days after an exhibition has finished.

The details of the storage requirements can be found in Annex 1

CQC will require the contractor to have a secure, appropriate storage facility and have the necessary insurance in place that will protect CQC in the event of theft, damage or loss.

Service Levels and Volumes

The project manager assigned to the CQC account must answer any queries from CQC regarding a project within 1 working day.

The project manager assigned to the CQC account must provide a build quote for CQC within 5 working days of it being requested. The cost for half or full build will be agreed in the contract, but this quote will show the variable items such as hotel, crew, travel, internet and so on, and any hire of additional equipment as requested.

Should the project manager be unavailable, the contractor must provide an alternative contact to manage the project in their absence.

The project manager must confirm an onsite handover time (to check the build is complete) with CQC at least 1 month in advance of a show to allow for the arrangement of CQC staff travel.

Should an item of stand equipment require repairs, the contractor must inform CQC of the nature of the repair and estimated cost before repair and upon agreement with CQC complete these repairs before the next show at which the equipment is required.

While CQC are likely to exhibit at 10 exhibitions, the contractor must be able to accommodate additional shows if required in each year of the contract. While CQC will always try and give as much notice as possible, at times there may be urgent requirement to do a show with less than a month notice.

Authority Responsibilities

CQC will;

- Assign the Senior Events Officer to act as the CQC Contract Manager and primary point of contact for the successful contractor and assigned project manager.

- Should the Senior Events Officer be unavailable, CQC will ensure that the contractor will be able to contact another member of the team.

- Provide the contractor with relevant information and online manuals for each exhibition. This will enable the contractor to provide an accurate quote per show, fully understand the requirements and complete online forms relevant to the build.

- Ensure all build and storage payments are made promptly in line with the contract.

- Ensure that the cost of the contract does not exceed that agreed in the contract and that the contractor is apprised on anything that may affect the agreed cost or the

performance of the contract.

Contractor Responsibilities

The contractor will;

Maintain (reporting repairs to CQC) and store CQC's existing exhibition stand throughout the duration of the contract.

If the stand is damaged by the contractor during transportation, on site or within their storage then they must cover the cost of repair.

The contractor must provide evidence that they have sufficient insurance coverage to cover for theft, fire and any other major damages (such as water damage) that may occur whether the stand is within their storage, being transported or on site.

Provide CQC with a cost estimate and plans for approval for each individual exhibition within 5 working days of being requested.

Crew travel arrangements for a show must be booked by the contractor
Provide advice and liaise with the CQC Senior Events Officer and exhibition organisers on each individual show.

Work with the exhibition organisers (using their online manuals) to supply detailed stand plans, risk assessments, health and safety assessments and build up/breakdown registration details for each individual show to deadlines specified by the organiser (these dates will vary depending on the show).

All deadlines listed in online manuals for each show must be adhered to and seven days' notice given to CQC if a deadline will be missed.

Order and pay for services through the exhibition online manuals (e.g. electrical and internet connections) to ensure that they are in place for arrival on site and build up for each individual show. If electricity is not in place the supplier will be expected to organise it on site to ensure the stand has all connections before the start of the show.

Build and breakdown each exhibition stand to times specified by the exhibition organisers (varies) within their online manual.

The contractor does not need CQC to be present during the build of an exhibition stand; however the contractor must wait for a CQC colleague to arrive at an agreed handover time to check the stand is correctly built.

In the event of travel delay, the contractor must wait for a CQC staff member to arrive in order to handover the stand and check everything is correct before leaving the site.

Each stand sign-off (after a stand build) time must be agreed at least one month in advance to allow CQC travel to be booked; times must be agreed in consultation with CQC to allow for the accommodation of other work.

Supply additional items as required which CQC does not own; e.g. literature racks advising CQC within 5 working days of any additional costs.

Provide secure storage to store the CQC stand and literature between exhibitions throughout the duration of the contract.

Provide a maintenance service for any required stand and equipment repairs between exhibitions for the duration of the contract.

Any damage must be reported to CQC within one day of de-rig at a show.

Any costs for repairs to be quoted to CQC within one week after de-rig at previous show and mended in time for the next show.

Demonstrate exceptional project management by providing information to suppliers and CQC by set deadlines.

Assign a project manager dedicated to the CQC account who should predominantly work on our exhibition programme.

Attend a quarterly review (teleconference) on the contract performance together with 'keeping in touch' meetings (teleconference) with CQC on specific exhibitions, to ensure that the exhibition programme is running to schedule.

Provide regular updates on cost to include actuals and projections for forthcoming events

Provide a yearly invoice for the storage of the CQC stand each year of the contract. This will be paid annually.

For every exhibition the contractor must provide a quote within 5 working days of the request. The Senior Events Officer for CQC will then sign off this quote and the first 50% invoice can be raised within 30 days of this confirmation. The next 25% invoice should be sent to CQC 30 days before the exhibition begins and the final 25%, plus any additions that occurred, should be invoiced within 30 days after an exhibition has finished.

Contract Management Arrangement

The contractor and CQC must attend quarterly teleconference meetings to evaluate how the contract is progressing.

The contractor and CQC should attend a teleconference at the end of each exhibition season (Spring and Autumn) to evaluate. This meeting will then be used to brief about future seasons, and an update CQC programme of exhibitions will be supplied to the contractor.

Together with the above, the contractor must be able to have continuous communication with CQC regarding the ongoing exhibition programme throughout the working week.

CQC will review supplied quotes and monitor costs against contract commercials.

Crew for each exhibition must be confirmed to CQC 1 month prior to an exhibition.

Milestone

Description	Target Date	Action to Achieve Milestone	Review Date
Storage of stand	Within 2 weeks of contract commencement	Collection of stand from incumbent supplier	
Viewing of storage	Within 2 weeks of contract commencement	CQC staff to visit storage facility	
Give supplier access to collection of the stand	Within 2 weeks of contract commencement	Skills and Knowledge Transfer/Handover and Contract Exit	

Skills and Knowledge Transfer/Handover and Contract Exit

There will be a transition period between the old contract and the new contract. This is expected to happen as soon as the contract is signed off. Then incumbent supplier should pass on their knowledge of the CQC exhibition programme i.e. venue experience, how to build the stand correctly etc. to the new contractor. At the end of the contract the contractor who wins the contract outlined in this ITT must give the same access and knowledge to any new supplier taking over the contract.

SCHEDULE 2 – TENDER RESPONSE

Capacity and experience to build and break down a show similar to the Pharmacy Show in Birmingham

The activities required to be undertaken to ensure a successful build are:-

Design a stand for the allocated stand space, provide a stand floor plan and a detailed project plan. As your existing stand contractor our design and project management teams fully understand CQC requirements and have the necessary experience to deliver your exhibition stand.

Provide a quote with a detailed cost estimate for your approval.

Liaise with the show organiser and venue contractors on behalf of CQC, and communicate with CQC on all aspects of the event. We provide a full management service taking care of all aspects of the show from initial design concept to final delivery and build onsite.

Employ an experienced crew team to build and break down each exhibition stand. Open Exhibitions have built the CQC stand at over 20 events across the UK over the last few years and all our in-house crew have direct experience of building the CQC stand. Our crew team have considerable event experience and all have the necessary skills and expertise to build complex exhibition stands.

We have designed and managed similar exhibition programmes for a number of years for Microchip Limited. We designed the stand for the allocated stand space, provided a stand visual and a detailed cost estimate, completed the risk and health and safety assessments, floor plan, and project plan for their approval. We liaised with the show organiser and show contractors on behalf of Microchip to ensure all venue services were ordered and in place for the stand build.

We have the capacity to manage over 15 CQC exhibitions a year and several events at the same time. Historically we service in excess of 130 events per year.

We have the availability to comfortably service the CQC portfolio until July 2020, if required.

Adequate & safe storage

The CQC stand would be stored in our 20,000 sq ft exhibition warehouse in Warwick.

The warehouse is secure, dry, and safe. The property is alarmed and only Open Exhibitions personnel have access. At night the gates are securely locked preventing access to the yard.

The roof is water tight and in addition the exhibition stand is stored off the floor on post stillages. The stillages enable easy movement around the warehouse for loading and unloading.

Attached is a copy of our insurance certificate. Client owned stock and equipment is insured at our premises, whilst in transit and at exhibition venues. The sums assured are in excess of

Repair capability

As part of our quality control procedures all stock is cleaned, checked and repaired as necessary after an event prior to the stock being stored ready for the next event.

If, repairs are necessary following our quality control procedures, then we have the capability in-house in our fully equipped workshop to repair all stand items prior to the next event.

The stand is a modular one comprising our own Form walling system. The exhibition curved stand walling is constructed from matt composite dibond panels that have been rolled to shape.

If the walling panels are damaged then we have a Sahindler 3m wide motorized three roller bending machine that can roll the panels into curves to create the curved walling.

Our in-house warehouse crew have been trained and have the experience to carry out this specialised rolling work.

If the uprights or clip for the walling panels need to be replaced then we have our own dye tool machines so that we can manufacture new parts.

Capacity to build two shows simultaneously

As your existing stand contractor our design, project management and crew teams fully understand CQC requirements and have the capability to build and break down several exhibition stands at the same time

We have the flexibility to easily attend your required number of exhibitions per year.

We would dedicate a separate in-house build crew team to each event.

To ship your stand to an event requires a sprinter van.

We own our own van and if another is required we would hire a sprinter van in from a vehicle leasing company such as Enterprise.

1. INTRODUCTION

This Schedule 7 covers:

- 1.1 principles of security for the Contractor System, derived from the Security Policy Framework, including without limitation principles of physical and information security;
- 1.2 wider aspects of security relating to the Services;
- 1.3 the creation of the Security Plan;
- 1.4 audit and testing of the Security Plan; and
- 1.5 breaches of security.

2. PRINCIPLES OF SECURITY

- 2.1 The Contractor acknowledges that the Authority places great emphasis on confidentiality, integrity and availability of information and consequently on the security of the Premises and the security for the Contractor System. The Contractor also acknowledges the confidentiality of Authority Data.
- 2.2 The Contractor shall be responsible for the security of the Contractor System and shall at all times provide a level of security which:
 - 2.2.1 is in accordance with Good Industry Practice and Law;
 - 2.2.2 complies with Security Policy Framework; and
 - 2.2.3 meets any specific security threats to the Contractor System.
- 2.3 Without limiting paragraph 2.2, the Contractor shall at all times ensure that the level of security employed in the provision of the Services is appropriate to maintain the following at acceptable risk levels (to be defined by the Authority):
 - 2.3.1 loss of integrity of Authority Data;
 - 2.3.2 loss of confidentiality of Authority Data;
 - 2.3.3 unauthorised access to, use of, or interference with Authority Data by any person or organisation;
 - 2.3.4 unauthorised access to network elements, buildings, the Premises, and tools used by the Contractor in the provision of the Services;
 - 2.3.5 use of the Contractor System or Services by any third party in order to gain unauthorised access to any computer resource or Authority Data; and
 - 2.3.6 loss of availability of Authority Data due to any failure or compromise of the Services.
 - 2.3.7 processing and storage of authority data within the UK or by exception within the EEA. Any processing outside of the UK must be subject to specific approval by the Authority.

3. SECURITY PLAN

- 3.1 The Contractor shall develop, implement and maintain a Security Plan to apply during the Contract Period (and after the end of the term as applicable) which will be approved by the Authority, tested, periodically updated and audited in accordance with this Schedule 7.
- 3.2 A draft Security Plan provided by the Contractor as part of its bid is set out herein.
- 3.3 Prior to the Commencement Date the Contractor will deliver to the Authority for approval the final Security Plan which will be based on the draft Security Plan set out herein.
- 3.4 If the Security Plan is approved by the Authority it will be adopted immediately. If the Security Plan is not approved by the Authority the Contractor shall amend it within 10 Working Days of a notice of non-approval from the Authority and re-submit to the Authority for approval. The Parties will use all reasonable endeavours to ensure that the approval process takes as little time as possible and in any event no longer than 15 Working Days (or such other period as the Parties may agree in writing) from the date of its first

submission to the Authority. If the Authority does not approve the Security Plan following its resubmission, the matter will be resolved in accordance with clause 12 (Dispute Resolution). No approval to be given by the Authority pursuant to this paragraph 3.4 may be unreasonably withheld or delayed. However any failure to approve the Security Plan on the grounds that it does not comply with the requirements set out in paragraphs 3.1 to 3.4 shall be deemed to be reasonable.

3.5 The Security Plan will set out the security measures to be implemented and maintained by the Contractor in relation to all aspects of the Services and all processes associated with the delivery of the Services and shall at all times comply with and specify security measures and procedures which are sufficient to ensure that the Services comply with:

3.5.1 the provisions of this Schedule 7;

3.5.2 the provisions of Schedule 1 relating to security;

3.5.3 the Information Assurance Standards;

3.5.4 the data protection compliance guidance produced by the Authority;

3.5.5 the minimum set of security measures and standards required where the system will be handling Protectively Marked or sensitive information, as determined by the Security Policy Framework;

3.5.6 any other extant national information security requirements and guidance, as provided by the Authority's IT security officers; and

3.5.7 appropriate ICT standards for technical countermeasures which are included in the Contractor System.

3.6 The references to Quality Standards, guidance and policies set out in this Schedule shall be deemed to be references to such items as developed and updated and to any successor to or replacement for such Quality Standards, guidance and policies, from time to time.

3.7 If there is any inconsistency in the provisions of the above standards, guidance and policies, the Contractor should notify the Authorised Representative of such inconsistency immediately upon becoming aware of the same, and the Authorised Representative shall, as soon as practicable, advise the Contractor which provision the Contractor shall be required to comply with.

3.8 The Security Plan will be structured in accordance with ISO/IEC27002 and ISO/IEC27001 or other equivalent policy or procedure, cross-referencing if necessary to other schedules of the Contract which cover specific areas included within that standard.

3.9 The Security Plan shall not reference any other documents which are not either in the possession of the Authority or otherwise specified in this Schedule 7.

4. AMENDMENT AND REVISION

4.1 The Security Plan will be fully reviewed and updated by the Contractor annually or from time to time to reflect:

4.1.1 emerging changes in Good Industry Practice;

4.1.2 any change or proposed change to the Contractor System, the Services and/or associated processes;

- 4.1.3 any new perceived or changed threats to the Contractor System;
 - 4.1.4 changes to security policies introduced Government-wide or by the Authority; and/or
 - 4.1.5 a reasonable request by the Authority.
- 4.2 The Contractor will provide the Authority with the results of such reviews as soon as reasonably practicable after their completion and amend the Security Plan at no additional cost to the Authority.
- 4.3 Any change or amendment which the Contractor proposes to make to the Security Plan (as a result of an Authority request or change to Schedule 1 or otherwise) shall be subject to a CCN and shall not be implemented until Approved.

5. AUDIT AND TESTING

- 5.1 The Contractor shall conduct tests of the processes and countermeasures contained in the Security Plan ("Security Tests") on an annual basis or as otherwise agreed by the Parties. The date, timing, content and conduct of such Security Tests shall be agreed in advance with the Authority.
- 5.2 The Authority shall be entitled to send a representative to witness the conduct of the Security Tests. The Contractor shall provide the Authority with the results of such tests (in an Approved form) as soon as practicable after completion of each Security Test.
- 5.3 Without prejudice to any other right of audit or access granted to the Authority pursuant to the Contract, the Authority shall be entitled at any time and without giving notice to the Contractor to carry out such tests (including penetration tests) as it may deem necessary in relation to the Security Plan and the Contractor's compliance with and implementation of the Security Plan. The Authority may notify the Contractor of the results of such tests after completion of each such test. Security Tests shall be designed and implemented so as to minimise the impact on the delivery of the Services.
- 5.4 Where any Security Test carried out pursuant to paragraphs 5.2 or 5.3 reveals any actual or potential security failure or weaknesses, the Contractor shall promptly notify the Authority of any changes to the Security Plan (and the implementation thereof) which the Contractor proposes to make in order to correct such failure or weakness. Subject to Approval in accordance with paragraph 4.3, the Contractor shall implement such changes to the Security Plan in accordance with the timetable agreed with the Authority or, otherwise, as soon as reasonably possible. For the avoidance of doubt, where the change to the Security Plan to address a non-compliance with the Security Policy Framework or security requirements, the change to the Security Plan shall be at no additional cost to the Authority. For the purposes of this paragraph, a weakness means a vulnerability in security and a potential security failure means a possible breach of the Security Plan or security requirements.

6. BREACH OF SECURITY

- 6.1 Either Party shall notify the other immediately upon becoming aware of any Breach of Security including, but not limited to an actual, potential or attempted breach, or threat to, the Security Plan.
- 6.2 Upon becoming aware of any of the circumstances referred to in paragraph 6.1, the Contractor shall immediately take all reasonable steps necessary to:

- 6.2.1 remedy such breach or protect the Contractor System against any such potential or attempted breach or threat; and
 - 6.2.2 prevent an equivalent breach in the future;
 - 6.2.3 collect, preserve and protect all available audit data relating to the incident and make it available on request to the Authority;
 - 6.2.4 investigate the incident and produce a detailed report for the Authority within 5 working days of the discovery of the incident.
- 6.3 Such steps shall include any action or changes reasonably required by the Authority. If such action is taken in response to a breach that is determined by the Authority acting reasonably not to be covered by the obligations of the Contractor under the Contract, then the Contractor shall be entitled to refer the matter to the CCN procedure set out in Schedule 3.
- 6.4 The Contractor shall as soon as reasonably practicable provide to the Authority full details (using such reporting mechanism as may be specified by the Authority from time to time) of such actual, potential or attempted breach and of the steps taken in respect thereof.
7. CONTRACT EXIT – SECURITY REQUIREMENTS
- 7.1 In accordance with clause H7 of the Contract, on termination of the Contract, either via early termination or completion of the Contract then the Contractor will either return all data to the Authority or provide a certificate of secure destruction using an industry and Authority approved method. Destruction or return of the data will be specified by the Authority at the time of termination of the Contract.
