The successful bidder will be expected to identify a lawful basis under Article 6 of the UK GDPR and a separate condition for processing under Article 9 and document this as part of the project documentation before any data is collected. The Supplier will need to confirm that they are UK GDPR or GDPR (if operating in the EEA) compliant when submitting a bid.
Duration of the processing	Throughout the project, from the issuing of the tender (February 2022) to project completion Friday, 30th September 2022.

To differentiate the analysis of participant views and responses to the questions explored as part of the dialogue delivery and analyse any patterns in views expressed by different individuals or groups. Order Schedule 20 (Order Specification)

This Schedule sets out the characteristics of the Deliverables that the Supplier will be required to make to the Buyers under this Order Contract

1. Background

Strategic context

As a department, BEIS' responsibilities include energy, clean growth and climate change. In order to meet its responsibilities in these areas, BEIS delivers policies on renewable energy and energy security, and heat and industrial decarbonisation. Biomass has a role to play in all of these areas, and as a result BEIS is leading on the development of a cross-government Biomass Strategy which is due to be published in late 2022.

The Biomass Strategy will detail the government's view on how biomass can best contribute towards net zero across these areas, and outline the policies needed to deploy biomass in the priority areas for net zero, alongside the frameworks to support these policies, such as sustainable supply of resources, sustainability and air quality requirements, and GHG accounting mechanisms.

BEIS launched a call for evidence in spring 2021 to seek stakeholders' views about the role of biomass in achieving net zero and the technological, policy, and other barriers which need to be overcome to realise any opportunities. Following the call for evidence, we consider further public engagement and dialogue is required to better understand public views about uses of biomass and associated technologies. This need for further public/community engagement was specifically raised by a number of respondents in their responses to the call for evidence. This public engagement will feed into the development of the forthcoming Biomass Strategy.

The Sciencewise programme, led and funded by UK Research and Innovation (UKRI) and supported by BEIS, aims to improve UK public sector policy-making around areas of science, technology and innovation through the use of public dialogue. The programme provides financial support (through a co-funding model) and specialist advice in all aspects of best practice in dialogue with the public to help Government departments and public sector bodies develop and commission public dialogue. For this project, Sciencewise will be working with BEIS.

Rationale for the project

As part of this Sciencewise public dialogue project, we want to (i) explore views, any areas of concern, and possible conditions for biomass use further, (ii) identify areas where information and additional knowledge would be most useful to the public, and importantly (iii) add to the evidence base of public perspectives on biomass and Bioenergy with carbon capture and storage (BECCS). Here, we aim to build on the outcomes of the Climate Assembly UK work.

At present we consider that there is a gap in detailed public dialogue and engagement on biomass and BECCS, which has meant that the more detailed views of participants are not currently comprehensively captured or understood. This gap has been identified through a review of recent research and surveys undertaken on biomass and BECCS. In summary, we found that in large part research has been relatively general in terms of exploring the public's potential support for biomass, BECCS, and Carbon Capture, Utilisation and Storage (CCUS) technologies more widely, as well as general views on biomass/BECCS compared to other renewable technologies.

In much of the existing, more general, research that captures public views on biomass and BECCS (such as the BEIS Public Attitudes Tracker and Climate Assembly UK work), there is no evidence of strong public opposition to biomass being used as a source of renewable energy, although we acknowledge that in the UK Climate Assembly research for example, there were indications that support for BECCS may be limited and that concerns could be considerable. We would therefore like to explore further the nature and source of these concerns, why support may be limited, and whether public opinion is similar to, or diverges from, the views expressed in correspondence and engagement with other stakeholders. This cannot currently be confirmed with any level of confidence due to the lack of more detailed and comprehensive public engagement that has taken place in this space on biomass and BECCS, for example through the UK Climate Assembly research.

Where there are any public concerns around the use of biomass and BECCS, it will be important for BEIS to understand specifically where these concerns lie so that they can be addressed as part of the development and implementation of the Biomass Strategy. Where concern and opposition are identified as part of this project, we will aim to establish the actions and conditions participants would prefer to be put in place in order to mitigate their concerns. This is particularly important for short-term policy development in areas, such as Power-BECCS, as the Government intends to develop a business model for Power-BECCS in the near future.

Size of dialogue project

- Minimum number of participants: 100
- Expenditure: The budget for this research project is £156,600.00 excl. VAT.

Anticipated impact/s of the research

The outcomes of this project are likely to impact a variety of decision-making areas in relation to biomass and BECCS policy.

The overarching strategic context for this project is net zero. The Net Zero Strategy (NZS) presented, for the first time, that Government sees a vital role for biomass and BECCS in achieving net zero and its sixth carbon budget. The NZS outlined that reaching net zero requires biomass use in many areas vital for decarbonisation, such as growing the low carbon fuel sector, producing low-carbon hydrogen at scale, reducing demand for energy and carbon-intensive resources, and delivering Greenhouse Gas Removals (GGR) at scale. The NZS demonstrated the cross-cutting and wide use of biomass in almost all sectors of

the economy. In addition, Government has committed to delivering 5 Mt CO₂ of engineered removals by 2030, which (according to BEIS analysis) is unlikely to be delivered in this timeframe by any other technology but Power-BECCS.

Therefore, the context for exploring public views and opinion on biomass use has shifted significantly since 2016, when the Energy Systems Catapult undertook similar research, and even since the 2020 Climate Assembly UK work. To successfully deliver the targets set out in the NZS and make significant progress towards net zero in this decade requires us to refine our understanding of public opinion on these technologies, including the specific conditions and actions participants would like to see Government put in place when designing these policies to secure support or mitigate concerns. Increasing our understanding of public views and opinions will enable us to better factor into and consider the public voice in policy development in this space, in line with the Net Zero Strategy goals.

Government has committed to publishing a Biomass Strategy in late 2022, and public engagement and views on biomass sourcing and use, and on BECCS will form an important part of the Biomass Strategy, as it will steer policy development on biomass in a range of sectors. Business models for Power-BECCS are also in the early stages of development, and it is clear that research around public views on acceptability and conditions of use of these technologies are required in order to successfully roll out the technology at scale.

We foresee the most immediate impacts from the project being on the future harmonised sustainability criteria and policy which is being developed for biomass use in all sectors. At present, the UK's existing sustainability criteria are among the most stringent in the world, but are specific to financial support schemes in sectors, and specific requirements can vary to some extent across the schemes. Looking forward, we are exploring options to put in place a common sustainability criteria which can be applied to all biomass feedstocks across sectors regardless of support schemes. We foresee that input from participants on the specific criteria (such as those relating to biodiversity, carbon stocks, land rights, and social issues) that are most important to them could be included in the revised policy framework.

We also expect that views could impact and influence any potential future regulations around air quality and biomass use, such as BECCS. Similarly to the sustainability criteria, we would use participant views to establish the areas of greatest importance for participants to be regulated and the specific policies and areas where regulations should be made stricter.

When developing the specific requirements that we want to include in a common sustainability and air quality criteria for biomass, we intend to consider the evidence base alongside stakeholder views (collected via the recent call for evidence, future stakeholder workshops, and potential consultations) to draw up an evidence-based list of improvements that also considers the reporting burden on organisations. The findings of this public dialogue project will be considered alongside the evidence base and on the same footing as stakeholder views collected via other routes, to ensure they feed in and all views are represented.

Also on BECCS, participants could influence policy by stating preferences for the types of BECCS (Power-BECCS, Energy-from-Waste BECCS, Hydrogen-BECCS, BECCS in

transport fuel production, etc) or ways of using it, and/or how much of each type of BECCS they would like to see and provide preferences for the regional distribution of the plants.

Participants will need to be given the opportunity to evaluate and react to the technology outside the immediate context, and while there is little scope for direct impact on this broader point, participants' views will form part of the ongoing social research base for biomass sourcing and use policy in the energy, transport, heat, land use, and GGR sectors.

The outputs from this research will form part of our consideration into the social implications and/or impacts of biomass use and sourcing, for example on local communities around biomass plants (e.g. combustion, anaerobic digestion, and gasification plants) and BECCS plants. Biomass plants can range in size significantly, presenting different impacts on local communities. Different biomass technologies have different environmental and AQ impacts and often use different source materials (e.g. wood pellets for combustion, food waste, sewage sludge, other biogenic waste in anaerobic digestion), therefore it is important to establish whether and how participants' views differ across these technologies. The findings could also influence areas of further research, particularly in the social research and public trust space.

Importantly, as part of the forthcoming Biomass Strategy, we intend to build a wider plan for building and improving public trust, mitigating concerns about government's regulations and processes for reducing potential negative impacts of using biomass and BECCS in achieving net zero. To do this, we need to understand the views and key areas of concerns so that we can specifically address these points, and this project will deliver vital information towards this objective from which we will be able to consider how best to build further effective communications and engagements. The findings from this project will also allow the team to gain a greater understanding of how policies relating to biomass may fit in with Government's Public Sector Equality Duties, for example if policies were likely to adversely impact a certain group of the population, which is currently an evidence gap.

2. Aims and Objectives of the Project

Aims and objectives

The overall aim of the project is to engage with a diverse group of participants on biomass and BECCS to gather views, perspectives, and any concerns on biomass sourcing (both domestic and imports) and use, including as part of BECCS. The findings will inform the forthcoming Biomass Strategy; specifically, we intend to include a plan for public engagement for the implementation of the Biomass Strategy. In addition, the findings of the project will influence any future sustainability criteria or regulations for biomass/BECCS, as well as inform BEIS of the areas where future public engagement is required.

The project objectives are:

1. To engage a diverse group of participants, broadly reflective of the UK public, in topic areas relating to the development of the Biomass Strategy
2. To explore and understand participants' aspirations and concerns in relation to biomass sourcing (both domestic and imports), production and use across the economy

3. To understand what values and perspectives inform participants' views in order to inform and help refine any future communications and engagement
4. To define conditions of use in relation to sustainability frameworks (which could include areas like land, biodiversity, environmental impacts, ecosystem services, emissions and social criteria)
5. To determine participants' views of using biomass, particularly through BECCS, as a negative emissions technology in achieving net zero
6. To help shape other aspects of Government policy and guidance as part of the forthcoming Biomass Strategy, and inform future engagement

Questions/question areas to explore

The successful bidder will be expected to explore the following questions as part of the public dialogue to deliver the project objectives:

- a) What are participants' views on uses of biomass across different sectors of the economy (such as transport, land-use, agriculture, energy and heat) in the context of net zero?
 - Sub-questions could include exploring different types of feedstocks, how biomass is produced and sourced as well as where it is sourced from (both domestically and imported), and using biomass for bio-based products.
 - There should be an opportunity for participants to share any concerns with the wider concept of using biomass/BECCS, as well as into more specific areas such as sustainability or use as offsets distracting from the need for mitigation
 - There could also be a sub-question looking into views and concerns around using biomass as a Greenhouse Gas Removal (GGR) technique to offset emissions more generally (i.e. through a range of GGR methods, not just through BECCS).
- b) What are the values or perspectives that underpin participant views and concerns on biomass?
- c) What governance, regulation and criteria do participants want in place to ensure that any sourcing (both domestic and imported) and use of biomass in the UK, including for BECCS, is sustainable?
 - Who do they trust to oversee the governance and regulation of biomass use, including BECCS?
 - This could also include exploring who should pay for BECCS, how BECCS could affect specific communities/geographic locations (and how impacts could be minimised), what concerns around BECCS are etc
- d) How does certain information about biomass and BECCS impact on participants' views?
- e) What features (safety, security etc) would a converted biomass power plant with BECCS need, or what benefits could it bring (e.g. jobs, investment etc), for communities to support development in their own local area?
- f) What areas do participants wish for more information on in relation to biomass and BECCS/what areas are there knowledge gaps for participants?

- Within this, some flexibility in the design of the engagement should be kept, for example so participants could ask for input from particular organisations/perspectives

Group/s and any geographic areas to research

The objective of this research is to engage and hear from a diverse and inclusive group of citizens that is broadly reflective of the UK population, in so far as is possible with a relatively small number of participants, therefore these are the participants we expect the contractor to focus on.

We would also be interested in hearing the views of citizens that live relatively near to large biomass/BECCS power stations, such as Drax or Lynemouth, and participants such as farmers or others involved in agriculture/farming who play a key role in the production/sourcing of biomass and may be affected by any changes in land use (however the views of farmers, for example, could also be heard through involvement as 'expert representatives' in certain dialogue sessions throughout the project).

The work should take part in the four nations of the UK. Bidders should indicate how they would distribute the 100 minimum participants across the four nations and provide a rationale for this distribution.

Contractors should suggest the most cost efficient and valuable method of including the various important perspectives in this area. It is expected that a core group which is inclusive, diverse and reflective of the UK population as a whole will be selected, and then additional participants from some of the specific areas we'd like to ensure are covered will also be selected. If it is not possible to secure participants from the specific areas requested, it may be that these views can be included in the project through participation as 'experts' who provide presentations and input into the workshops, for example from farmers. This is expected to be explored with the successful bidder and the Oversight Group (OG) (see below for further information on the OG) once the successful bidder identified the most cost efficient and valuable method of including the various important perspectives for the project.

3. Suggested Methodology

If applicable: Total number of Participants (experimental design)	Insert numbers: Minimum 100
Any other specific requirements	Further information on methodology is provided below

Public dialogue methodology

The contractor is expected to propose the detailed structure of this project; however we anticipate that the core of the process will involve deliberative public dialogue processes in

accordance with the Sciencewise [Guiding Principles](#) and [Quality in Public Dialogue Framework](#).

The exact methodology will be based on the expertise and creativity of the winning contractor, and the resources and time frame of the project. The methodology suggested by bidders should include deliberative and dialogic elements and enable interaction between participants and specialists. There should be sufficient time for participants to receive, discuss, reflect and deliberate on information provided, and share and learn from each other's views. Bidders should note that detailed knowledge of the technical aspects of BECCS or biomass are not required for participants' views to be of value.

Depending on Covid-19 restrictions we may aim to hold some, possibly all, events in a hybrid manner to enable participation of a range of participants. The bidder should recommend an approach that does not impose additional risks on the costs or timetable for this work. Whichever channel is chosen for workshops (face-to-face or online), bidders should make clear what methodological challenges they anticipate arising from this particular topic, and how their methodology minimises or overcomes these challenges. Bidders should also outline a contingency plan or approach to deal with any unforeseen absences of participants or specialists due to illness, isolation or other commitments relating to the ongoing Covid-19 pandemic that may arise during the course of the project.

Although the final approach will depend on the successful contractor appointed, it is expected that there will be between 10-14 hours of workshops delivered as part of this project, with individual workshops usually lasting between 2-3 hours. Alongside this, we encourage bidders to utilise an appropriate online platform, to enable participants to engage with content between workshop sessions. This may include specific tasks for participants to undertake.

Following project kick-off, the successful bidder will be expected to undertake a rapid evidence assessment involving some desk research and stakeholder interviews to inform the development of the supportive materials. The OG may also raise questions about dialogue structure and design and bidders will need to allow for the incorporation of these feedback. Bidders will also be expected to suggest appropriate structures based on their expertise of running previous dialogue projects.

Wider stakeholder input to this project will be important, and we anticipate this being in the form of an initial stakeholder workshop, held online. Engaging stakeholders both at an early stage and throughout the project would:

1. Provide us with insight into the perspectives of a wider group than involved in overseeing the project.
2. Help to build awareness of the work at an early stage, potentially easing involvement of specialists in the public dialogue events.
3. Help with dissemination and communication of the findings on conclusion of the project.

Bidders will need to account for this stakeholder workshop in their proposed project timeline

and demonstrate that feedback from the stakeholder group will be incorporated into materials prepared for the dialogue.

Stakeholders for the initial stakeholder workshop are expected to be selected through a collaborative process, with the Oversight Group (OG), BEIS Project Team, contractor and Sciencewise Dialogue and Engagement Specialist (DES) possibly all providing suggestions. Sciencewise and the evaluator are likely to challenge, and in doing so help to ensure that the full range of perspectives are reflected in any final list.

The stakeholder workshop should be used after parameters, scope and broad content have been agreed between the OG, BEIS Project Team and the contractor. The stakeholder workshop should at this point be used as a pilot, to identify any gaps in the plans, whether language used contains any misleading information, and/or whether positions outlined reflect the true breadth of the debates in this topic area. Bidders should propose how this stakeholder workshop will be organised, run and facilitated.

We welcome use of a digital platform as part of this work: if this is included in a proposed approach, bidders should specify what value it adds and how they plan to use the platform during the project.

Bidders should make clear how their proposed approach will maximise the overall quality of the project, including the richness of data outputs, and the learning and impacts of the project.

We welcome innovative approaches, provided these add to the overall value of the final process and outputs. Bidders are asked to provide an explanation for the design approach and methodology they recommend.

Potential contractors are encouraged to consider:

- That BEIS expects dialogue findings and conclusions that are reflective of the subject matter and rigorous enough to contribute to the evidence base for the policy and regulation around BECCS in the UK.
- How collaboration with other organisations or contractors may bring in suitable skills as necessary.
- How stimulus materials / case studies / scenarios may be developed to have legacy value beyond the project's lifespan, but without losing relevance and value to participants themselves.
- How they will ensure that participants have sufficient information and time to deliberate and respond to the issues under consideration without being overwhelmed.
- That the commissioners are open to creative digital engagement methodologies but are not looking for innovation for its own sake. Any innovation in process should be fully justified in terms of how this adds to the quality and insight of the project as a whole.

- How continued uncertainty over the coronavirus pandemic and any accompanying restrictions requires flexibility in approach and planning.
- What type of contingency arrangements they will make with regards to replacements in the case of incapacity for any reason.
- How and what incentives should be used to encourage participant involvement in the project, and how these incentives will be structured and provided over the course of the project.

Project Oversight

This project will be advised by an Oversight Group (OG) that represents views from academia, public sector (central government and arms length bodies), private sector and civil society. This will include up to 15 experts. BEIS will provide a secretariat and expenses where relevant will be covered by the overall project budget.

The OG will provide expert advice about the development of the dialogue, including the design of the workshops and the presentation of technical concepts. Its advice will be considered by BEIS and the final decision for scope and content of the dialogue will be with the BEIS team.

The role of the OG is to provide an independent perspective, reassurance about the integrity and quality of a project, to disseminate/communicate about the project and its findings, helping with impacts. The OG plays a key part in ensuring the unbiased selection of discussion materials by reviewing and providing challenge on these before they are used.

The successful contractor will be expected to attend and present/participate in OG meetings and provide information or give presentations as required by BEIS. We envisage there will be 3-4 such meetings held online.

A first OG meeting is likely to take place in the week commencing the 7th March 2022, at which contractors will be primarily observers. Bidders are asked to note this date.

A further more substantive OG meeting will be scheduled at which the contractor will be asked to present initial design ideas and an overview of content to be covered.

The OG is likely to comprise individuals from some/all of the following organisations:

- RSPB
- REA
- WWF
- NFU
- Defra
- Supergen
- ADBA (Anaerobic Digestion and Bioresources Association)
- Experts from various academic institutions

It is our intention that the OG membership reflects a diverse range of views on biomass/BECCS.

At this stage it is proposed that there are around 10 OG members, however this may depend on availability.

Project Management

The project will be managed by a core team comprising the BEIS project team and the dialogue delivery contractors. The Sciencewise Dialogue and Engagement Specialist and the UKRI liaison will also both input into the project and its management.

BEIS has appointed a project manager who will: manage the contract; monitor and manage actions and interdependencies, evaluate against delivery timeline; coordinate governance processes; manage risks; and ensure that contractor engagement is undertaken in accordance with best practice.

In terms of the wider governance arrangements for this project, BEIS as the project commissioner has the final say in decisions and report drafting, having taken advice from Sciencewise/UKRI and the OG.

The OG helps to provide an independent perspective, reassurance about the integrity and quality of a project, to disseminate/communicate about the project and its findings, helping with impacts.

Sciencewise/UKRI attends OG meetings, as does the contractor and evaluator, but they have no official role on the OG.

The contractor should note that as is expected with all Sciencewise projects an independent formative and summative evaluation of the dialogue project will be commissioned at the same time.

A project management team comprising the commissioner (BEIS team), Sciencewise & UKRI and the contractor is established to shepherd the project on a day to day basis. The evaluator attends all project management meetings: part of the evaluator's role is to provide formative input.

The project will be carried out according to Government standards for quality and professionalism.

The supplier is expected to provide details of their approach to project management, including how they will address challenges and opportunities, and identify and manage risks associated with this dialogue project.

BEIS, Sciencewise and UKRI, together with the dialogue and evaluation contractors, will convene for an inception meeting, a final project wash-up meeting and any progress meetings/ telecoms needed as part of the good running of the dialogue. The dialogue contractor will be expected to convene, prepare for and attend these meetings, including

the inception meeting. The inception meeting is likely to take place from the week commencing 7th March 2022. (See timetable, below, for other important project dates.)

Stakeholder engagement

- Stakeholder engagement activities should inform the materials used in the dialogue, to ensure that the dialogue is balanced and information provided to participants does not reflect or promote any particular perspective or interest. This would enable us to gain deeper insights into the views of relevant stakeholders, such as NGOs.
- Bidders are invited to recommend an approach to stakeholder engagement that will help to ensure full range of views and accurate information; provide reassurance to external audiences; be proportionate to the budget, and; help to maximise the dissemination and impacts of the dialogue findings.
- The contractor will work with the BEIS team to recruit suitable participants for this work.

Evaluation

- We will follow the Sciencewise best practice guidance and appoint an independent contractor to review the work through a formative and summative evaluation.
- The evaluation contractor will be copied in on all project emails and invited to all events, and may contribute to the project as part of the formative aspect of the evaluation.

Publication of the dialogue and evaluation reports

- All materials that are generated in the course of the project, including final and evaluation reports, will be published.

4. Deliverables

Expected Outputs

The following outputs are required within the project, irrespective of whether the proposed methodologies are used or whether alternatives are proposed. Alternative reporting approaches or timing may be proposed so long as they meet the needs outlined below and the bidder's reasoning is clearly set out.

We anticipate requiring the following deliverables from the dialogue contractor (though these are subject to refinements):

- Dialogue process design and materials, including 'homework' tasks for participants between workshops/rounds of dialogue and the role any digital platform may have
- Presentations to the Oversight Group
- Interim report of findings and deliverables related to outputs and impact
- Quality assured final report and number of comment rounds (a minimum of 2)
- PowerPoint slides summarising key findings

Order Schedule 20 (Order Specification)
 Order Ref: PS22024
 Crown Copyright 2021

- Visual presentation of the findings, such as qualitative segmentation, models, diagrams, infographics, film/vox-pops.
- Policy/stakeholder briefings
- Launch event
- A summary, for example via email, of headline findings following each dialogue activity

Alongside these listed deliverables, the dialogue contractor will:

- Run the project and lead on materials scoping, drafting and finalising, with BEIS, Sciencewise and OG contribution and oversight
- Run a pilot event to test materials and processes, as part of a stakeholder workshop
- Organise and facilitate the online/hybrid/in-person workshops/sessions delivered with participants.
- Processing of data, information and insights gained throughout the project to inform findings and final report
- ID and lease an online platform to be used by participants
- Run and participate in a review meeting approximately a third of the way through the delivery of the dialogue activities to review how the dialogue is proceeding, whether participants are gaining a good understanding of the issues, how the information is provided to participants etc. The contractor will also be expected to provide a summary of findings to date to inform this discussion. This may be tied into an OG meeting or involve OG members.

UKRI/Sciencewise recommend that final reports are structured in the following way:

- Executive Summary – it is recommended that executive summary should not exceed 5 pages: 1 page to situate the report in the wider context (why was the dialogue needed); 1 paragraph on what public dialogue is; 1-3 paragraphs summarising public dialogue methodology in general and this dialogue in particular; the remainder on findings and (if included) recommendations.
- Report– the introduction should provide a summary of the method. The focus should be on detailing new insight and, where relevant, referencing earlier work, i.e. what does this dialogue find that supports or corroborates what has been found in other studies. Sciencewise recommends this not exceed 50-60 pages (including the executive summary).
- Annex to the main dialogue report – summary of method contained in the main report, with detailed information (e.g. participant breakdown, recruitment criteria, structure of workshops, stakeholders and experts involved in the development / oversight). Generally, if the annex exceeds 10 pages then the details should be published in a separate methods report

As well as the dialogue delivery outputs, UKRI and BEIS will be going out to tender for an evaluation contractor for this project. This contractor will ultimately produce a final evaluation report on the project.

BEIS will own the intellectual property rights of any and all intermediate products, including final deliverables, and in particular including presentation slide packs, reports and data.

We envisage that the contract for this work will commence in March 2022. We require

interim findings to be shared by early June 2022 to ensure that they can feed into the development of the Biomass Strategy which is due in the autumn of 2022. Although we would like to see interim findings by early June 2022, we suggest that the draft final outputs and report be completed by August 2022. The delivery of the draft final outputs will be followed by successive (c. three) review rounds to refine and finalise the outputs. We expect to be complete the review process and the final, complete set out outputs delivered by mid-September 2022. The exact project timelines and milestones are expected to be agreed with the successful bidder at the project kick-off meeting.

Bidders are asked to submit a detailed Gantt chart as part of their bid. This should cover the finalisation of the outputs, including the review process towards the end of the project. The final milestones and exact Gantt chart will be discussed and agreed with the successful bidder at the kick-off meeting.

Bidders may propose alternative timetables provided these will deliver the required outputs by mid-September 2022 and allow time for BEIS to review and comment on outputs and for these to be actioned.

Bids should outline how they will ensure the work is delivered to meet this deadline, including project Gantt charts factoring sufficient time for quality assurance.

Price and payments

The maximum budget for this project is £156,600.00 excluding VAT. Cost will be a criterion against which bids will be assessed.

Contractors should provide a full and detailed breakdown of costs. This should include staff (and day rate) allocated to specific tasks.

In submitting full tenders, suppliers confirm in writing that the price offered will be held for a minimum of 30 calendar days from the date of submission. Any payment conditions applicable to the prime contractor must also be replicated with sub-contractors.

The Department aims to pay all correctly submitted invoices as soon as possible, within 30 days from the date of receipt, in line with standard terms and conditions of contract.

Quality Assurance

Bidders must set out their approach to quality assurance (QA) in their response to this ITT with a QA plan.

Sign-off for quality assurance must be done by someone of sufficient seniority within the contractor organisation to be able to take responsibility for the work done. Acceptance of the work by BEIS will take this into consideration. BEIS reserves the right to refuse to sign off outputs which do not meet the required standard specified in this invitation to tender and/or the contractor's QA plan. QA should cover all aspects of the project undertaken by the contractors, including data collection, data analysis and reporting.

To demonstrate an effective process to produce high quality reporting, the contractor/s must ensure that quality assurance is done by individuals who were not directly involved in that particular research, analysis, or reporting process.

Order Schedule 20 (Order Specification)
 Order Ref: PS22024
 Crown Copyright 2021

Outputs will be subject to BEIS internal approvals, and the more substantive the output the longer the approval time required.

The successful bidder will be responsible for any work supplied by sub-contractors. For primary research, contractors should be willing to facilitate BEIS research staff attending interviews as part of the quality assurance process if appropriate.

Other useful sources of guidance and advice that will help bids and the resulting work be of the highest quality include:

- The [BEIS Monitoring and Evaluation Framework](#), which sets out BEIS's ambitions and standards for monitoring and evaluation
- The [Government Social Research Code](#), in particular those that relate to GSR Products
- [Quality in Qualitative Research: A Framework for assessing research evidence](#) provides a Framework for appraising the quality of qualitative research

Outputs will also need to meet the requirements of the [Accessibility Legislation](#) in order to be published.

Working Arrangements

The successful contractor will be expected to identify one named point of contact through whom all enquiries can be filtered. A BEIS project manager will be assigned to the project and will be the central point of contact.

Where a consortium or sub-contractors are in place, BEIS expects that they are included in relevant meetings, workshops and review points to ensure their full engagement in the project. All contractors and sub-contractors are responsible for the delivery of outputs to the appropriate time and quality. It is expected that the lead contractor takes an active role in oversight of all workstreams and bears the overall responsibility for the delivery of the evaluation activities and outputs.

We expect the appointment offer to be confirmed in the week commencing 7th March 2022. Note that bidders must be available to attend an inception meeting from the week commencing 7th March 2022.

We envisage the need for close interaction between the BEIS Project Manager and contractor throughout the process, to ensure that emerging issues are dealt with promptly and that BEIS fully understand the assumptions and approach taken. Bidders should assume that engagement with BEIS will include fortnightly project management phone calls, weekly progress updates, and any ad hoc meetings as required to design and deliver the project. Throughout the project, BEIS will review and sign off all materials before they can be used. BEIS will also review and sign off all outputs.

The winning Supplier will be the highest scoring bid submission, provided that they meet a minimum quality threshold, deemed to be an average of at least 60 for each scoring criteria (PROJ1.1, PROJ1.2 and PROJ1.3).

3.2.3 The Supplier transfers ownership of the Goods on Delivery or payment for those Goods, whichever is earlier.

3.2.4 Risk in the Goods transfers to the Buyer on Delivery of the Goods, but remains with the Supplier if the Buyer notices damage following Delivery and lets the Supplier know within 3 Working Days of Delivery.

Core Terms - DPS

- 3.2.5 The Supplier warrants that it has full and unrestricted ownership of the Goods at the time of transfer of ownership.

If the Buyer gives less than 14 days notice then it will pay the Supplier's reasonable and proven costs already incurred on the cancelled order as long as the Supplier takes all reasonable steps to minimise these costs.
- 3.2.12 The Supplier must at its own cost repair, replace, refund or substitute (at the Buyer's option and request) any Goods that the Buyer rejects because they do not conform with Clause 3. If the Supplier does not do this it will pay the Buyer's costs including repair or re-supply by a third party.

3.3 Services clauses

- 3.3.1 Late Delivery of the Services will be a Default of an Order Contract.

- 3.3.6 The Supplier must ensure all Services, and anything used to Deliver the Services, are of good quality and free from defects.

3.3.7 The Buyer is entitled to withhold payment for partially or undelivered Services, but doing so does not stop it from using its other rights under the Contract.

4. Pricing and payments

4.1 In exchange for the Deliverables, the Supplier must invoice the Buyer for the Charges in the Order Form.

4.2 CCS must invoice the Supplier for the Management Levy and the Supplier must pay it using the process in DPS Schedule 5 (Management Levy and Information).

4.3 All Charges and the Management Levy:

(a) exclude VAT, which is payable on provision of a valid VAT invoice; and (b) include all costs connected with the Supply of Deliverables.

4.4 The Buyer must pay the Supplier the Charges within 30 days of receipt by the Buyer of a valid, undisputed invoice, in cleared funds using the payment method and details stated in the Order Form.

4.5 A Supplier invoice is only valid if it:

- (a) includes all appropriate references including the Contract reference number and other details reasonably requested by the Buyer;
- (b) includes a detailed breakdown of Delivered Deliverables and Milestone(s) (if any); and
- (c) does not include any Management Levy (the Supplier must not charge the Buyer in any way for the Management Levy).

4.6 The Buyer must accept and process for payment an undisputed Electronic Invoice received from the Supplier.

4.7 The Buyer may retain or set-off payment of any amount owed to it by the Supplier if notice and reasons are provided.

4.8 The Supplier must ensure that all Subcontractors are paid, in full, within 30 days of receipt of a valid, undisputed invoice. If this does not happen, CCS or the Buyer can publish the details of the late payment or non-payment.

4.9 If CCS or the Buyer can get more favourable commercial terms for the supply at cost of any materials, goods or services used by the Supplier to provide the Deliverables, then CCS or the Buyer may require the Supplier to replace its existing commercial terms with the more favourable terms offered for the relevant items.

4.10 If CCS or the Buyer uses Clause 4.9 then the DPS Pricing (and where applicable, the Charges) must be reduced by an agreed amount by using the Variation Procedure.

4.11 The Supplier has no right of set-off, counterclaim, discount or abatement unless they are ordered to do so by a court.

5. The buyer's obligations to the supplier

5.1 If Supplier Non-Performance arises from an Authority Cause:

- (a) neither CCS or the Buyer can terminate a Contract under Clause 10.4.1;
- (b) the Supplier is entitled to reasonable and proven additional expenses and to relief from liability and Deduction under this Contract;
- (c) the Supplier is entitled to additional time needed to make the Delivery; and (d) the Supplier cannot suspend the ongoing supply of Deliverables.

5.2 Clause 5.1 only applies if the Supplier:

- (b) demonstrates that the Supplier Non-Performance would not have occurred but for the Authority Cause; and
- (c) mitigated the impact of the Authority Cause.

 - (b) provide information to the Relevant Authority or to the Auditor and reasonable co-operation at their request.
- 6.5 Where the Audit of the Supplier is carried out by an Auditor, the Auditor shall be entitled to share any information obtained during the Audit with the Relevant Authority.
- 6.6 If the Supplier is not providing any of the Deliverables, or is unable to provide them, it must immediately:
 - (a) tell the Relevant Authority and give reasons;
 - (b) propose corrective action; and
 - (c) provide a deadline for completing the corrective action.
- 6.7 The Supplier must provide CCS with a Self Audit Certificate supported by an audit report at the end of each Contract Year. The report must contain:

 - (b) the sampling techniques applied; (c) details of any issues; and (d) any remedial action taken.
- 6.8 The Self Audit Certificate must be completed and signed by an auditor or senior member of the Supplier's management team that is qualified in either a relevant audit or financial discipline.

7. Supplier staff

- 7.1 The Supplier Staff involved in the performance of each Contract must:
 - (a) be appropriately trained and qualified;
 - (b) be vetted using Good Industry Practice and the Security Policy; and

- 7.2 Where a Buyer decides one of the Supplier's Staff is not suitable to work on a contract, the Supplier must replace them with a suitably qualified alternative.
- 7.3 If requested, the Supplier must replace any person whose acts or omissions have caused the Supplier to breach Clause 27.
- 7.4 The Supplier must provide a list of Supplier Staff needing to access the Buyer's Premises and say why access is required.

- 7.5 The Supplier indemnifies CCS and the Buyer against all claims brought by any person employed by the Supplier caused by an act or omission of the Supplier or any Supplier Staff.

8. Rights and protection

- 8.1 The Supplier warrants and represents that:

- (b) each Contract is executed by its authorised representative;
- (c) it is a legally valid and existing organisation incorporated in the place it was formed;

- (f) it does not have any contractual obligations which are likely to have a material adverse effect on its ability to perform each Contract;
- (g) it is not impacted by an Insolvency Event; and (h) it will comply with each Order Contract.

- 8.2 The warranties and representations in Clauses 2.10 and 8.1 are repeated each time the Supplier provides Deliverables under the Contract.

- 8.3 The Supplier indemnifies both CCS and every Buyer against each of the following:

- (a) wilful misconduct of the Supplier, Subcontractor and Supplier Staff that impacts the Contract; and (b) non-payment by the Supplier of any Tax or National Insurance.

- 8.4 All claims indemnified under this Contract must use Clause 26.

- 8.5 The description of any provision of this Contract as a warranty does not prevent CCS or a Buyer from exercising any termination right that it may have for breach of that clause by the Supplier.

- 8.6 If the Supplier becomes aware of a representation or warranty that becomes untrue or misleading, it must immediately notify CCS and every Buyer.

- 8.7 All third party warranties and indemnities covering the Deliverables must be assigned for the Buyer's benefit by the Supplier.

9. Intellectual Property Rights (IPRs)

- 9.1 Each Party keeps ownership of its own Existing IPRs. The Supplier gives the Buyer a non-exclusive, perpetual, royalty-free, irrevocable, transferable worldwide licence to use, change and sub-license the Supplier's Existing IPR to enable it to both:
- (a) receive and use the Deliverables; and
 - (b) make use of the deliverables provided by a Replacement Supplier.
- 9.2 Any New IPR created under a Contract is owned by the Buyer. The Buyer gives the Supplier a licence to use any Existing IPRs and New IPRs for the purpose of fulfilling its obligations during the Contract Period.
- 9.3 Where a Party acquires ownership of IPRs incorrectly under this Contract it must do everything reasonably necessary to complete a transfer assigning them in writing to the other Party on request and at its own cost.
- 9.4 Neither Party has the right to use the other Party's IPRs, including any use of the other Party's names, logos or trademarks, except as provided in Clause 9 or otherwise agreed in writing.
- 9.5 If there is an IPR Claim, the Supplier indemnifies CCS and each Buyer against all losses, damages, costs or expenses (including professional fees and fines) incurred as a result.
- 9.6 If an IPR Claim is made or anticipated the Supplier must at its own expense and the Buyer's sole option, either:
- (a) obtain for CCS and the Buyer the rights in Clause 9.1 and 9.2 without infringing any third party IPR; or
 - (b) replace or modify the relevant item with substitutes that do not infringe IPR without adversely affecting the functionality or performance of the Deliverables.
- 9.7 In spite of any other provisions of a Contract and for the avoidance of doubt, award of a Contract by the Buyer and placement of any contract task under it does not constitute an authorisation by the Crown under Sections 55 and 56 of the Patents Act 1977 or Section 12 of the Registered Designs Act 1949. The Supplier acknowledges that any authorisation by the Buyer under its statutory powers must be expressly provided in writing, with reference to the acts authorised and the specific IPR involved.

10. Ending the contract or any subcontract

10.1 Contract Period

- 10.1.1 The Contract takes effect on the Start Date and ends on the End Date or earlier if required by Law.

10.3 Rectification plan process

10.3.1 If there is a Default, the Relevant Authority may, without limiting its other rights, request that the Supplier provide a Rectification Plan.

10.3.2 When the Relevant Authority receives a requested Rectification Plan it can either:

- (a) reject the Rectification Plan or revised Rectification Plan, giving reasons; or
- (b) accept the Rectification Plan or revised Rectification Plan (without limiting its rights) and the Supplier must immediately start work on the actions in the Rectification Plan at its own cost, unless agreed otherwise by the Parties.

10.3.3 Where the Rectification Plan or revised Rectification Plan is rejected, the Relevant Authority:

- (a) must give reasonable grounds for its decision; and
- (b) may request that the Supplier provides a revised Rectification Plan within 5 Working Days.

10.3.4 If the Relevant Authority rejects any Rectification Plan, including any revised Rectification Plan, the Relevant Authority does not have to request a revised Rectification Plan before exercising its right to terminate its Contract under Clause 10.4.3(a).

10.4 When CCS or the buyer can end a contract

10.4.1 If any of the following events happen, the Relevant Authority has the right to immediately terminate its Contract by issuing a Termination Notice to the Supplier:

- (i) if the Relevant Authority discovers that the Supplier was in one of the situations in 57 (1) or 57(2) of the Regulations at the time the Contract was awarded; or
- (j) the Supplier or its Affiliates embarrass or bring CCS or the Buyer into disrepute or diminish the public trust in them.

10.4.2 CCS may terminate the DPS Contract if a Buyer terminates an Order Contract for any of the reasons listed in Clause 10.4.1.

10.4.3 If any of the following non-fault based events happen, the Relevant Authority has the right to immediately terminate its Contract by issuing a Termination Notice to the Supplier:

- (a) the Relevant Authority rejects a Rectification Plan;
- (b) there is a Variation which cannot be agreed using Clause 24 (Changing the contract) or resolved using Clause 34 (Resolving disputes);
- (c) if there is a declaration of ineffectiveness in respect of any Variation; or (d) any of the events in 73 (1) (a) or (c) of the Regulations happen.

10.5 When the supplier can end the contract

The Supplier can issue a Reminder Notice if the Buyer does not pay an undisputed invoice on time. The Supplier can terminate an Order Contract if the Buyer fails to pay an undisputed invoiced sum due and worth over 10% of the annual Contract Value within 30 days of the date of the Reminder Notice.

10.6 What happens if the contract ends

10.6.1 Where a Party terminates a Contract under any of Clauses 10.2.1, 10.2.2, 10.4.1, 10.4.2, 10.4.3, 10.5 or 20.2 or a Contract expires all of the following apply:

10.6.2 In addition to the consequences of termination listed in Clause 10.6.1, where the Relevant Authority terminates a Contract under Clause 10.4.1 the Supplier is also responsible for the Relevant Authority's reasonable costs of procuring Replacement Deliverables for the rest of the Contract Period.

10.6.3 In addition to the consequences of termination listed in Clause 10.6.1, if either the Relevant Authority terminates a Contract under Clause 10.2.1 or 10.2.2 or a Supplier terminates an Order Contract under Clause 10.5:

- (a) the Buyer must promptly pay all outstanding Charges incurred to the Supplier; and
- (b) the Buyer must pay the Supplier reasonable committed and unavoidable Losses as long as the Supplier provides a fully itemised and costed schedule with evidence - the maximum value of this payment is limited to the total sum payable to the Supplier if the Contract had not been terminated.

10.6.4 In addition to the consequences of termination listed in Clause 10.6.1, where a Party terminates under Clause 20.2 each Party must cover its own Losses.

10.7 Partially ending and suspending the contract

10.7.1 Where CCS has the right to terminate the DPS Contract it can suspend the Supplier's ability to accept Orders (for any period) and the Supplier cannot enter into any new Order Contracts during this period. If this happens, the Supplier must still meet its obligations under any existing Order Contracts that have already been signed.

10.7.2 Where CCS has the right to terminate a DPS Contract it is entitled to terminate all or part of it.

10.7.3 Where the Buyer has the right to terminate an Order Contract it can terminate or suspend (for any period), all or part of it. If the Buyer suspends a Contract it can provide the Deliverables itself or buy them from a third party.

10.7.4 The Relevant Authority can only partially terminate or suspend a Contract if the remaining parts of that Contract can still be used to effectively deliver the intended purpose.

10.7.5 The Parties must agree any necessary Variation required by Clause 10.7 using the Variation Procedure, but the Supplier may not either:

- (a) reject the Variation; or
- (b) increase the Charges, except where the right to partial termination is under Clause 10.2.

10.7.6 The Buyer can still use other rights available, or subsequently available to it if it acts on its rights under Clause 10.7.

10.8 When subcontracts can be ended

Core Terms - DPS

- 11.6 In spite of Clauses 11.1, 11.2 but subject to Clauses 11.3 and 11.4, the Supplier's aggregate liability in each and any Contract Year under each Contract under Clause 14.8 shall in no event exceed the Data Protection Liability Cap.
- 11.7 Each Party must use all reasonable endeavours to mitigate any Loss or damage which it suffers under or in connection with each Contract, including any indemnities.

- 12.3 The Supplier must appoint a Compliance Officer who must be responsible for ensuring that the Supplier complies with Law, Clause 12.1 and Clauses 27 to 32.

13. Insurance

The Supplier must, at its own cost, obtain and maintain the Required Insurances in Joint Schedule 3 (Insurance Requirements) and any Additional Insurances in the Order Form.

14.5 If at any time the Supplier suspects or has reason to believe that the Government Data provided under a Contract is corrupted, lost or sufficiently degraded, then the Supplier must notify the Relevant Authority and immediately suggest remedial action.

14.6 If the Government Data is corrupted, lost or sufficiently degraded so as to be unusable the Relevant Authority may either or both:

- (a) tell the Supplier to restore or get restored Government Data as soon as practical but no later than 5 Working Days from the date that the Relevant Authority receives notice, or the Supplier finds out about the issue, whichever is earlier; and/or
- (b) restore the Government Data itself or using a third party.

- (h) to the Serious Fraud Office where the Recipient Party has reasonable grounds to believe that the Disclosing Party is involved in activity that may be a criminal offence under the Bribery Act 2010.

15.3 In spite of Clause 15.1, the Supplier may disclose Confidential Information on a confidential basis to Supplier Staff on a need-to-know basis to allow the Supplier to meet its obligations under the Contract. The Supplier Staff must enter into a direct confidentiality agreement with the Relevant Authority at its request.

17. Invalid parts of the contract

If any part of a Contract is prohibited by Law or judged by a court to be unlawful, void or unenforceable, it must be read as if it was removed from that Contract as much as required and rendered ineffective as far as possible without affecting the rest of the Contract, whether it is valid or enforceable.

18. No other terms apply

The provisions incorporated into each Contract are the entire agreement between the Parties. The Contract replaces all previous statements, agreements and any course of dealings made between the Parties, whether written or oral, in relation to its subject matter. No other provisions apply.

19. Other people's rights in a contract

No third parties may use the Contracts (Rights of Third Parties) Act 1999 (CRTPA) to enforce any term of the Contract unless stated (referring to CRTPA) in the Contract. This does not affect third party rights and remedies that exist independently from CRTPA.

20. Circumstances beyond your control

20.1 Any Party affected by a Force Majeure Event is excused from performing its obligations under a Contract while the inability to perform continues, if it both:

- (a) provides a Force Majeure Notice to the other Party; and
- (b) uses all reasonable measures practical to reduce the impact of the Force Majeure Event.

20.2 Either Party can partially or fully terminate the affected Contract if the provision of the Deliverables is materially affected by a Force Majeure Event which lasts for 90 days continuously.

21. Relationships created by the contract

No Contract creates a partnership, joint venture or employment relationship. The Supplier must represent themselves accordingly and ensure others do so.
