

Invitation to Tender posted 2nd August 2018

Stowey Sutton Parish Council

Invitation to Tender for the Design and Installation of a new Multi Use Games area at:

Location: Bishop Sutton Recreation Ground

Multi Use Games Area (to be built on location of a redundant play area to be removed).

Size approx. 25m x 14m

Bishop Sutton village is situated within Bath and North East Somerset on the A368 approximately 10 miles from Bath. It is in the Parish Council area of Stowey-Sutton and has a population of 1,361

Within recent years, three new housing developments have led to an increase in population size and there is a need to install new equipment to ensure the recreation ground becomes a more widely used and shared space for the community. A fully equipped children's play area with zip wire and gym equipment has recently been installed and we would now like to take the next step.

Stowey Sutton Parish Council (SSPC) is seeking to appoint a suitably qualified service provider to deliver the design, supply, and installation of a new steel multi use games area (MUGA) including rebound goal ends and anti-rattle side fencing. The fencing must be a proven effective noise reducing rebound fencing system with twin wiring fencing, minimum 6mm wires. The MUGA shall measure approximately 25 metres(m) long by 14m wide and should incorporate two football goal ends, two basketball hoops and other items such as two cricket wickets. All equipment should be certified to current British Standard BS EN 15312 .

Requirement

The new MUGA is to be built on, and to replace, a redundant play and skateboard area. Works will include complete upgrade of an existing play area including removal and disposal of existing play equipment, surfacing and site furniture, construction of a new MUGA with suitable surfacing, anti-rattle fencing, surface lining. The setting is rural and so the equipment should reflect this to remain in-keeping with other equipment and the local area.

Invitation to Tender posted 2nd August 2018

The project should provide a basic MUGA with the option and ability to increase facilities in the future. The need for this new equipment was identified through a full consultation process which has taken place over the last two/three years. It should cater for teenagers and young adults and seek to cater for the needs of young people with disabilities.

The tender submission shall include accompanying groundworks to create a level playing surface, external pathways, and supplementary landscaping to ensure the MUGA harmonises with the existing surroundings ready for public use.

Guarantee

A guarantee and maintenance period of at least 2 full years would be expected possibly supported by either a retention of monies or a bond.

Evaluation

The evaluation of each tender will be on a 50/50 scored basis, 50% on price/50% weighted non-price criteria : service, quality of goods, running costs, technical merit, previous experience, delivery date, cost effectiveness, quality, relevant environmental considerations, aesthetic and functional characteristics, safety, after-sales services, technical assistance, warranties/guarantees and durability and adherence to the Design Brief and Specification to ensure their suitability in an unsupervised environment.

Completion

The project should be completed within 8-12 weeks of the tender contract being awarded. The Council wish to have the project completed by the end of the year 2018.

Should the contract not be completed within the timescales agreed, the Council reserves the right to retain 5% of the contract value.

Consents

The Play area may require prior planning permission from BANES council. The successful contractor may be required to apply for all necessary consents and permissions. All equipment must be compliant with relevant British/EU Safety Standards.

Funding

The project will be funded through grants and fundraising.

Invitation to Tender posted 2nd August 2018
