 - ii) such other information in relation to the Occasion of Tax Non-Compliance as the Authority may reasonably require.
- E11.2 If the Contractor or any Staff are liable to be taxed in the UK or to pay NICs in respect of consideration received under the Contract, the Contractor shall:
- (a) at all times comply with ITEPA and all other statutes and regulations relating to income tax, and SSCBA and all other statutes and regulations relating to NICs, in respect of that consideration; and
 - (b) indemnify the Authority against any income tax, NICs and social security contributions and any other liability, deduction, contribution, assessment or claim arising from or made in connection with the provision of the Services by the Contractor or any Staff.

F. CONTROL OF THE CONTRACT

F1 Failure to meet Requirements

- F1.1 If the Authority informs the Contractor in writing that the Authority reasonably believes that any part of the Services do not meet the requirements of the Contract or differs in any way from those requirements, and this is not as a result of a default by the Authority, the Contractor shall at its own expense re-schedule and carry out the Services in accordance with the requirements of the Contract within such reasonable time as may be specified by the Authority.
- F1.2 The Authority may by notice to the Contractor reject any of the Goods which fail to conform to the approved sample or fail to meet the Specification. Such notice shall be given within a reasonable time after delivery to the Authority of such Goods. If the Authority rejects any of the Goods pursuant to this clause the Authority may (without prejudice to its other rights and remedies) either:
- (a) have such Goods promptly, free of charge and in any event within 5 Working Days, either repaired by the Contractor or replaced by the Contractor with Goods which conform in all respects with the approved sample or with the Specification and due delivery shall not be deemed to have taken place until such repair or replacement has occurred; or

- (b) treat the Contract as discharged by the Contractor's breach and obtain a refund (if payment for the Goods has already been made) from the Contractor in respect of the Goods concerned together with payment of any additional expenditure reasonably incurred by the Authority in obtaining other goods in replacement.

- F1.3 The Authority will be deemed to have accepted the Goods if it expressly states the same in writing or fails to reject the Goods in accordance with clause F1.2.
- F1.4 The issue by the Authority of a receipt note for delivery of the Goods shall not constitute any acknowledgement of the condition, quantity or nature of those Goods, or the Authority's acceptance of them.
- F1.5 The Contractor hereby guarantees the Goods against faulty materials or workmanship for such period as may be specified in the Specification or, if no period is specified, for a period of 18 months from the date of delivery. If the Authority shall within such period or within 25 Working Days thereafter give notice to the Contractor of any defect in any of the Goods as may have arisen during such period under proper and normal use, the Contractor shall (without prejudice to any other rights and remedies which the Authority may have) promptly remedy such defects (whether by repair or replacement as the Authority shall elect) free of charge.
- F1.6 Any Goods rejected or returned by the Authority as described in clause F1.2 shall be returned to the Contractor at the Contractor's risk and expense.

F2 Monitoring of Contract Performance

- F2.1 The Contractor shall immediately inform the Authority if any of the Services are not being or are unable to be performed, the reasons for non-performance, any corrective action and the date by which that action will be completed.
- F2.2 At or around 6 Months from the Commencement Date and each anniversary of the Commencement Date thereafter (each being a "Review Date"), the Authority shall carry out a review of the performance of the Contractor ("Checkpoint Review"). Without prejudice to the generality of the foregoing, the Authority may in respect of the period under review consider such items as (but not limited to): the Contractor's delivery of the Services; the Contractor's contribution to innovation in the Authority; whether the Services provide the Authority with best value for money; consideration of any changes which may need to be made to the Services; a review of future requirements in relation to the Services and progress against key milestones.
- F2.3 The Contractor shall provide at its own cost any assistance reasonably required by the Authority to perform such Checkpoint Review including the provision of data and information.
- F2.4 The Authority may produce a report (a "Checkpoint Review Report") of the results of each Checkpoint Review stating any areas of exceptional performance and areas for improvement in the provision of the Services and where there is any shortfall in any aspect of performance reviewed as against the Authority's expectations and the Contractor's obligations under this Contract.
- F2.5 The Authority shall give the Contractor a copy of the Checkpoint Review Report (if applicable). The Authority shall consider any Contractor comments and may produce a revised Checkpoint Review Report.
- F2.6 The Contractor shall, within 10 Working Days of receipt of the Checkpoint Review Report (revised as appropriate) provide the Authority with a plan to address resolution of any shortcomings and implementation of improvements identified by the Checkpoint Review Report.
- F2.7 Actions required to resolve shortcomings and implement improvements (either as a consequence of the Contractor's failure to meet its obligations under this Contract identified by the Checkpoint Review Report, or those which result from the Contractor's failure to meet the Authority's expectations notified to the Contractor or of which the Contractor ought reasonably to have been aware) shall be implemented at no extra charge to the Authority.

F3 Reporting

- F3.1 Unless otherwise authorised in writing by the Authority, the Contractor shall submit an annual report (the "Annual Report") for each Project Year to the Authority in accordance with this clause F3.
- F3.2 The Contractor shall provide one hard copy of the Annual Report and one copy on either computer readable disk or e-mail in the format specified by or agreed with the Authority, no later than 4 weeks after the end of each Project Year, or, for work lasting one year or less, no later than 4 weeks after completion of the Services.
- F3.3 The Annual Report shall:
- (a) list the scientific objectives set out in the Specification, indicating where amendments have been agreed;
 - (b) indicate in non-scientific terms the scientific progress achieved since the Commencement Date or since the last Annual Report; how this relates to the policy objectives as set out in the relevant current statement of policy rationale and programme objectives relating to research and development issued by the Authority in accordance with the Specification, plus any findings of particular interest;
 - (c) indicate whether the scientific objectives in the Specification are appropriate for the remainder of the Contract Period, giving reasons for any changes, together with financial, Staff and time implications;
 - (d) list the milestones for the relevant Project Year as set out in the Specification, indicating which milestones have been met and whether the remaining milestones appear realistic (subject to clause F4);
 - (e) list any outputs, for example, published papers or presentations and identify any opportunities for exploiting any Intellectual Property Rights or technology transfer arising out of the Services and any action taken to protect and exploit such Intellectual Property Rights; and
 - (f) comment briefly on any new scientific opportunities which may arise from the Services.
- F3.4 Unless Approved, the Contractor shall submit by the completion date of the Services a final report (the "Final Report") consisting of 2 hard copies and one electronic copy on either computer readable disk or by e-mail in a format specified by the Authority. The Final Report shall include the following:
- (a) the Services' code and title as set out in the Specification; the name of the Contractor; the total costs; and the Commencement Date and date of completion of the Services;
 - (b) an executive summary of not more than 2 sides of A4 written in a style understandable to the intelligent non-scientist. This should include the main objectives of the Services; the methods and findings of the research; and any other significant events and options for new work; and
 - (c) a scientific report.
- F3.5 The scientific report referred to in clause F3.4(c) above shall contain:

F3.6 Notwithstanding clause E6 (Publicity, Media and Official Enquiries), the Authority may publish the Final Report on a website. When submitting the Final Report to the Authority the Contractor shall indicate any information contained in the Final Report which it considers to be commercially sensitive or which might otherwise merit non-publication and the Authority shall not disclose such information without first having consulted the Contractor (without prejudice to the Authority's discretion as to whether to publish following such consultation).

F3.7 The Authority reserves the right to reject any Annual Report or Final Report submitted by the Contractor which is not, in the reasonable opinion of the Authority, satisfactory, either in form or content, having regard to the provisions of this Schedule. If an Annual Report or Final Report is rejected by the Authority, the Contractor shall remedy any deficiencies identified by the Authority and submit a revised version at no additional cost to the Authority or the Co-funders.

F3.8 The Contractor shall supply any additional reports, including financial reports, in respect of the Services, at such time or times, and in such form, as the Authority may reasonably require. Without prejudice to the generality of the foregoing, the Contractor shall provide to the Authority such information as the Authority may reasonably require regarding commercial exploitation of the Results, including details of any licences granted to third parties in respect of any Intellectual Property Rights in the same. The Contractor shall further keep at its normal place of business detailed accurate and up to date records and accounts showing details of its commercial exploitation of the Results including the sale of products or services which incorporate the Results, Income received, allowable costs deducted and the amount of licensing revenues received by it in respect of the Results in a format sufficient to ascertain that revenue sharing pursuant to the Contract has been properly accounted for and apportioned in accordance with the Contract.

F3.9 The Contractor shall, subject to reasonable notice, attend all meetings specified in the Contract or otherwise arranged by the Authority for the purpose of discussion of the Services.

F4 Remedies for inadequate performance

F4.1 If the Authority reasonably believes the Contractor has committed a Material Breach it may, without prejudice to its rights under clause H2 (Termination on Default), do any of the following:

- (a) without terminating the Contract, itself supply or procure the supply of all or part of the Services until such time as the Contractor has demonstrated to the Authority's reasonable satisfaction that the Contractor will be able to supply the Services in accordance with the Specification;
- (b) without terminating the whole of the Contract, terminate the Contract in respect of part of the Services only (whereupon a corresponding reduction in the Price shall be made) and thereafter itself supply or procure a third party to supply such part of the Services;
- (c) withhold or reduce payments to the Contractor in such amount as the Authority reasonably deems appropriate in each particular case; and/or
- (d) terminate the Contract in accordance with clause H2.

F4.2 Without prejudice to its right under clause C3 (Recovery of Sums Due), the Authority may charge the Contractor for any costs reasonably incurred and any reasonable administration costs in respect of the supply of any part of the Services by the Authority or a third party to the extent that

such costs exceed the payment which would otherwise have been payable to the Contractor for such part of the Services.

- F4.3 If the Authority reasonably believes the Contractor has failed to supply all or any part of the Services in accordance with the Contract, professional or industry practice which could reasonably be expected of a competent and suitably qualified person, or any legislative or regulatory requirement, the Authority may give the Contractor notice specifying the way in which its performance falls short of the requirements of the Contract or is otherwise unsatisfactory.
- F4.4 If the Contractor has been notified of a failure in accordance with clause F4.3 the Authority may:
- (a) direct the Contractor to identify and remedy the failure within such time as may be specified by the Authority and to apply all such additional resources as are necessary to remedy that failure at no additional charge to the Authority within the specified timescale; and/or
 - (b) withhold or reduce payments to the Contractor in such amount as the Authority deems appropriate in each particular case until such failure has been remedied to the satisfaction of the Authority.
- F4.5 If the Contractor has been notified of a failure in accordance with clause F4.3, it shall:
- (a) use all reasonable endeavours to immediately minimise the impact of such failure to the Authority and to prevent such failure from recurring; and
 - (b) immediately give the Authority such information as the Authority may request regarding what measures are being taken to comply with the obligations in this clause F4.5 and the progress of those measures until resolved to the satisfaction of the Authority.
- F4.6 If, having been notified of any failure, the Contractor fails to remedy it in accordance with clause F4.5 within the time specified by the Authority, the Authority may treat the continuing failure as a Material Breach and may terminate the Contract immediately on notice to the Contractor.

F5 Transfer and Sub-Contracting

- F5.1 Except where clauses F5.5 and F5.6 both apply, the Contractor shall not transfer, charge, assign, sub-contract or in any other way dispose of the Contract or any part of it without Approval. All such documents shall be evidenced in writing and shown to the Authority on request. Sub-contracting any part of the Contract shall not relieve the Contractor of any of its obligations or duties under the Contract.
- F5.2 The Contractor is responsible for the acts and/or omissions of its Sub-Contractors as though they are its own. If it is appropriate, the Contractor shall provide each Sub-Contractor with a copy of the Contract and obtain written confirmation from them that they will provide the Services fully in accordance with the Contract.
- F5.3 The Contractor shall ensure that its Sub-Contractors and suppliers retain all records relating to the Services for at least 6 years from the date of their creation and make them available to the Authority on request in accordance with the provisions of clause E10 (Audit). If any Sub-Contractor or supplier does not allow the Authority access to the records then the Authority shall have no obligation to pay any claim or invoice made by the Contractor on the basis of such documents or work carried out by the Sub-Contractor or supplier.
- F5.4 If the Authority has consented to the award of a Sub-Contract the Contractor shall ensure that:
- (a) the Sub-Contract contains a right for the Contractor to terminate the Sub-Contract if the relevant Sub-Contractor does not comply in the performance of its contract with legal obligations in environmental, social or labour law;

- (b) the Sub-Contractor includes a provision having the same effect as set out in clause F5.4 (a) in any Sub-Contract which it awards; and
- (c) copies of each Sub-Contract shall, at the request of the Authority, be sent by the Contractor to the Authority immediately.

F5.5 If the Authority believes there are:

- (a) compulsory grounds for excluding a Sub-Contractor pursuant to regulation 57 of the Regulations, the Contractor shall replace or not appoint the Sub-Contractor; or
- (b) non-compulsory grounds for excluding a Sub-Contractor pursuant to regulation 57 of the Regulations, the Authority may require the Contractor to replace or not appoint the Sub-Contractor and the Contractor shall comply with such requirement.

F5.6 Notwithstanding clause F5.1, the Contractor may assign to a third party (the “**Assignee**”) the right to receive payment of the Price or any part thereof due to the Contractor (including any interest which the Authority incurs under clause C2 (Payment and VAT)). Any assignment under this clause F5.6 shall be subject to:

- (a) reduction of any sums in respect of which the Authority exercises its right of recovery under clause C3 (Recovery of Sums Due);
- (b) all related rights of the Authority under the Contract in relation to the recovery of sums due but unpaid; and
- (c) the Authority receiving notification under both clauses F5.7 and F5.8.

F5.7 If the Contractor assigns the right to receive the Price under clause F5.6, the Contractor or the Assignee shall notify the Authority in writing of the assignment and the date upon which the assignment becomes effective.

F5.8 The Contractor shall ensure that the Assignee notifies the Authority of the Assignee’s contact information and bank account details to which the Authority shall make payment.

F5.9 The provisions of clause C2 shall continue to apply in all other respects after the assignment and shall not be amended without Approval.

F5.10 Subject to clause F5.11, the Authority may assign, novate or otherwise dispose of its rights and obligations under the Contract or any part thereof to:

- (a) any Contracting Authority;
- (b) any other body established or authorised by the Crown or under statute in order substantially to perform any of the functions that had previously been performed by the Authority; or
- (c) any private sector body which substantially performs the functions of the Authority

provided that any such assignment, novation or other disposal shall not increase the burden of the Contractor’s obligations under the Contract.

F5.11 Any change in the legal status of the Authority such that it ceases to be a Contracting Authority shall not, subject to clause F5.12, affect the validity of the Contract and the Contract shall bind and inure to the benefit of any successor body to the Authority.

F5.12 If the rights and obligations under the Contract are assigned, novated or otherwise disposed of pursuant to clause F5.10 to a body which is not a Contracting Authority or if there is a change in the legal status of the Authority such that it ceases to be a Contracting Authority (in the remainder of this clause F5 both such bodies being referred to as the “**Transferee**”):

- (a) the rights of termination of the Authority in clauses H1 and H2 shall be available to the Contractor in respect of the Transferee; and
- (b) the Transferee shall only be able to assign, novate or otherwise dispose of its rights and obligations under the Contract or any part thereof with the prior consent in writing of the Contractor.

F5.13 The Authority may disclose to any Transferee any Confidential Information of the Contractor which relates to the performance of the Contractor's obligations under the Contract. In such circumstances the Authority shall authorise the Transferee to use such Confidential Information only for purposes relating to the performance of the Contractor's obligations under the Contract and for no other purpose and shall take all reasonable steps to ensure that the Transferee gives a confidentiality undertaking in relation to such Confidential Information.

F5.14 Each Party shall at its own cost and expense carry out, or use all reasonable endeavours to ensure the carrying out of, whatever further actions (including the execution of further documents) the other Party reasonably requires from time to time for the purpose of giving that other Party the full benefit of the provisions of the Contract.

F6 Waiver

F6.1 The failure of either Party to insist upon strict performance of any provision of the Contract, or the failure of either Party to exercise, or any delay in exercising, any right or remedy shall not constitute a waiver of that right or remedy and shall not cause a diminution of the obligations established by the Contract.

F6.2 No waiver shall be effective unless it is expressly stated to be a waiver and communicated to the other Party in writing in accordance with clause A4.2 (Notices).

F6.3 A waiver of any right or remedy arising from a breach of the Contract shall not constitute a waiver of any right or remedy arising from any other or subsequent breach of the Contract.

F7 Variation

F7.1 If, after the Commencement Date, the Authority's requirements change, the Authority may request a Variation subject to the terms of this clause 7.

F7.2 The Authority may request a Variation by notifying the Contractor in writing of the Variation and giving the Contractor sufficient information to assess the extent of the Variation and consider whether any change to the Price is required in order to implement the Variation within a reasonable time limit specified by the Authority. If the Contractor accepts the Variation it shall confirm it in writing.

F7.3 If the Contractor is unable to accept the Variation or where the Parties are unable to agree a change to the Price, the Authority may:

- (a) allow the Contractor to fulfil its obligations under the Contract without the Variation to the Specification; or
- (b) terminate the Contract immediately except where the Contractor has already delivered all or part of the Services or where the Contractor can show evidence of substantial work being carried out to fulfil the requirements of the Specification; and in such case the Parties shall attempt to agree upon a resolution to the matter. If a resolution cannot be reached, the matter shall be dealt with under the Dispute Resolution procedure detailed in clause I2 (Dispute Resolution).

F7.4 No Variation will take effect unless and until recorded in a validly executed CCN. Execution of a CCN shall be made via electronic signature as described in clause 1.2 of Section 1 of the Contract.

- F7.5 A CCN takes effect on the date both Parties communicate acceptance of the CCN via Bravo and, on the date it communicates its acceptance of the CCN in this way, the Contractor is deemed to warrant and represent that the CCN has been executed by a duly authorised representative of the Contractor in addition to the warranties and representations set out in clause G2.
- F7.6 The provisions of clauses F7.4 and F7.5 may be varied in an emergency if it is not practicable to obtain the Authorised Representative's approval within the time necessary to make the Variation in order to address the emergency. In an emergency, Variations may be approved by a different representative of the Authority. However, the Authorised Representative shall have the right to review such a Variation and require a CCN to be entered into on a retrospective basis which may itself vary the emergency Variation.
- F8 Severability**
- F8.1 If any provision of the Contract which is not of a fundamental nature is held invalid, illegal or unenforceable for any reason by any court of competent jurisdiction, such provision shall be severed and the remainder of the provisions of the Contract shall continue in full force and effect as if the Contract had been executed with the invalid, illegal or unenforceable provision eliminated.
- F9 Remedies Cumulative**
- F9.1 Except as expressly provided in the Contract all remedies available to either Party for breach of the Contract are cumulative and may be exercised concurrently or separately, and the exercise of any one remedy shall not be deemed an election of such remedy to the exclusion of other remedies.
- F10 Entire Agreement**
- F10.1 The Contract constitutes the entire agreement between the Parties in respect of the matters dealt with therein. The Contract supersedes all prior negotiations between the Parties and all representations and undertakings made by one Party to the other, whether written or oral, except that this clause shall not exclude liability in respect of any fraudulent misrepresentation.
- F11 Counterparts**
- F11.1 The Contract may be executed in counterparts, each of which when executed and delivered shall constitute an original but all counterparts together shall constitute one and the same instrument.

H3 Termination on Notice

H3.1 The Authority may terminate the Contract at any time by giving 30 day's notice to the Contractor. However, if the termination clause between each survey period, that is Clause H4.1 (e) below is invoked by the Authority, there will be a minimum 3 month's notice period before the next survey is due to start.

H4 Other Termination Grounds

H4.1 The Authority may terminate the Contract on written notice to the Contractor if:

- (a) the Contract has been subject to a substantial modification which requires a new procurement procedure pursuant to regulation 72(9) of the Regulations;

H5 Consequences of Expiry or Termination

H5.1 If the Authority terminates the Contract under clauses H2 or H4.1(a) to (d) and makes other arrangements for the supply of the Services the Authority may recover from the Contractor the cost reasonably incurred of making those other arrangements and any additional expenditure incurred by the Authority throughout the remainder of the Contract Period.

H5.2 If the Contract is terminated under clauses H2 or H4.1(a) to (d) the Authority shall make no further payments to the Contractor (for Services supplied by the Contractor prior to termination and in accordance with the Contract but where the payment has yet to be made by the Authority), until the Authority has established the final cost of making the other arrangements envisaged under this clause.

H5.3 If the Authority terminates the Contract under clause H3 the Authority shall make no further payments to the Contractor except for Services supplied by the Contractor prior to termination and in accordance with the Contract but where the payment has yet to be made by the Authority.

H5.4 Save as otherwise expressly provided in the Contract:

I2 Dispute Resolution

I2.1 The Parties shall attempt in good faith to negotiate a settlement to any dispute between them arising out of or in connection with the Contract within 20 Working Days of either Party notifying the other of the dispute and such efforts shall involve the escalation of the dispute to the finance director of the Contractor and the commercial director of the Authority.

- (c) unless otherwise agreed, all negotiations connected with the dispute and any settlement agreement relating to it shall be conducted in confidence and without prejudice to the rights of the Parties in any future proceedings;
- (d) if the Parties reach agreement on the resolution of the dispute, the agreement shall be recorded in writing and shall be binding on the Parties once it is signed by their duly authorised representatives;
- (e) failing agreement, either of the Parties may invite the Mediator to provide a non-binding but informative written opinion. Such an opinion shall be provided on a without prejudice basis and shall not be used in evidence in any proceedings relating to the Contract without the prior written consent of both Parties; and
- (f) if the Parties fail to reach agreement within 60 Working Days of the Mediator being appointed, or such longer period as may be agreed by the Parties, then any dispute or difference between them may be referred to the Courts unless the dispute is referred to arbitration pursuant to the procedures set out in clause 12.6.

12.6 Subject to clause 12.2, the Parties shall not institute court proceedings until the procedures set out in clauses 12.1 and 12.3 have been completed save that:

- (a) The Authority may at any time before court proceedings are commenced, serve a notice on the Contractor requiring the dispute to be referred to and resolved by arbitration in accordance with clause 12.7;
- (b) if the Contractor intends to commence court proceedings, it shall serve notice on the Authority of its intentions and the Authority shall have 21 days following receipt of such notice to serve a reply on the Contractor requiring the dispute to be referred to and resolved by arbitration in accordance with clause 12.7; and

SCHEDULE 1 - SPECIFICATION

This Section sets out the Authority's requirements.

1. Introduction

In its 25 year plan Defra has committed to ensuring Clean and Plentiful Water for all. As part of this it aims to improve the efficiency of water use, to ensure that society can continue to have access to the water resource it needs now and in the future, whilst protecting the important natural complexity and adaptive capacity of freshwater ecosystems¹.

Water resources management strategies must take human, societal and environmental needs into account if those strategies are to be sustainable over the long term and be able to adapt to pressures such as climate change.

One challenge faced by current water resources policies is to understand how water is used in the household and reasons behind this usage. This project aims to understand the current patterns of household water usage, and monitor usage over time to identify changes.

The evidence from this project will help identify potential actions which can help households to use water more efficiently; reducing their bills and contributing to a more sustainable water future.

2. Background

Climate change, population increases, environmental requirements and a growing demand for water will mean that, in the future, there will be substantial pressure on surface and groundwater supplies, potentially less water available per person and a significant likelihood of more frequent, severe droughts. In order to maintain water security, measures will need to be put into place to increase supply and manage demand. Defra is committed to promoting greater water efficiency and lower personal water use as part of its 25 Year Environment Plan goal of ensuring 'clean and plentiful water'.

Defra carried out a public consultation and call for evidence on *Measures to reduce personal water use* in October 2019². The consultation sought views and evidence on various interventions that could be taken forward to reduce personal water use.

The Government Response to the *Measures to reduce personal water use* is intended to be published in Autumn 2020, this will set out the Government's intended initial actions. The Water Practice Survey will provide a baseline to which the effect of the actions taken can be measured. To further target its efforts on the practices with highest potential of reducing water use, Defra needs to understand how water is being used in domestic households. This level of detail is required to understand why different practices are undertaken and to evaluate the impact of interventions on these practices. This knowledge will enable Defra to better create a water-saving

¹ <https://www.esa.org/wp-content/uploads/2013/03/issue10.pdf>

culture, assess which practices to target to save water, identify points of change in these practices, or evaluate the impact of its interventions.

Some personal water practice evidence does exist, such as the information collected by the Energy Saving trust and reported in their 2013 and 2015 reports³⁴. Water companies also gather information and hold some complex information from their own supply areas, such as information on faith and water use in the initiative to promote water efficiency practise within different faith groups within the Thames Water Catchment⁵.

Currently we do not have a comprehensive baseline of the actual practices and rationales for them, that are undertaken in households across England and Wales. This project aims to contribute to closing this evidence gap through implementing a new online water practice survey for households in England and Wales.

This Contract will deliver these surveys, including both data collection of survey waves and bringing to bear expertise in questionnaire adaptation and ongoing research design.

3. Project Aim and Objectives

This programme of work will further understand how water is used in households to inform policy to reduce water consumption. It will:

- a) Establish a reliable and valid online survey method to track water use practices, including a full baseline in 2020/2021.
- b) Undertake surveys (on a 3 yearly basis) to describe variations in water use practices over time and between household and demographic types.

The Objectives are to:

- Develop and finalise survey questions and an analysis plan which will allow the above aims to be addressed.
- Collect representative data from households in England and Wales using an online survey.
- Deliver cleaned, anonymised data and report to Defra for internal analysis with an accompanying summary report.

Research questions

- What is the frequency of specific practices in households [i.e. Which practices seem more/less common]?
- What are the patterns and differences in water use practices observed across societal groups?
- What are possible explanations for certain water use practices in different groups? For example access to resources, motivations (values) of the user.

Benefits

The project will improve understanding of water use practices. This will help policy makers to:

- identify the practices which use water consumption, patterns in use and potential high impact levers. For example, small changes which could be made to everyday practices, but which produce relatively large efficiencies in water use.
- gain deeper understanding of the “why” behind personal water practices; the systemic influencers (e.g. social norms and barriers) which underlie water use practices, and which consequently might also serve as high impact levers in changing society’s water demand.
- contribute to the evaluation of policy designed to intervene on practices and reduce water demand. For example, it will identify how policies are affecting different demographics and extent to which different groups are impacted more or less positively.

The Contractor will initiate a survey which runs every three years about water practices to compliment household data from water meters. The survey will build off questions that were used in the social patterns of water project to investigate water practices ([Pullinger et al 2013](#)).

The Contract will run for a period of 9 years and 9 months to cover **four** waves of the survey (as detailed in the Clause 4 Duration table below), with baseline data collected in 2021 (ie data on the multiple water use practices within the household. In addition, it will likely focus on outside uses of water such as gardening and car washing as these practices use a lot of water, often in times of water stress) and practice specific data collected in 2024, 2027, and 2030. The focus of each of these following waves may change according to which practice is of most relevance. For example; as policy interventions regarding specific practices are rolled out (hygiene practices, cooking practices, cleaning) the survey can be re-run to capture more data on those particular practices.

Data will be collected on the everyday water use practices using an online multiple choice survey. These questions will ask about “how” water is used; the frequency, duration of use, different ways the practices are performed (these are called “skills in [Pullinger et al 2013](#)”). Questions could also ask about the “why” behind them; the motivations of the user (values, attitude – called “image” in [Pullinger et al 2013](#)⁶) and their resources (infrastructure available – called “stuff” in [Pullinger 2013](#)⁷). Additional questions will capture characteristics of the household to allow for weighting to

⁶ E.g. these can include questions on environmental attitude such as turning lights off when exiting a room, wearing more clothes rather than turning up heating, public transport use etc.

⁷ E.g income, average water bill, whether they have a water meter, dishwasher, laundry machine etc.

be applied to responses so that the final sample is representative of the population of England and Wales (each within their own right).

By asking a representative sample each time and altering questions to focus on particular practices, the survey will provide in depth information on water use. A stratified random sampling approach is suggested in order to capture a sample with sufficient households from different socioeconomic groups and regions. Weighting will need to be applied to ensure the sample is sufficiently representative at the household level and individual respondent level.

The responses will be analysed to identify patterns in practices between households and over time.

4. Duration

Task	Start	End
Contract Start 1st December 2020		
First wave of the survey 2021 (Tasks 1 to 10)	1st December 2020	6th September 2021
The Authority may invoke Break clause, if required		
Second wave of the survey Start (Tasks 1 to 10)	4th December 2023	2nd September 2024
The Authority may invoke Break clause, if required		
Third wave of the survey Start (Tasks 1 to 10)	7th December 2026	6th September 2027
The Authority may invoke Break clause, if required		
Fourth wave of the survey Start (Tasks 1 to 10)	3rd December 2029	2nd September 2030
Contract End 2nd September 2030		

As detailed above, the Authority will have the option to terminate the Contract by invoking a break (termination) clause after the output of each wave of the survey, subject to the Authority's business needs.

In accordance with the Specification (Schedule 1)) after a break in (i) Tasks 1 to 10 First wave of the survey or (ii) Tasks 1 to 10 Second wave of the survey or (iii) Tasks 1 to 10 Third wave of the survey, if the Authority has determined there is no requirement to continue with the Contract a minimum of 3 months Termination notice will be given by the Authority prior to the planned start of Task 1 of the subsequent round of the survey.

5. Approach and Methodology

Tasks 1-5: Develop questionnaire design, analysis and sampling strategy, so that we are able to

- a) Establish a reliable and valid survey method to track water use practices; including a full baseline in 2020/21, with data collection split into 2 within-year seasons (winter, summer) to account for seasonality. The survey will focus on answering research questions on:

- What is the frequency of specific practices in households [i.e. Which practices seem more/less common]?
- What are the patterns and differences in water use practices observed across societal groups?
- What are possible explanations for certain water use practices in different groups? For example access to resources, motivations (values) of the user.

Task 1 - Review and finalise the survey questions, questionnaire structure and flow.

The Contractor will provide expert advice in reviewing the draft questionnaire (see attached Annex 1) and in shaping the future of the tracker survey to maximise its potential usefulness, flexibility and effectiveness. It is expected that this involves:

- reviewing existing best practice water use collection tools (such as the [Thames Water Online Calculator](#)) to ensure questions are drafted to maximise understanding and minimise self-reporting error and bias.
- identify additional questions which would allow data to be matched to water company meter data (so as to ground truth water usage)
- designation of a core question set for annual tracking, with a recommendation for particular questions or sets of questions to be introduced on less frequent or ad-hoc basis.
- ordering the multiple choice responses (for example by “most water efficient” to “least efficient”) to enable analysis to use ordinal data techniques.

The Contractor will produce a finalised set of survey questions.

The Contractor is invited to propose options for development of the questionnaire, which will improve its flexibility and effectiveness.

Task 2 - Cognitive testing of questions where relevant.

It is anticipated that any question revision may require cognitive testing and that the Contractor will undertake general testing of fieldwork interviews before commencing the main period of fieldwork/data collection. The same is required thereafter for each future wave of the survey.

Task 3 - General “fieldwork” testing prior to main fieldwork period.

It is anticipated that fieldwork testing of the survey will be required and that the Contractor will do this before commencing the main period of fieldwork/data collection. The same is required thereafter for each future wave of the survey.

Milestone 1 – Finalised set of survey questions delivered to Defra for approval.

Task 4 – Analysis plan and sampling framework.

The Contractor will be required to produce an analysis plan and consequent sampling framework (including information on data weighting) which would allow analysis of data to produce:

- a) Comparisons between groups (see below)
- b) Explanations (testing) possible causes of different water use patterns
- c) Consistent comparisons over time.

Due to the remit of Defra, there are a number of requirements for the composition of the sample, which should allow for robust data analysis of trends for particular groups.

The sampling framework, therefore, must provide for sufficiently robust data analysis with an appropriate statistical power of the following sub groups:

- socio-demographic (including split by gender, age, income, housing tenure, parental status (whether children in household), ethnicity, religion, disability);
- geographical region; allowing for breakdown of data by ONS NUTS 1 statistical regions and water company
- urban and rural classification

The Contractor is invited to recommend their approach to sampling and data weighting. In order to meet this requirement and the project objectives, it is essential that the Contractor carefully considers both the analytical techniques required and the consequent implications for the samples and question design. In addition, the Authority will welcome proposals for analytical methods that may extend the insights from the data.

Task 5 - Finalised mode of survey administration and data handling plan.

The Contractor will ensure:

- the sample is nationally representative and includes the sub-groups highlighted above for the sampling framework.
- sufficient weighting of rural respondents in the sample design.
- the data collection is undertaken to minimize seasonality; data collection split into 2 within-year seasons (winter, summer).
- respondent engagement and data quality throughout the survey.
- respondent understanding of questions being asked, as it is possible some respondents may require brief explanations or definitions of some terms used in the survey questions.
- data validity and consistency between the survey waves, considering potential issues of seasonality and other methodological design constraints.

- seasonality effects are minimised or negligible, by replicating fieldwork timing between waves.
- the risk to fieldwork delivery is minimised. We would like the survey to be online only, but still ensure adequate response rates across the groups.

The Contractor is invited to propose their methodology for meeting the objectives of the project and show how their proposal offers good value for money.

When making proposals it will be important to consider how a proposal will address the above requisites of research design.

Milestone 2 - Finalised sampling framework, mode of survey administration and data handling plan delivered to Defra for approval

Task 6 - Survey implementation and data collection

Deliver the survey in order to collect data as specified. Data collection should be split over 2 within-year seasons (winter, summer).

Milestone 3 - Produce a mid-term written update on the survey progression; date it goes live, number of respondents from each household and demographic type, any issues encountered and resolutions found.

Tasks 7 -10 – Data cleaning, weighting and interpretation

Task 7 - Clean and anonymise the data

Task 8 - Where necessary weight data to ensure representative results can be produced (this should be avoided where possible through a robust sampling strategy).

Task 9 - Produce data report which includes a summary of results and all information required for the Authority to undertake analysis in house:

- a) Summary of the methodology, sample framework and sampling strategy and survey administration [as covered in Tasks 1-5]
- b) Data cleaning process and assumptions
- c) Data weighting; including clear detail on the method/formula used
- d) Data catalogue (for easy interpretation of the data variables for use by Defra)
- e) Summary of results; including summary statistics for each survey question.

Task 10 – Produce and securely transfer both the:

- raw, anonymised data, and
- cleaned & weighted, anonymised data

to Defra in the form of Excel Worksheets so that analysis can be undertaken. These should be structured to facilitate analysis in statistical programming languages, such as R. Data files will also be provided as .csv format.

Milestone 4 – Final report and accompanying MS Excel data worksheets

NOTE: As previously stated, there will be breaks in the Contract after satisfactory completion of the requirements (Tasks 1 to 10). The Authority will analyse the outcomes and determine if there is a requirement to continue with the Contract for each subsequent wave of the survey (2024, 2027, 2030).

Required Knowledge and Expertise

The skills and experience required include, but are not limited to:

- Expert knowledge in social science research methods
- Excellence in delivering large surveys via online format to collect representative data from the population.
- Understanding and ability to comply with data protection principles and requirements, including the GDPR and Data Protection Act 2018⁸
- Understanding of water policy context such as the [Measures to reduce personal water use](#) in October 2019 consultation and existing research undertaken in this field.
- Excellent project management skills
- High quality communication, report writing and presentation for meetings/workshops

The Contractor shall only use people in delivery of the work who are suitably experienced. The Authority recognise the specialist nature of the skills required and encourage due consideration to the best way of providing the necessary expertise. Proposals from well-balanced consortiums will be considered.

6. Programme of Work / Deliverables / Timetable

Specific deliverables will be required from the Contractor during the course of this project.

The Authority envisage the tasks will be delivered as separate activities, but with the potential for elements of the different tasks to be undertaken in parallel.

Below are detailed the key deliverables and milestones within the project:

review and approval by Defra and its partners (Environment Agency, Welsh Government and Natural Resources Wales where relevant) in every case. Draft reports, and communications materials (including any press releases) will be subject to comments and sign-off by Defra.

Defra may require the final report to be peer reviewed by an external peer reviewer/s. The Department will identify and co-ordinate the peer review but the Contractor will be expected to respond to comments and revise outputs accordingly. The Contractor should therefore accommodate responding to peer review comments in their proposal.

7. Project Governance and Contract Management

A Steering Group will be set up to steer direction of the project and to provide technical quality review and Authority Contract Management.

Role	Responsibility
Sponsor	Head of Floods and Water, Defra Head of Water Resources, Environment Agency

Project Manager	Senior Scientific Officer, Defra
Delivery Team	Policy Lead, Defra Senior Operational Researcher, Defra central Analysis and Evidence directorate. Specialist Advisor Water Resources, Natural Resources Wales Principle social scientist for Water Research, Environment Agency
Authority Contract Manager	Water Supply Policy-Water Services, Defra

The Project Manager will act as the main point of contact for matters relating to the delivery of the Contract. Appropriate escalation routes to senior managers to be included in the project bid to mitigate risk of delivery issues. The project will be managed on behalf of Defra by a Principal Scientist, in Floods and Water directorate, Defra. The Project Manager will coordinate an internal project Steering Group to review the work and ensure it meets project objectives, with appropriate input from the Authority Contract Manager, as required. Meetings have been incorporated into the Programme of work to discuss progress and to ensure timely support and data provision as required.

A Steering Group will guide the project. The Steering Group will monitor progress and provide advice, support and guidance on project scope, methodology, policy focus and research outputs.

8. Audience

The main audience for this research are Defra Analysis & Evidence, Water Services policy team, the Environment Agency, Welsh Government and Natural Resource Wales. Findings will be disseminated to people in the Defra group who have interest in water resources.

9. Performance Management Framework (including Key Performance Indicators (KPIs))

- 9.1 As part of the Authority's continuous drive to improve the performance of all suppliers, this Performance Management Framework (PMF) will be used to monitor, measure and control all aspects of the Contractor's performance of Contract responsibilities.
- 9.2 The PMF purpose is to set out the obligations on the Contractor, and to outline how the Contractor's performance will be evaluated. The Contractor is responsible for the performance of any sub-contractors.
- 9.3 Key Performance Indicators (KPIs) are essential to align Contractor performance with the requirements of the Authority and to do so in a fair and practical way. KPIs must be realistic, achievable, and set to indicate where the service is failing if they are not achieved.
- 9.4 KPIs are set out at Table One (1) below. They will be monitored on a six monthly basis as appropriate to the Service and will form part of the Contract performance review.
- 9.5 The Authority will be entitled to refine, vary or modify the KPIs and performance standards from time to time during the Contract period through a variation to be agreed with the Contractor using a Contract Change Note.
- 9.6 Where a KPI has a percentage measure, the Contractor's performance will be rounded up or down to the nearest whole number.
- 9.7 The Contractor will produce a six monthly Performance Management report, detailing performance against the KPIs. The report will be circulated to the Authority on a six monthly basis, at least one week prior to the date of the six monthly Review Meeting.
- 9.8 The Contractor will maintain their own management reports, including Issues Log, which will include detail on periodic checks to ensure quality. This data will be made available to the Authority on request.
- 9.9 Any performance issues highlighted in the performance management reports must be addressed by the Contractor, who may be required to provide a formal improvement plan to address all issues highlighted within ten (10) working days of request by the Authority.

The Contractor also acknowledges the confidentiality of Authority Data.

- 2.2.1 is in accordance with Good Industry Practice and Law;

However any failure to approve the Security Plan on the grounds that it does not comply with the requirements set out in paragraphs 3.1 to 3.4 shall be deemed to be reasonable.

If such action is taken in response to a breach that is determined by the Authority acting reasonably not to be covered by the obligations of the Contractor under the Contract, then the Contractor shall be entitled to refer the matter to the CCN procedure set out in Schedule 3.
- 6.4 The Contractor shall as soon as reasonably practicable provide to the Authority full details (using such reporting mechanism as may be specified by the Authority from time to time) of such actual, potential or attempted breach and of the steps taken in respect thereof.
