Annex 1 – Authorised Processing Template

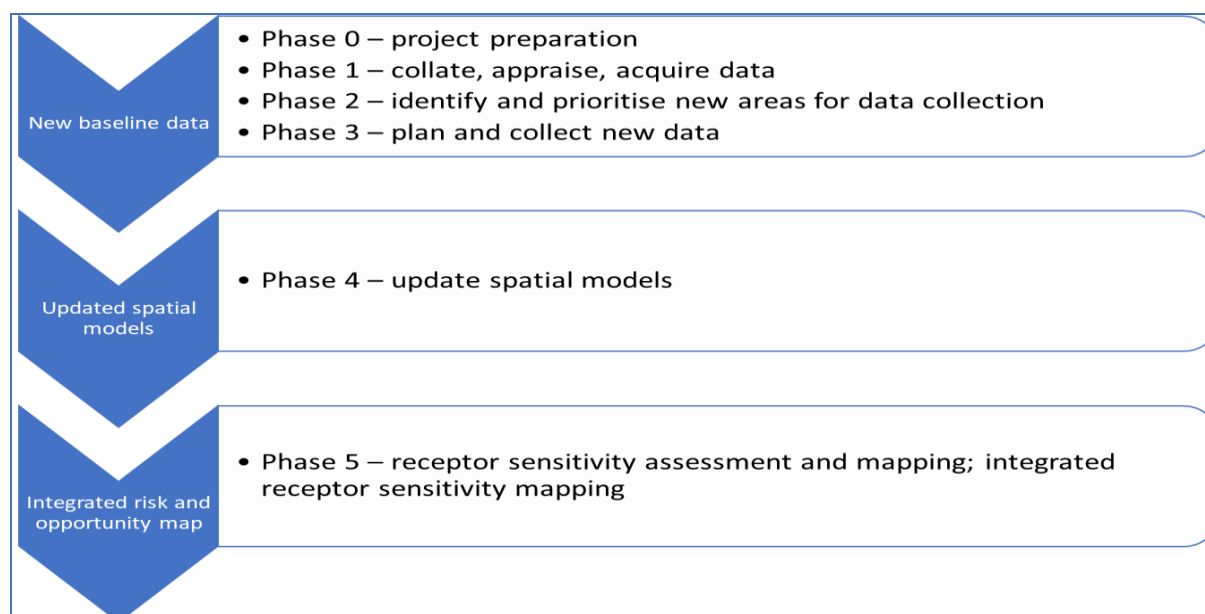

Contract:	C20704
Date:	Contract start date: 1 st September 2023 Contract end date: 31 st October 2024
Description Of Authorised Processing	Digital Aerial Surveys for Seabirds and Marine Mammals Species in the Scottish Northern Isles for the POSEIDON Project
Subject matter of the processing	No personal data will be processed under this contract. The requirement is for the collection and processing of seabird and marine mammal imagery data. Staff names and contact details, including work phone numbers, will be provided to support communications and contract management.
Duration of the processing	Full contract
Nature and purposes of the processing	As above. No personal data will be processed under this contract. The requirement is for the collection and processing (image analysis and Quality Assurance) of seabird and marine mammal imagery data.
Type of Personal Data	Staff names and contact details, including work telephone numbers
Categories of Data Subject	Staff, Seabird and marine mammal imagery data.

Annex 2 – Specification

Summary of the outcome needed and the high level specification agreed for this requirement is set out below and is the starting point for the remaining procurement strategy commentary and recommendations.

The POSEIDON project is structured into six phases (0-5) which are linked to the three key project outputs: 1) new baseline data; 2) updated habitat and species models; and 3) integrated risk and opportunity map (Figure 1). This requirement relates to Phase 3 and seeks to collect new baseline seabird and marine mammal data for the Northern Isles study area. This new baseline data will in turn be used to update spatial models (Phase 4) and produce integrated receptor sensitivity mapping (Phase 5).

1. Aims

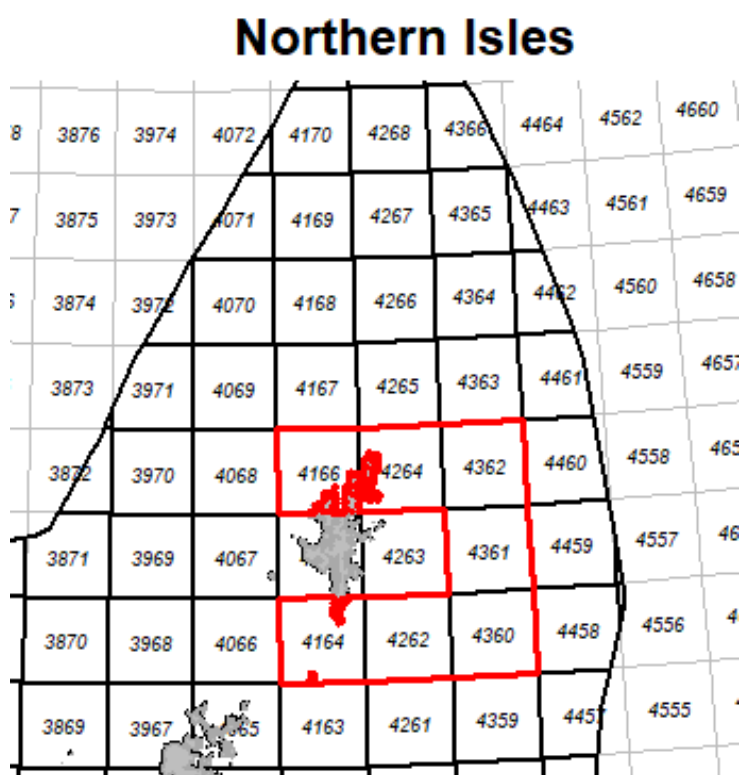

Natural England is seeking a Digital Aerial Survey (DAS) supplier to design and carry out two core digital aerial surveys of the prescribed study area east of Shetland (Figure 2), in the core seasons defined below. Budget permitting, the supplier will be required to repeat the same surveys in two optional seasons for a total of four digital aerial surveys of the prescribed study area.

Each of the seven ICES rectangles that comprise the study area will be surveyed at least once in each season. Seasons are defined as:

1. Core: January 2024.
2. Core: June 2024
3. Optional: September - October 2023, (budget dependent).
4. Optional: March - April 2024 (budget dependent).

Figure 2: Study area

ICES cells outlined in red - 4166, 4264, 4362, 4361, 4360, 4262, 4164

The selected DAS supplier will use the most up to date digital aerial imagery methods (video or still) and process the resulting imagery to provide a comprehensive digital dataset from which robust estimates of the abundance and distribution of birds and marine mammals in the survey areas can be derived.

The successful supplier will be required to design, organise and logistically coordinate the survey work, as well as process the resulting imagery and provide the imagery and processed data in an agreed format to Natural England. Under this contract there will be no requirement to analyse the processed survey data to derive abundance estimates or produce density surface maps – the contract is solely for data collection, image

processing and provision of resultant images, data and associated metadata compliant with required standards.

The service required is provision of all aspects of digital aerial survey (including suitably qualified surveyors, appropriate digital camera equipment, and survey aircraft designed for offshore work over long durations), digital data processing, Quality Assurance and reporting to meet the requirements and objectives of the survey work, as detailed in the specification.

There are four **core objectives** for this contract. These are to:

- a) Conduct a minimum of two, core seasonal surveys and a maximum of four, seasonal¹, high precision digital aerial surveys of the study area in the Northern Isles. Survey data are to be collected using digital video or still imagery at a minimum of 2 cm Ground Surface Distance (GSD) to confidently capture and identify to the lowest taxonomic level possible all birds (in flight and on the water) and marine mammals within the surveyed area;

¹Whilst we recognise the challenges of surveying large areas to prescriptive timetables, we would suggest contractors aim for the middle of each survey season where practical, and limit as far as possible the total time required to survey the study area within a season. Where surveys have to take place at the beginning or end of seasons, Natural England will require discussions to ensure seasons are separated to an acceptable degree.

- b) process imagery to identify **all** birds, marine mammals, and other objects of interest captured to the lowest taxonomic level possible;
- c) Quality Assure results so that pre-agreed data standards are met (to meet MEDIN guidelines, and JCDP data standards or equivalent) for archival in marine data repositories such as the Marine Data Exchange;
- d) produce ArcGIS layers, associated metadata, accompanying .csv files, etc. and four brief reports (one for each of the survey seasons) detailing survey effort and observations for each individual survey within pre-agreed timeframes, likely to be within 6 – 8 weeks of data collection). Files provided should quantify locations, dates and times of surveys in a clearly communicated coordinate system and/or projection, regardless of whether animals were sighted or not.

There is no requirement to analyse data to produce e.g. abundance estimates or density maps – the contract is solely for data collection, image analyses and provision of data, imagery and associated files to required standards.

1. Methods

The successful supplier will need to develop an appropriate survey design to meet the project aims and objectives outlined above. Recognising the trade-off between coverage and cost, contractors are encouraged to consider a range of coverage options and to include costings and justification for each. Natural England recommend contractors consider and present costings for three potential options. These are 2%, 3% and 5% coverage each at a resolution of minimum 2 cm Ground Surface Distance (GSD). Justification and costings for other appropriate options are also welcomed.

Survey design

Bidders should clearly indicate, and provide supporting evidence for their degree of confidence in:

- a) The suitability of the proposed survey design to provide a dataset that can provide suitable data to characterise the study area;
- b) The ability to identify as many of the species of interest to lowest possible taxonomic level; and
- c) The suitability of the proposed survey design to maximise encounters with species of interest within the study area.

Bidders must also provide information on technical and procedural specifications, to include as a minimum, but not necessarily limited to:

- Camera specification, number deployed per aircraft, and type
- Camera performance in different environmental conditions (for example, comparison of bird and mammal detections during good versus poor light conditions, between different sea states and in variable cloud levels) and approaches to management of variable image quality with respect to environmental conditions (e.g. sea state, where possible turbidity, cloud cover, sun altitude and surface glare)
- Choice of survey design (e.g. transect or grid based, continuous or discontinuous image capture)

- Number of proposed transects to be surveyed or still images to be collected
- Transect or grid orientation and spacing and swathe / image width or still image area for plot-based surveys
- Survey altitude and image resolution (GSD)
- Methods for ensuring accurate georeferencing of survey images
- Time required to complete the survey and indicative survey plan; consideration should be given to whether it is appropriate to divide the survey area into zones that can be surveyed in a day, or whether the whole area could be surveyed in a day, using multiple planes, with repeat surveys visiting different offset transect lines within the season to provide the overall required coverage of the study area
- Proposed survey area extent in relation to the study area; information on any operational restrictions or other factors that justify excluding coverage of certain areas
- Proposed overall percentage analysed coverage of the survey area (including actual area surveyed and percentage of images to be analysed) and commentary on implications for confidence in final population estimates. It is recommended that costings are presented for 2%, 3% and 5% coverage. Costings and justification may also be presented for alternative coverage percentages should the bidder consider them achievable
- Approach to bird or marine mammal recognition and species attribution, including QA procedures
- Proposed output format of the raw data (including the fields/attributes that would be included)
- An indication of the size of the raw data outputs from each of the seasonal surveys at different coverages

A suitable survey method should consider the following points and bidders are required to consider and address each of these points in their submission:

- Aerial survey(s) should be undertaken using digital high-definition video or high resolution still photography with a Ground Surface Distance of 2 cm or finer.

- Survey(s) should be designed to gain a representative sample of seabird and marine mammal populations across the study area to enable statistically robust estimates of their population sizes (and associated confidence intervals) and their distributions to be generated subsequent to this contract.
- Survey designs should aim to balance costs against survey coverage, image resolution and duration and frequency of survey. There will be a need to explicitly state the percentage coverage of the survey area for each seasonal survey and how this will be achieved reliably. Costs should be provided for various options of replicates and coverage considered appropriate to meet the requirements.
- Details of the camera specification and type, performance in different environmental conditions (for example, comparison of bird and mammal detections during good versus poor light conditions, between different sea states and in variable cloud levels) and approaches to management of variable image quality with respect to environmental conditions (e.g., sea state, cloud cover, sun altitude and surface glare) are important and information on these matters should be provided by bidders.
- Full details of logistic considerations for survey work should be provided in the tender e.g., operational restrictions, or other factors that may justify excluding coverage of certain areas and how these restrictions will be addressed.
- There are various risks that may constrain the ability to complete the survey and data extraction within the required timescales, considering factors such as weather, fuelling, airspace restrictions and COVID-19 etc. Bidders should describe the potential risks and provide details of relevant contingency measures.
- Natural England will require the successful framework contractor to pass all survey imagery to Natural England. Bidders should provide details of the process by and format in which this imagery will be transferred to Natural England and an estimate of the total storage capacity required.

2. Requirements

To enable successful delivery, the successful Contractor is expected to:

- Plan the survey design and submit these plans at tendering stage.

- Conduct the survey(s), including organisation and positioning of aircraft, crew and equipment and ensuring that all health and safety requirements, including Covid-19 requirements, are met.
- Process the acquired imagery.
- Quality Assure results so that pre-agreed data standards are met (e.g. to meet [MEDIN standards](#) and [JCDP Data Standard](#) for marine mammals or equivalent for archival in marine data repositories such as the [Marine Data Exchange](#)). Common identifiers must be used for sightings and GPS location to ensure the latter can be associated with the former. It is recommended that photograph files are used as the common identifier. This detail should also be provided when no animals are sighted. It is recommended that the GPS log includes environmental / conditions during surveys alongside the coordinates (turbidity, sea-state etc). For marine mammals, data should record which detections (images) were at the surface and which were not. A guide to the data format should be provided to define headings and guidance on how to interpret the data. (Note, that by the time this project is completed it is likely that Marine Scotland's *Digital Aerial Survey Data Standard Guidance Document*, which is currently in preparation, will have been finalised and published. This guidance will set out details of the data and metadata requirements needed for MEDIN compliance when reporting on digital aerial surveys and will provide templates for the provision of all necessary information in a standard format. It is likely that the successful framework contractor will be required to provide data and metadata relating to the surveys conducted under this project in accordance with this guidance, once finalised.)
- Submit ESRI ArcGIS 10.2 compatible shapefiles (clean of any topology errors) and .csv files showing survey effort (e.g. aircraft tracks and altitude) and observations of birds, marine mammals and other objects of interest (one per survey), including data fields and metadata to pre-agreed standard (see above). These to be submitted to pre-agreed public repository with accompanying metadata, within pre-agreed period following each survey. Point and polygon data should be supplied. Column headers and terminology must be consistent amongst files with identical words, spacing and case.
- Submit brief technical reports in Microsoft Word format following each set of seasonal surveys, detailing pertinent survey information including: detailed description of, and rationale for, survey methods and design, maps of survey routes and coverage; details of surveys as actually flown (dates, time, weather conditions, sea state, crew, camera set up, etc.); details of data extraction and processing and associated challenges or limitations (e.g. around species identification). Reports will include species identification rates and the criteria used for species-specific identification rates (e.g., are they comprised of definite,

probable or possible identifications). Beaufort Scale should be used to report sea states in addition to a (subjective) underwater visibility estimated at 15min periods and added directly to the survey route data as additional fields. The final report structure and content will be agreed with the nominated officer.

- Submit copies of all survey imagery and above files to Natural England.

Project deliverables

- Digital copies of a sample of the georectified original survey photographs or video stills – please indicate available formats.
- A copy of the camera calibration report for each survey.
- Quality assured datasets of validated and geo-referenced observations (for all species/species groups/other objects of interest recorded) – so that pre-agreed data standards are met (e.g. to meet MEDIN standards or equivalent for archival in marine data repositories such as the Marine Data Exchange) (see guidance at <https://medin.org.uk/>) and/or compliance with Marine Scotland's *Digital Aerial Survey Data Standard Guidance Document* (once finalised);
- ESRI ArcGIS 10.2 compatible shapefiles with attached metadata and clean of any typology errors and .csv files showing survey effort (e.g. aircraft tracks and altitude) together with log of conditions (sea state, visibility, cloud cover, glare, precipitation etc) during each survey. As above, sea state should be recorded using the Beaufort Scale and a (subjective) underwater visibility estimated at 15min periods and added directly to the survey route data as additional fields.
- ESRI ArcGIS 10.2 compatible shapefiles with attached metadata and clean of any typology errors and .csv files showing observations of birds, marine mammals and other objects of interest (one set per seasonal survey), including data fields and metadata to pre-agreed standard. Point and polygon data should be supplied. All datafiles to be submitted to pre-agreed public repository within pre-agreed period following each survey.
- Raw data files providing details of all the objects observed within each sample frame and subsequent identification. For each object detected, data fields to include, as a minimum, georeferenced position, date, time, number of individuals, assignment to identity (bird or mammal species and age/sex or broader category), confidence level in that categorisation, whether in flight or on the water surface and direction of travel. The locations of any objects such as vessels that might influence observed bird distributions should also be recorded within these

data files. Positional and conditional information is required for photographs or video where animals were not seen.

- Brief reports in Microsoft Word format; one following each survey season, each detailing pertinent survey information (dates, time, weather, sea state, crew, camera set up, incidents, species ID rates, etc.). (Reports do not need to contain any descriptive or analytical statistics or modelling). Reports will include the criteria used for species-specific identification rates (e.g., are they comprised of definite, probable or possible identifications).

All data provided must comply with Natural England metadata standards and GIS formats as outlined at Annex 2 and should additionally be in European Seabirds at Sea (ESAS) compatible format.

Data ownership, intellectual property rights and copyright

All data captured and produced shall be fully owned by and copyrighted to Natural England. This shall include any intellectual property rights that might otherwise impede on Natural England's usage and data sharing of the outputs. Natural England may share any project outputs with third parties including for the purposes of additional analyses outside the final scope of any contract awarded against this statement of requirements. Any data supplied by Natural England to potential bidders and the successful contractor are for use in this project only and should not be retained once the bidding process (for unsuccessful bidders) or project (for the successful contractor) has been completed. In addition, neither bidders nor the successful contractor must pass such data on to any third parties unless with explicit prior permission from Natural England. The successful contractor is responsible for ensuring that all products submitted are of a satisfactory standard. The Natural England Nominated Officer may undertake a QA review of all project deliverables, including image analyses, prior to approving subsequent payment for the work.

3. How the Contract works

3.1 The Order Form is an offer by the Authority to purchase the Deliverables subject to and in accordance with the terms and conditions of the Contract.

3.2 The Supplier is deemed to accept the offer in the Order Form when the Authority receives a copy of the Order Form signed by the Supplier.

3.3 The Supplier warrants and represents that its Tender Submission and all statements made and documents submitted as part of the procurement of Deliverables are and remain true and accurate.

4. What needs to be delivered

4.1 All Deliverables

(a) The Supplier must provide Deliverables: (i) in accordance with the Specification and Tender Submission; (ii) to a professional standard; (iii) using all reasonable skill and care; (iv) using Good Industry Practice; (v) using its own policies, processes and internal quality control measures as long as they don't conflict with the Contract; (vi) in accordance with such policies and procedures of the Authority (as amended from time to time) that may be specified in the Contract (vii) on the dates agreed; and (viii) in compliance with all applicable Law.

(b) Without prejudice to the Specification the Supplier must provide Deliverables with a warranty of at least 90 days (or longer where the Supplier offers a longer warranty period to the Authority) from Delivery against all obvious damage or defects.

4.2 Goods clauses

- (a) All Goods Delivered must be capable of meeting the requirements set out in the Specification and be either (i) new and of recent origin, (ii) reused or (iii) recycled.
- (b) All manufacturer warranties covering the Goods will be assigned to the Authority on request and for free.
- (c) The Supplier transfers ownership of the Goods on completion of Delivery (including off-loading and stacking) or payment for those Goods, whichever is earlier.
- (d) Risk in the Goods transfers to the Authority on Delivery but remains with the Supplier if the Authority notices any damage or defect following Delivery and lets the Supplier know within three Working Days of Delivery.
- (e) The Supplier must have full and unrestricted ownership of the Goods at the time of transfer of ownership.
- (f) The Supplier must Deliver the Goods on the date and to the specified location during the Authority's working hours.
- (g) The Supplier, its subcontractor(s) and supply chain must minimise packaging used whilst providing sufficient packaging for the Goods to reach the point of Delivery safely and undamaged. The Supplier must take back any primary packaging where it is possible to do so. Packaging must be 100% re-usable, recyclable or compostable, use recycled content where reasonably practicable and support the Government's commitment to eliminate single use plastic.
- (h) All Deliveries must have a delivery note attached that specifies the order number, type, quantity of Goods, contact and details of traceability through the supply chain.
- (i) The Supplier must provide all tools, information and instructions the Authority needs to make use of the Goods. This will include, where appropriate, any operation manuals which, unless specified otherwise, will be written in English and provided in electronic form.

Goods must be disposed of in line with the waste management hierarchy as set out in Law. The Supplier will provide evidence and transparency of the items and routes used for disposal to the Authority on request.
- (k) The Authority can cancel any order or part order of Goods which have not been Delivered. If the Authority gives less than 14 calendar days' notice then it will pay the Supplier's reasonable and proven costs already incurred on the

cancelled order as long as the Supplier takes all reasonable steps to minimise these costs.

(l) The Supplier must at its own cost repair, replace, refund or substitute (at the Authority's option and request) any Goods that the Authority rejects because they don't conform with clause 4.2. If the Supplier doesn't do this it will pay the Authority's costs including repair or re-supply by a third party.

(m) The Authority will not be liable for any actions, claims, costs and expenses incurred by the Supplier or any third party during Delivery of the Goods unless and to the extent that it is caused by negligence or other wrongful act of the Authority or its servant or agent. If the Authority suffers or incurs any damage or injury (whether fatal or otherwise) occurring in the course of Delivery or installation then the Supplier shall indemnify from all losses, damages, costs or expenses (including professional fees and fines) which arise as a result of or in connection with such damage or injury where it is attributable to any act or omission of the Supplier or, where related to the Contract, any of its subcontractors or suppliers.

4.3 Services clauses

(g) On completion of the Services, the Supplier is responsible for leaving the Authority's premises in a clean, safe and tidy condition and making good any damage that it has caused to the Authority's premises or property, other than fair wear and tear and any pre-existing cleanliness, safety or tidiness issue at the Authority's premises that existed before the commencement of the Term.

(h) The Supplier must ensure all Services, and anything used to deliver the Services, are of the required quality and free from damage or defects.

(i) The Authority is entitled to withhold payment for partially or undelivered Services or for Services which are not delivered in accordance with the Contract but doing so does not stop it from using its other rights under the Contract.

5. Pricing and payments

The Supplier shall not be entitled to assert any credit, set-off or counterclaim against the Authority in order to justify withholding payment of any such amount in whole or in part.

- (b) as to the sustainability or health and safety conduct of the Supplier, subcontractors and supply chain in the performance of the Contract;

then the Authority may:

- (i) require that the Supplier provide to the Authority (for its approval) a plan setting out how the Supplier will ensure continued performance of the Contract (in the case of (a)) or improve its sustainability conduct or performance (in the case of (b)) and the Supplier will make changes to such plan as reasonably required by the Authority and once it is agreed then the Supplier shall act in accordance with such plan and report to the Authority on demand

- (a) comply with the Income Tax (Earnings and Pensions) Act 2003 and all other statutes and regulations relating to income tax, the Social Security Contributions and Benefits Act 1992 (including IR35) and National Insurance contributions;
- (b) indemnify the Authority against any Income Tax, National Insurance and social security contributions and any other liability, deduction, contribution, assessment or claim arising from or made during or after the Term in connection with the provision of the Deliverables by the Supplier or any of the Supplier Staff.

31.3 If any of the Supplier Staff are Workers who receive payment relating to the Deliverables, then the Supplier must ensure that its contract with the Worker contains the following requirements:

- (a) the Authority may, at any time during the term of the Contract, request that the Worker provides information which demonstrates they comply with clause 31.2, or why those requirements do not apply, the Authority can specify the information the Worker must provide and the deadline for responding;
- (b) the Worker's contract may be terminated at the Authority's request if the Worker fails to provide the information requested by the Authority within the time specified by the Authority;
- (c) the Worker's contract may be terminated at the Authority's request if the Worker provides information which the Authority considers isn't good enough to demonstrate how it complies with clause 31.2 or confirms that the Worker is not complying with those requirements;
- (d) the Authority may supply any information they receive from the Worker to HMRC for revenue collection and management.

32. Publicity

32.1 The Supplier and any subcontractor shall not make any press announcements or publicise this Contract or its contents in any way; without the prior written consent of the Authority.

32.2 Each Party acknowledges to the other that nothing in this Contract either expressly or by implication constitutes an endorsement of any products or services of the other Party and each Party agrees not to conduct itself in such a way as to imply or express any such approval or endorsement.

33. Conflict of interest

33.1 The Supplier must take action to ensure that neither the Supplier nor the Supplier Staff are placed in the position of an actual or potential conflict between the financial or personal duties of the Supplier or the Supplier Staff and the duties owed to the Authority under the Contract, in the reasonable opinion of the Authority.

33.2 The Supplier must promptly notify and provide details to the Authority if a conflict of interest happens or is expected to happen.

33.3 The Authority can terminate its Contract immediately by giving notice in writing to the Supplier or take any steps it thinks are necessary where there is or may be an actual or potential conflict of interest.

34. Reporting a breach of the contract

34.1 As soon as it is aware of it the Supplier and Supplier Staff must report to the Authority any actual or suspected breach of Law or breach of its obligations under the Contract.

34.2 Where an actual or suspected breach is notified to the Authority under clause 34.1, the Supplier will take such action to remedy any breach as the Authority may reasonably require. Where the breach is material, the Authority has the right to terminate under clause 11.4.

34.3 The Supplier must not retaliate against any of the Supplier Staff who in good faith reports a breach listed in clause 34.1.

35. Resolving disputes

35.1 If there is a dispute between the Parties, their senior representatives who have authority to settle the dispute will, within 28 days of a written request from the other Party, meet in good faith to resolve the dispute.

35.2 If the dispute is not resolved at that meeting, the Parties can attempt to settle it by mediation using the Centre for Effective Dispute Resolution (CEDR) Model Mediation Procedure current at the time of the dispute. If the Parties cannot agree on a mediator, the mediator will be nominated by CEDR. If either Party does not wish to use, or continue to use mediation, or mediation does not resolve the dispute, the dispute must be resolved using clauses 35.3 to 35.5.

35.3 Unless the Authority refers the dispute to arbitration using clause 35.4, the Parties irrevocably agree that the courts of England and Wales have the exclusive jurisdiction to:

- (a) determine the dispute;
- (b) grant interim remedies;
- (c) grant any other provisional or protective relief.

35.4 The Supplier agrees that the Authority has the exclusive right to refer any dispute to be finally resolved by arbitration under the London Court of International Arbitration Rules current at the time of the dispute. There will be only one arbitrator. The seat or legal place of the arbitration will be London and the proceedings will be in English.

35.5 The Authority has the right to refer a dispute to arbitration even if the Supplier has started or has attempted to start court proceedings under clause 35.3, unless the Authority has agreed to the court proceedings or participated in them. Even if court proceedings have started, the Parties must do everything necessary to ensure that the court proceedings are stayed in favour of any arbitration proceedings if they are started under clause 35.4.

35.6 The Supplier cannot suspend the performance of the Contract during any dispute.

35.7 The provisions of this clause 35 are without prejudice to the Authority's right to terminate or suspend the Contract under clause 11.
