

Allow for necessary propping to form new opening within existing wall as shown all in accordance with the Structural Engineers details. Allow for making good existing disturbed finishes as necessary to match existing.

Allow for necessary propping and remove existing wall as indicated dotted. Install new steel beam all in accordance with the Structural Engineers details to form new opening between the existing Radio Room and Museum Areas as shown. New steel beam to be boxed in with 25 x 25mm s.w. timber framing finished with 12.5mm thick plasterboard with plaster skim finish. Allow for making good existing disturbed finishes around new opening as necessary to match existing.

Existing wall inclusive of existing door / frame indicated dotted to be removed and existing disturbed finishes made good as necessary to match existing.

Install new angled glass feature floor within existing floor to allow for viewing void below floor. Cut out and trim existing timber floor and install a pane of toughened glass set within a proprietary aluminium frame angled to allow for viewing floor void below.  
Prior to installing new angled glass feature cover construct a White painted plywood lined angled shaft within existing floor void together with new LED light fittings to allow for the existing Historic Valve Cap located below ground floor level to be viewed from above ground floor level.

Where existing wall removed allow for infilling with new timber floor construction to match existing floor as shown.
