PROGRESS MEETINGS, PRESENTATIONS AND REPORTS

1. The Contractor shall participate in Progress Review Meetings twice a year, each timed to follow shortly after a “two monthly brief” – see paragraph 3 below. These meetings will focus on technical progress against the aims of the work, exploitation opportunities and schedule/budget issues and can include appropriate presentations to meet this need. The meetings shall be held at mutually convenient dates and locations (usually the contractor’s premises or the Dstl offices at locations to be agreed with the Project Manager), as indicated in the Contractor’s Proposal. The Contractor shall be responsible for arranging the meetings, taking the minutes of the meetings and disseminating the agenda, minutes and any other associated documents to interested parties.
2. Review meetings will usually be attended by the Dstl Project Manager, key MoD technical staff and stakeholders and sometimes by an independent expert drawn from the DSAC Register of Independent Experts. Contractor’s representatives with good knowledge of both project management and technical aspects of the work are expected to attend.
3. The Contractor shall provide to the Dstl a brief (typically not exceeding two pages) report summarising progress and issues on technical, schedule and budget axes every two months.
4. At the end of the project a Final Report will be required with the following sections:
 - Executive Summary

 - Aims of the Project – A clear statement of the original aims of the project and/or revised aims as agreed with the DSTL Project Manager.

 - Exploitation for Defence – a description of any opportunities, instances or plans for exploiting the work of the project into MoD and/or its supplier base
 - References and Publications – any technical articles/papers or other publications produced in connection with the project
 - Abstract – the Final Report shall be accompanied by a separate document **concisely** stating the purpose, methodology, results and conclusions presented in the original Final Report document. It should be kept to unclassified level if possible, avoid acronyms, and be not more than 200 words of commercially non-sensitive text. *[for guidance - The abstract is intended to help readers decide whether they wish to consult the original report, and to help searchers decide whether a report is likely to provide the answer to a technical enquiry].*
5. For the avoidance of doubt, the “two month briefs”, the Final Report and the Abstract shall be subject to the provisions of DEFCON 705.
