Buyer contractual details

This Order is for the G-Cloud Services outlined below. It is acknowledged by the Parties that the volume of the G-Cloud Services used by the Buyer may vary during this Call-Off Contract.

G-Cloud lot:	This Call-Off Contract is for the provision of Services under: Lot 3 - Cloud support
G-Cloud services required:	Services Required Readiness communications to be delivered across various channels that prepare staff for when they are to receive new hardware and software, which will include some self-service online sessions for raising familiarity with the new products and services, and in person road shows and showcases across multiple office locations demonstrating the key new features and functions that will be available. The content and delivery of a 1-2 hour onboarding and orientation session to be delivered when users receive new hardware (up to 48 hours prior or on the day), aimed to get them up and running as efficiently as possible. Where teams require further assistance, the supplier will provide specific training covering the key features of the new devices (users will be given a choice of a Microsoft Surface laptop, Microsoft Surface Pro or a Dell XPS 13 at the point of rollout but this will be subject to change moving forwards (possibly including Macs)), operating system, Office 365 and key pieces of MHCLG good practice (for example, where people should share documents in OneDrive and SharePoint). MHCLG will work with the supplier to agree the full content of the 1-2 hour sessions plus the optimum number of attendees. However, MHCLG expect that the following three change objectives will be encompassed within the training: • Collaboration – sharing links not attachments. • Using Skype for Business for more inclusive meetings and sharing. • Enabling cultural and behavioural change – i.e. not printing papers for meetings and using VC rather than travelling to meetings. Adaptation of the onboarding and orientation session to be delivered to new

	joiners to the organisation after the initial roll-out has been completed as part of general staff induction to be delivered by MHCLG staff or contractors. Resources and links to key support resources once people are live on the new platform, floorwalking trainers (floorwalkers will need to be cleared to CTC level in 2 Marsham Street and baseline level in other MHCLG buildings) will be required in the days immediately after deployment to support people on the ground, provide pointers to online materials, information about new features released in the platform, supplier produced training modules (online and/or face to face) to cover topics that are unique to the Department; establishing online communities across the organisation to share good practice on the use of new tools based around user groups of professional or policy interest. Team-based interventions that can help operational teams to understand the art of the possible with the new platforms, and then plan collectively to implement changes to working practices that are facilitated by the new platforms. This will include, but not be limited to, specific training covering the key features of the new devices, operating system, Office 365 and key pieces of MHCLG good practice (for example, where people should share documents in OneDrive and SharePoint). Suggestions for how technology elements can be embedded into more broad management and skills training (e.g. Project Management, Time Management, Performance Management). Suppliers will be required to advise how the new technology can be best utilised by different roles across MHCLG – i.e. Analysts, Policy Officials and staff working in Corporate areas, so that the platforms are referenced in a way that is much more contextual to the work that people do. Handover for training and development to be taken into ongoing business as usual at the end of the project by in house or contract resource. This will be documentation that can be folded into the HR induction process FAQ's and references that can stay on the Intranet. To supplement this, the MHCLG IT Operations Team will operate a genius bar where users can seek advice and support on a wide variety of subjects. Train the trainer sessions will also allow certain MHCLG staff to train other staff in using the new solution. Provision for users with reasonable adjustments and in particular how training and communications will be made accessible to all MHCLG people, and where specific training can be provided for people who have accessibility challenges, and to all to promote inclusive use of the new technologies. MHCLG are working very closely with Microsoft to understand what assistive technology enhancements the new solution will provide to our users and it will be important that the training offering complements this work.

Schedule 1 – Services

REDACTED

Hable's response to MHCLG clarifications is set out below.

1. Suppliers are to detail how they will train, and provide floorwalkers for, up to 100 staff per day between the start of September and the end of November 2018 (the planned rollout period).

Hable will appoint a senior consultant to the MHCLG project (Nicki Harman) to lead the project throughout and company founder Mark Reynolds will continue to play an active role in the delivery of this contract. Melanie Hunter will be your Project Co-ordinator & manage all of the admin & scheduling throughout the training programme.

We have designed a detailed 3-month schedule (see Excel spreadsheet attached) which requires 8 of our regionally based staff to deliver a combination of face-to-face workshops and floor-walking. With 3 Hable trainers delivering workshops at MHCLG sites (both London & Regional) on any given day, this allows us to train 108 staff per day.

Figure 1: September Schedule for MHCLG rollout

Assumptions made in designing the schedule:

- 3 x 90-minute sessions per day for the "Discover your Device" (initial orientation) session.
- Maximum of 12 people per session, giving a total of 36 staff trained per-day, by each Hable trainer.
- By providing 3 Hable trainers per day, between the start of September and the end of November 2018, your target of training 100 staff per day can easily be achieved.
- Up to 3000 staff can attend the "Discover Your Device" session in the 3-month rollout period, plus delivery of a second module ("Discover Office 365" or "Smarter Meetings" for example) can begin in October, for those staff who attend "Discover your Device" in September.

Possible adjustments depending on requirements:

- 3 X 2hour sessions can be accommodated within the same schedule by adjusting start and finish times
- Proposed schedule delivers completion of first workshop to all users by 9th Nov. This means that we could remove 1 day per week of workshop delivery (e.g. Fridays) and required target would still be met without overall increase in number of trainers required.
- Locations/days within the proposed schedule can easily be interchanged without impact on volume.
- Our proposed schedule means that there will be floorwalkers in London every day throughout the 3-month rollout period and in the regional offices, we can provide a floor walker after the workshop days if required.

Hable were originally expecting the rollout period to start during May or June. The fact that the rollout is now planned to start in September makes it even easier for us to schedule the training and floorwalking days, allocate the resource and confirm to MHCLG the names of the specific Hable staff who will be delivering the sessions. We usually book resources around 2-3 months in advance, meaning that all of the Hable staff included on our schedule are currently available for this project.

We are recommending 1 trainer and 1 floorwalker per 36 delegates, per day. The trainer will deliver the workshops for up to 12 MHCLG staff and the floorwalker will be onsite to support staff after each of the 3 sessions or support other staff who have already been through the session on a previous day. In London you will require 2/3 trainers and 2/3 floorwalkers on some days, in order to hit the target number of staff trained.

2. Suppliers are to confirm that they are able to run training sessions and floorwalking in parallel, at both the MHCLG HQ building in central London and MHCLG regional sites.

Yes, Hable can provide training sessions and floorwalking in parallel, both in London and at regional sites. We have designed a schedule that will be delivered entirely by Hable staff (no temporary staff or contractors) with up to 3 trainers and 3 floorwalkers on-site per day. See suggested schedule on attached Excel spreadsheet.

3. Suppliers are to confirm how they will ensure that quality is maintained throughout the three month rollout period.

Hable ensures that the quality of our services remains high, via the following activities:

- Obtaining feedback from its customers and promptly managing any quality related issues.
- Using analysis tools to identify root cause and implementing robust preventative actions.
- Engaging with staff and giving them the required training and supervision to support the company's quality objectives.
- Defining roles & responsibilities within the organisation structure.
- Monitors and reviews performance, striving to continuously improve our services.

All Hable staff have a responsibility for quality performance. To enable the execution of these responsibilities adequate equipment, resources, training, supervision & instruction will be given.

The company Directors have overall responsibility for matters relating to quality and will regularly review the company's quality performance. The quality policy will be available to all staff and for public viewing via the company website.

For MHCLG specifically, we will create training content based around your requirements and objectives, then review that content with the project team at MHCLG. Once the content is agreed, we will provide the content to all Hable staff and brief them fully about the project. All Hable trainers will attend at least 1 day during our planned Pilot Week (w/c August 27th).

The planned schedule takes into consideration the need for our trainers to be consistent in their approach, and also fresh and enthusiastic in every session. We therefore try to avoid any Hable trainer delivering back-to-back weeks, instead giving trainers a "1 week on, 1 week off" schedule.

We will use both Skype for Business and Microsoft Teams to communicate any changes and feedback during the rollout. A minimum of two Teams collaboration spaces will be set up:

- 1) For the MHCLG project team and Hable project teams to communicate & collaborate. This can be used for any questions, comments and feedback throughout the programme. This will be managed daily by Hable project co-ordinator.
- 2) For Hable trainers and floorwalking staff, to update each other through each day of the programme – sharing feedback, success stories & any challenges faced.

The Hable team can help feed in to the evolving document of FAQs which will be updated daily and available to all. We will also work with MHCLG to design a course feedback form, which will track our progress and help us maintain quality by addressing any issues that delegates raise during the rollout.

At the end of each week the Hable team will have a review call to discuss how the week has gone and update the trainer for the following week. The project co-ordinator will run the calls and will enter all feedback in to the lessons

learned log, which we will share with the project team and take action as required. The project co-ordinator can also be onsite regularly, to assist with training or floor walking, observe sessions and meet with the MHCLG project team to ensure the objectives are being met and the required outcomes are as expected.

4. Suppliers are to confirm that they have delivered training and floorwalking on this scale to similar organisations in these timescales – i.e. circa 3,000 users in three months.

Whilst Hable have not delivered a training programme to 3000 users in 3 months before, we have however delivered a training schedule with the exact same user-to-trainer ratio, over a 3-month period. This was for the University of London, who also did their rollout between September and December 2016. We delivered sessions for over 1000 delegates in that 3-month period. For this project we had 1 trainer onsite for 3 months, delivering 3 sessions per day, each with 12 staff in. We were issuing Surface Pro's and training staff on using the device, Windows 10 and Office 365.

Our planned schedule for MHCLG is exactly the same approach, but with 3 trainers on-site per day, rather than 1.

5. Suppliers are to confirm how many trainers and floorwalkers they can provide during the rollout period and whether these staff are supplier staff or contractors.

Hable have created a training schedule for the MHCLG project, to be delivered across 3 months (Sep/Oct/Nov). This schedule requires 7 trainers (6 plus 1 for cover) and 3 floorwalkers, all of whom will be Hable staff.

Here are the names of the Hable staff who we will provide for the rollout:

Name	Role
Redacted	

Should additional trainers or floor-walkers be required, Hable can also provide the following staff:

Name	Role
Redacted	

If for any reason the project requires more than 10 trainers and 4 floorwalkers, then Hable will bring in temporary staff (contractors), but we do not expect that to be necessary based on the schedule we have planned. Our bid and our delivery model is all based on using Hable staff to deliver all of your requirements. Due to the delays in this project, and subsequent September start – if MHCLG confirm the contract in June 2018, then the staff above can all be booked and scheduled onto the MHCLG project.
