Section 4 – Specification and about this procurement

Background

The tank was built in the 1970s, during installation it was found to be suffering from cracked welds that were seriously compromising its vacuum integrity. Because the design of the tank is such that the interior of the tank can be accessed only from the ends of the tank, the cracks were necessarily repaired by hand from the inside using patches with O-rings and RF (Radio Frequency) finger-strip. However, because of activation (especially activation of the drift tubes) over the many years of operation since the 1980s it would be very difficult to repair the tank in the same way again, and the tank is still leaking; currently it is being kept at an acceptable vacuum only by pumping with six 2000 litres/second pumps. Therefore, due to the risks related to maintaining and to guard against sudden and embarrassing failure, a new Tank IV will need to be designed and built.

To further reduce the risks to acceptable levels, an upgrade of the ISIS LINAC is planned using a controlled approach. This will entail testing the newly manufactured tank in a pre-determined test area by running at full RF power. Once the tank has passed all its testing it will then replace the current one in ISIS LINAC.

Summary of Requirement

Note: Bidders should read all the procurement documentation including all attached drawings to fully familiarise themselves with the requirement.

A new ISIS Linear accelerator (LINAC) vessel is required to replace the current aged one. Tank IV is the last section of the ISIS normal conducting drift tube linear accelerator. It operates whilst under vacuum. All components will be cleaned and conform to ISIS vacuum specification. The 12m long tank will consist of six 2m long by 1m diameter vessels bolted together.

The new tank will be a direct replacement, as the frequency is dictated by the ISIS machine. For ease of maintenance and safe radiation working levels side hatches will be added to aid drift tube replacement, should the need arise in the future.

The main requirements are:

- The Tank needs to be a direct dimensional copy of the existing tank for the physics to operate correctly.
- The Tank needs to hold a vacuum at pressures of 1×10^{-7} mbar, with an acceptable leak rate of 1×10^{-8} mbar/s.
- A method of aligning the tanks is important, so a rail alignment system will be used.
- The tank will need to be cooled to 1 deg delta T and will operate at max gauge pressure of

3.85 Bar.

- The tank will need surface treatment after manufacture using high conductivity oxygen free copper plating.
- Delivery is required within 12 months of Contract placement
- Bidders must be able to demonstrate evidence of experience of manufacturing ultra-high vacuum vessels of a similar scale to this requirement to demonstrate (a) capability to manufacture to ISIS/TS/N5/05 or equivalent standards and (b) capability to manufacture vessel to 12m length

Full and specific details of all the requirements can be found in the Questionnaires, in the provided attachment(s) and on the Emptoris e-sourcing platform.

Award Scoring criteria

Evaluation Justification Statement

In consideration of this particular requirement UK SBS has decided to evaluate Potential Providers by adopting the weightings/scoring mechanism detailed within this RFP. UK SBS considers these weightings to be in line with existing best practice for a requirement of this type.

Questionnaire	Q No.	Question subject	Maximum Marks
Price	AW5.2	Price(including inspection visits)	25%
Quality	AW6.2	Proposed method of manufacture	35%
Quality	AW6.4	Quality assurance systems and procedures	5%
Quality	AW6.5	Project Plan	10%
Quality	AW6.6	Safe delivery of completed vessel	5%
Quality	AW6.7	Delivery Date	20%

Award Evaluation of criteria

Non-Price elements

Each question will be judged on a score from 0 to 100, which shall be subjected to a multiplier to reflect the percentage of the evaluation criteria allocated to that question.

Where an evaluation criterion is worth 20% then the 0-100 score achieved will be multiplied by 20.

Example if a Bidder scores 60 from the available 100 points this will equate to 12% by using the following calculation: Score/Total Points available multiplied by 20 ($60/100 \times 20 = 12$)

Where an evaluation criterion is worth 10% then the 0-100 score achieved will be multiplied by 10.

Example if a Bidder scores 60 from the available 100 points this will equate to 6% by using the following calculation: Score/Total Points available multiplied by 10 ($60/100 \times 10 = 6$)

The same logic will be applied to groups of questions which equate to a single evaluation criterion.

The 0-100 score shall be based on (unless otherwise stated within the question):

The Question is not answered or the response is completely unacceptable.	0
Extremely poor response – only partially answers the requirement, with major deficiencies and little relevant detail proposed.	10 or 20
Poor response with deficiencies apparent. Response falls short of requirements. Low probability of success, some weaknesses, but correctable.	30 or 40
Response is acceptable but remains basic and could have been expanded upon. Response is sufficient but does not inspire.	50 or 60
Good probability of success, weaknesses can be readily corrected.	70 or 80
Response demonstrates they can meet a high performance level. High probability of success, no significant weaknesses noted. The response is compelling in its description of techniques and resources to be employed.	90 or 100

Where a scoring definition has two associated scores, e.g. 50 or 60, then scores will be allocated to reflect whether the bidder's response was identified at the bottom or top half of the scoring definition.

All questions will be scored based on the above mechanism. Evaluators will review and score bids individually before moderation to reach a consensus score. In the event that there is not a common consensus, individual scores will be averaged (mean) to determine your final score as follows:

Example

Evaluator 1 scored your bid as 60

Evaluator 2 scored your bid as 40

Evaluator 3 scored your bid as 60

Evaluator 4 scored your bid as 60

Your final score will $(60+40+60+60) \div 4 = 55$

Price elements will be judged on the following criteria.

The lowest price for a response which meets the pass criteria shall score 100.

All other bids shall be scored on a pro rata basis in relation to the lowest price. The score is then subject to a multiplier to reflect the percentage value of the price criterion.

For example - Bid 1 £100,000 scores 100.

Bid 2 £120,000 differential of £20,000 or 20% remove 20% from price scores 80

Bid 3 £150,000 differential £50,000 remove 50% from price scores 50.

Bid 4 £175,000 differential £75,000 remove 75% from price scores 25.

Bid 5 £200,000 differential £100,000 remove 100% from price scores 0.

Bid 6 £300,000 differential £200,000 remove 100% from price scores 0.

Where the scoring criterion is worth 50% then the 0-100 score achieved will be multiplied by 50

In the example if a supplier scores 80 from the available 100 points this will equate to 40% by using the following calculation: Score/Total Points multiplied by 50 $(80/100 \times 50 = 40)$

The lowest score possible is 0 even if the price submitted is more than 100% greater than the lowest price.

5.5. Evaluation process

- 7.3.5 All Central Government Departments and their Executive Agencies and Non Departmental Public Bodies are subject to control and reporting within Government. For these purposes, UK SBS may disclose within Government any of the Bidders documentation/information (including any that the Bidder considers to be confidential and/or commercially sensitive such as specific bid information) submitted by the Bidder to UK SBS during this Procurement. All Bidders are encouraged to make themselves aware of the changes and identify any potential impacts in their Bid, as the protective marking and applicable protection of any material passed to, or generated by, you during the procurement process or pursuant to any Contract awarded to you as a result of this tender process will be subject to the new GSC from 2nd April 2014. The link below to the Gov.uk website provides information on the new GSC: <https://www.gov.uk/government/publications/government-security-classifications>

Bidders should note, however, that, even where information is identified as commercially sensitive, UK SBS may be required to disclose such information in accordance with the FoIA or the Environmental Information Regulations. In particular, UK SBS is required to form an independent judgment concerning whether the information is exempt from disclosure under the FoIA or the EIR and whether the public interest favours disclosure or not. Accordingly, UK SBS cannot guarantee that any information marked 'confidential' or "commercially sensitive" will not be disclosed.
- 7.4.4 Where a Bidder receives a request for information under the FoIA or the EIR during the procurement, this should be immediately passed on to UK SBS and the Bidder should not attempt to answer the request without first consulting with UK SBS.
- 7.4.5 Bidders are reminded that the Government's transparency agenda requires that sourcing documents, including RFP templates such as this, are published on a designated, publicly searchable web site, and, that the same applies to other sourcing documents issued by UK SBS, and any contract entered into by UK SBS with its preferred supplier once the procurement is complete.
