Z12.0	Packaging
Z12.1	For contracts containing packages of projects the <i>Client's</i> Contract Data, Scope and Site Information particular to an individual project is contained within its Site Specific Pack
Z110	Inflation
	At the Contract Date the total of the Prices does not include a sum to cover inflation.
	The total of the Prices [at the Contract Date] shall be adjusted by a fixed number of Price Adjustments.
	The number of Price Adjustments shall be equal to:
	The number of months between the Completion Date included at the starting date and the Contract Date.
	The proportion of Price Adjustment shall be equal to:
	The total of the Prices at the Contract Date / The number of Price Adjustments
	Each time the amount due is assessed, the Price Adjustment shall be:
	The proportion of Price Adjustment x [80% x Construction Output Price Indices (OPIs) New work output prices: Infrastructure Index 1 – month rate]
	The Construction Output Price Indices (OPIs) New work output prices: Infrastructure Index 1 – month rate shall be the value determined by the Office of National Statistics for the applicable month of the amount due assessment
	Provided always that the fixed number of Price Adjustments has NOT been exceeded.
	The Price Adjustment adjusts the total of the Prices.
	If a compensation event under this contract omits original Scope covered by the total of the Prices at the Contract Date the Price Adjustments made under this clause shall be corrected accordingly.

## **Price List**

Entries in the first four columns in this Price List are made either by the Client or the tenderer.

If the *Contractor* is to be paid an amount for the item which is not adjusted if the quantity of work in the item changes, the tenderer enters the amount in the Price Column only: the Unit, Quantity and rate columns being left blank.

If the *Contractor* is to be paid an amount for the item of work which is the rate for the work multiplied by the quantity completed, the tenderer enters the rate which is then multiplied by the expected quantity to produce the Price, which is also entered.

Item Number	Description	Unit	Quantity	Rate	Price
	Codford

The method and rules used to compile the Price List are

Civil Engineering Standard Method of Measurement 4<sup>th</sup> edition (CESMM4) as per the Framework Price Workbook.

## Scope

#### 1. Description of the works

#### As defined in the Site-Specific Packs:

Small Works Package Wessex H&T - Fosseway Design and Build

Small Works Package Wessex H&T - Codford Design and Build

Small Works Package Wessex H&T - Sydling St Nicholas Design and Build

#### 1.1 Project background

- 1.1.1 The Wessex H&T Capital Programme has three hut replacement projects in 24/25 at Fosseway, Codford and Sydling St Nicholas existing flow stations (respectively ST 8913 8702, ST 9708 4005, SY 6324 9964). The three telemetry huts are showing signs of deterioration and are no longer fit for purpose. It requires removal and replacement.
- 1.1.2 The Fosseway gauging station hut is located to the West of Malmesbury on the river Avon and was built in the 1960s on privately owned land with no existing agreement or lease in place. The Codford gauging station hut is located West of Chitterne Road at Codford. The gauging station is on privately owned land without a known agreement in place. The Sydling St Nicholas hut, located on the Sydling water, is red carded and a new stilling well is to be built on the right bank (opposite bank from the current hut). No ownership was

Doc No 249 18 SD15

identified for the new location. The huts provide level/flow data serving both Flood Risk Coastal Management & Water Resources departments.

1.1.3 This project's primary objective is to replace the existing huts at Fosseway and Codford urgently. In their current state, these huts pose significant health and safety risks for our operatives. The huts will be removed and replaced with new ones. The hut at Sydling St Nicholas is also presenting risks for the H&S. While we are not planning to remove the hut at the existing location, a new stilling well is to be installed on the opposite riverbank.

The secondary objective of this Project is to provide a detailed design to repair the existing weir and refurbish the fence at Fosseway. The weir repair will be done as part of a separate Project (detailed design only to be provided as part of this Contract) to avoid Programme constraints. Fences will be added to the Codford and Sydling St Nicholas sites to enhance the operators' safety further.

1.1.4 The Contractor is responsible for carrying out detailed design and build to deliver the preferred option to the Client.

#### 1.2 Description of the works

#### 1.2.1 The works are:

- 1.2.1.1 Design and build of new kiosks at Fosseway and Codford. Required excavation and ducting to existing Power Pole to allow power connection to the new kiosk at Codford.
- 1.2.1.2 Design and build of new stilling well at Sydling St Nicholas.
- 1.2.1.3 Design of weir repair at Fosseway.
- 1.2.1.4 Contractor to provide pre-construction/supporting documentations (non-exhaustive list): PCI, CPP, RAMS (heritage toolbox talk to be attached), CEMP, H&S file, traffic management plans, GPR, topo, FRAP.
- 1.2.1.5 Vegetation clearance ahead of accessing the site and compound location (where necessary).
- 1.2.1.6 Site mobilisation and set up compound.
- 1.2.1.7 CAT scan area and identify services.
- 1.2.1.8 Set up temporary works fall from height risk into channel.
- 1.2.1.9 Demolish and removal of existing telemetry hut and section of post and rail fencing (Fosseway and Codford only). Materials to be removed off site for disposal with relevant waste management plan, materials to be recycled where possible.
- 1.2.1.10 Construction of new telemetry hut (re-using existing concrete base where possible) and pouring addition slab where necessary (Fosseway and Codford only)
- 1.2.1.11 Construction of new stilling well in the opposite riverbank (Sydling St Nicholas only).
- 1.2.1.12 Reinstate/install fences and install new gate latch to prevent public access.
- 1.2.1.13 Remove temporary works and demobilise from site.
- 1.2.2 The Contractor shall maintain the works from Completion until the rectification dates.

#### 1.3 Site Progress Meetings

Frequency: weekly meetings through the awarded programme.

Chairperson (who will also take and distribute minutes): Client's Project Manager

#### 1.4 Access to the Site

1.4.1 Prior to first entry to the site to undertake physical works, the Contractor shall record the condition of the site and accesses to the site through photographs and videos. These are submitted to the Client for record keeping. The Contractor shall leave the site and accesses to the site in as good a condition as prior to first entry.

#### 1.5 Site Restrictions

- 1.5.1 Archaeological contractor monitoring and recording groundworks required at Sydling St Nicholas.
- 1.5.2 Any in channel work must be outside of the Salmonid spawning period (1st Nov to 30th April inclusive).
- 1.5.3 Ecological Clerk of Works (EcOW) required for work done from February to October.
- 1.5.4 The storage of materials/waste will undertake on areas of hard standing or bare ground and should be raised on pallets.
- 1.5.5 Have a mobile bat box and gloves on site during the works at Fosseway and Codford.

#### 1.6 Completion

Prior to Completion the Contractor shall arrange a joint inspection with the Client. The initial inspection shall take place a minimum of one week in advance of the Completion. Completion is achieved and certified only when the works have reached a stage of completion where the site is judged to be acceptable for handover and suitable and safe for its intended use. The Client is responsible for making their initial judgement following the joint inspection.

The following criteria must be met for the works to be certified as Complete:

- The Contractor shall be responsible for ensuring the design is acceptable to the Client, gaining formal approval.
- The Contractor shall undertake the mitigation actions outlined in the Environmental Action Plan (EAP).
- All excavation, earthworks, and topsoiling work must be fully complete, and all construction plant, and machinery must be removed from site.
- All site perimeter fencing, temporary works, materials storage and waste must be removed from site.
- All public open spaces must be safe for use by the public with no remaining hazards associated with construction operations.

The following are absolute requirements for Completion to be certified, without these items the Client is unable to use the works:

- Provision of all information required by the Principal Designer for the Health & Safety File including but not limited to:
  - o As-built drawings if there have been any changes to design.
  - Maintenance plans.
- A completion certificate will be issued on a project basis prior to the Client taking over the Site.
- The whole of the Works has been completed in accordance with the Scope.
- There are no Defects that prevent safe access and operation by the Client. There are no Defects that present a health and safety hazard to the public or landowners.

#### 2. Drawings

List the drawings that apply to the contract.

Drawing Number	Revision	Title
N/A	1	Site Specific Pack Information – further detail of the works required

#### 3. Specifications

List the specifications which apply to the contract.

Title	Date or Revision	Tick if publicly available
SHEW CoP	V6	yes
Asset OMR Framework Deed of Agreement and Schedules	04/03/2024	yes

#### 4. Constraints on how the Contractor Provides the Works

As defined in the Site-specific Packs.

In accordance with Clause 14.5 of the contract, all of the Client's actions under the contract are delegated to Florelle Cloarec. The Contractor shall only act upon instructions received from the Client's delegate.

All communications from the Contractor to the Client shall be sent to Florelle Cloarec.

The Contractor shall not commence any work on the site until the Client, or their representative, has accepted the Construction Phase Plan, including method statements and risk assessments ahead of each project in this contract. Acceptance will be by way of a written communication from the Client confirming the Contractor may take possession of the site from the agreed starting date.

The Client has the contractual right to access the working area as shown on the drawings. The Contractor shall be required to determine the suitability of the access and agree any alternative routes with the landowner should the identified routes be unsuitable.

The Contractor must allow a minimum of 2 weeks to allow the Principal Designer to review construction phase plans.

In order to assess the extent of work, the Contractor shall visit each site when pricing the work. The Contractor shall inform the Client of the time and date of each site visit before going to site.

The Client has the contractual right to access the working area as shown on the drawings. The Contractor shall be required to determine the suitability of the access and agree any alternative routes with the landowner should the identified routes be unsuitable.

Details of the routes must be included within the method statements. Access conditions may deteriorate following wet weather and the Contractor should assume the worst conditions when preparing his quotation.

Works will require the Contractor to obtain a Flood Risk Activity Permit from the Environment Agency where required. The Contractor shall be responsible for obtaining the necessary Environmental Permits for Flood Risk Activities (if applicable). The Contractor shall ensure the permits are received a minimum of two (2) weeks prior to commencement of works. The Contractor shall be responsible for all costs associated with permit applications. The Client has, were possible, started the application process which will need to be transferred to the Contractor and finalised. Please be aware the Permitting process can take eight (8) weeks from receipt of payment, need for permits to be discussed with Client's Project Manager prior to applying for permits.

The Contractor will need to work with the Client to ensure that data continuity continues during the new kiosk construction and the old hut removal.

Doc No 249 18 SD15 Version 7 Last printed 20/08/24 Page 17 of 20

The Contractor shall take all reasonable steps to avoid damage and disruption to the surrounding land, to the designated sites and associated access routes. Such land may be privately owned, commercially managed for industrial, agricultural use, or part of the local social amenities etc. Any problems with access should be reported directly to the Client.

Land access at Sydling St Nicholas is by foot only.

Where the Contractor requires access to any occupied premises, or third-party land the Contractor shall consult with the Client's estates Team to secure access.

The Contractor shall ensure that any service diversions and protection measures required during the works have been arranged and agreed with the relevant Statutory Authority.

All accidents, near misses, dangerous occurrences and environmental incidents shall be notified to the Client, or their representative.

The Client requires twenty-four (24) hour / seven (7) days per week emergency contacts from the Contractor including the provision of out of hour's response if required due to theft, fire, flood and vandalism. It is expected that any emergency procedures are carried out by a competent employee of the Contractor.

The Contractor shall be responsible for arranging all rights of way, road, car park and footpath closures, diversions and related work.

Any connection to third party assets required as part of the scheme shall be completed through liaison with the Client's Estates team, which may include the Client using their statutory powers under the Water Resources Act 1991.

#### Working times

The Contractor will be permitted to work between 7.30am and 6.00pm on weekdays (Monday to Friday)

#### 5. Requirements for the programme

The *Contractor* submits his programme with the *Contractor*'s Offer for acceptance. The *Contractor* shows on each programme which they submits for acceptance (in form of Gantt chart showing the critical path, proposed order and timing to undertake the works and proposed plant and labour resources) the following:

- (a) Period required for mobilisation/ planning & post contract award
- (b) starting date
- (c) Each of the activities listed within the Price List
- (d) Any key third party interfaces: lead in periods for materials and sub-contractors; time required to obtain consents/waste permits; stated constraints; Contractor's risks.
- (e) Completion date

#### 6. Services and other things provided by the Client

Item	Date by which it will be provided
Access to Site through EA Estates	To be confirmed post award.

Ecological Clerk of Works	As programme
Archaeologist	As programme

### Site Information

#### The site

1) Description: Fosseway, Brokenborough, Foxley, Wiltshire, SN16 0RD

Location: ST 8913 8702

Refer to in the defined Site-specific Pack: Small Works Package Wessex H&T - Fosseway Design and Build

2) Description: Codford, Chitterne Rd, Warminster BA12 0PR

Location: ST 9708 4005

Refer to in the defined Site-specific Pack: Small Works Package Wessex H&T - Codford Design and Build

3) Description: Sydling St Nicholas, Dorchester, Dorset, DT2 9PD

Location: SY 6324 9964

Refer to in the defined Site-specific Pack: Small Works Package Wessex H&T - Sydling St Nicholas Design

and Build

#### **Existing utilities and services**

Drawings: See enclosed utility searches

Other information: N/A

#### Health and safety file

Issue details: To be confirmed if available.

#### Access to site

Description: An indicative site access plan is included in the site-specific pack. To be agreed collaboratively ahead of the work on-site.

Limitations: vehicle loads limitation at Fosseway due to Heritage concerns. To be further discussed ahead of the work on-site.

Access for inspections: to be agreed collaboratively ahead of the work on-site.

#### Use of the site

General: The river Avon at Fosseway and the Chitterne Brook at Codford are a flow measuring structures operated and maintained by the Environment Agency. The assets are privately owned by the landowner.

The Sydling water at Sydling St Nicholas is also used for flow measuring. The new asset will be located on an unregistered land.

Limitations: Landowners require notification from EA Estates prior to being on site (Fosseway & Codford).

The welfare and compound area to be positioned over a mat at Fosseway to not disturb the ground.

#### Surrounding land / building uses

General: Adjacent and nearby uses are as follows: an open field at Fosseway and Codford (Farmlands).

A residential site on both sides at Sydling St Nicholas.

Doc No 249 18 SD15 Version 7 Last printed 20/08/24 Page 19 of 20

#### Health and safety hazards

General: The nature and condition of the site/ building cannot be fully and certainly ascertained before it is opened up. However, the following hazards are or may be present:

- Boggy ground at Fosseway in winter.
- Access to the works is restricted by HV overhead cables.

Information: The accuracy and sufficiency of this information is not guaranteed. Ascertain if any additional information is required to ensure the safety of all persons and the *works*.

Site staff: Draw to the attention of all personnel working on the site the nature of any possible contamination and the need to take appropriate precautionary measures.
