

UPDATED DOCUMENT 04.08.22 - Number of System users

There has been some confusion over previous System user figures submitted so we have revised to help clarify.

Please refer to the below figures for our current system usage to base your pricing model on.

- 75 Read/write users accessing the system
- Of those 75 currently 41 access the risk **and** performance system
- The remaining 34 access **only** the performance system
- There will be some read only users

Community Housing would like you to price on the above model but would also like information and costing on adding additional users in future, the below is an example.
